Attractive User Interface

The screenshot displays the Sofaculous WordPress Management dashboard. On the left is a dark sidebar with navigation items: Websites List, Add Website, Servers, Hosting Accounts, Install WordPress, WordPress Sandbox, Plugins/Themes Sets, Manage Posts, Plans, Billing, and More Apps. The main content area features a top navigation bar with icons and a welcome message for 'sales@softaculous.com'. A green notification banner at the top suggests connecting an existing WordPress site. Below this is the 'WordPress Management' header with buttons for 'Install', 'Remote Import', 'Manage Sets', 'Security Measures', 'Add Website', and 'Manage Post'. The 'Installations' section shows a card for 'https://mywordpress.com' with 'My Blog' as the site name. The card includes a 'Site Info' preview, a 'Configuration' panel with settings for Version (6.5.3, Up to date), Auto Upgrade (WordPress Plugins and Themes), Search Engine Visibility, WordPress Cron, and Debug Mode. At the bottom of the card are buttons for 'Security Measures', 'Create Template', 'Clone', 'Staging', 'Backup', 'Restore', 'Remove', and 'Uninstall'. The footer indicates the time is June 6, 2024, 5:19 pm, and the interface is powered by Sofaculous 6.0.4 © 2024 Electron Technologies FZC.

Updated with New Features Regularly

With every new version released Softaculous innovates and integrates new features. These features are designed to make the workflow for the Users and the Web Hosts perform efficiently and with ease. These features also automate most of the tedious processes. These updates also contain patches, Bug Fixes and Security releases along with them. Softaculous updates have the flexibility of getting updated automatically via the CRON or the Softaculous Admin can manually Update it.
