

3D Swym

3DSwymer connects users with apps and services, establishing social communities to share and innovate. It validates concepts and gathers feedback, helping to develop better decisions using cross-business data. It also enhances productivity by simplifying data sharing and project management.

- Get to market faster
- Develop better decisions
- Gather and evaluate
- Improve productivity

Gain exclusive access to a preview of your project at any time!

- Access to all CAD data

3DEXPERIENCE®

The 3DPlay app on the 3DEXPERIENCE platform is a file viewer that allows users to view multiple file types, apply various scenarios and tools, and access it through a browser without installation only using CADPRODUCT credentials.

It is possible to choose several modes of operation of the platform

Try the 3Dexperience platform for FREE by clicking the link.

Click the objects to hide. Use the context toolbar to show all objects, toggle between hidden and visible objects, and isolate objects.

Show all / Swap visibility / Isolate

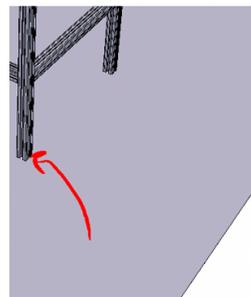

Explodes assembly and sub-assemblies to reveal their inner parts.

Drag the slider or use the arrows to control the explode amplitude

Measures objects or the distance between objects.

Click two points on the model to measure the distance between them.

Explode

Measure

Annotation Commands

Displays to the right of the work area a context toolbar that gives access to annotation commands (exit, draw, erase, annotation color).

Text annotation

Create a text box
