Graduate Catalog

Nature of Announcements

Volume 83, No. 1

Catalog Issue 2024-2025

Announcements 2025-2026

Announcements contained in this publication are subject to change without notice and may not be regarded in the nature of binding obligations to the University. The University reserves the right to change any provisions or requirements. Only the Provost or designee can approve changes to the Catalog except where otherwise stated within.

When students matriculate with Old Dominion University, they come under the academic requirements of the edition of the Catalog at that time. Students may graduate under these academic requirements within a period of eight years even though subsequent Catalogs may change. Academic requirements include competency requirements, grade point average requirements, and degree program requirements. Grading practices, tuition, fees and other matters are not considered to be “academic requirements” and are subject to change at the discretion of the University.

Should new changes be to their advantage, graduate students must have permission of the graduate program and dean to select a newer catalog. However, because academic programs are subject to requirements imposed by outside accrediting or certifying agencies, the Commonwealth of Virginia, and the United States of America, such outside requirements take precedence.

It is the policy of Old Dominion University to provide equal employment, educational and social opportunities for all persons, without regard to race, color, religion, sex (including pregnancy), national origin, age, veteran status, disability, political affiliation, sexual orientation or genetic information. Old Dominion University complies with the Family Rights and Privacy Act of 1974 (as amended).

The University is an Affirmative Action Equal Opportunity employer.

Student Responsibility for Catalog Information

Students are held individually responsible for the information contained in the Undergraduate and Graduate Catalogs. Failure to read and comply with University regulations will not exempt students from whatever penalties they may incur.

Table of Contents

Old Dominion University	9	Maritime History Certificate	87
Academic Calendar	14	Institute for the Humanities	88
Graduate Admission	17	Humanities (MA)	88
Tuition, Fees, and Financial Information	20	F. Ludwig Diehn School of Music	89
Graduate Financial Aid	23	Music Education with a Concentration in Applied Studies (MME)	89
Financial Awards for Graduate Students	36	Music Education with a Concentration in Pedagogy (MME)	90
Policies	40	Music Education with a Concentration in Research (MME)	91
University Policies & Procedures	40	Music Performance Certificate	91
Graduate Policies & Procedures	42	Department of Political Science and Geography	92
Graduate Registration Requirements and Procedures	47	International Studies (MA)	93
Linked Programs	55	International Studies (PhD)	95
University Requirements for Graduate Degrees & Certificates	57	Geographic Information Science Certificate	98
Graduate Student Resources	64	International Development Certificate	99
Academic Resources	64	Modeling and Simulation - International Studies Certificate	99
Research Resources	65	Spatial Analysis of Coastal Environments Certificate	99
Campus Services	67	Department of Sociology and Criminal Justice	100
College of Arts & Letters	68	Applied Sociology (MA)	100
Department of Communication & Theatre Arts	69	Criminology and Criminal Justice (PhD)	100
Lifespan and Digital Communication (MA)	69	Department of Women's and Gender Studies	101
Department of English	70	Women's Studies Certificate	101
Applied Linguistics (MA)	70	Strome College of Business	103
Applied Linguistics with a Concentration in Language, Society, and Social Justice (MA)	71	Strome College of Business - Dean's Office Programs	104
Applied Linguistics with a Concentration in Teaching of English to Speakers of Other Languages (TESOL) (MA)	72	Business Administration (MBA)	104
Creative Writing with a Concentration in Fiction (MFA)	73	Business Administration with a Concentration in Finance (PhD)	105
Creative Writing with a Concentration in Non-Fiction (MFA)	74	Business Administration with a Concentration in Information Technology/Supply Chain Management (PhD)	107
Creative Writing with a Concentration in Poetry (MFA)	75	Business Administration with a Concentration in Marketing (PhD)	109
English with a Concentration in Literature (MA)	76	Business Administration with a Concentration in Strategic Management (PhD)	111
English with a Concentration in Rhetoric and Composition (MA)	78	School of Accountancy	113
English with a Concentration in Teaching of English (MA)	79	Accounting with a Concentration in Financial Management (MS)	113
English with a Concentration in Technical Writing (MA)	80	Accounting with a Concentration in Taxation (MS)	114
English (PhD)	81	Department of Economics	115
Literature Certificate	85	Economics (MA)	115
Professional Writing Certificate	85	Department of Information Technology and Decision Sciences	117
Teaching English to Speakers of other Languages (TESOL) Certificate	85	Business Analytics and Big Data Certificate	117
Teaching of Writing Certificate	85	School of Public Service	117
Department of History	86	Master of Public Administration (MPA)	117
History (MA)	86	Public Administration with a Concentration in Multi-Sector Public Service (MPA)	119
		Public Administration with a Concentration in Nonprofit Management and Governance (MPA)	121

Public Administration and Policy (PhD)	123	Education with a Concentration in Educational Leadership (PhD)	152
Public Administration and Policy Certificate	127	Educational Leadership with a Concentration in Higher Education (MSEd)	153
Public Procurement and Contract Management Certificate	127	Educational Leadership with a Concentration in Higher Education (EdS)	155
School of Cybersecurity	128	Education with a Concentration in Higher Education (PhD)	157
Cybersecurity (MS)	128	Educational Leadership with a Concentration in Occupational and Technical Studies (EdS)	158
Cybersecurity with a Concentration in AI for Cybersecurity (MS)	129	Education with a Concentration in Workforce and Organizational Development (PhD)	159
Cybersecurity with a Concentration in AI Security (MS)	131	Marketing Education Post-Baccalaureate Endorsement	160
Cybersecurity with a Concentration in Cyber Conflict and Cyber Crime (MS)	132	Technology Education Post-Baccalaureate Endorsement	160
Cybersecurity with a Concentration in Cybersecurity Risk Management (MS)	134	Department of Human Movement Studies and Special Education	161
Artificial Intelligence (AI) in Cyber Defense Certificate	135	Education with a Concentration in Human Movement Sciences - Applied Kinesiology (PhD)	161
Cybersecurity Risk Management Certificate	135	Education with a Concentration in Human Movement Sciences - Health and Sport Pedagogy (PhD)	163
Trustworthy Artificial Intelligence Certificate	136	Education with a Concentration in Human Movement Sciences - Sport and Recreation Management (PhD)	164
School of Data Science	137	Physical Education with a Concentration in Adapted Physical Education (MSEd)	165
Data Science and Analytics with a Concentration in Artificial Intelligence and Machine Learning (MS)	137	Physical Education with a Concentration in Coaching (MSEd)	166
Data Science and Analytics with a Concentration in Business Intelligence and Analytics (MS)	137	Physical Education with a Concentration in Curriculum & Instruction (MSEd)	167
Data Science and Analytics with a Concentration in Engineering and Big Data Analysis (MS)	138	Physical Education with a Concentration in Initial Virginia Licensure in Health and Physical Education (MSEd)	168
Data Science and Analytics with a Concentration in Full Stack (MS)	139	Special Education with a Concentration in Early Childhood Special Education (MSEd)	169
Data Science and Analytics with a Concentration in Geospatial Analytics (MS)	139	Special Education with a Concentration in K-12 Licensure - Adapted Curriculum - K-12 (MSEd)	171
Data Science and Analytics with a Concentration in Physics (MS)	140	Special Education with a Concentration in K-12 Licensure - General Curriculum - K-12 (MSEd)	173
Artificial Intelligence (AI) in Data Science Certificate	140	Education with a Concentration in Special Education (PhD)	174
Artificial Intelligence (AI) in Healthcare Certificate	141	Sport Management (MS)	176
Darden College of Education and Professional Studies	142	Applied Behavior Analysis Certificate	177
Department of Counseling and Human Services	143	Adapted Physical Education Certificate	177
Counseling with a Concentration in Clinical Mental Health Counseling (MSEd)	144	Autism Certificate	178
Counseling with a Concentration in School Counseling (MSEd)	145	Early Childhood Special Education Post-Baccalaureate Endorsement	178
Counseling (EdS)	146	Special Education Adapted Curriculum, K-12 Post-Baccalaureate Endorsement	179
Education with a Concentration in Counseling (PhD)	146	Special Education General Curriculum, K-12 Post-Baccalaureate Endorsement	180
Advanced Counseling Practice Certificate	147	Special Education - Visual Impairments, PreK-12 Post-Baccalaureate Endorsement	181
Educational Leadership and Workforce Development	147	Teacher Preparation in Special Education Adapted Curriculum Post-Baccalaureate Endorsement	183
Community College Leadership (PhD)	148	Department of STEM Education & Professional Studies	183
Community College Leadership Certificate	149		
Educational Leadership with a Concentration in Administration and Supervision (K-12 Licensure) (MSEd)	150		
Educational Leadership with a Concentration in Administration and Supervision - Licensure (EdS)	151		
Educational Leadership with a Concentration in Administration and Supervision (Non-Licensure) (EdS)	152		

Education with a Concentration in Educational Psychology and Program Evaluation (PhD)	184	Teacher Leadership Certificate	213
Education with a Concentration in Instructional Design and Technology (PhD)	185	Teaching English to Speakers of other Languages (TESOL) Certificate	213
Elementary Education with a Concentration in Instructional Design and Technology (MSEd)	187	Early Childhood Education, PreK-3 Post-Baccalaureate Endorsement	213
Library and Information Studies (MLIS)	188	Elementary Education (PreK-6) Post-Baccalaureate Endorsement	214
Library and Information Studies with a Concentration in School Librarianship (MLIS)	189	Mathematics Specialist (PK-8) Post-Baccalaureate Endorsement	215
Occupational and Technical Studies (MS)	191	Secondary Education, 6-12 Post-Baccalaureate Endorsement	216
Secondary Education with a Concentration in Instructional Design and Technology (MSEd)	191	Elementary Education, Middle School (Grades 6-8) Post-Baccalaureate Endorsement	217
Human Performance Technology Certificate	192	Secondary Education, Teachers of English to Speakers of Other Languages (TESOL), K-12 Post-Baccalaureate Endorsement	218
Online Teaching for K-12 Teachers Certificate	192	Teacher Education Post-Baccalaureate Endorsement	219
School Library Practice Certificate	192	Teacher Education	221
Industrial Cooperative Training Post-Baccalaureate Endorsement	193	Teacher Education Post-Baccalaureate Endorsement	222
Teacher Education Post-Baccalaureate Endorsement	193	Frank Batten College of Engineering and Technology	224
Department of Teaching & Learning	195	Batten College of Engineering Dean's Office Programs	226
Early Childhood Education with a Concentration in Initial Licensure - Pre-K-3 (MSEd)	196	Advanced Engineering with a Concentration in Biomedical Engineering Certificate	227
Education with a Concentration in Curriculum and Instruction (PhD)	197	Advanced Engineering with a Concentration in Cyber Systems Security Certificate	227
Elementary Education with a Concentration in Elementary Education Pre-K-6 (MSEd)	198	Advanced Engineering with a Concentration in Energy Systems Certificate	228
Elementary Education with a Concentration in Elementary Education Pre-K-6 - IDS (Initial Licensure) (MSEd)	200	Coastal Engineering Certificate	228
Elementary Education with a Concentration in Licensed Teachers (MSEd)	201	Engineering Management Certificate	228
Elementary Education with a Concentration in Mathematics Specialist PK-8 (MSEd)	202	Entrepreneurship and Innovation for Engineers Certificate	229
Elementary Education with a Concentration in Middle School Education (Grades 6-8) (MSEd)	203	Mission Analysis and Engineering Certificate	229

Old Dominion University

The Mission of the University

Mission

Old Dominion University (ODU) is a preeminent public research university located in Coastal Virginia. Our world-class faculty fosters dynamic on-campus and global online learning for undergraduate and graduate students that enriches their lives, promotes insightful and perceptive leadership, and motivates the pursuit of excellence in dedicated fields and professions. We collaborate with strategic partners to address challenges and propose solutions that impact the economy, environment, health and wellness, and social justice. In pursuit of equity and inclusion, ODU provides opportunities for educational, artistic, and professional growth to our diverse Monarch community.

Background

Old Dominion University is located in Hampton Roads, one of the world's major seaports. Since the early seventeenth century, Hampton Roads has been the state's gateway to the rest of the world and the world's gateway to Virginia in commerce and industry, in recreation and culture, and in national security. Now a complex of seven major cities, it is a microcosm of the opportunities and challenges of contemporary urban America. It is also a major center for research and development and a home for extensive scientific and technological activities in marine science, aerospace, ship design and construction, advanced electronics, and nuclear physics.

The University takes its unique character from Hampton Roads as it provides leadership to the state and nation in teaching, research, and service. Thus the University has a special mission for the Commonwealth in commerce, and in international affairs and cultures. It has a significant commitment in science, engineering and technology, particularly in fields of major importance to the region. As a metropolitan institution, the University places particular emphasis upon urban issues, including education and health care, and upon fine and performing arts.

As one of America's major ports, Hampton Roads is the locus of national and international military commands, and the home of a culturally diverse population. The University therefore has natural strengths in activities having international outreach. Faculty members in such fields as business, economics, international studies, geography and the sciences strive to design curricula, teach courses, and encourage foreign exchanges that enhance the University's role as Virginia's international institution.

The Hampton Roads scientific environment provides special opportunities for science and engineering faculty to emphasize research and graduate programs in such fields as marine science, aerospace, and advanced electronics. Global ocean studies and cooperative research at NASA receive particular attention, as University researchers collaborate with U.S. and foreign engineers and scientists.

Urban issues are addressed by programs in public administration, education, the social sciences, and the health professions. The richness of Hampton Roads' artistic life gives great vitality to the University's programs in the visual arts, music, theater, and dance.

Mission Support

Old Dominion University serves the needs of several internal and external constituents with its resources. These include: current and prospective students seeking undergraduate, graduate, and continuing education programs; business and industry; government agencies at all levels; the military; research organizations; and the community at large regionally statewide, nationally, and internationally. These constituencies are discussed in greater detail in the following paragraphs.

Old Dominion University offers a wide array of undergraduate programs, all of which meet national standards of excellence. Every Old Dominion undergraduate student follows a general education program that is designed to develop the intellectual skills of critical thinking and problem solving and to encompass the breadth of understanding needed for personal growth and achievement and for responsible citizenship. This general education

program places special emphasis upon appreciation of the arts and upon understanding the perspectives of women, minorities, and non-Western cultures. Each undergraduate chooses a major program in the liberal arts or sciences or in a technological or professional field.

Old Dominion University's graduate offerings are focused on society's need for advanced professional education and on specialized programs at the master's and doctoral levels for which the institution is prepared through unusual strength of faculty or special geographic advantages. All graduate programs meet national standards of excellence.

As a national leader in the field of technology-delivered distance learning, the University strives to enhance the quality of the educational experience, wherever education is delivered, by applying emerging technologies. It also supports research to explore the impact of these technologies on the teaching-learning process. By utilizing these technologies and by partnering with institutions of higher education, corporations, and governmental entities, the University is able to provide undergraduate and graduate degree programs to students across time and geographic boundaries.

Because of its commitment to Hampton Roads and its emphasis on creative innovation, Old Dominion University offers life-long learning opportunities through credit and noncredit courses and brings educational services and programs to the people of Hampton Roads at several off-campus centers. The University has a responsibility to serve the many members of the military services and their families. The military forms a unique combination of national and international constituents because they are from other locales in the United States and are looking to become, among other things, internationally capable in an international environment.

As a center of learning, Old Dominion University is committed to the principle of free inquiry. The University faculty of distinguished teacher-scholars seek to pass on the best in academic tradition while establishing themselves at the forefront of discovery and creativity. As partners in the development of the University's future, the faculty enjoy full academic freedom and have a recognized role in the decision-making process of the University. Mindful of present and future needs for a multicultural academic climate, the University deems recruitment and retention of minority and women faculty members and staff to be essential.

The University is committed to providing the highest quality instruction to all of its students. Teaching excellence is encouraged through faculty development programs and appropriate recognition of superior instruction.

The discovery of new knowledge through research and creative endeavor is a central function of Old Dominion University, which values and supports faculty participation in the discovery, synthesis, application and creation of new knowledge and art forms. The institution shall promote and preserve excellence in basic and applied research as a Carnegie Foundation Doctoral Research-Extensive University which is a key production and coordination force in technology development.

The University encourages the involvement of its faculty and staff in community service. The enrichment of the lives of students and residents of Hampton Roads is fostered through University sponsored cultural activities, fine and performing arts events, and intercollegiate athletics. In addition, through applied research, consulting, and other activities, the University plays a prominent role in the development of local business and industry and serves as a resource of government agencies and both public and private educational institutions.

The University seeks in its student body a diversity of age, gender, ethnic, religious, social, and national backgrounds. It actively recruits American minority students along with students from other countries worldwide in such numbers as to have their presence make a discernible impact upon the University's educational processes. Old Dominion recognizes its mandate to serve both the academically gifted and those who have the potential for academic success despite educational, social, or economic disadvantages.

Extracurricular activities and experiences are offered that challenge students to develop a personal system of values, to think and act autonomously, to achieve physical competence, and to establish a sense of their own identity. Other services help students meet educational, personal, and health needs.

Old Dominion University depends on its alumni for advice, leadership, and support. In close collaboration with the University, the Alumni Association provides to former students opportunities to continue their participation in various aspects of university life, to advance their personal and professional development, and to sustain communication and strengthen bonds with their alma mater and fellow alumni.

To evaluate its accomplishments against its goals, a continuing process of systematic assessment is given high priority by the University. Information gained from such efforts is utilized to ensure the highest possible quality for all University programs. The Board of Visitors will conduct a periodic review of the University's mission and major goals in conjunction with representatives of the major University constituencies. The review will ensure that the mission clearly identifies the University's unique role in Virginia's public higher education system and assures that the University is focusing its resources to be the best that it can be in that role to achieve its mission and accomplish the major goals.

Adopted by the Board of Visitors

Major Goals of the University

1. Students

Old Dominion University is a selective admission institution. The University strives to serve those students in the immediate geographical area as well as attract students from the national and international communities. Additionally, the University seeks to attract and serve a culturally and ethnically diverse student body. The University pays particular attention to identifying and admitting students who are academically gifted. As a major metropolitan university, Old Dominion University has a special commitment to serve those students who have been academically, socially, or economically disadvantaged, but who have the potential for academic success.

2. Faculty

Old Dominion University seeks to attract and retain a distinguished faculty of teacher-scholars. Its faculty enjoy academic freedom and have a recognized role in the decision-making process of the University. The University is committed to strengthening its faculty through the recruitment and retention of minorities and women.

3. Academic Programs

Undergraduate Programs

As a comprehensive university, Old Dominion University offers and develops quality liberal arts, science, technology and professional programs. Old Dominion University undergraduate students follow a general education program that emphasizes intellectual skills and the breadth of intercultural understanding necessary for personal growth and achievement and responsible citizenship. All Old Dominion University degree programs meet national standards of excellence.

Graduate Programs

Old Dominion University's graduate offerings are focused on society's need for advanced professional education and on specialized programs at the master's and doctoral levels for which the institution is prepared through unusual strength of faculty or special geographic advantages. In selected graduate programs, the University aspires to international leadership.

Special Emphasis Areas

Because Hampton Roads is a major international maritime and commerce center that is Virginia's window to the nation and world, the University has a special mission for the Commonwealth in commerce, and in international affairs and cultures. With the principal marine and aerospace activities of the Commonwealth concentrated in Hampton Roads, the University has a

significant commitment to science, engineering and technology, specifically in marine science, aerospace and other fields of major importance to the region. Due to its location in a large metropolitan area, Old Dominion University places particular emphasis on urban issues, including education and health care, and on fine and performing arts.

4. Teaching

Old Dominion University is committed to providing the highest quality instruction to all of its students. Teaching excellence is encouraged through faculty development programs and appropriate recognition of superior instruction.

5. Research, Scholarship, and Creativity

Old Dominion University is a center of learning committed to the principle of free inquiry. The University seeks to participate in the acquisition, discovery, synthesis, application, and creation of new knowledge and art forms through research, scholarly endeavor and creative undertakings by faculty and students. In selected areas of research, scholarship and creativity, the University strives for international recognition.

6. Digital Learning

As a national leader in the field of technology-delivered distance learning, Old Dominion University is committed to providing academic programs to a diverse national and international population. The University seeks partnerships and alliances that will facilitate delivering those programs to place-bound students.

7. Life-long Learning

Old Dominion University is committed to the concept of life-long learning, and offers credit and noncredit courses throughout the region. The University seeks to develop off-campus centers to bring educational services and programs to the citizens of the region. Because of the major Armed Forces presence in Hampton Roads, the University is particularly cognizant of its responsibility to serve members of the military services and their families.

8. Community Service

Community service is an important part of the University's mission. Particular importance is attached to the enrichment of the lives of students and residents of Hampton Roads through University cultural activities, fine and performing arts events, and recreational, intramural and intercollegiate athletics. The University acts as a resource to business, industrial, health care and educational organizations, as well as to the agencies of local, state and federal government. The University is committed through applied research, consulting and other activities to playing a major role in advancing the overall development of Hampton Roads.

9. Student Life

The University provides opportunities for student development outside of the classroom. Programs are offered to enhance personal and social growth of individual students, to provide an exciting and stimulating collegiate environment and to enable students to cope with educational, career, and health needs. Students choosing to live in on-campus housing benefit from programs especially designed to promote student educational and personal development.

10. Alumni

Alumni are an important part of the University community. Through outreach programs, participation on advisory committees, and a variety of professional and social activities, the University maintains a close relationship with its alumni and seeks alumni involvement and support for planning and development purposes.

11. Quality

Improvement of the University is a continual process. The foregoing goals provide criteria for the rigorous and regular evaluation of the quality, pertinence and effectiveness of academic and other University programs.

These goals also provide criteria for the assessment of student achievement and the performance of members of the faculty, administration, and staff.

General Statement of Policy

Within the limits of the University's facilities as to numbers that can be accommodated, admission to Old Dominion University is open to all qualified students regardless of race (or traits historically associated with race including hair texture, hair type, and protective styles such as braids, locks, and twists), color, national origin, age, marital status, sex (including pregnancy, childbirth, or related medical conditions), political affiliation, marital status, sexual orientation, gender identity, genetic information, disability, religion, or veteran status; the facilities and services of the University are open to all enrolled students on those same bases, and all policies and standards of the University, including those governing employment, are applied accordingly. Students having concerns of this nature should contact the Office of Institutional Equity and Culture.

Old Dominion University Notice of Non-Discrimination

Old Dominion University does not discriminate in admissions, treatment, employment or access to its programs or activities on the basis of race (or traits historically associated with race including hair texture, hair type, and protective styles such as braids, locks, and twists), color, religion, national or ethnic origin, age, sex (including pregnancy, childbirth, or related medical conditions), political affiliation, marital status, veteran status, family medical and genetic information, sexual orientation, gender identity, gender expression, or disability, as required by The Civil Rights Act of 1964; The Americans with Disabilities Act of 1990, as amended; The Age Discrimination Act of 1975; Title IX of the Education Amendments of 1972; Section 504 of the Rehabilitation Act of 1973; the Virginia Human Rights Act; the Governor's Executive Order Number One (20184); and other state or federal laws and University policies <https://www.odu.edu/about/policiesandprocedures/university/1000/1005> (<https://www.odu.edu/about/policiesandprocedures/university/1000/1005/>) and <https://www.odu.edu/about/policiesandprocedures/university/1000/1008> (<https://www.odu.edu/about/policiesandprocedures/university/1000/1008/>). ODU prohibits sexual and sex-/gender-based misconduct, discrimination, harassment and interpersonal violence, including sexual assault. ODU also prohibits discrimination against employees or applicants because they have inquired about, discussed or disclosed their own pay or the pay of another employee or applicant.

As an affirmative action and equal opportunity employer, ODU promotes the full realization of employment opportunity for all persons, including minorities, women, individuals with disabilities and veterans. ODU bases all employment decisions only on job requirements. These efforts apply to all employment actions, including but not limited to recruitment, selection, hiring, promotion and compensation.

Any member of the ODU community has the right to raise concerns or file a complaint regarding discrimination without fear of retaliation. Any and all inquiries regarding the application of this statement and related policies may be referred to: Kimberly Cain, Director of Equity and EO/AA, Institutional Equity and Culture, Innovation Research Park I, 4111 Monarch Way, Suite 106, Old Dominion University, Norfolk, VA 23529, (757) 683-3141, kcain@odu.edu.

Title IX Nondiscrimination Statement

As part of its commitment to providing an educational environment free from discrimination, Old Dominion University complies with Title IX of the Education Amendments, which prohibits discrimination and harassment based upon sex in an institution's education programs and activities. Title IX prohibits sexual harassment, including sexual violence, of students at Old Dominion University-sponsored activities and programs whether occurring on-campus or off-campus. Title IX also protects employees from sexual harassment and discrimination. Prohibited harassment includes acts of verbal, nonverbal or physical aggression, intimidation or hostility based on sex, even if those acts do not involve conduct of a sexual nature; sex-based harassment by those of the same sex; and discriminatory sex stereotyping. Old Dominion University will take prompt action to investigate and resolve reports of sexual harassment or sexual violence in accordance with Title IX. Old Dominion University's Title IX Coordinator is Kate Couch, Innovation Research Park I, 4111 Monarch Way, Suite 106, Norfolk, VA 23529, akgriffi@odu.edu. Retaliation against any person who initiates an inquiry

or complaint or participates in the investigation of a complaint is prohibited. Such conduct will be further cause for disciplinary action.

Accreditations

Old Dominion University is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, masters, education specialist, and doctoral degrees. Old Dominion University also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of Old Dominion University may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (<https://www.sacscoc.org> (<https://www.sacscoc.org/>)).

Numerous programs of study at the University are accredited by specialized accrediting agencies that are recognized by the Council on Higher Education Accreditation (CHEA), the U.S. Department of Education, and other agencies.

College of Arts and Letters

The F. Ludwig Diehn School of Music is a full member of the National Association of Schools of Music (NASM):

11250 Roger Bacon Drive, Suite 21
Reston, VA 20190-5248
(703) 437-0700 Phone

Strome College of Business

- The undergraduate and graduate business programs of the Strome College of Business are accredited by The Association to Advance Collegiate Schools of Business (AACSB)-International.
- The undergraduate and master's degrees in accounting are also accredited by the AACSB-International.
- The master's degree in public administration is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA).

Darden College of Education and Professional Studies

- The undergraduate human services program is accredited by the Council for Standards in Human Service Education.
- The mental health, school, and college counseling master's and counselor education doctoral degree programs are accredited by the Council on Accreditation of Counseling and Related Educational Programs (CACREP).
- The Children's Learning and Research Center is accredited by the Southern Association of Colleges and Schools Commission on Colleges and Council on Accreditation and School Improvement (SACS/CASI).
- The graduate program in library and information studies has been awarded candidacy by the American Library Association Committee on Accreditation (ALA).

Education Programs

- The education programs in the Colleges of Arts and Letters, Education and Professional Studies, and Sciences are accredited by the Council for the Accreditation of Teacher Education (CAEP). These include: art education, biochemistry (licensure in chemistry), biology, chemistry, computer science, early childhood education, earth science, educational leadership, elementary education, English, world languages, library science, marketing education, mathematics, math specialist, vocal and instrumental music, middle school science education, health and physical education, physics, reading specialist, school counseling, social studies, special education, Teaching English as a Second Language, technology education, and theatre and dance.
- The graduate program in music education is accredited by the National Association of Schools of Music (NASM).

Batten College of Engineering and Technology

- The baccalaureate degrees in civil engineering, computer engineering, electrical engineering, and mechanical engineering are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org/>.
- The engineering technology programs in civil engineering technology, electrical engineering technology, and mechanical engineering technology are accredited by the Engineering Technology Accreditation Commission of ABET, <http://www.abet.org/>. (<http://www.abet.org/>)

School of Health Professions

- The Master of Health Sciences, Pathologists' Assistant program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 5600 N River Road, Suite 720, Rosemont, IL 60018, 773-714-8880.
- The Master of Physician Assistant program is accredited by the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA).
- The Master of Science in Counseling and Art Therapy is accredited by the Accreditation Council for Art Therapy Education (ACATE).
- The Master of Surgical Assisting program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

College of Health Sciences

- The program in dental hygiene is accredited by the American Dental Association Commission on Dental Accreditation (ADA).
- The medical laboratory science program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS), 5600 N River Road, Suite 720, Rosemont, IL 60018, 773-714-8880.
- The physical therapy program is accredited by the American Physical Therapy Association, Commission on Accreditation in Physical Therapy Education (CAPTE).
- The graduate program in athletic training is accredited by the Commission on Accreditation of Athletic Training Education (CAATE).
- The nuclear medicine technology program is accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT).
- The cytology program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP).
- The undergraduate program in exercise science is accredited by the Commission on Accreditation of Allied-Health Education Programs (CAAHEP).
- The Doctor of Occupational Therapy program is a candidate for accreditation by the Accreditation Council for Occupational Therapy Education (ACOTE).
- The graduate program in speech-language pathology is accredited by the Council on Academic Accreditation in Speech-Language Pathology of the American Speech-Language-Hearing Association (CAA/ASHA).

Joint School of Public Health

- The environmental health program is accredited by the National Environmental Health Science and Protection Accreditation Council (EHAC).
- The health services administration major in the Bachelor of Science in Public Health program is certified by the Association of University Programs in Health Administration (AUPHA).
- The Master of Public Health program is accredited by the Council on Education for Public Health (CEPH).

College of Sciences

- The doctoral program in clinical psychology is accredited by the American Psychological Association (APA).
- The doctoral program in psychology (human factors) is accredited by the Human Factors and Ergonomics Society.

School of Nursing

- The baccalaureate nursing program is accredited by the Commission on Collegiate Nursing Education (CCNE) and approved by the Virginia Board of Nursing (VBN).
- Graduate nursing programs (MSN and DNP) are accredited by the Commission on Collegiate Nursing Education (CCNE).
- Specialty tracks in graduate nursing programs are approved by the Pediatric Nursing Certification Board, the National Nurses Certification Corporation, American Nurses Certification Corporation, and the American College of Nurse Practitioners.
- The certified registered nurse anesthetist specialty track is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (CoA-NA).

Affiliations

The University is a member of the Southern Association of Colleges and Schools, the American Council on Education, the Council of Graduate Schools in the United States, the American Association of State Colleges and Universities, the American Association for Higher Education, the Association of American Colleges and Universities, the Association of Governing Boards of Universities and Colleges, the Council for the Advancement and Support of Education, the Southeastern University Research Association, the American Association of University Women, the University Extension Association, the Universities Space Research Association, the American Association of Collegiate Schools of Business, the National Council for Accreditation of Teacher Education, the Association for Continuing Higher Education, the North American Association for Summer Sessions, the Association of Virginia Colleges, the Association of Schools of Allied Health Professions, the American Society for Engineering Education, the Consortium for Oceanographic Research and Education, the Conference of Southern Graduate Schools, the Council for Standards in Human Service Education, and the National Council for State Authorization Reciprocity Agreements (NC-SARA), and a partner of the Southern Regional Education Board's Electronic Campus (SREB Electronic Campus). The University is also a Division I member of the National Collegiate Athletic Association (NCAA) and the Sun Belt Athletic Conference.

The Master of Engineering Management program is certified by the American Society for Engineering Management (ASEM). The undergraduate program in chemistry is American Chemical Society certified.

Old Dominion University is authorized by the Washington Student Achievement Council and meets the requirements and minimum educational standards established for degree-granting institutions under the Degree-Granting Institutions Act. This authorization is subject to periodic review and authorizes Old Dominion University to offer specific degree programs. The Council may be contacted for a list of currently authorized programs. Authorization by the Council does not carry with it an endorsement by the Council of the institution or its programs. Any person desiring information about the requirements of the act or the applicability of those requirements to the institution may contact the Council at P.O. Box 43430, Olympia, WA 98504-3430.

Graduate Admission

Office of Admissions

The mission of the Office of Admissions is to recruit, admit, and enroll students from throughout the United States and abroad who will contribute to the overall collegiate experience. Old Dominion University is open to all qualified students regardless of race, color, religion, gender (including pregnancy), age, national origin, veteran status, disability, political affiliation, sexual orientation, or genetic information.

General Requirements for Admission

An earned baccalaureate degree from institutions of higher education accredited by accrediting agencies recognized by the U.S. Department of Education for Title IV purposes (https://www2.ed.gov/admins/finaid/accred/accreditation_pg9.html) or international equivalent. An applicant must have earned at least a 2.80 cumulative grade point average (4.00 scale) for admission to a master's program and at least a 3.00 cumulative grade point average for admission to a doctoral program. Additional requirements are imposed by individual graduate programs. For specific program requirements, prospective students should consult the appropriate section of this catalog and contact the appropriate graduate program directors.

Students who apply before completion of undergraduate work may be admitted on the condition that the bachelor's degree is received before the beginning of actual graduate studies.

Students whose backgrounds are judged to be deficient in any specific area of study or whose undergraduate grades or test scores are below the required average may be admitted provisionally and asked to make up the deficiency by taking one or more courses at the undergraduate level. Graduate credit will not be awarded for these courses.

Standardized Tests

The Graduate Record Exam (GRE) or the Graduate Management Admission Test (GMAT) may be required for admission. Test scores are considered valid for five years. Students with test scores older than five years should contact the program director for guidance.

Required by some programs, the Miller Analogies Test (MAT) is administered by appointment through the University Testing Center. Applicants should contact that office to make arrangements for taking the MAT.

Some programs require that students take the Exit Examination of Writing Proficiency, administered by the University's Writing Center, prior to completion of nine graduate hours of study. Graduate students in additional programs must take the Graduate Writing Proficiency Examination administered and evaluated by the College of Education.

Academic Testing

The University Testing Center is part of University College and is located in the Student Success Center. Personnel from the Testing Center administer University placement tests, College-Level Examination Program (CLEP) exams, DANTES, the Miller Analogies Test (MAT), and correspondence tests, and coordinate entrance and certification test administrations. For information on testing, please see the web site at <http://www.odu.edu/testing-center> (<http://www.odu.edu/testing-center/>).

Submission of Transcripts

All transcripts and academic records uploaded to the online application system are considered unofficial.

If admitted, official transcripts from all colleges or universities from which a bachelor's degree has been earned and official transcripts of all subsequent coursework must be submitted to the Office of Graduate Admissions. Official transcripts must be sent directly to the Office of Graduate Admissions from the institution at which the student took classes. Some programs may require additional official transcripts.

Old Dominion University reserves the right to require the submission of all official transcripts or credentials any time during the admission review process.

Application Procedures

Individuals interested in graduate work at Old Dominion University should apply online at <http://www.odu.edu/admission/graduate> (<http://www.odu.edu/admission/graduate/>) or contact the Office of Graduate Admissions to obtain the forms and information. The applicant must first complete the online Admissions application (including the application fee, when applicable), and submit all supporting documents required by the graduate program to which the student is applying. The completed application and supporting documents should be submitted to the Office of Graduate Admissions by the deadlines established by the programs to ensure complete processing of an application.

Several programs of a highly competitive nature have early deadlines. Failure to submit a complete application by the program's established deadline date will result in removal of the application from consideration for admission. Applications that remain incomplete for 6 months after the initial deadline will be purged unless the student requests deferment to a subsequent semester.

Applicants should refer to <https://www.odu.edu/academics/programs> (<https://www.odu.edu/academics/programs/>) for program application deadlines.

Old Dominion University reserves the right to require the submission of all official transcripts or credentials any time during the admission review process.

The Admission Decision

A written notice from the Office of Admissions or International Admissions, not letters from departments or faculty members, is certification of admission. Admission to graduate study may be limited by the number of places available in the various programs, colleges, schools, and departments of the University. Applicants are encouraged to apply early. The application process may span six to eight weeks depending on timely receipt of documents. After supporting credentials have been received and reviewed, applicants for admission are usually notified within 30 days of the action taken on their application.

International Student Admission

International students should apply only through the Office of International Admissions. U.S. Permanent Residents and Green Card holders should apply only through the Office of Admissions. The primary method of application is web-based; however, a paper application is available upon request. Along with the application and fee, officially issued academic records (transcripts) and evidence of English language proficiency are required. As a service to applicants, the Office of International Admissions evaluates all foreign academic credentials.

Application Process and Dates

Applicants must strictly adhere to international admission and specific program deadlines to allow for the evaluation of academic and financial credentials. Additional timeline considerations include the student visa application process and required attendance at various orientation programs conducted during the week prior to the beginning of classes. Admission deferments are granted for up to one calendar year (two semesters); beyond this allotted time, a new application, fee and academic credentials are required. Along with the application, fee and program specific requirements, all academic transcripts, translations and standardized tests must be official, sealed, stamped by the institution or testing agency and sent directly to the Office of International Admissions at Old Dominion University (CEEB code 005126). Officiating authorities include an institution's Registrar or Principle/Controller of Exams. When English is not the language of instruction, academic transcripts and course descriptions are required in one's native language and officially translated into English. Photocopies, notarized copies, or faxed copies of required official documents will not be accepted. Certified translations by a licensed or professional translator must accompany academic documents not written in English. Translations

of official documents completed by the student will not be accepted. Credentials submitted during the application process become the property of Old Dominion University and cannot be returned.

F-1 & J-1 Student Visas

Students seeking an F-1 or J-1 non-immigrant student visa must demonstrate to both Old Dominion University and the U.S. consulate the financial ability to cover all expenses related to study and living in the U.S. Funding requirements include tuition, health insurance, living and personal expenses for the first year of study, in addition to a reasonable expectation of funding for the remaining years of study. Old Dominion University issues forms I-20 (F-1) or DS-2019 (J-1) for the nine-month academic year with the submission of Old Dominion University's Financial Affidavit of Support, along with any corresponding original, bank issued financial statements or financial sponsorship guarantees.

English Proficiency Requirements for Non-Native Speakers of English

Admission to the University is contingent upon successful completion of English language proficiency requirements. Non-native speakers of English can provide evidence of English language proficiency through a variety of options. Admission to the English Language Center (ELC) and subsequent enrollment in non-credit English language courses at the ELC does not imply admission to the University. Further information for non-native speakers of English is available from the Office of Admissions (permanent residents and naturalized citizens) and from the Office of International Admissions (all non-immigrants).

Graduate applicants who are non-native speakers of English must provide evidence of English language proficiency through fulfillment of one of the following:

1. Submission of one of the following English proficiency test scores: TOEFL iBT of 79 (550 paper based); IELTS overall band of 6.5; PTE score of 53; GRE Verbal Reasoning of 152, a GCSE or GCE score of "O" level pass in English; CPE grade of A, B, C.
2. Possession of a Bachelor's or Master's degree equivalent from an accredited institution located in a country where English is the native language.
3. Successful completion of two university- or college-level English courses at a regionally accredited U.S. institution. Successful completion is defined as obtaining a minimum grade of C (2.00) in each of these courses. These courses must be equivalent to the University's English composition course(s) (see General Education Requirements, Lower-Division Written Communication section) and any other advanced composition or technical writing course. In addition, matriculated Old Dominion University / English Language Center students must receive prior approval from the Office of International Admissions to take English composition courses at another institution for the purpose of satisfying the English Proficiency Requirement.
4. Successful completion of the Old Dominion University's English Language Center (ELC) Monarch English Transition Program (formerly the ELC Bridge Program). Successful completion is defined as satisfying the following two criteria: a.) Securing a minimum grade of B and demonstrating 85% attendance in each English Language Center class; and b.) Securing a minimum grade point average of 3.00 in academic courses taken during the Monarch English Transition Program.

Graduate students who choose to satisfy English language proficiency requirements through the on-campus English Language Center will be placed according to the following criteria:

1. Students with a TOEFL iBT score below 61 (below 500 paper-based) are automatically eligible to enroll in the ELC's Intensive English Program (IEP). Conditional admission to most graduate programs is available.
2. Students with a TOEFL iBT score between 61 - 78 (500 - 550 paper-based) will be placed in the graduate level Monarch English Transition Program (formerly the ELC Bridge Program), which includes one

graduate academic course and semi-intensive English Language Center course work.

English Language Center - IEP students may enter the Monarch English Transition Program directly without TOEFL test scores after satisfying the following requirements: a.) Successful completion of level 5 in the IEP program with a 'B' grade or higher; and b.) Receive passing scores on level exit assessments. This option is only available to students that have progressively enrolled in the Intensive English Program.

Non-native speakers of English who anticipate holding a teaching assistantship position must provide evidence of oral English proficiency. They may take the Test of Spoken English (TSE), given by the Educational Testing Service (ETS) at sites around the world, or the ETS SPEAK Test, administered by the English Language Center at Old Dominion University. Graduate teaching assistants who fail to pass either of these tests will not be eligible to assume an instructional position.

Digital Learning

The mission of the Office of Admissions is to recruit, admit, and enroll students from throughout the United States and abroad who will contribute to the overall collegiate experience. Old Dominion University is open to all qualified students regardless of race, color, religion, sex (including pregnancy), age, national origin, veteran status, disability, political affiliation, sexual orientation, or genetic information.

Admission

Students who are applying for a online program are encouraged to apply online and include their essay and resume. Students may request letters of recommendation within the on-line application and the recommendation letters can either be mailed or sent electronically to the Office of Admissions. Additional requirements are imposed by individual graduate programs. For specific program requirements, prospective students should consult the appropriate section of this catalog and contact the appropriate graduate program directors. All graduate applications are processed according to the University policies and procedures contained in this catalog.

Types of Admission Status

Degree Seeking Applicants

Regular

Students who have fully met the requirements for admission to a program.

Provisional

An applicant who does not fully meet the requirements for admission as a regular graduate student may, at the discretion of the graduate program director, be allowed to enroll in a graduate program as a provisional graduate student.

The Graduate Continuance Policy applies to all students, including provisionally admitted students.

Deferred Enrollment

With approval of the graduate program director, enrollment into a graduate program can be deferred for no more than one calendar year beyond the start of the original semester for which admission was offered. For example, students offered admission for fall may request to defer their enrollment to the next fall semester. The records of students who have not enrolled after 1 calendar year will be purged and students will have to reapply for admission.

Nondegree Seeking Applicants

Nondegree Entry

Nondegree entry is available to students who do not choose to apply for admission to a degree program at the time but wish to enroll in course work at the institution. Some reasons to enter as a nondegree student are:

Visiting student – A student who takes course work at Old Dominion University and then transfers the course credit to the home (degree-granting) institution.

Applying for a certificate program.

Expanding academic background or teacher certification.

Taking courses for personal and/or academic growth.

Missed the application deadline, but intends to apply as a degree-seeking student for a successive term.

Taking prerequisites (undergraduate, second degree, or graduate) for a degree-seeking program.

Nondegree Entry Procedures

Applicants for nondegree status are required to complete the online application form on the Admissions Office web page. For the student's convenience, official credentials may not be required at the time of registration; however, unofficial records or a personal interview may be requested for admission purposes. It is understood that all student information stated on the application is truthful. Deliberate falsification of application information will result in immediate withdrawal and a potential forfeiture of credits. Students should be familiar with policies and procedures for nondegree enrollment listed on the application form.

Directions for Certificate Program Registration

Please contact the department offering the certificate program for specific registration information and procedures.

Additional Information

All students should seek the approval of the academic department before registering for course work as a nondegree student.

Financial aid is not available for nondegree students, except those in approved teacher certification programs.

Students under suspension from another college or university are not eligible to attend as nondegree.

Academic advising is not available to nondegree students, but students are strongly encouraged to contact their academic department before registering for courses.

All students, degree and nondegree alike, must meet the continuance requirements as stated in the current Graduate Catalog. Failure to meet these requirements will subject students to probation or suspension.

Continuing Student Admission

Continuing applicants are students who have previously attended Old Dominion University on a degree-seeking basis and left the University, but would like to return. A student who has left the University in good academic standing is required to complete a reactivation/readmission form. If the separation from the University was longer than five years, the applicant will be required to reapply and resubmit all official transcripts and necessary credentials. The graduate program directory must approve reactivation/readmission requests.

Tuition, Fees, and Financial Information

Tuition

As used by the University, the term tuition refers to a comprehensive fee that includes payment of instructional programs, academic services, student services and activities, recreational sports, and intercollegiate athletics. All fees are subject to approval and/or change by the Board of Visitors.

Information related to the comprehensive tuition can be found on the website for the Office of Finance (<https://www.odu.edu/tuition/rates> (<https://www.odu.edu/tuition/rates/>)).

Students who are eligible to enroll in a combination of undergraduate and graduate courses in any given semester must pay tuition for the courses at the appropriate levels as prescribed. Graduate hours are available at graduate tuition rates, and undergraduate rates apply for undergraduate hours.

Room and Board Charges—2025-26 Academic Year

See <https://www.odu.edu/housing> (<https://www.odu.edu/housing/>) for room and board rates.

Eligibility for In-State Tuition for Certain Individuals Using G.I. Bill Benefits

<https://www.odu.edu/tuition-aid/tuition/military> (<https://www.odu.edu/tuition-aid/tuition/military/>)

G.I. Bill is a registered trademark of the U.S. Department of Veterans Affairs. More information about education benefits offered by the VA is available at the official U.S. government website at <http://www.benefits.va.gov/gibill> (<http://www.benefits.va.gov/gibill/>).

In-State Tuition Status (Residency)

Current information about eligibility for in-state tuition rates can be found at: <https://odu.edu/tuition-aid/costs-tuition/tuition/in-state> (<https://odu.edu/tuition-aid/costs-tuition/tuition/in-state/>).

Billing Cycle/Tuition Deadlines

Through the act of registration, either by registering online or by registration form, students accept responsibility for charges incurred. All University charges are due and payable by the established deadlines. The total amount due must be received by 5:00 p.m. on the deadline date shown on the statement to avoid financial penalties. Students unable to pay the total due by the tuition deadline may opt for participation in the University payment plan (fall and spring only). If charges remain unpaid 30 days after the due date, a 5% late payment penalty is assessed. Once the account is 120 days past due, it is forwarded to a collection agency and assessed an additional 25%. Tuition deadlines are published for each term: <https://ww1.odu.edu/tuition-aid/tuition/billing> (<https://ww1.odu.edu/tuition-aid/tuition/billing/>).

Billing Statements

All itemized Student Account billing statements are only available online at www.LeoOnline.odu.edu (<http://www.leonline.odu.edu/>). Billing activity, notifications, and alerts are sent to the student's ODU.EDU provided email address. For more information, please visit the website (<https://ww1.odu.edu/tuition-aid/tuition/billing/>).

Failure to Pay Tuition

Students' registrations will not be canceled for failure to pay tuition. Nonpayment will not release students from the financial obligation for tuition charges. Students are strongly encouraged to follow University procedures and meet published deadlines to officially drop classes and be released from charges. Stopping payment on a tuition draft does not constitute a cancellation of the student's registration.

Payment/Student Accounts (Cashiers' Windows)

Students may pay for tuition and fees with personal checks, money orders, cash, or credit card (VISA, MasterCard, Discover, and American Express). The Office of Finance no longer accepts credit card payments at the cashiers' windows. Cash payments should be made at the Office of Finance cashiers' windows ONLY. Check/money order payments may be mailed to Office of Finance, Student Accounts, Old Dominion University, Alfred B. Rollins, Jr. Hall, Norfolk, VA 23529-0045. Personal checks will be accepted for the exact amount of fees and/or other amounts owed the University. Students may make credit card payments via Leo Online only. Students who pay using a credit card will be charged a convenience fee. Third party payments are accepted upon submission of authorization documents. Payments on all financial obligations to the University will be applied on the basis of age of the debt. The oldest debt will be paid first. Postdated checks are not scrutinized and will be deposited upon receipt. The cashiers do not cash checks or make cash refunds. Checks must be provided in U.S. dollars. Over-payments on students' accounts of \$5 or less that are not created by a financial aid disbursement will not be refunded unless students request the refund from the Student Accounts Office.

Cash Payments over \$10,000

In accordance with the Internal Revenue Service (IRS) requirements and the University Policy, any cash payment received by ODU exceeding \$10,000 will require completion of a Cash Intake Form (<https://www.odu.edu/sites/default/files/documents/cash-intake-form.pdf>). For more information, visit the Departmental Deposits (<https://ww1.odu.edu/finance/accounts-receivable/departamental-deposits/>) page.

Third-Party Payment Authorizations

A "Third Party" is an employer, a military unit, a service organization, embassies, or a federal, state or local governmental agency agreeing to pay tuition and fees on the student's behalf, and requests that ODU bill them for these debts. These payments require a written authorization (<https://ww1.odu.edu/tuition-aid/tuition/billing/payments/third-party/>) for processing.

Student Account Inquiry

The University reserves the right to request information on the student identification number and/or a photo identification when releasing information or conducting other financial transactions. Specific account information will be released only to the student. Each student account can be viewed using any Internet browser. Students are strongly encouraged to access records directly through their secure access site on www.leonline.odu.edu (<http://www.leonline.odu.edu/>). Students are expected and required to assume responsibility for their own financial matters and to abide by the laws of the Commonwealth and the rules and regulations of the University. Failure to read and comply with University regulations will not exempt students from whatever penalties they may incur.

Delinquent Accounts

The University will not issue a degree, diploma, grade report, or permit registration for future terms to any student who has not paid all debts in full. Students with account holds are permitted to drop classes to reduce debt or withdraw to prevent academic penalty.

Collections

Virginia State law requires that the University make every attempt to collect past due amounts owed to state agencies. If, after 120 days, full payment of a debt has not been received, the account will be placed with a collection agency. Account holders are responsible for any collection costs incurred at a rate of 25% of the total due. Several other actions may be taken including the following: the account can be listed by the Credit Bureau as a bad debt; a delinquent account can be collected in full from income tax refunds, lottery winnings or other refunds due from the state (for Virginia residents); and the account may be turned over to the Virginia Attorney General's Office for

litigation. Timely payment is strongly encouraged so that collection efforts can be avoided.

Set-off Debt Collection Act

Under the provisions of this act, an individual's Virginia income tax refund or lottery winnings will be subject to the University's claim for any unpaid balance of tuition and fees to the University. For more information, please visit <https://ww1.odu.edu/tuition-aid/tuition/penalties/collections/> (<https://ww1.odu.edu/tuition-aid/tuition/penalties/collections/>).

Dishonored Checks and Charge Cards

A \$50.00 fee will be charged for each returned check or charge on a student's account, with a maximum allowable of three returned checks after which check payments will no longer be accepted. For more information, please visit <https://ww1.odu.edu/tuition-aid/tuition/penalties/> (<https://ww1.odu.edu/tuition-aid/tuition/penalties/>).

University Payment Plan (Fall & Spring Semesters)

Students may setup a payment plan (<https://www.odu.edu/tuition/billing/payments/payment-plan-agreement/#::~text=Fall%2FSpring%20Semester%20Plans&text=Old%20Dominion%20University%20offers%20a,%2Drefundable%20set%2Dup%20fee>) in Leo Online, where charges for each semester are divided into four equal payments with a \$40 nonrefundable setup fee, to be paid at the time the payment plan is established. **Payment plans may not be available on past due balances.**

Tuition Refund Policy

The total tuition is considered fully earned by the University once scheduled classes have begun. Students desiring to withdraw from the University must formally notify the University of their intention by executing an official withdrawal with the Office of the University Registrar (<https://www.odu.edu/registrar/>). If completed by the posted deadlines each semester, students will be refunded (<https://ww1.odu.edu/tuition-aid/tuition/refunds/>) the costs and fees associated with dropped courses.

Tuition Differentials (Add/Drop Policy)

In accordance with the refund periods, a full or partial refund of the difference between tuition paid and the new tuition charges will be granted if the per credit rates differ. In those instances where the revised tuition charges are greater, the additional tuition charges will be assessed.

Special Situations

For classes of less than one semester/session in length, refunds will be granted only before the first meeting of the class. Administrative withdrawals, as in the case of classes canceled by the University or the case of academically suspended students, entitle the student to a full refund of tuition. For refund purposes, the beginning of a semester is defined as the opening day of classes as shown in the course schedule and Undergraduate and Graduate Catalogs. For additional information, visit <https://ww1.odu.edu/tuition-aid/tuition/refunds/> (<https://ww1.odu.edu/tuition-aid/tuition/refunds/>).

Return of Title IV Funds

According to federal regulations, financial aid funds are returned to the government when charges were paid by financial aid and a refund is given to a student who fully withdraws from the University. For more information or further assistance, please visit the Refunds (<https://ww1.odu.edu/tuition-aid/tuition/refunds/>) page or contact the Office of Financial Aid (<https://www.odu.edu/finaidoffice/>).

Tuition Appeal Policy

Students may request tuition financial charges be dropped if a student meets the approved requirements by completing an official Tuition Appeal (<https://ww1.odu.edu/tuition-aid/tuition/refunds/appeals/>) and providing necessary paperwork.

Senior Citizen Tuition Waiver

In accordance with the Senior Citizen's Higher Education Act of 1974 (Code of Virginia, § 23.1-639, et seq.), a senior citizen* may take courses without paying tuition or required fees, except for course materials, under certain conditions. If the senior citizen has taxable individual income of not more than \$23,850 in the preceding year, the individual may take a course for academic credit free of tuition and fees, except for fees established for the purpose of paying for course materials, such as laboratory fees, books, etc. Proof of income in the form of a Virginia Resident Form 760 or an IRS Verification of Non-Filing must be provided at the time of registration, along with the Senior Citizen Tuition Waiver Application & Registration Form. This form can be downloaded at <https://odu.edu/registrar/forms/> (<https://odu.edu/registrar/forms/>).

A senior citizen, regardless of income level, may audit a course that is given for academic credit or take a noncredit course free of tuition and fees, except for fees established for the purpose of paying for course materials, such as laboratory fees or books.

No limit is placed on the number of terms or semesters in which a senior citizen who is not enrolled for academic credit may register for courses, but the individual can take no more than three noncredit courses in any one term, quarter, or semester. There will be no restriction on the number of courses that may be taken for credit in any term, semester or quarter, or on the number of terms, semesters or quarters in which an eligible senior citizen may take courses for credit.

The two additional conditions listed below shall be met before an individual may take a course under the provisions of this program:

1. Senior citizens wishing to use this benefit must be admitted as degree-seeking or non-degree students before registering, and
2. The senior citizen may be admitted to a course only on a space-available basis after all tuition-paying students have been accommodated on or after the first day of classes for the session in which the class is scheduled. Exceptions to this procedure may be made when the senior citizen has completed 75% of the requirements for a degree.

* "Senior citizen" means any person who, before the beginning of any term, semester or quarter in which such person claims entitlement to the benefits of this chapter, (i) has reached 60 years of age, and (ii) has had his legal domicile in this Commonwealth for one year. (Code of Virginia, § 23.1-639)

Deferment for Veterans

Old Dominion University offers a deferment for veterans, which extends the payment deadline for students whose veterans' benefits are not available by the tuition deadline. More information may be found here: <https://ww1.odu.edu/tuition-aid/tuition/military/> (<https://ww1.odu.edu/tuition-aid/tuition/military/>).

Federal Student Aid Refunds

Students who have a credit balance on their account may be eligible to receive a refund. The type of credit on a student's account will determine the method of initiating the refund and the length of time for a student to receive their refund. If there is a credit balance, then funds will be returned to the student in the form of a check or e-Refund. Additional information may be found here: <https://ww1.odu.edu/tuition-aid/tuition/refunds/> (<https://ww1.odu.edu/tuition-aid/tuition/refunds/>).

Replacement Checks

Checks that are lost, mutilated, or destroyed can be replaced by issuing a Stop Payment Request Form (<https://www.odu.edu/sites/default/files/documents/stop-payment-request.pdf>). For more information, please visit <https://ww1.odu.edu/tuition-aid/tuition/refunds/> (<https://ww1.odu.edu/tuition-aid/tuition/refunds/>).

Education Tax Credits

The IRS regulations require ODU to provide a statement of tuition and charges billed each calendar year via a 1098T Tax Form, issued no later than January 31 of each calendar year to all eligible students. For more

information, please visit <https://ww1.odu.edu/tuition-aid/tuition/education-tax-credits> (<https://ww1.odu.edu/tuition-aid/tuition/education-tax-credits/>).

Contact Information

Norfolk, VA 23529

Graduate Financial Aid

Office of Student Financial Aid

The Office of Student Financial Aid supports the mission of the University by seeking to assist qualifying students and their families in reducing financial barriers that might prohibit their participation in the education programs offered by Old Dominion University. Provide exemplary customer service; deliver funds in a timely and equitable manner; support enrollment and retention by identifying and obtaining resources and ensure federal, state and institutional policies and regulations are adhered. We also strive to educate students, their parents, the community and our colleagues to ensure informed financial decisions are reached. The office administers need-based financial aid programs funded by Federal, State, University, and private sources in the form of grants, Federal Direct Subsidized loans, Federal work-study programs, and both merit-based and need-based scholarships. In addition, the office administers the William D. Ford Federal Direct Unsubsidized Loan program and the Federal Direct PLUS loan program, both of which are non-need-based federally supported sources of funding. Alternative loan options are also available.

Financial resources are available to assist Old Dominion University graduate students with their educational costs. Most stipends awarded to graduate students are insufficient for meeting all living expenses; therefore, other sources of income are necessary. Financial sources for graduate students typically include teaching, administrative and research assistantships, fellowships, tuition grants (all administered through the academic colleges), as well as Federal Direct Stafford Loan Programs, and part-time student employment (administered through the Center for Career and Leadership Development). Additional information about need-based financial assistance is available from the Office of Financial Aid.

Prospective graduate students should also consider applying for national fellowships, such as those awarded by the National Science Foundation, the Woodrow Wilson National Fellowship Foundation, the Ford Foundation (minority fellowship program), and the Danforth Foundation. Applicants should check program deadlines, some of which are as early as December 1. Information on fellowships in specific fields is available from the chair or program director of each department/school.

Regulations governing the administration of student financial aid are subject to unanticipated changes. Information provided herein is as accurate as possible on the date of printing. For additional and updated information, students and interested parties are invited to visit the office's web site at <https://www.odu.edu/finaidoffice> (<https://www.odu.edu/finaidoffice/>) or Old Dominion University's home page <http://www.odu.edu>.

Scholarships, Grants, Loans, and Student Employment

The University offers a variety of awards each year to qualified students who have been accepted for admission into degree programs. Some of these awards are available only to Virginia residents, while others are awarded without regard to state residency. Student assistance is offered on the basis of scholastic achievement and/or established financial need. Financial need is defined as the difference between the cost of education/attendance at Old Dominion University and the amount of money an applicant and his or her family are expected to make available from their income and assets to meet the expenses of that education. The eligibility for non-need Federal Direct Unsubsidized loans and Federal Direct PLUS loans is determined by a combination of factors, including cost of attendance, and aggregate amount borrowed to date, to name a few.

To be eligible for assistance from the major student aid programs, a student must:

- be a citizen or an eligible non-citizen;
- be admitted and enrolled as degree seeking in an eligible program;
- be registered with the Selective Service (if required);
- not be in default or owe a repayment or refund on a federally guaranteed loan or grant;

- be in good academic standing (making satisfactory academic progress) to be eligible for financial assistance. Certain aid programs require a student to maintain a full-time status.

There is one exception to the requirement that students be admitted on a degree-seeking basis: students who are admitted only for purposes of teacher certification may qualify for a William D. Ford Federal Direct Loan by submitting a memo verifying their admission into an approved licensure program by the Director of Teacher Education Services in the Darden College of Education. Students must be enrolled in six (6) credits minimum to be eligible for aid.

Financial aid eligibility is determined on an annual basis for one academic year (fall, spring), and is determined for succeeding years upon re-application and continued eligibility. Student must submit the summer aid request form to request summer aid review. Not all students will be eligible for summer aid. Applications for Old Dominion University-administered financial aid should be submitted as early as possible starting in October for consideration in the following academic year.

To be considered for the Annual and Endowed Scholarships administered by the University, an Admissions application or the Scholarship Application for Continuing Students must be received by the University by March 1st preceding the academic year of interest. All admitted students will automatically be considered.

An entering student must be accepted for admission into a degree-seeking program before receiving a financial aid eligibility notification letter, however, a student who has not yet been accepted for admission may apply for financial assistance. Once admitted into an eligible degree program, the student will automatically receive a notice of tentative financial aid eligibility. Announcements of financial aid eligibility for early applicants are generally made before May 1. The applicant will be notified by the Office of Student Financial Aid. In addition, the admitted student is encouraged to monitor the status of his/her application for aid and its subsequent processing by accessing his/her records on the University's secure online site, LEO Online at www.leonline.odu.edu. Alerts, reminders, and student-specific information are mailed through the University's secure e-mail system throughout the year, and students are responsible for reading and responding to these communications.

The information regarding financial aid contained in this catalog is subject to changes or deletions without notification. Additional information concerning financial aid is available through the Office of Student Financial Aid. The Guide to Federal Student Aid, which describes the federal student aid programs and how to apply for them, is also available free of charge from the Federal Student Aid Information Center (1-800-433-3243). The U.S. Department of Education provides efficient and secure access to information and government services and benefits for students via the web site (<https://studentaid.gov/>).

Application Requirements

To be considered for financial aid, a student must complete the FAFSA as soon as it becomes available preceding the academic year for which application is made. For example, a student planning to attend during the Fall semester, 2025 would submit a financial aid application on or after October 1, 2024. The documents and deadlines are described below. The FAFSA for the 2026-27 year is expected to be available on October 1, 2025.

Note: The Free Application for Federal Student Aid (FAFSA) is required of all applicants who wish to be considered for financial aid.

Document 1: The Free Application for Federal Student Aid (FAFSA)

Submitting a completed and signed FAFSA initiates the process of applying for financial aid. The information provided by the student (and his/her contributors) is used by the University and other awarding agencies to determine financial need and general financial aid eligibility. When filing the 2025-26 FAFSA, tax information for 2023 will be submitted. When completing the FAFSA, use Old Dominion University's Title IV Institution Code (003728). Old Dominion University encourages students to take advantage of the electronic FAFSA option on the web at <https://>

studentaid.gov/, which is a secure and convenient method for completing the application process. All applicants and contributors of dependent applicants should apply for a FAFSA ID with the Department of Education at <https://studentaid.gov/> in order to be able to sign the FAFSA application electronically. The FAFSA must be filed each year for which the student is requesting aid. FAFSAs received by the federal processor before university established priority deadlines receive priority consideration. The FAFSA priority date is March 1 for all students (priority consideration as funds are available).

Document 2: FAFSA Submission Summary

Once the FAFSA is received and processed, you will receive your results by e-mail within a few days. The e-mail will contain a secure link so you can access your FAFSA Submission Summary online. If you have a “blocked” folder in your e-mail files, check it. Students are strongly encouraged to keep their FAFSA Submission Summary and all other financial-aid-related documents for future reference. The FAFSA Submission Summary contains valuable information as well as a unique data release code.

Document 3: Employment Eligibility Verification

All U.S. employers are responsible for completion and retention of Form I-9 for each individual they hire for employment in the United States. This includes citizens and non-citizens. On the form, the employer must verify the employment eligibility and identity documents presented by the employee and record the document information on the Form I-9. Additional information can be obtained from the Office of Finance.

Document 4: Consortium Agreement and Dual Enrollment Forms

Students attending classes at the community college may be required to submit these forms. These students should consult with their success advisor and their financial aid counselor to determine if these forms are required.

Standards of Satisfactory Academic Progress to Maintain Financial Aid Eligibility

Old Dominion University Requirements

Fulfillment of Federal Satisfactory Academic Progress is reviewed and evaluated by the Financial Aid Office in compliance with federal regulations. In order to qualify for assistance through the Office of Student Financial Aid, students must be accepted by the University as degree-seeking students. Students must be enrolled at least half-time (50%) to qualify for most financial aid programs.

Graduate students must be enrolled for a minimum of nine (9) credit hours during either the fall or spring semester to be considered full-time or 6 or more credit hours during the summer. Three-quarter time enrollment is 6-8 credit hours during the fall or spring semesters or 4-5 credit hours in the summer semester. Half-time enrollment for graduate students is 4-5 credit hours during either the fall or spring semesters or three credit hours during the summer semester.

Eligibility and award amounts are based on the number of semester hours in which the student is enrolled. For purpose of financial aid, courses taken for audit do not count toward enrolled hours.

The following quantitative and qualitative requirements apply to financial aid programs administered by Old Dominion University for satisfactory academic progress.

Policy

Maintaining Satisfactory Academic Progress is one of many federally mandated criteria viewed in determining a student’s eligibility for continued receipt of financial aid. Progress is measured by PACE (the number of credits earned in relation to those attempted), Qualitative (GPA) standard and Allowable time (the maximum time frame allowed to complete the academic program). Students must also demonstrate a progression toward completion of their degree program within an established time-frame.

Failure to maintain Satisfactory Academic Progress will result in loss of financial aid eligibility. Progress is reviewed annually, at the end of the academic year.

A. PACE

Graduate

To maintain Satisfactory Academic Progress, a graduate student is required to complete 80% of the total credit hours attempted.

How to calculate PACE

$.80 \times \text{Attempted Hours (including transfer credits)} = \text{Minimum hours a graduate student must earn}$

B. QUALITATIVE

Qualitative Satisfactory Academic Progress for students is evaluated in accordance with the following table.

Hours Earned	Minimum G.P.A
1+	3.0

C. Maximum Time Frame

No student may exceed 150% of the published length of their educational program. Students will be notified and will need to appeal for financial aid when they are approaching 150%. Students must complete their degree within a specified amount of time. This standard will depend on the student’s enrollment status and degree. Old Dominion University requires an appeal at 125% of degree hours. When a student exceeds 125%, they will be required to submit an appeal for the following semester to determine if they will continue to receive financial aid.

*Note: Transfer credit hours are included in the calculation.

Satisfactory Academic Progress Review

The Office of Student Financial Aid will conduct a review of Satisfactory Academic Progress at the end of each academic year. Email notifications of SAP standard(s) not met will be sent to the student’s ODU email account or mailed to the student’s permanent address.

Please note that students who have not received financial aid in previous years but are applying for financial assistance for the first time will also be held to the requirement of maintaining Satisfactory Academic Progress. Satisfactory Academic Progress is reviewed for all semesters of a student’s enrollment regardless of whether the student was eligible for financial assistance during a term. **If students exceed the maximum allowable time, they are not meeting satisfactory academic progress, thus, all aid will be suspended.**

Financial Aid suspension does not prohibit you from continuing your education at Old Dominion University. It does prohibit you from receiving financial aid until you again meet the standards for Satisfactory Academic Progress.

Financial Aid Suspension

Students who fail to meet satisfactory academic progress are placed on financial aid suspension. You have the option to appeal this suspension. An appeal must be based on significant mitigating circumstances that seriously affected academic performance. The decision of the appeal will be sent via email to the students ODU email account. ***Note: Please make sure your email account is activated.**

Financial Aid Probation

For students who are successful in their appeal, aid will be reinstated on a probationary basis for one payment period/term. Emails will be sent to students on financial aid probation advising them of the conditions needed. The financial aid office will review the student’s record at the end of the semester to determine their outcome for future semesters. At the conclusion of the probation term, the student must be meeting the school’s SAP standard in order to qualify for further Title IV Funding. If it is determined that a

student will need more than one probationary term, the student must be placed on an academic plan.

The Appeal Process

Appeals must be submitted 10 days after notification of appeal or by the deadline on the appeal form. These dates vary from year to year; however, the deadline will be the Friday before classes begin.

The deadlines are listed on the SAP appeal form.

Deadlines for appeal submission for summer 2025 and 2025-26 academic years

2024-25

Summer 2025 term

2025-26

Fall term - August 22, 2025

Spring term - January 17, 2026

Summer - June 26, 2026

Students awaiting a response from the SAP Appeal Review Committee are responsible for paying their tuition and other fees by the payment deadline to avoid late and collection fees.

The decision of the Financial Aid Office is FINAL and cannot be appealed.

The complete packet including the advisor's portion and all documentation needed must be submitted or appeal will be denied.

The University will consider appeals for uncontrollable events, students having trouble adjusting to college, special circumstances that happen in a student's life such as death of a family member, student illness, transition to college issues, being called to the military, etc. The student must describe what impact the circumstance had on academics, what the student has done to address the impact and how the student plans to be successful. If the student is not yet prepared to vigorously focus on academics with assistance, if necessary, the student should not submit an appeal.

Some examples include but are not limited to:

- Death in the family. State how this person was related to you (i.e. parent, spouse, sibling, etc.). You must provide a copy of the death certificate or related documentation.
- Disabling illness or injury to the student. Please provide supporting documentation from your medical provider.
- Disabling illness or injury of immediate family member that required your care. Please provide supporting documentation from your medical provider.
- Emotional or mental health issue (for student) that required professional care. Please provide supporting documentation from your medical provider, social worker or other professional.
- Other special circumstance beyond your control (transition that may lead to depression, anxiety, and other problems that can be documented, divorce/separation, natural disaster, extreme change in financial or legal circumstances, etc.)

Documentation or evidence that supports the reason(s) must be included with your appeal. This might include a letter from a doctor, court documents, death certificates or copies of university documents, layoff notices, foreclosure notices, etc. Upload supporting documentation.

Use the SATISFACTORY ACADEMIC PROGRESS APPEAL FORM to submit your appeal.

- State clearly why you failed to meet the condition(s) cited. Upload documentation if necessary.
- State what has changed that will allow you to demonstrate SAP progress at the end of the next evaluation period.

- To confirm your extenuating circumstance(s), you must upload documentation from an objective third party (e.g. physician, counselor, lawyer, social worker, teacher, religious leader, academic advisor).

Meet with your academic advisor or department chair to complete the REQUEST FOR WRITTEN EVALUATION OF ACADEMIC PERFORMANCE form.

NOTE: If you submit your appeal without the advisor or department chair's evaluation, your appeal will not be considered.

Submit your complete appeal and upload all supporting documents by the deadline. Failure to submit the complete appeal will result in cancellation of aid.

ALLOW TWO WEEKS for the review of this appeal and receipt of the decision notification. If your appeal is approved, the decision notification will outline the conditions of your contract for reinstatement of aid eligibility. The contract is binding, and your academic progress will be reviewed at the end of the enrollment period specified. If your appeal is denied, the decision notification will specify the conditions for future consideration for financial aid eligibility.

Students awaiting a response from the SAP Appeal Review Committee are responsible for paying their tuition and other fees by the payment deadline to avoid late and collection fees.

The decision of the financial aid review committee is FINAL and cannot be appealed.

If the appeal is unsuccessful, an email notification will be sent notifying you of the decision and information on how to re-establish eligibility if applicable.

If you would like to file an appeal for reinstatement of your eligibility for financial aid, please follow these directions:

1. **Use the SATISFACTORY ACADEMIC PROGRESS APPEAL FORM to write your appeal.**

State clearly why you failed to meet the condition(s) cited.

Attach documentation if necessary.

State what has changed that will allow you to demonstrate SAP progress at the end of the next evaluation period.

To confirm your extenuating circumstance(s), you must attach documentation from an objective third party (e.g. physician, counselor, lawyer, social worker, teacher, religious leader, academic advisor).

We realize that sharing personal information can be difficult. Be assured that your statement will remain confidential. Only financial aid personnel will review your appeal.

2. **Meet with your academic advisor or the dean of your college to complete the REQUEST FOR WRITTEN EVALUATION OF ACADEMIC PERFORMANCE form.**

NOTE: If you submit your appeal without the advisor or dean's evaluation, your appeal will not be considered.

3. **Submit your complete appeal packet and all supporting documents within 14 days of receipt of the notification or prior to the deadline.** Appeals must be submitted 10 days after notification of appeal or by the deadline on the appeal form. These dates vary from year to year; however, the deadline will be the Friday before classes begin. The deadlines are listed on the SAP appeal form. Failure to submit the complete packet will result in cancellation of aid.

ALLOW TWO WEEKS for the review of this appeal and receipt of the decision notification. If your appeal is approved, the decision notification will outline the conditions of your contract for reinstatement of aid eligibility. The contract is binding, and your academic progress will be reviewed at the end of the enrollment period specified. If your appeal is denied, the decision notification will specify the conditions for future consideration for financial aid eligibility.

Students awaiting a response from the SAP Appeal Review Committee are responsible for paying their tuition and other fees by the payment deadline to avoid late and collection fees.

The decision of the financial aid review committee is FINAL and cannot be appealed.

If the appeal is unsuccessful, an email notification will be sent notifying you of the decision and also information on how to re-establish eligibility if applicable.

Re-Establishing Eligibility

Students may re-establish their eligibility for financial assistance by achieving the satisfactory progress standards. Keep in mind this will be at the student's own expense as they are ineligible for financial aid. Sitting out a semester at Old Dominion University will not assist in re-establishing eligibility. Once the student has earned the required grade point average or completed the required credit hours, they must contact financial aid to request the reinstatement of their financial aid eligibility.

Students not making SAP at the end of the second year, but at the end of the subsequent grading period come into compliance with the school's graduation requirements; will be considered making SAP beginning with the next grading period.

Withdrawing from Courses

Withdrawing from courses may impact your financial aid awards. Before withdrawing from class, you should contact the Financial Aid Office to determine the consequences.

Withdrawing from the University

Students who totally withdraw from the University and receive aid may owe the University money. Before withdrawing from the University, you should contact the Financial Aid Office to determine the consequences.

Withdrawing from all courses for two consecutive semesters may result in loss of financial aid eligibility.

Students who withdraw from all courses are subject to regulations regarding the Return to Title IV Funds requirement. If the date of complete withdrawal precedes the date on which 60% of the academic semester has been completed, a prorated portion of all Title IV student financial assistance will be due back to the federal programs. The University policy regarding tuition refunds following withdrawals is stated in the catalog and is independent of the Return to Title IV funds regulations. Students who withdraw from the University before 60% of the semester has elapsed should anticipate repaying a significant portion of the Title IV financial assistance. Additionally, students who failed to earn a passing grade during the term are subject to the same federal guidelines.

Transfer and Repeat Coursework

Accepted transfer credits must count as both attempted and completed hours.

Federal regulations limit the number of times a student may repeat a course and receive financial aid for that course. Ineligible repeated courses will be excluded from counting in the student's enrollment for financial aid purposes.

A student may receive aid when repeating a course that was previously failed (received a failing or unsatisfactory grade), regardless of the number of times the course was attempted and failed providing you meet the Satisfactory Academic Progress standards.

A student may receive aid to repeat a previously passed course (grade of 'D' or higher) one additional time. Once a student has completed any course twice with a passing grade (grade of 'D' or higher), he/she is no longer eligible to receive aid for that course.

This rule applies whether or not the student received aid for earlier enrollments in the course.

Important Note: The Financial Aid Office does not determine if a student may repeat a class, only whether a student may be eligible for financial aid

for a repeat class. For more information on your academic program's policy regarding repeat coursework, contact your academic advisor. In addition, every repeated course affects Satisfactory Academic Progress calculations; all repeated courses are counted as attempted credit hours.

Remedial courses are counted; however, enrichment and ESL courses ARE NOT taken into consideration.

Federal Programs

Students must submit the Free Application for Federal Student Aid (FAFSA) to determine eligibility for all of the following federal financial aid programs.

Federal Direct Student Loan Programs

Old Dominion University participates in the William D. Ford Federal Direct Loan Program and thus receives loan funds directly from the U.S. Department of Education upon disbursement (payment) to eligible students. There are two kinds of loans:

William D. Ford Federal Direct Unsubsidized Loans

Available to eligible students regardless of financial need, but students will be required to pay all interest charges, including the interest that accumulates during deferments.

PLUS Loans for Graduate or Professional Students

Graduate or professional students are eligible to borrow under the PLUS Loan Program up to their cost of attendance minus estimated financial assistance in the Direct Loan programs. This requirement includes a determination that the applicant does not have an adverse credit history, repayment beginning on the date of the last disbursement of the loan. Applicants for these loans are required to complete the Free Application for Federal Student Aid (FAFSA) and must have applied for their annual loan maximum eligibility under the Federal Unsubsidized Stafford Loan Program before applying for a Graduate/Professional PLUS loan.

Conditions for Disbursement of Financial Aid

The Office of Student Financial Aid publishes a "Statement of Student Responsibility & Conditions for Release of Financial Aid" document each academic year. This statement is included with the initial award notification and is also accessible on the Financial Aid Office page of the University web site <https://www.odu.edu/finaidoffice> (<https://www.odu.edu/finaidoffice/>). When students accept financial aid, they also acknowledge that they have read and agree to comply with the Statement. A limited sample of conditions is as follows:

Initial financial aid notices are based on the assumption that the student will enroll full time.

Students are required to communicate immediately with their counselors any changes in the enrollment level or student type during the period leading up to the beginning of each semester as they may impact the student's aid eligibility. Financial aid is based upon full-time (9 credits or more), three-quarter (6-8 credits), or half-time enrollment (4-5 credits). If a student's aid has been calculated based on an enrollment level different from the actual enrollment for that semester, the aid will not be released until the student has notified the counselor and the counselor has reviewed and recalculated aid eligibility. Financial aid eligibility changes when enrollment level changes. Students who drop courses are responsible for notifying the financial aid counselor immediately. It is the student's responsibility to notify the financial aid office if the student type changes (example: degree seeking to non-degree/certificate program). Aid will be reduced accordingly, and financial aid already received will be due back to the University. This also applies to "balance-of-aid" payments made to students prior to dropping.

The student is responsible for repayment of any and all financial aid received if adjustments resulting from unreported or misreported information discovered through verification, third-party notices, account reviews, that lead to reductions in aid. Documents such as Federal Income Tax transcript, W-2 forms, Leave and Earning

Statements, notices of SSI benefits, and Verification Worksheets may be required. Other documents may be requested to confirm marital status or other information provide on the FAFSA during the verification process.

The student is responsible for reporting additional educational assistance received through sources other than the Financial Aid Office. Financial aid may be adjusted according to federal regulations as a result of additional educational assistance received and not reflected initially. **The student bears responsibility for reporting any additional aid in the form of scholarships from outside sources, Vocational Rehabilitation Benefits, Graduate Tuition Scholarships, Veterans Benefits, Senior Citizen Tuition Waivers, Employer Assisted Tuition Payments, Third Party Payment Agreements involving any outside group or company, and all other forms of assistance. The student must report these external sources of financial assistance immediately to his/her financial aid counselor.**

Federal Direct Student Loans and Federal Perkins Loans require Promissory Notes. Federal Direct Student Loan promissory notes may be signed online. Federal Perkins Loan Promissory Notes are produced by the Office of Student Financial Aid after all eligibility conditions have been met. Students must complete and sign the promissory notes and return them to the Financial Aid Office before the loan process can be completed. Entrance loan counseling is required of all first-time borrowers prior to release of loan proceeds.

A tentative or conditional financial aid package assumes a level of government appropriations which are frequently under-determined at the time of preparation. If legislative bodies fail to provide the anticipated funding level, it may be necessary to reduce or cancel certain types of aid, particularly grants. Students will be notified immediately if such changes become necessary.

The Office of Student Financial Aid reserves the right to review, modify or cancel financial aid at any time on the basis of new information affecting student eligibility, including but not limited to changes in financial resources, residence, academic status, or changes in the availability of funds.

Awards Based on Admission to the University

Annual and Endowed University Scholarships

Scholarships at Old Dominion University have been established through the generosity of individuals, organizations, and corporations to recognize outstanding academic performance and to assist students in pursuing their educational goals. Scholarship awards are based on a variety of criteria. For some awards, eligibility is entirely determined by academic merit or potential. Other requirements might include demonstrated financial need, field of study, state or city residency, graduation from a particular high school or participation in a specific program, organization or activity. Generally, recipients have earned at least a 3.4 grade point average (on a 4.00 scale) and are full-time, degree-seeking students.

The Scholarship Form for Continuing and Graduate Students is available for students who are:

Students who have a change in scholarship eligibility according to the Criteria Checklist (included in the Scholarship Form)

Continuing students who meet the above circumstances must complete and submit the form to:

Office of Student Financial Aid
2002 Rollins Hall
Norfolk, VA 23529-0052

The form must be received by March 1st each year to be considered for scholarships for the following academic year. The information provided on the Form for Continuing and Graduate Students will be maintained and used for scholarship selection for the duration of the student's attendance at Old Dominion University. It is not necessary to complete the form more than once during attendance at Old Dominion University, UNLESS the

required information has changed. **To determine eligibility for need-based scholarships, designated by an asterisk (*), students must also file the Free Application for Federal Student Aid (FAFSA) PRIOR to March 1st of the appropriate academic year for Continuing and Transfer students.**

Selection procedures vary for these awards. All scholarships require admission to and enrollment in a degree program at Old Dominion University. For some scholarships, a portfolio, an audition or participation in a specific program may be required. The additional steps, if required, are summarized following each scholarship description.

Students will receive written notification of any scholarship for which they have been selected. Most scholarships will be awarded starting in April through August of each year.

College Scholarships

The College of Arts and Letters

The H. Lee Addison, III Scholarship in History was established by H. Lee Addison, III to assist a full time undergraduate or graduate student majoring in history that has a minimum GPA of 3.0.

The Eliot S. Breneiser Memorial Scholarship was established to assist a full-time music major in either the piano performance program or the music education program with a concentration in piano. Information concerning audition requirements is available from the Music Department. (AUDITION, PARTICIPATION) (757) 683-4061.

***The Dr. James V. D. Card Scholarship Fund** was established by James V. D. Card to assist an undergraduate or graduate student who is majoring in English. The recipient must demonstrate financial need. (FAFSA.)

The Anita Clair Fellman Endowed Service Learning Scholarship was established to assist one or more full time or part-time graduates, or undergraduate students who participate in a service-learning project through the Department of Women's Studies. The recipient will be selected by the chair of the Women's Studies Department and another Faculty member in the department.

The Lorraine '78 '83 and Dr. H. William Fink '34 Art Scholarship in Honor of Ken Daley was established to assist an incoming full-time graduate student in the MFA program. If there is no eligible graduate candidate who is qualified, the scholarship will be awarded to a rising senior in the BFA program who has a declared concentration in Print and Photo Media. The scholarship is based on merit and review of student's portfolio.

***The Harriet W. '69 and Burl Fisher Endowed Scholarship in History** is funded by an endowment that was established by Harriet and Burl Fisher given in memory of her aunt, Mabel Gresham Cones, and his grandmother, Renie Wright Fisher. Preference will be given to one or more full-time graduate students in history who maintain GPA of 3.5 and demonstrate financial need. (FAFSA)

***The Daniel E. Frank Memorial Scholarship Endowment for Blacksmithing and Metalwork** was established to assist a full-time student enrolled in the College of Arts and Letters and classified as a sophomore, junior or senior. Graduate students are also eligible for consideration. The recipient must be enrolled in studio art, blacksmithing, metalwork, jewelry-making or equivalent courses. The scholarship recipient must have a minimum grade point average of 3.0 or better and demonstrate financial need. (FAFSA)

The Friends of the ODU MFA Creative Writing Program Fellowship was established to assist a student enrolled in the MFA Creative Program in the College of Arts and Letters. The fellowship is based on merit and recipient must maintain a grade point average of 3.0.

***The Friends of Women's Studies Scholarship** is funded by an endowment in honor of Carolyn Rhodes for students majoring in women's studies. Two scholarships are awarded: one to a graduate student seeking an M.A. in humanities and one to an undergraduate student. Graduate students must have a minimum grade point average of 3.50. Recipients can be full- or part-time students. (FAFSA)

***The Linda Hyatt Wilson Graduate Scholarship in China Studies** was established by Linda Hyatt Wilson to assist a full-time graduate student who maintains a grade point average of 3.5, demonstrates financial need and is involved in the study of China's culture, history economy, politics, or foreign relations. (FAFSA)

***The Barbara M. Gorlinsky Memorial Fine Arts Scholarship** is made possible by an endowment the Gorlinsky family established in memory of their daughter. It is designed to assist students with financial need who are fine arts majors. Information concerning portfolio requirements is available from the Art Department. (PORTFOLIO, FAFSA) (757) 683-4047.

***The Amanda Kinzer Scholarship in Dance** was established to assist full-time undergraduate or graduate student(s) studying in the College of Arts & Letters. Preference will be given to a student(s) pursuing a degree in dance. The recipient must have a minimum grade point average of 2.75 for undergraduate students and 3.0 grade point average for graduate students.

***The Ralph Jackson and Clara Jackson Kingsbury Memorial Scholarship Endowment** was established to assist one or more undergraduate junior, senior and graduate student(s) majoring in English who has a cumulative GPA of 3.0 or better and demonstrates financial need. (FAFSA)

The Ashley Elizabeth Lawson Memorial Scholarship for Spanish Language Study Abroad was established to assist a student in the College of Arts and Letters enrolled in the Spanish Language Study Abroad Program at Old Dominion University. The recipient(s) must be full-time or part-time, Undergraduate or Graduate student.

The Marilyn Marloff and John Luker Dance Endowed Scholarship was established to assist a full-time undergraduate or graduate student(s) studying in the College of Arts and Letters who has a minimum grade point average of 2.75. Preference will be given to student(s) pursuing a degree in dance.

The Perry Morgan Fellowship in Creative Writing established in 2005 by Frank Batten and is awarded to two or more first year full-time graduate students enrolled in the creative writing program. Recipients must maintain a minimum 3.5 GPA.

***The Harvey Ronald Saunders Memorial Endowed Scholarship** was established by Mr. and Mrs. Louis M. Saunders to assist an undergraduate or graduate student majoring in the arts/fine arts with an emphasis in painting or drawing. The recipient must have a 3.00 minimum grade point average, demonstrate financial need and be a citizen of either the United States or Israel. Information concerning portfolio requirements is available from the Art Department. (PORTFOLIO, FAFSA) (757) 683-4047.

The Charles K. Sibley Art Scholarship is funded by an endowment made possible by contributions from the friends and patrons of the former Old Dominion University professor. Awards are to assist graduate or undergraduate students majoring in studio art or art history. Information concerning portfolio requirements is available from the Art Department. (PORTFOLIO) (757) 683-4047.

The David Scott Sutelan Memorial Scholarship is made possible by an endowment established by David, Charles, and May Scott Sutelan. The recipient will be seeking a master in fine arts in the creative writing program.

The Forrest P. and Edith R. White Endowed Scholarship Fund was established by Edith R. White to provide scholarships to students studying acting in the Old Dominion University Communication and Theatre Arts Department. (AUDITION)

The Joan Argyle Shambaugh Graduate Scholarship in English was established to assist students enrolled in the Master of Arts in English program within the Department of English in the College of Arts and Letters. The scholarship may be awarded to a full-time or part-time students who demonstrate financial need and maintains a grade point average of 3.0. The recipient(s) may be on enrolled as an on-campus student or online student.

***The Jerri Fuller Dickeski Endowed Master of Arts in English Scholarship** was established to promote graduate students pursuing a degree in the Master of Arts in English program with a concentration in Literature

in the College of Arts and Letters. The scholar may be full or part-time, must maintain a 3.0 grade point average, and demonstrate financial need. (FAFSA)

The Anne Tunyogi & Ildiko (Togi) Foldvary Endowed Scholarship was established to assist full-time rising sophomore students up through graduate student classification majoring in either of the Departments of History, Political Science, Sociology or in the Graduate Program in International Studies of the College of Arts & Letters. The recipient must maintain a minimum grade point average of 3.25, and complete an essay submission of no more than two pages outlining the student's interest in studies primarily relating to the historical, political, economic, ethnic, religious, cultural, linguistic and demographic forces in Central Europe, with particular focus on those of contemporary and historic Hungary in the Carpathian Basin, its neighbors and their indigenous ethnic Hungarian communities, especially, whenever possible, those living in Rumania's western province of Transylvania.

The Strome College of Business

***The Jeffrey W. Ainslie Endowed Scholarship in Real Estate** was established in 2006 by Jeffrey W. Ainslie to assist a full-time student in the Real Estate track in the Strome College of Business. The student must have a grade point average of 3.0 or higher and must demonstrate financial need. Preference will be given to the student with the highest GPA and demonstrating the greatest financial need. (FAFSA)

The Theodore F. and Constance C. Constant Fellowships are funded by an endowment that assists two full-time graduate students in the Strome College of Business.

***The Larry J. and Elizabeth J. Creef Endowed Scholarship** was established as an endowment by Larry J. and Elizabeth J. Creef to provide a scholarship to a student with an interest in pursuing a career with the Federal Bureau of Investigation (FBI), the CIA, the Department of Homeland Security, or other security agency of the U.S. government. The recipient must be a Virginia resident and a U.S. citizen, must demonstrate financial need, be a full-time student enrolled in the Strome College of Business, and must have declared a major in accounting. (FAFSA)

***The Kendra M. and Glen R. Croshaw Endowed Internship in Public Service** was established to assist a graduate student enrolled in the Strome College of Business that is currently working in or planning a career in Public Service. This scholarship will fund payment for internships in the public service sector, e.g., governmental, non-profit, or public service-related businesses. The scholar must be a full or part-time student maintaining a minimum grade point average of 3.5 and demonstrate financial need. (FAFSA)

***The Adam Gilmore Endowed Scholarship in Accounting** was established to assist a full-time entering graduate student in the M.S. Accounting Program. The recipient must hold an undergraduate degree from Old Dominion University and demonstrate financial need. (FAFSA)

***The Virginia Maritime Association/Carter T. Gunn Scholarship** was established to assist undergraduate students enrolled in the Strome College of Business majoring in Maritime and Supply Chain Management and/or an MBA student pursuing a concentration in Maritime & Port Management and demonstrating financial need. (FAFSA)

***The James A. Hixon Endowed Scholarship** was established by James A. Hixon to assist a full-time or part-time MBA student in the Strome College of Business. The student must have a cumulative GPA of 3.5 or better and demonstrate financial need. (FAFSA)

The Jesse and Sue Hughes International Accounting Scholarship was established by Dr. Jesse and Mrs. Sue Hughes to assist a full-time international student in the Strome College of Business who is a declared major in accounting with a focus on public sector financial management. Preference is given to a student at the graduate level, however, if there is not an eligible student at the graduate level, then an undergraduate student can be considered for the scholarship award.

The Jesse and Sue Hughes International Urban Studies and Public Administration Endowed Scholarship was established by Dr. Jesse and

Mrs. Roselyn S. Hughes to assist a full-time international graduate student in the Strome College of Business. The recipient must be enrolled in the Department of Urban Studies and Public Administration with a focus in public sector financial management and has successfully completed a graduate level accounting course. Secondary consideration will be given to an eligible undergraduate or graduate student in the Department of Urban Studies and Public Administration in the Department of Accounting with a focus in public financial management.

***The Max B. Jones Endowed Memorial Scholarship** was established by Katherine Jones Long and Susan K. Jones, in memory of their father, to assist a full-time or part-time graduate student enrolled in the Strome College of Business. The student must be a Virginia resident, must have a minimum cumulative GPA of 3.0, and demonstrate financial need. (FAFSA)

***The Pamela C. Kirk '88 and A. Russell Kirk Business Study Abroad Endowment** was established to assist full-time undergraduate and graduate students enrolled in the Strome College of Business to participate in Strome College of Business faculty-led study abroad experiences or an ODU affiliated study abroad program approved by a committee if an ODU faculty-led program is not offered. Preference will be given to full-time undergraduate or graduate students that demonstrate financial need. (FAFSA)

The Charles H. and Mary Kathryn Rotert Scholarship is funded by an endowment established by Mr. and Mrs. Charles H. Rotert Jr. This scholarship is awarded to a deserving student in the Strome College of Business.

***The Kilmer Accountancy Scholarship Endowment** was established to assist full-time undergraduate or graduate student(s) with a declared major in accounting. The recipient must demonstrate financial need. (FAFSA)

***The Scott and Lisa Thatcher Scholarship Endowment** was established to assist a full-time undergraduate or graduate student with a declared major in finance who demonstrates financial need. (FAFSA)

The Wolfgang Pindur Endowed Scholarship in Applied Research is funded by an endowment given by the School of Public Service to assist a full-time or part-time master's student (MPA or MUS) and/or a doctoral student (PhD in Public Administration and Urban Policy). An essay concerning the student's commitment to public service will need to be provided. (Essay) (683-6856)

***The Tevangudi P. Radhakrishnan Endowed Scholarship** was established by Rajesh Radhakrishnan to assist a full-time international student in the Strome College of Business.

The Susan (Merendino) Rowell Graduate Scholarship in Humanities was established in 2004 by Mrs. Susan S. Rowell to assist a graduate student majoring in humanities. The recipient must have a GPA of 3.4 or higher. This scholarship is renewable, and preference will be given to students with full-time enrollment status.

The Dr. Bruce L. Rubin Endowed MBA Scholarship was funded by former students of the Strome College of Business and friends. The scholarship recipient must be a newly-admitted and enrolled part-time student in the MBA program, have a minimum undergraduate grade point average of 3.2, and must have a minimum GMAT score of 600. Preference is given to a student who demonstrates volunteer service to the local business community.

The Marvin and Marilyn Simon Family Endowed Fellows Program in Business was established in 1994 to assist a master's or doctoral degree-seeking candidate attending the Strome College of Business. The recipient will be a talented student studying in business who has outstanding academic ability.

***The John R. Tabb Scholarship** was established by an endowment by the Tabb family in 2004. It is the desire of the family to assist a graduate student studying economic development with an international focus. The recipient must be a U.S. citizen with residency in North Carolina, Virginia, or Iowa. A minimum grade point average of 3.5 and demonstrated financial need is required. (FAFSA)

The Tidewater Association of Service Contractors (TASC) Scholarship was established to assist a full-time undergraduate or graduate student from the College of Engineering and Technology or Strome College of Business degree program. A full-time/part-time Masters Certification in Government Contracting program or any other certificate program supporting government contracting within the Continuing Education Departments may also be considered. The scholarship recipient must have a minimum grade point average of 3.0.

***The Shawn I. Tureman Scholarship Endowment** was established to assist full-time undergraduate or graduate students in the Strome College of Business who demonstrate financial need. (FAFSA)

***The School of Accountancy Graduate Scholarship Fund** was established to assist a graduate student(s) enrolled in the School of Accountancy or its successor program. The recipient may be selected based on merit and/or need. (FAFSA)

The Spore Scholars Endowed Scholarship was established to assist graduate student(s) enrolled in the Masters of Public Administration (MPA) program. The recipient(s) must maintain a grade point average of 3.25 or higher and must have professional experience in municipal government or the nonprofit sector.

The Strome College of Business General Scholarship was to assist a full-time student in the Strome College of Business.

The Karen and Jeff Tanner Scholarship Endowment for Doctoral Studies in Business was established to assist the top entering PhD student(s) as determined by the Graduate Program Director for Marketing and the Marketing Department Chair. Preference will be given to PhD student(s) with a concentration in marketing.

***The Joseph and Donna Vestal Endowed Scholarship** was established by Joseph Vestal to assist a full-time student in the Strome College of Business, who has a GPA of 2.5 or higher and demonstrates financial need. The recipient must also be involved in campus student activities in a leadership program. (FAFSA)

***The Rolf Williams Memorial Endowed Scholarship** was established by the Propeller Club of the United States, Port of Norfolk to assist a full-time undergraduate or full-time graduate student in the Strome College of Business. Student must be a rising senior with a declared major in Maritime and Supply Chain Management or a graduate student in the Master of Business Administration Program with a concentration in Maritime, Ports, and Logistics Management. Preference will be given to the student with greatest financial need and has at least a minimum of 3.0 cumulative GPA. (FAFSA)

The Darden College of Education & Professional Studies

The Anonymous Scholarship Endowment will assist a Ph.D. student in the Community College Leadership Program.

***The Coca-Cola Scholars Endowed Scholarship Fund** was established to assist a student enrolled in a financial aid-eligible program leading to teacher certification, licensure, and/or enhancement. Consideration will be given to all students studying via Digital Learning who have a minimum of 58 credit hours with a 3.00 cumulative grade point average. The recipient must also demonstrate financial need. (FAFSA)

The Sarah E. Armstrong Scholarship Endowment was established in 2002 in memory of the donor, Sarah E. Armstrong. The recipient must be a full-time student who has been accepted into the College of Education and must have an overall cumulative 3.2 grade point average.

The Linda Zydron Bamforth Scholarship in Early Childhood Education was established by Linda Z. Bamforth to assist a graduate student majoring in the Early Childhood Program (Pre-K -3) of the Darden College of Education. The recipient must be a full-time or part-time graduate student, has a minimum GPA of at least 3.5, and demonstrate love of children and dedication to early childhood education-evidenced by a copy of the applicant's last performance appraisal or student teaching evaluation.

The Dana Burnett Endowed Scholarship for Emerging Leaders in Higher Education was established to assist admitted students in the Darden College of Education enrolled in the Education Foundations and Leadership program interested in pursuing careers in higher education.

The Bennett's Creek Sertoma Club Scholarship was established by the Bennett's Creek Sertoma Club to assist a full-time graduate student seeking a degree in Speech Pathology. The recipient must have a grade point average of at least 3.0. Preference will be given to a student from Suffolk, Virginia.

***The Florence Pavlides Blankenship Memorial Scholarship** was established to assist students who are admitted to the Master in Library and Information Studies degree program, within the Darden College of Education and Professional Studies. Recipients must demonstrate financial need. (FAFSA)

The Darden College of Education and Professional Studies General Scholarship was established to assist a full-time student in the Darden College of Education and Professional Studies.

Mark A. Forget Endowed Scholarship in Content Area Reading Education was established to assist a graduate student enrolled in a Reading Program within the Department of Educational Curriculum and Instruction with coursework in Content Area Reading Instruction. Student must have a 3.5 grade point average or better.

***The Annabel & Hal Sacks Family Endowed Scholarship** was established to assist a full-time student in the Darden College of Education and Professional Studies who has met the requirements to enter into the teacher candidate internship at the graduate or undergraduate level. The student must demonstrate financial need and must be taking classes on campus. (FAFSA)

The J. Frank Sellow Memorial Scholarship in Education was established by the friends and family of Mr. Sellow. The recipient must have a GPA of 3.0 and major in a teacher education program. The recipient must also meet all teacher education admission standards established by their program of study and the Darden College of Education.

***The John Albert Gay Scholarship** is made possible by an endowment given by Dr. and Mrs. R. A. Gay (Florence Vaughan). This scholarship assists a graduate student majoring in special education. Preference is given to those specializing in the area of the emotionally disturbed child. Student must demonstrate financial need. (FAFSA)

The Jane M. Hager Literacy Scholarship was established to assist full-time or part-time graduate students in a Master's or Ph.D program with emphasis on literacy in the Darden College of Education. The recipient must maintain a minimum grade point average of 3.5. Selection will be based on recommendations of the Associate Dean of the Darden College of Education.

Sharon K. Mills Graduate Teaching Scholarship in Special Education was established to assist a student seeking a Master's Degree in Education, with Endorsement in Special Education: General Curriculum K-12 with an intent to teach students with disabilities or a Ph.D. with a major in Education and a concentration in Special Education student. The recipient must be an ODU alumna/alumnus that has taught in Virginia for at least a year. The recipient must live in Virginia with the exception of a military spouse that is enrolled in ODU via the online program.

***The Peggy Woofter Hull Scholarship** is made possible by an endowment given by Marie D. Woofter in memory of her daughter. It is awarded to a full-time doctoral student in education. Students are nominated by their graduate program director and are selected by the Office of the Dean of the Darden College of Education. Recipients must demonstrate financial need. (FAFSA)

***The Libbie and Albert Kaplan Scholarship in Special Education** was established to assist a full-time graduate student(s) seeking their Master's Degree in Special Education. Student(s) must demonstrate financial need and must have a 3.0 grade point average. (FAFSA)

***The Frank Hill Knecht Memorial Scholarship** is made possible by an endowment given by Lena Rosa K. Conley, an alumnus and retired staff member of Old Dominion University, in memory of her brother. This

scholarship assists a full-time graduate student in education. Preference is given to study in the area of special education. (FAFSA)

***The Ejner Emil "Karl" Karlsen Graduate Scholarship in Education** was established to assist a student(s) seeking a graduate degree from the Darden College of Education. The student must be a Virginia resident qualifying for in-state tuition, must demonstrate financial need, and may be enrolled at full or part-time status. (FAFSA)

The R.W. and Betty MacDonald Endowed Scholarship in Language Arts & Social Studies Education was established by Dr. Robert H. MacDonald and Ms. Betty Joan Matson in memory of and named for their parents. The recipient must be a graduate student enrolled in Language Arts or Social Studies Education and must have a minimum grade point average of 3.0.

***The Sertoma Club of Norfolk Scholarship for Speech Pathology** was established by the Sertoma Club of Norfolk to assist a Masters level first year full-time student enrolled in the Speech Pathology Program in the Darden College of Education. Student must have a minimum grade point average of 3.5 and demonstrate financial need. (FAFSA)

***The Strong Scholars Program Scholarship** was created to assist students in their final year of study in an approved teacher education program. This scholarship will be awarded to undergraduate students who have exhibited outstanding success and enthusiasm in field experiences prior to the final year of the program OR graduate students whose life experiences prior to enrollment reveal the same traits. Students must have achieved a minimum GPA of 3.0 in the two semesters prior to their final year and must demonstrate financial need. (FAFSA)

***The Louise M. White Memorial Scholarship** was established to assist a student pursuing a degree in the Darden College of Education and Professional Studies, first generation student that demonstrates financial need (FAFSA)

The Frank Batten College of Engineering and Technology

The Rao V. Arimilli and V. Lakshmi Arimilli Graduate Award in Mechanical and Aerospace Engineering was established to assist a PhD student in Mechanical and Aerospace Engineering, or its successor. The recipient must be making adequate academic progress in their PhD program in Mechanical and Aerospace Engineering. Preference is given to PhD students pursuing the thermal sciences.

The Batten College of Engineering and Technology General Scholarship was established to assist a full-time student in the Batten College of Engineering and Technology.

The Oktay Baysal Endowed Graduate Scholarship in Computational Engineering for Aerospace was established by Oktay Baysal to assist a graduate level Aerospace or Electrical and Computer Engineering student. The recipient must have a minimum grade point average of 3.0 and must have completed a minimum of 30 semester credit hours while attending ODU at either undergraduate and/or graduate level, or any combination thereof.

The BBG Incorporated Endowed Scholarship in Engineering was established by BBG Incorporated for a rising junior or senior majoring in Electrical Engineering, Electrical Engineering Technology, Computer Engineering, or Computer Engineering Technology who holds a minimum cumulative GPA of 2.5. The scholarship is also available to a graduate student majoring in Electrical Engineering or Computer Engineering with a minimum cumulative GPA of 3.0. The recipient will also be considered for an Engineering Cooperative Education/Intern position with BBG Incorporated.

The Civil and Environmental Engineering Visiting Council Graduate Scholarship in Engineering was established by The Civil and Environmental Engineering Visiting Council (CEEVC) in 2003. The recipient must be either full- or part-time civil or engineering graduate student who has a minimum graduate or undergraduate grade point average

of 3.25. Transfer students from other colleges or universities are also eligible for consideration.

***The Bruce and Carol Conway Scholarship Endowment** was established to assist a student that is pursuing a degree within the Batten College of Engineering & Technology. The recipient must demonstrate financial need. (FAFSA)

The Day-Helmick Family Endowed Scholarship in Engineering was established to assist a student in the Batten College of Engineering and Technology.

The Dewberry Endowed Scholarship was established to assist full-time students in the Batten College of Engineering and Technology in the civil engineering, electrical engineering, or mechanical engineering disciplines.

***The Dr. Robert A. and Ronnie Slocum Magoon Scholarship for Aerospace Engineering** was established by Robert A. Magoon to assist a graduate student majoring in Aerospace Engineering. Scholarship recipient must demonstrate financial need. (FAFSA)

The Newport News Shipbuilding and Huntington Ingalls Industries Scholars Program was established to assist rising junior, senior and/or graduate students who are declared in a STEM major related to engineering, analytics, information technology, and/or computer sciences. Student must maintain a minimum undergraduate grade point average of 2.0, and a minimum graduate grade point average of 3.0. The recipient must be a U.S. citizen or permanent resident. First preference will be given to military-affiliated student or student veterans. Second preference will go to students interested in working and living in Hampton Roads.

The Prabhu Endowed Graduate Scholarship in Mechanical Engineering was established to assist graduate level Mechanical Engineering student with a minimum grade point average of 3.0 at the undergraduate or graduate level. The scholar(s) must be a full-time student or equivalent if registered as a Graduate Assistant. Preference will be given to international students interested in research and other scholarly activities.

***The Christopher Kelly Rapp Memorial Scholarship in Civil & Environmental Engineering** was established to assist a student with a declared major in Civil and Environmental Engineering who has graduated from a Virginia High School and demonstrates financial need. (FAFSA)

***The Rollie Dubbe' Engineering Scholarship** is funded by an endowment to assist a full time graduate engineering student who holds a minimum cumulative GPA of 3.0. The scholarship recipient must be enrolled in the civil engineering program with a preference in geo-technical engineering. Must demonstrate financial need (FAFSA).

The Stuart H. Russell Memorial Scholarship is made possible by an endowment established by the estate of Olive L. Spicer. The scholarship is awarded to a deserving student in the Frank Batten College of Engineering and Technology with particular preference given to a student in the Electrical and Computer Engineering Department with an interest in electronics.

The Tiwari Endowed Graduate Scholarship in Mechanical Engineering was established by Surendra N. Tiwari. The recipient must be a graduate level Mechanical Engineering student and be enrolled full-time or equivalent if registered as a Graduate Assistant. Must have a minimum Undergraduate or Graduate GPA of 3.0 and preference is given to an international student interested in scholarly activities and research.

The Triton International Enterprises Scholarship Endowment was established to assist full-time undergraduate or graduate student(s), enrolled in the Frank Batten College of Engineering and Technology (BCET), born or a documented permanent resident from the country of Turkey with preference given to student(s) residing in a city OTHER THAN Istanbul, Ankara, Izmir, Bursa, Antalya or Adana.

***The Clarke and Susan Vetrone Endowed Scholarship** is funded by an endowment established by Clarke and Susan Vetrone to assist one undergraduate and one graduate student with an intending or declared major in the Batten College of Engineering and Technology. Both undergraduate and graduate student must be enrolled full-time and demonstrate financial

need. Undergraduate student must have a minimum GPA of 2.75 and preference will be given to a student with learning disabilities. Graduate student must have a minimum of 3.0 GPA. (FAFSA)

***The Edward L. White Endowed Scholarship** was established by Edward L. White, Jr. and Margaret W. Moore to assist a computer engineering student. The recipient must be a Norfolk resident, have a minimum 3.30 grade point average, and demonstrate financial need. (FAFSA)

The George C. Winslow Scholarship is made possible by an endowment to assist a graduate or undergraduate student who has demonstrated financial need and has obtained at least a 2.50 grade point average while pursuing a degree in mechanical engineering. (FAFSA)

The Anthony B. Woodell and Paul A. Woodell Aerospace Engineering Scholarship was established to assist a senior taking a senior concentration in aerospace engineering or pursuing an aerospace minor within The Batten College of Engineering and Technology. Preference will be given to the same student to continue their studies at ODU by pursuing a master's degree or Ph.D. in aerospace engineering. Preference will be given to full-time students, awarded on merit and/or financial need, and the student must maintain a grade point average of 3.0 at both undergraduate and graduate levels.

***The Captain Joseph F. Yurso Scholarship Endowment** was established to assist students in the Batten College of Engineering and Technology who demonstrate financial need and are in good academic standing. (FAFSA)

The College of Health Sciences

The Thomas Charles Auclair (*78) Scholarship is made possible through an endowment given by Mr. and Mrs. George E. Auclair in memory of their son. The scholarship supports a student pursuing studies in environmental health.

The Bennett's Creek Sertoma Fishcher-Grandy Endowed Scholarship was established to assist a full-time graduate student seeking a degree in Speech Pathology. The recipient must have a grade point average of at least 3.0. Preference will be given to a student from Suffolk, Virginia.

The College of Health Sciences General Scholarship was established to assist a full-time student in the College of Health Sciences.

***The DPS, Inc. Graduate Dental Hygiene Endowed Scholarship** was established by DPS, Inc. to assist a full time first or second year graduate dental hygiene student that has admitted into the Old Dominion University Dental Hygiene Program. The scholarship recipient must demonstrate financial need and hold a minimum GPA of 3.0. (FAFSA)

***The Echternach Scholarship** was established to assist a graduate student enrolled in the School of Physical Therapy. The recipient must have a minimum grade point average of 3.0 and must demonstrate financial need. An essay submission is required based on a topic chosen by the scholarship committee from the School of Physical Therapy. (FAFSA)

***The Friends of Dental Hygiene Endowed Scholarship** was established by Mrs. Linda Fox Rohrer in 2004. Recipients must be either full-time graduate or undergraduate students. The scholarship will be awarded to a deserving student in the School of Dental Hygiene. The recipient must also demonstrate financial need (FAFSA).

***The Gene W. Hirschfeld Scholarship** is supported by an endowment given by the former chair of the Department of Dental Hygiene and Dental Assisting. The scholarship is awarded to undergraduate or graduate students who demonstrate financial need and are enrolled in the Dental Hygiene Program. (FAFSA)

The Kate and George Maihafer Scholarship in Physical Therapy was established by George Maihafer to assist full-time graduate students majoring in Physical Therapy who have a minimum GPA of 3.25. Students eligible for the scholarship may apply for the scholarship starting in the spring semester of their first year of study. Students interested in the scholarship must submit an essay no longer than 500 words to the Physical Therapy Curriculum Committee describing their career goals within the

physical therapy profession after graduation. The scholarship is to be awarded in the fall semester.

***The George Maihafer Scholarship in Physical Therapy Endowed Scholarship** was established to assist full-time graduate students enrolled in the School of Physical Therapy. The recipient(s) must maintain a grade point average of 3.0 and demonstrate financial need. (FAFSA)

***Dr. Karen Royall Endowed Scholarship for Physical Therapy Students** was established to assist a full-time graduate student enrolled in the Physical Therapy Program (or its successor). Preference is given to a student with an interest in pediatrics from the Hampton Roads Region of Virginia with a minimum GPA of 3.0. Student must complete an essay (no longer than 500 words) describing their reasons for pursuing a career in pediatric physical therapy and the experiences that led to this decision to the Physical Therapy Scholarship Committee.

***Linda Fox Rohrer Endowed Scholarship for Dental Hygiene** was established to assist full-time graduate or undergraduate students. The scholarship will be awarded to a deserving student in the School of Dental Hygiene. The recipient must also demonstrate financial need (FAFSA).

***The Linda Fox Rohrer Graduate Dental Hygiene Endowed Scholarship** was established to assist a full time first or second year graduate dental hygiene student that has admitted into the Old Dominion University Dental Hygiene Program. The scholarship recipient must demonstrate financial need and hold a minimum GPA of 3.0. (FAFSA)

***Sentara Scholars College of Health Sciences Annual Scholarship** was established to assist an in-state undergraduate or graduate student enrolled in a healthcare or healthcare-related program. Student(s) must demonstrate financial need, be in compliance with the institution's Student Code of Conduct and must be in good academic standing. (FAFSA)

The Dr. Deanne Shuman Endowed Scholarship in Health Services was established to assist students with a regular admission status into the Ph.D in Health Services Research program on the basis of complete and fully evaluated credentials and recipient must be in good academic standing. The recipient must have a minimum grade point average of 3.25, be enrolled as a full-time student, and preference is given to dental hygienists interested in teaching and research. Students interested in this scholarship must submit an essay no longer than 500 words to the College of Health Science's Ph.D Advisory Committee describing his/her career goals in the health services research field after graduation.

The Sharon C. Stull Oral Health Community Impact Scholarship was established to assist all enrolled dental hygiene student(s) in the BSDH and MSDH programs. Interested student(s) must have a minimum grade point average of 3.0 and must submit an application packet to the Dental Hygiene Scholarship Committee. The packet should contain information that describes his/her leadership, volunteer and extra-curricular initiatives to increase oral health literacy in the community and include a letter of support from impacted volunteer/community organization(s).

The College of Sciences

The Dr. Hussein Abdel-Wahab Memorial Scholarship was established to assist a graduate student majoring in Computer Science.

The Sarah E. Armstrong Science Scholarship Endowment was established in 2002 in memory of Sarah E. Armstrong. The recipient must be a full-time student who has been accepted into the College of Sciences and must have an overall cumulative 3.2 grade point average.

The Virginia S. Bagley Endowed Scholarship is made possible by Mrs. Bagley's estate and is awarded to a graduate or undergraduate student in the Department of Biological Sciences.

The Richard T. and Nancy P. Cheng Award in Computer Science was established to assist one graduate student and one or more undergraduate student(s) enrolled in the Department of Computer Science in the College of Sciences. The graduate scholar must be in good academic standing and making good progress on his/her degree. The undergraduate scholar(s) may

be awarded up to the extent funds are available and must have a minimum grade point average of 3.5.

The Dr. Allen K. Clark Endowed Scholarship in Chemistry was established to assist a full-time undergraduate or graduate student majoring in chemistry or organic chemistry. Preference will be given to a student who is an affiliate of the American Chemical Society. The recipient must maintain a grade point average of at least 3.0.

Lee Entsminger Scholarship for Coastal Geology was established to assist a student emphasizing the Geosciences. If no such student is available, the department chair may recommend any student enrolled or about to enroll in graduate studies in the department of Ocean, Earth, and Atmospheric Sciences. Recipient(s) must be in good academic standing and maintain a 3.0 grade point average or higher.

***The Hampton Roads Maritime Scholarship** is funded by an endowment from the Hampton Roads Maritime Association and is given to a graduate student in the Department of Ocean, Earth, and Atmospheric Sciences with financial need. (FAFSA)

The Neil and Susan Kelley Endowed Scholarship Fund, established by Neil Kelley in 2001, provide financial support to a graduate student pursuing a Master of Science in Oceanography. The scholarship is awarded strictly on merit and may be renewed annually.

The Harold G. Marshall and Vivian J. Marshall Scholarship in Biology is funded by an endowment given by Harold G. Marshall and Vivian J. Marshall. This scholarship is provided to assist a full-time graduate student in the Department of Biological Sciences with a specific concentration in ecology.

The Brian Donald Diederich and Flavia Alexandra Osorhean Scholarship Endowment for Doctoral Research in Nuclear Physics was established to provide an award to an incoming experimental or theoretical nuclear physics Ph.D. student. Second priority is to provide an award to an existing experimental or theoretical nuclear physics Ph.D. student. Third priority is to provide an award to an incoming or existing Ph.D. student in another field within the Department of Physics.

The Nick Savage Scholarship was established by Anne Raymond Savage to assist a full-time undergraduate or graduate student majoring in an area of science that involves field work and the study of plant life. Preference will be given to a student who is entering or returning to the field of teaching science. Student must maintain a grade point average of 3.0.

The Travis Priest Family Endowment was established to assist an undergraduate or graduate student in good academic standing. The recipient must work with the Systems Group within the Department of Computer Science in the College of Sciences.

***The Jacques S. Zaneveld Endowed Scholarship** was established by Dr. Jacques S. Zaneveld to assist a graduate student in the Department of Ocean, Earth, and Atmospheric Sciences of the College of Sciences. The recipient must demonstrate a need for funding in the preparation of his/her dissertation in the field of biological oceanography. (FAFSA)

The School of Nursing

The Atlantic Anesthesia Endowed Scholarship for Nurse Anesthesia Students was established to assist full-time nurse anesthesia students in good standing. The scholarship will support tuition for any given semester of enrollment.

***The Bon Secours Hampton Roads Health System Endowed Scholarship for Graduate Nursing Students** was established to assist a full-time graduate student(s) enrolled in the Old Dominion University Nursing Program. The recipient(s) must demonstrate financial need and are encouraged to participate in a clinical experience with a minimum of 120- 250 clinical hours depending on program of study at a Bon Secours Hampton Roads Health System facility, or its successor. The student(s) will agree to placement in an ambulatory, acute, or long-term care depending on applicability to course of study. (FAFSA)

***The Chesapeake Regional Medical Center Nursing Endowed Scholarship** was established by the Chesapeake Regional Medical Center to assist a full time undergraduate or graduate student enrolled in Old Dominion University's Nursing Program. The student must demonstrate financial need and must agree to accept 120 clinical hours at Chesapeake Regional Medical Center, or its successor. (FAFSA)

***The Joseph Fleischmann Scholarship Endowment** was established to assist a full-time undergraduate sophomore, junior, senior or graduate student enrolled in pre-med or nursing major. Preference is given to a student pursuing medical research. The recipient must maintain a minimum GPA of 3.0 and must demonstrate financial need. (FAFSA)

***The Paul W. Imogene M. "Jean" Lowe Endowed Nursing Administrator/Executive Scholarship** was established to assist students enrolled in the School of Nursing graduate administrator or executive programs. The recipients must demonstrate financial need, must submit an essay about their desire for an advanced nursing degree, prior nursing practice experience, and aspirations for a nursing administrative/executive leadership position, and maintain a grade point average of 3.0. (FAFSA)

The Barbie Morgan Endowed Scholarship for Nurse Anesthesia Students was established to assist full-time senior nurse anesthesia student(s). Students interested in the scholarship must submit an application to the Graduate Nursing Awards Committee. The application packet should describe his/her volunteer activities, include a letter of support from the volunteer organization(s), and provide evidence of demonstrated clinical excellence as reported by preceptor feedback and evaluations.

The School of Nursing General Scholarship Fund was established to assist full-time student(s) in the School of Nursing.

The Graduate School

The Alumni Association Outstanding Scholar Fellowships were established in 1984. The fellowships are awarded to two graduate students in good academic standing who are attending Old Dominion University on a full-time or part-time basis. One fellowship must be awarded to an Old Dominion University alumnus/alumna who has been admitted as a full-time student to a graduate program at the University.

The Graduate School General Scholarship was established to assist a full-time student in the Graduate School. The recipient must demonstrate extraordinary academic merit and must maintain a grade point average of 3.5 or higher.

The Meredith Construction Company Scholarship is made possible by an endowment given by the Meredith Construction Co. Inc., Meredith Realty, et al., and members of the Meredith family. The award is given to a graduate student demonstrating academic merit in his/her chosen curriculum.

Military Awards

Army Reserve Officer Training Corps (AROTC) participants may qualify for scholarships. More information on application procedures and program requirements is available from the faculty of the Department of Military Science. (PARTICIPATION) (757) 683-3663.

Naval Reserve Officer Training Corps (NROTC) participants may qualify for full or partial scholarships. More information on application procedures and program requirements is available from the faculty of the Department of Naval Science. (PARTICIPATION) (757) 683-4744.

Other Awards (General)

The Bannon Foundation Quasi-Endowed Scholarship was established to assist four students of the Eastern Shore of Virginia with their commuter expenses.

The Nancy Topping Bazin Scholarship was established by the Friends of Women's Studies to assist a graduate student in women's studies.

***The John R. Burton Jr. Scholarship** is made possible by an endowment given by John R. Burton Jr. This scholarship assists students who demonstrate financial need. Preference is shown to high school graduates who have been reared in the Hope Haven Children's Home. (FAFSA)

***The Robert Claytor Memorial Scholarship** is funded by an endowment from the friends of Robert Claytor for a student who demonstrates financial need, according to federal needs analysis. (FAFSA)

The Charles H. Eure Memorial Scholarship is awarded to a marine science or engineering student who has a 3.00 grade point average and is of sound moral character. Preference will be given to a STASR (South Tidewater Association of Ship Repairers) company family member.

***The Wil & Michaelene James Endowed Scholarship** was established to assist student(s) pursuing a degree in the STEM-H field, must be a native to the Hampton Roads area in Virginia, demonstrate financial need and must have a minimum grade point average of 2.5. (FAFSA)

***The Pamela C. Kirk '88 and A. Russell Kirk Study Abroad Quasi-Endowment** was established to assist full-time undergraduate and graduate students enrolled in Old Dominion University to participate in faculty-led study abroad experiences or an ODU affiliated study abroad program approved by a committee if an ODU faculty-led program is not offered. Preference will be given to full-time undergraduate or graduate students demonstrating good academic standing, no violations of University's Honor Code, and demonstrating financial need. (FAFSA)

The Memorial and Recognition Scholarship Fund is an endowed scholarship that will be awarded to a student with a minimum grade point average of 3.00 and is able to demonstrate involvement in community service.

***The Sherwood/Portsmouth Scholarships** are funded annually by a trust established by the late Calder Sherwood III, a professor emeritus in the departments of Chemical Sciences and Physics/Geophysical Sciences. Professor Sherwood served on the Old Dominion University faculty for 38 years. The scholarships are awarded to graduates of public high schools in Portsmouth, Virginia who demonstrate financial need. (FAFSA)

***The Charles Redford "Red" Stone Scholarship** was established to assist a full-time student in good academic standing. The student must demonstrate financial need. (FAFSA)

The Town-N-Gown Scholarship has been established by Town-N-Gown, an association dedicated to promoting cooperation between the Hampton Roads community and the University in order to promote better understanding in fulfilling the aims and ideals of each. The scholarship recipient rotates annually from the following: (1) resident of the greater Hampton Roads area, (2) a member of or dependent of active duty military personnel, and (3) a dependent of an Old Dominion University faculty or staff member.

The Hugh L. Vaughan Scholarship has been established by an endowment made by Mr. Hugh L. Vaughan to assist handicapped students. Preference is given to blind students. Recipients must be native-born Virginians.

***The Jane L. and Robert H. Weiner International Affairs Scholarship** is made possible through an endowment established by Mr. and Mrs. Weiner to assist a student who will be studying abroad through the International Student Exchange Program (ISEP). Preference will be given to students who will study in a Third World or developing country for the purpose of fostering international understanding and peace and who demonstrate academic achievement and financial need. (FAFSA)

***The Calvert S. Whitehurst Scholarship** is funded by an endowment established by Mr. Robert B. Kendall and augmented by the Whitehurst Scholars Scholarship Foundation. The endowment recognizes the contribution of both Mr. Calvert S. Whitehurst and his son, Professor G. William Whitehurst, former member of the U.S. Congress. The scholarship is awarded to a student with financial need who demonstrates academic potential. (FAFSA)

The Linda Hyatt Wilson Graduate Scholarship in China Studies was established by Linda Hyatt Wilson to award one scholarship to a full-time graduate student who has a 3.5 grade point average, demonstrates financial need, and is involved in the study of China's culture, history, economy, politics, or foreign relations.

The Anita Clair Fellman Endowed Service Learning Scholarship is funded by an endowment established by Dr. Carolyn H. Rhodes to assist one or more full time or part-time graduates, or undergraduate students who participate in a service-learning project through the Department of Women's Studies. The recipient will be selected by the chair of the Women's Studies Department and another Faculty member in the department.

Other Financial Aid Resources

The Parker Lesley Endowed Fund has been established for students who demonstrate need for special circumstances. Special circumstances are defined as emergency travel, supplies, equipment, etc. (ESSAY) (757) 683-6856.

The James Stamos Scholarships in Voice and Piano are made possible by a bequest from Mr. Stamos to assist several students who are majoring in either voice or piano. Information concerning audition requirements is available from the Music Department. Contact Mr. Dennis Zeisler, chair of the department. (AUDITION) (757) 683-4061.

The Student Activities Scholarships in music are awarded to students who participate in one or more Music Department activities including concert choir, band, orchestra, Madrigal Singers and brass choir. Information concerning audition requirements is available from the Music Department. Contact Mr. Dennis Zeisler, chair of the department. (AUDITION, PARTICIPATION) (757) 683-4061.

The Viburnum Acting Endowed Scholarship Fund was established by the Viburnum Foundation to provide monetary awards to acting students. (AUDITION) (757) 683-3608.

The Institute for Learning in Retirement Scholarship is a two-year scholarship established by the Institute for Learning in Retirement for a student of any discipline who demonstrates financial need, has a baccalaureate degree, is a resident of Hampton Roads, and has a 3.00 grade point average. (757) 368-4160.

The Monarch Athletic Bands Endowed Scholarship was established by Old Dominion University Educational Foundation. The recipient(s) must be a full-time undergraduate or graduate student, successfully completes an audition, and must maintain a minimum GPA of 2.5 for an undergraduate student or minimum GPA of 3.0 for a graduate student.

State Programs

The Virginia Student Financial Assistance Program (VSFAP) was established to assist students with financial need. VSFAP Funds are used for need-based grants to Virginia resident undergraduates or for assistantships and fellowships to graduate students. As funds are limited, they are awarded on a first-come, first-served basis, with students meeting the priority FAFSA receipt deadlines established by the University given first consideration. Awards are limited to 125% of degree (cannot exceed 150 attempted credits). Specific Satisfactory Academic Progress requirements that are more rigorous than those for federal financial aid eligibility consideration apply. Interested students are encouraged to visit the State Council of Higher Education for Virginia web site at <http://www.schev.edu> (<http://www.schev.edu/>) for detailed information and program regulations and guidelines.

Veterans and Dependents Benefits

Virginia Military Survivors and Dependents Education Program (VMSDEP)

The Virginia Military Survivors and Dependents Education Program (VMSDEP) is a Commonwealth of Virginia program that provides education benefits to spouses and children of qualifying veterans who have been rated by the U.S. Department of Veteran Affairs (USDVA) (<https://www.va.gov/education/survivor-dependent-benefits/>) as totally and permanently disabled or at least 90 percent permanently disabled as a result of military service or qualifying military service members killed, missing in action, taken prisoner, or who have been rated by the USDVA as totally and permanently disabled or at least 90 percent permanently disabled as a direct result of involvement in covered military combat. Military service includes the United States

Armed Forces, United States Armed Forces Reserves, or the Virginia National Guard. VMSDEP assists survivors and dependents of qualified veterans or service members in attaining their educational goals.

The Virginia Department of Veterans Services (VDVS) (<https://www.dvs.virginia.gov/home/showpublisheddocument/148/638538872385700000/>) is responsible for certifying eligibility for benefits under the Virginia Military Survivors and Dependents Education Program.

The State Council of Higher Education for Virginia (SCHEV) (<https://www.virginia.gov/agencies/state-council-of-higher-education-for-virginia/>) and Virginia's public colleges and universities are responsible for applying the financial aid benefits (tuition/fee waiver, stipend) available under VMSDEP.

Benefits are available for up to eight semesters, the equivalent of four academic years.

Students who are certified by VMSDEP are eligible for educational benefits (a waiver of tuition and mandatory fees). **Housing and meals are not included.**

In addition, as funds are available, eligible students may receive a stipend to offset other educational expenses incurred by the student, such as room, board, books, and supplies. Please note that the stipend will **not be available** for the advance purchase of books.

Only students appearing on the verification rosters released by SCHEV to the institutions will be funded for the terms specified as authorized, regardless of certification/verification from any other source.

Stipends Priority Funding System for Fall and Spring

Because there may not be sufficient funding to make full VMSDEP stipends to all eligible students, a priority funding system will be used to determine the order and number of stipends. Students in a higher Priority category must receive their full projected annual stipend, as determined by SCHEV based on student enrollment level before subsequent categories are considered for funding. Only students appearing on the verification rosters released by SCHEV to the institutions will be funded for the terms specified as authorized, regardless of certification/verification from any other source.

To apply for VMSDEP, students must submit the application on the Virginia Military Survivors web site <https://www.dvs.virginia.gov/>.

Once approved, students are required to report enrollment plans via the VMSDEP portal for each term they wish to use benefits within the established open and close dates. Once the request is approved by VMSDEP, the student's name will be placed on the roster in the VMSDEP portal. The student's financial aid account will be noted with the enrollment and expected tuition amount. Please note VMSDEP only covers the tuition costs. Housing and meals are not included. Tuition payment may be adjusted for enrollment changes or tuition charge revisions.

The student's name must match the name listed in the ODU system to be processed. For example, if the name listed with VMSDEP is Bobby Smalls, the ODU name listed must also be Bobby Smalls. It cannot be Bob Smalls or Robert Smalls. VMSDEP funds cannot be processed if the student names do not match in both systems. It is strongly encouraged to have the student social security number on file to prevent processing delays. The student's domicile/residency must also be determined. Submit the request for instate tuition form or contact the Office of the Registrar for assistance. Students with a pending domicile status cannot be processed.

VMSDEP can only pay the authorized term tuition charge. Late fees may be assessed if the student is not listed in the portal timely and will be the responsibility of the student.

Approval for late submission of VMSDEP request for awarding of benefits will be at the discretion of the ODU Office of Financial Aid.

The student must report enrollment plans in the VMSDEP portal during the open and close established deadlines for tuition to be applied to the term requested. If you do not complete your enrollment update by the listed *Close (Due by)* date and time, you must request retroactive approval

from your attending Virginia public college or university; and **if approved**, the respective institution will notify the VMSDEP Office of such approval; upon which, the Office will authorize the qualifying semester. The financial aid office decision on retro request is final.

Note: Once the academic year is closed for processing (August 1), ODU can no longer approve VMSDEP tuition retro request.

Students should follow the VMSDEP application deadline guidelines to ensure they are approved for the semester they want to start the benefit.

VMSDEP Award Information

As a state veterans' benefit, the VMSDEP will be included as a financial resource in the financial aid package and may reduce state grants*, University grants or scholarships, federal loans, federal work-study, and private loans. Each financial aid offer type is different, so the benefit may affect each person's offer differently.

***A student cannot receive both VMSDEP and state grants (Commonwealth and VGAP). The state grant award will be cancelled once the student is authorized for VMSDEP.**

Tuition benefits (Tier 1 and Tier 2)

Eligible students, as confirmed by DVS, are guaranteed a waiver of all tuition and mandatory fees for eight semesters at a Virginia public college or university and Eastern Virginia Medical School. Please note tuition and mandatory fees are waived.

Housing, dining, books, and supplies are considered educational expenses; however, they are not considered mandatory fees and are not waived under this program.

Stipend benefits (Tier 2 only)

Eligible students may receive a stipend to offset educational expenses such as housing, dining, books, and supplies. The State Council of Higher Education for Virginia (SCHEV) works with DVS and the public colleges and universities in disbursing funds. The amount of the stipend is determined annually by SCHEV and is dependent on the student's enrollment status, the number of participating students, and available funding. Stipends are awarded later in the semester when funds are received from SCHEV.

Funds will be applied to the student's account 2-3 business days AFTER the last day to withdraw and receive 50% tuition refund or credit deadline of each term.

Students eligible for the stipend will receive those funds later in the semester once approved by SCHEV.

Students should not allow technical issues to prevent them from requesting their benefits. Contact VMSDEP directly for help with technical issues. Representatives are available to assist Monday-Friday, 8 a.m. - 4:30 p.m. Their contact information is as follows:

VMSDEP Contact Information

Phone - (804) 225-2083

Email: vmsdep@dvs.virginia.gov

Delays in submitting your VMSDEP request can lead to holds and late penalties. To avoid delays and possible late penalties, submit your request in a timely manner and by following up with VMSDEP should have questions or concerns.

VMSDEP is handled by the Office of Financial Aid Office. All other Veterans programs are handled by VASERVICES in the Military Connections Center.

Information about the administration of education assistance under the Veterans Administration may be obtained from the VA website: www.vba.va.gov (<http://www.vba.va.gov/>). Students wishing to use their VA benefits at Old Dominion University may find further information on the Military Connections Center <https://www.odu.edu/>

military-connection. (<http://www.odu.edu/military/students/veterans-services%20/>)

This institution is approved to offer GI Bill® educational benefits by the Virginia State Approving Agency. GI Bill® is a registered trademark of the U.S Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website at <http://www.benefits.va.gov/gibill> (<http://www.benefits.va.gov/gibill/>).

Contact the Military Connection Center for further assistance:

1106 Monarch Hall
phone: 757 683-7153
email vaservices@odu.edu.

Termination of Aid

Failure to remain in good academic standing will result in automatic withdrawal of financial aid by the University. Failure to comply with the conditions of a financial award will cause its termination and the return of any unexpended funds as well as repayment, in some cases, of funds already utilized. Undergraduate specific endowed scholarships will be withdrawn immediately for the term in which an undergraduate student's classification advances to an admitted graduate student status.

Financial Awards for Graduate Students

Financial awards are determined by the graduate program and college dean following the policies and guidelines described below. For specific qualifications, conditions, amounts, length and types of awards, contact the appropriate graduate program director.

Graduate Assistantships

A. Nature of the Graduate Assistantship

A Graduate Assistant (GA) is expected to participate directly in either instructional, research, or administrative duties in support of the ongoing activities of the University's academic, research, and service units.

It is the University's intention to make the assistantship an integral and valuable part of the student's graduate education. It should be viewed as an apprenticeship in teaching, research, or administrative service.

B. Categories of Graduate Assistants

1. **Graduate Teaching Assistant (GTA)** - participates directly in teaching activities, such as the teaching of a course, holds responsibility for a laboratory section, or is assigned to specific instructional support or related activities. The University recognizes two levels of graduate teaching assistant responsibilities and activities: GTA-Instructors and GTA-Assistants.
 - GTA-Instructors directly communicate and interact with students in ways that lead to the conveyance of knowledge or skills required to successfully complete the course. Included in this category are graduate students who serve as instructors, laboratory supervisors, recitation leaders, and tutors.
 - GTA-Assistants do not directly instruct students; instead, they serve as graders and/or classroom or laboratory assistants.
2. **Graduate Research Assistant (GRA)** - participates directly in research or support activities conducted by faculty members or administrators. The University recognizes two categories of graduate research assistant responsibilities and activities: GRA-Faculty Assistants and GRA-Project Assistants
 - GRA-Faculty Assistants assist faculty on non-sponsored research activities.
 - GRA-Project Assistants assist faculty on sponsored research projects funded through external grants and contracts managed by the Old Dominion University Research Foundation, or through funds generated by the Educational Foundation or gift accounts.
3. **Graduate Administrative Assistant (GAA)** - participates directly in the support of the activities of a University administrative unit. Such positions must provide graduate students with an academically and/or programmatically appropriate level of intellectual and/or professional experience. The appointment of GAAs in non-academic units is to be made in consultation with the graduate program directors of the pertinent academic units.

C. Graduate Teaching Assistant Instructor Institute (GTAI Institute) Requirement

1. All GTA-Instructors will be required to pass the GTAI Institute prior to their semester of appointment. GTA-Assistants are not required to pass the GTAI Institute, but they must be approved and supervised by their appropriate faculty instructor.
2. The Institute is offered twice a year during the week before fall and spring classes begin. All graduate assistants, including those who have research and/or other non-instructional assignments, are encouraged to participate in the Institute in anticipation of future teaching assignments. The Institute is comprised of the University portion and the college portion. Students are required to attend both portions to pass the Institute. Departments are encouraged to develop their own on-going programs for training graduate teaching assistants. Such programs

should be tailored to the specific needs of the discipline and department policies.

3. International students must pass the SPEAK test prior to attending the GTAI Institute. This requirement may be waived if the student has a score of 26 or better on the Speaking portion of the iBT TOEFL exam or a score of 8.0 the speaking portion of the IELTS exam. Waivers are approved by the Graduate School.

D. Application

Application forms for graduate assistantship stipends paid by the University (GTAs, GRAs, and GAAs) are available from the Office of Admissions or from the University's web page. The completed form, together with a brief essay by the applicant discussing academic interests and career objectives, must be submitted to the appropriate graduate program director or office making the appointment, as soon as possible for fullest consideration. Applications for GRA positions funded through ODURF are made through the faculty member who is the principal investigator, the department chair, or graduate program director.

E. Eligibility

1. Only students admitted to graduate degree programs in regular or provisional status on the basis of complete and fully evaluated credentials and in good academic standing are eligible for appointment to a graduate assistantship. Students appointed as graduate assistants must be enrolled at least three-quarter time in fall and spring and at least half time in summer with the exception of those doctoral students who have advanced to candidacy or those master's students who are in their final semester of study (see the section in this policy on "Enrollment Requirements;" see also the related Graduate Catalog policy on "Enrollment Status"). Additional criteria apply for appointment as a graduate teaching assistant (GTA) (see the sections in this policy on "Categories of Graduate Assistants" and "Graduate Teaching Assistant Instructor Institute (GTAI Institute) Requirement").
2. All students appointed to a graduate assistantship are required to verify their identity and employment eligibility and complete an I-9 Form, according to University procedures, prior to commencing their duties. This requirement is established in order to comply with the Immigration Reform and Control Act of 1986. Students are also required to complete the Child Support Disclosure and Authorization Form, the Commonwealth of Virginia's Policy on Alcohol and Other Drugs Form, ODU Use of Electronic Communications and Social Media Form, the Commonwealth of Virginia Selective Service Form, and the Employee Payroll Direct Deposit Authorization Form.

Students who are not in good academic standing (i.e. a GPA below 3.0) may not be appointed to an assistantship. An existing assistantship appointment will be terminated for any student whose GPA falls below 3.0 and whose status subsequently moves to probationary at the end of a given semester. An exception may be granted for one semester by the Dean of the Graduate School or designee provided that 1) a remedial plan of study with set benchmarks is developed and confirmed in writing with the student, the student's advisor, and if pertinent, the student's supervisor, and 2) a justification is submitted by the graduate program director and approved by the dean of the college or dean's designee. An extension for a second semester may be granted only if the student has shown significant improvement toward the benchmarks and by using the same process.

F. Enrollment Requirements

Graduate students who are supported through graduate assistantships and appointed as Graduate Assistants are required to be enrolled during the semester of their appointment, but their registration requirements may differ based on their funding sources, duties, and/or residency status:

- **Graduate Teaching Assistants and Graduate Administrative Assistants**
 - Graduate Teaching Assistants, including both GTA-Instructors and GTA-Assistants, and Graduate Administrative Assistants who are paid from non-restrictive Commonwealth funds must register for and complete a minimum of **nine (9)** hours of graduate coursework per fall and spring semesters and **three (3)** hours of

graduate coursework per summer semester. Graduate Teaching Assistants and Graduate Administrative Assistants who are paid from restrictive Commonwealth (S5) funds must register for and complete a minimum of **nine (9)** hours of graduate coursework per fall and spring semesters and **six (6)** hours of graduate coursework per summer semester.

- **Graduate Research Assistants**

- Graduate Research Assistants, including GRA-Project Assistants and GRA-Faculty Assistants, have additional conditions that may affect their registration requirements. GRA-Project Assistants are paid only from external funds managed by the Old Dominion University Research Foundation or the Educational Foundation or from funds generated from gift accounts. They must register for and complete a minimum of **six (6)** hours of graduate coursework per fall and spring semesters and **three (3)** hours of graduate coursework per summer semester. GRA-Faculty Assistants are paid from Commonwealth funds. Those who are paid from non-restrictive Commonwealth funds must register for and complete a minimum of **nine (9)** hours of graduate coursework per fall and spring semesters and **three (3)** hours of graduate coursework per summer semester. Those who are paid from restrictive Commonwealth (S5) funds must register for and complete a minimum of **nine (9)** hours of graduate coursework per fall and spring semesters and **six (6)** hours of graduate coursework per summer semester.

For international students taking fewer than **nine (9)** hours of graduate coursework in either the fall or spring semester, a Reduced Course Load Request Form (RCL) must be filed with the Office of Visa and Immigration Service Advising (VISA). International students beginning a new academic program during the summer semester must register for and complete a minimum of **six (6)** credits, regardless of their funding source.

Students are required to complete all of the credit hours as listed in the individual program sections necessary for the degree. Undergraduate prerequisite courses and courses taken for audit are not normally counted toward the enrollment requirement, except upon the recommendation of the graduate program director, the department/school chair, and the dean of the appropriate academic college. International students must comply with any regulations or conditions associated with their visa status, in addition to the requirements of this enrollment policy.

Exceptions to enrollment requirements:

1. Doctoral students who have successfully advanced to candidacy must register for and complete at least **one (1)** hour of graduate credit every semester until graduation (see Continuous Enrollment Policy). Such students may be appointed as Graduate Assistants even while registered for a reduced course load. They are eligible for full tuition exemption and are considered to be full-time for financial aid purposes. The graduate form, Doctoral Candidates 1-Hour Full-Time Notification, must be completed and forwarded to the Office of the University Registrar, the Office of Financial Aid, and for F-1 and J-1 visa holders, the Office of Visa and Immigration Service Advising (VISA). Such students shall not be paid from restrictive Commonwealth (S5) funds.
2. Master's students appointed as Graduate Assistants in their final semester of study may register for a reduced course load, although they will not be considered full-time for financial aid purposes. The graduate form, Master's Student Full-Time Status Notification, must be completed and forwarded to the Office of the University Registrar and, for F-1 and J-1 visa holders, the Office of Visa and Immigration Service Advising (VISA). For F-1 and J-1 visa holders, the Reduced Course Load Request Form (RCL) must also be filed with VISA. Master's students appointed as Graduate Assistants may register for a reduced course load for no more than one semester. Such students shall not be paid from restrictive Commonwealth (S5) funds.
3. Except in certain professional programs, Graduate Assistants normally may not enroll for more than **nine (9)** credit hours per semester. Enrollment above **nine (9)** credit hours requires the approval of the appropriate graduate program director.

4. The Board of Visitors has authorized the president or his or her designee to consider waivers related to the minimum enrollment requirements specified above.

G. Appointment Process

1. Assistantships in Departments/Schools

The dean or other appropriate administrators notifies the individual departments/schools or units of their allocation of assistantships for the coming year.

- a. The department/school recommends candidates for the assistantships to the appropriate academic dean. Candidates should be interviewed before final recommendations are made for appointment. Particular care should be taken in the consideration of applicants to determine the adequacy of academic preparation and language skills. A completed E-1SG form or ODURF Form for all graduate assistant appointments will accompany the candidate's nomination to the dean or administrator. All completed E-1S forms with award letters, acceptance forms, and job descriptions are to be sent to the Office of E1S Processing for processing. ODURF forms are submitted electronically to the Old Dominion University Research Foundation. Prior to submission of a nomination, the department/school should determine whether the student has been nominated for or accepted another graduate assistantship.
- b. Nominations are reviewed and approved by the dean of the academic college or his/her designee to insure that applicants meet the eligibility criteria for appointment, such as admission to a degree program, English language proficiency requirements, good academic standing, and enrollment, and that the appointment is in compliance with applicable University and college policy.
- c. Applicants for GTA appointments must demonstrate written and oral fluency in the English language. For international students, a good command of written English will be evidenced by acceptable TOEFL scores and required entrance essays. Oral proficiency in English will be determined through the SPEAK test administered by Old Dominion University's English Language Center personnel. A passing score on the SPEAK test is 50. Students who marginally fail the SPEAK test with a score of 45 will be offered the opportunity to participate in a re-test as a part of the GTAI Institute to determine if face-to-face communication is sufficient for holding a teaching assistantship.

2. Assistantships in Non-Departmental Units

- a. Each non-departmental unit, e.g., the Center for Career and Leadership Development, Athletics, the Office of the University Registrar, submits to the Graduate School a position description for each Graduate Administrative Assistant (GAA) position available within their unit. Along with the position description the unit will provide a list of those graduate programs in which students have or are proposed to have the interest and skills required. The position must require and provide an academically and programmatically appropriate level of intellectual and professional activity. If the position description is approved, the department chair and graduate program director will coordinate with the non-departmental unit the selection of academically qualified and highly ranked students from their current or to-be recruited graduate students. The appointment of the GAA is made jointly by the academic and non-departmental administrative departments.
- b. Determination of the number and the availability of funds must be done as early as possible in order to facilitate offering these GAA positions to the top ranked applicants/students in the appropriate graduate programs. As part of the December - January budget submission process, non-departmental units must submit a justification for continued and increased support of GAAs, i.e., stipends and tuition waiver.
- c. Each semester, the GAA's immediate, non-departmental supervisor will evaluate the performance of the student and make recommendations for continuance or termination. This written evaluation will be reviewed by the graduate student and his/her

GPD or academic advisor and a final set of recommendations made regarding continued awarding of the assistantship.

H. Appointment Workload

Graduate assistantships require up to 20 hours per week of service and are generally made for a period of one academic year with a nine-month performance period. For a GTA, the work load should include no more than six hours of classroom teaching or nine contact hours of laboratory supervision per semester, plus normal preparation time.

Nominations should be submitted at least 30 days before the semester of employment in order to assure adequate time for processing. A graduate assistant funded through a grant or contract may be appointed for shorter periods if required by the conditions of the grant or contract.

An assistantship workload (up to 20 hours per week) may be divided between teaching and research duties with the approval of the dean of the appropriate academic college. A graduate assistant appointment may be renewed upon nomination, review of qualifications, and satisfactory previous performance.

I. Additional Employment

Full-time (20 hours per week) graduate assistants are not permitted to accept additional on-campus employment during the period of their assistantship. In particular, graduate assistants (graduate teaching assistants, graduate research assistants, and graduate administrative assistants) may not be paid for part-time teaching or other campus employment for the University in addition to their normal responsibilities. Exceptions to this policy may only be made under unusual circumstances and only with the approval of the dean of the appropriate college or equivalent administrator upon the written recommendation of the graduate program director and the department/school chair. Any outside employment (i.e., off-campus) should be undertaken with caution and in consultation with the GPD. It should in no way adversely affect academic performance or assistantship duties and responsibilities. Information on employment guidelines that are specific to international students may be obtained from the Office of Visa and Immigration Service Advising (VISA).

J. Evaluation and Monitoring

All graduate assistants shall be provided with a written job description of their responsibilities, and be evaluated at least once by their supervisor(s) during the period of the award, preferably before the end of the first semester of service is completed. The evaluation shall be discussed with the assistant and a copy forwarded to the appropriate graduate program director or chair.

K. Termination

A graduate assistantship normally ends when the period of appointment is concluded and the terms of the assistantship agreement are fulfilled. Otherwise, a graduate assistant may be terminated for the following reasons:

1. Resignation by the student. Resignation shall be in writing to the supervisor with a copy to the appropriate department chair, program director, and academic dean or equivalent administrator.
2. Failure of the student to perform his or her assigned duties adequately. Termination must be recommended by the student's supervisor and approved by the department chair, graduate program director, and the appropriate academic dean or equivalent administrator.
3. Failure of the student to remain in good academic standing in accordance with the graduate continuance regulations.
4. Failure of the student to maintain enrollment in the requisite number of graduate credits.
5. Expiration of a grant or contract that funds the student's stipend.
 - a. Any overpayment must be reimbursed to the University by the student as soon as possible after termination. Failure to repay the amount owed may result in legal action against the student for recovery.
 - b. If a student resigns from an assistantship or is terminated for reasons other than the completion of the appointment or expiration of the funding contract, the department chair or graduate program director should notify the appropriate academic dean or

administrator as soon as possible and nominate a replacement if necessary.

- c. A student who believes that he or she may have been unjustly terminated may appeal the decision. First, the student should meet with the supervisor, graduate program director, and department chair in an effort to resolve the situation. If this effort fails, the student may make an appeal in writing to the dean or administrator of the appropriate academic college. If the matter is not resolved, it will be referred to The Graduate School and then be automatically refer the matter to the Graduate Appeals Committee for review. The decision of the Appeals Committee is final.

L. Grievance Procedure

Should a graduate assistant believe that his/her assigned duties and/or the workload required to fulfill these duties do not conform to University Graduate Catalog policies, he/she should first attempt to reconcile the grievance with his/her academic/nonacademic immediate supervisor. If the grievance is not resolved, the graduate assistant will ask his/her graduate program director (GPD) to mediate the grievance between him/her and the immediate supervisor. If the GPD is the student's immediate supervisor, the GPD chair/dean's designee will attempt to mediate. If the chair is the student's supervisor, the GPD shall refer the case directly to the dean or the dean's designee. If this course of action does not resolve the grievance, the GPD/chair/dean's designee will seek mediation with the supervisor of the student's immediate supervisor. If a resolution cannot be achieved, the chair/dean's designee will appoint an ad hoc committee comprised of two senior faculty members from the student's department and one senior faculty member from another department. If the student's assistantship is a non-academic unit, the third member will be a senior level administrator from the nonacademic unit. Should the committee not resolve the grievance, it will be referred to the dean of the student's college for a final decision. For matters involving sexual harassment and/or discrimination, please see the "Student Complaint Procedure" or the "Discrimination Policy" in this catalog.

M. Recognition of Outstanding Performance

Each academic year, two graduate teaching assistants will be recognized for their outstanding performance as a classroom or laboratory instructor. Recipients of the Outstanding Teaching Assistant Awards will receive a \$1,000 financial award to be used to support their educational expenses. A request for nominations and criteria is distributed by the Graduate School.

Graduate Fellowships

Fellowships are awards granted for scholastic achievement and promise. Their objective is to enable full-time students to pursue graduate studies and research leading to advanced degrees without requiring them to render any service. Part-time and/or nondegree students are not eligible. Fellows are responsible for payment of their tuition, in- or out-of-state, as applicable.

University fellows are chosen by their graduate programs and are supervised by their colleges. Applicants should indicate their intent to apply for a fellowship when applying for admission. Letters of recommendation, current transcripts, and any additional evidence of scholastic achievement that would assist in an evaluation of the student should be on file in the Admissions Office.

Tuition Grants

Tuition grants are scholarships disbursed through the Office of Financial Aid and/or the Old Dominion University Research Foundation that are earmarked specifically for payment of tuition. They may be offered to regular or provisional degree-seeking graduate students who are enrolled full- or part-time. Tuition grants may be combined with other forms of scholarship or fellowship support. The decision to award a grant, including the amount, is made by the graduate program director in consultation with the chair and the dean or designee of the college. Students holding tuition grants who withdraw from courses may be held personally liable for repayment of funds utilized.

Tuition Waivers

Tuition waivers are partial-to-full remittances issued by the Office of Finance and/or the Old Dominion University Research Foundation specifically to accompany graduate assistantships. They may be offered to regular or provisional degree-seeking graduate students who are enrolled at least three-quarter time in fall and spring and at least half time in summer with some notable exceptions (see the section on “Enrollment Requirements” under the policy on Graduate Assistantships;” see also the related Catalog policy on “Enrollment Status”). The decision to award a waiver, including the percentage, is made by the graduate program director in consultation with the chair and dean or designee of the college. Students holding tuition waivers who withdraw from courses may be held personally responsible for repayment of funds utilized. Domestic graduate students who receive tuition waivers and who reside out-of-state are urged to declare Virginia residency as soon as possible.

Minimum Stipend Levels

In compliance with federal guidelines a graduate student must receive a minimum of \$3,200 in assistantship or fellowship support for the fall and spring semesters and a minimum of \$2,500 during the summer.

Supplements to the minimum stipend amount can be made based upon the availability of funds and upon approval of the appropriate dean and the funding agency. The stipend is considered to be taxable income since it is payment for services.

Return of Tuition Assistance

A student who completes less than half of the assistantship or fellowship appointment will be required to return his/her full tuition assistance award to the university.

Student Complaint Procedure

The University subscribes to the following 2009 statement on professional ethics of the American Association of University Professors, according to which “As teachers, professors encourage the free pursuit of learning in their students. They hold before them the best scholarly and ethical standards of their discipline. Professors demonstrate respect for students as individuals and adhere to their proper roles as intellectual guides and counselors.” The University recognizes that the instructor has the authority to maintain appropriate classroom behavior and respects the academic freedom of the faculty (see Board of Visitors Policy 1403: Academic

Freedom). The University will not normally interfere with content or style of teaching activities. The University recognizes the responsibility to establish procedures for addressing student complaints about faculty conduct that is not protected by academic freedom and not addressed in other procedures (see Board of Visitors Policy 1502: Student Rights and Freedoms).

This procedure describes how students may formally complain about inappropriate faculty behavior in formal academic, professional, or research settings. Student-initiated complaints in other areas, including grade appeals, sexual harassment, disability accommodations, and discrimination, are covered under separate policies and are not included in this procedure.

I. General Provisions Procedures

1. **Determination of Appropriate Procedure.** The student is responsible for filing the complaint under the proper procedure. Complaints should only be filed using this procedure if there is no other provision available. *Failure to follow the appropriate procedures may result in the complaint not being heard.*
2. **Student Complaints and Concurrent Procedures**
The act of filing a complaint under this procedure will not normally delay any pending process or procedure involving the student and/or faculty member. Normally, any concurrent process or procedure will move forward independently of the student complaint, though it may be delayed for good cause as determined by the appropriate University official(s).
3. **Retaliation**
No student who files a complaint under this procedure shall be subject to any form of retaliation by any person, department, program or college.

II. Procedures

1. **STEP 1 - Informal Resolution.** Students must first attempt to resolve complaints informally. Given the nature of complaints covered by this procedure, it is expected that in all but the most unusual circumstances, students will first raise the issue with the faculty member. In the event this is not feasible, the student will contact the Department Chair. In instances where there is no Department Chair, the student should contact the Program Director.
2. **STEP 2 - Formal Complaint.** If the issue is not resolved informally, the student may contact the Department Chair or Program Director if there is no Chair. In instances where the Chair is the subject of the complaint, the student should contact the Dean of the College to which the chair is assigned. The student must contact the Chair (or Program Director if there is no Chair or Dean if the Chair is the subject of the complaint) within 30 business days of the action from which the complaint rises or the complaint will be barred. The Chair or Dean has the discretion to accept a complaint filed after this deadline for good cause.

The complaint must be submitted in writing on the Student Complaint Procedure Formal Complaint Form (<https://www.odu.edu/dean-students/submit-a-student-complaint/>) and contain:

- a. The student's name and University Identification Number
- b. The faculty member's name and the course subject area prefix and number
- c. A detailed description of the nature of the complaint
- d. A detailed description of attempts at informal resolution with the faculty member and Chair
- e. A detailed description of the relief sought

C. STEP 3 - Investigation

The Chair may designate a faculty member to investigate the complaint. If the Chair is the subject of the complaint, the student shall contact the academic Dean who will designate a faculty member to investigate the complaint. The person investigating the complaint will meet, either independently or collectively, with the student and the

person who is the subject of the complaint within 10 business days from the filing of the complaint. The decision should be issued in writing to the student and the faculty member within 20 business days of the date the complaint is filed.

The complaint process is not intended to be an adversarial hearing and both the interviews of the student and the faculty member will usually be conducted without the other present.

- D. **STEP 4 - Appeal Procedure.** If the student is not satisfied with the resolution in Step 3, the student may file a formal appeal with the appropriate academic Dean. The appeal must be filed within five business days after the decision in Step 3 has been sent. The Dean has the discretion to accept a complaint filed after this deadline for good cause.

The appeal must be submitted in writing on the Student Complaint Procedure Formal Appeal Form (<https://www.odu.edu/dean-students/submit-a-student-complaint/>) and contain:

1. The student's name and University Identification Number
 2. The faculty member's name and the course subject area prefix and number
 3. A detailed description of the nature of the complaint
 4. A detailed description of attempts at resolution with the faculty member and Chair or Program Director
 5. A detailed description of the relief sought
 6. A copy of the Chair's (or Program Director's) finding and supporting documents. (No new information is permitted.)
1. The Dean shall provide the faculty member and Chair or Program Director a copy of the appeal.
 2. The Dean may consider the appeal or appoint a faculty member to consider the appeal. The person appointed shall not have been involved as a decision maker in Steps 1-3 above.
 3. The person considering the appeal shall review the materials and issue the finding within 30 business days from the date the appeal is filed. The review of materials will generally occur outside the presence of the complainant and respondent, and it will be limited to a review of the record. The person considering the appeal may interview any person, such as the original decision-maker, as needed.
 4. The person making the decision shall first determine whether the conduct in question is protected by academic freedom and whether the student's complaint is best addressed by this process.
 5. At the end of the review, a written decision will be issued. A copy of the decision will be sent to the complaining student, the faculty member, and the Chair or Program Director.
 6. The decision by the designee or the Dean is final.

III. Records

A. If the complaint concludes after Step 3 above, the Student Complaint Procedure Formal Complaint Form and all related documents will be kept in a secure location in the department chair's or program director's office for a minimum of three years after the last action.

B. If there is an appeal, the Student Complaint Procedure Formal Complaint Form, the Student Complaint Procedure Formal Appeal Form, and all related documents for each level of review will be kept in a secure location in the Dean's office for a minimum of three years after the last action.

-Approved by the president

Veterans Grievance Policy

The Virginia State Approving Agency (SAA), is the approving authority of education and training programs for Virginia. Our office investigates

complaints of GI Bill beneficiaries. While most complaints should initially follow the school grievance policy, if the situation cannot be resolved at the school, the beneficiary should contact our office via email saa@dvs.virginia.gov.

GI Bill® is a registered trademark of the U.S Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Webs site at <http://www.benefits.va.gov/gibill> (<http://www.benefits.va.gov/gibill/>).

(<https://www.odu.edu/about/policiesandprocedures/university/4000/4100/>)

Technical Standards

To successfully complete a program at Old Dominion University, students must meet all academic and technical standards required by the program. Technical standards are all nonacademic criteria or standards for admission to or participation in the program in question. A technical standard is a description of the physical and mental abilities required of students to perform successfully in an academic program. Students are responsible for knowing the technical standards of their intended major program. Technical standards are documents that can and should be used in the advising process, both when students are exploring different majors and when they want specific information on what is required in a particular program.

Copies of all technical standards are located in the following offices: Educational Accessibility, Institutional Equity and Diversity, and University Counsel. In addition, each department chair has a copy. For students requiring accommodations, please contact the Office of Educational Accessibility for assistance. webpage: <http://www.odu.edu/educationalaccessibility> (<http://www.odu.edu/educationalaccessibility/>).

Graduate Policies & Procedures

The Graduate Policies are currently under review and subject to change. We will update this section as soon as the review is complete.

Attendance Policy

Regular classroom attendance is expected of all students and individual faculty may require class attendance. Course grades reflect not only performance on written assignments and exams, but also participation during class periods. As discussions cannot be reproduced, many times absences cannot truly be made up. Excessive absences therefore have a negative effect on the student's learning and performance. Students are responsible for all class work, and a student who misses a class is expected to have the initiative necessary to cover properly the material missed. Students must meet all course deadlines and be present for all quizzes, tests, and examinations.

Syllabus information will include a statement of the attendance policy for each course and the effect of nonattendance on grades. Reasonable provisions should be made by the instructor for documented representation at University-sponsored athletic or academic functions, mandatory military training and documented illness. The granting of provisions for other documented absences is left to the discretion of the faculty member.

Due to the nature of asynchronous courses, students are expected to participate in class, but in formats that may not require attendance at regular intervals.

Extended illness. The student should notify the Office of Student Enrollment, Engagement & Services when the student is going to be absent from classes for more than one week because of an illness. Student Enrollment, Engagement & Services will notify the student's course instructors of the absence on his or her behalf.

Audit Status

The audit grading status is available for students who would like to enroll in a course for the knowledge gained or personal satisfaction, not for academic credit. Any course that is elected to be carried as an audit will be subject to the normal fees and regulations of the University. Regular attendance is expected, but neither tests nor examinations are required. No grade will be recorded, except that an instructor may assign a grade of "W&" to a student who misses an appreciable portion of the classes. The student's record will be marked "audit" by the course so elected. A student may not audit a course and subsequently seek advanced placement credit for the same course. A student may audit a course and register for the same course for credit in a subsequent semester. Registration for the audit option must be selected by the end of the drop/add period in the given semester. Any course elected for audit cannot be changed to that of credit status after the end of the "add" registration period. Students receiving financial aid should be aware that registering for audit status may affect their financial aid eligibility. Selection of the audit status is accomplished through the normal registration procedures.

Class Attendance by Guests

Statement: The propriety for non-student presence in the classroom will vary dependent upon the nature of curricular offerings, dangers inherent to certain classrooms and labs, the optimum classroom environment for each class, and the preferences of each instructor. Guidelines specifying whether non-student guests will be permitted in the classroom, which are consistent with departmental policy, will be established for each class by the instructor.

Continuous Enrollment Policy

Master's and Education Specialist Students. Students who have completed all course work but are working during a given semester to complete other outstanding degree requirements (e.g., comprehensive examination, thesis, removal of an I or II grade) or wish to use University facilities and/or consult with faculty must be registered for at least one credit during that semester. In addition, graduate students must be registered for at

least one credit hour in the semester in which they graduate. The program designated 998 course or GRAD 998 may be used to fulfill this requirement.

Registration for the required program designated 998 course or GRAD 998 is subject to the normal fees and regulations of the University.

Doctoral Students After Advancement to Candidacy. After successful advancement to candidacy, all doctoral students are required to be registered for at least one graduate credit hour each term (fall, spring, and summer) until the degree is completed, including the semester in which they graduate. GRAD 999 or the program designated 999 course may be used to fulfill this requirement. Failure to comply with this requirement will result in charges to the student's account for one graduate credit hour plus required fees for each semester after advancement to candidacy. Students are not eligible for graduation until all charges are paid.

Master's Degree Seeking Students with Assistantship Appointments in Their Final Semester. Master's students holding graduate teaching, research, or administrative assistantships who are in their final semester and who are within six hours of completing their degree requirements, may register for six or fewer graduate credit hours needed for the completion of their degree. Those who are completing a Master's Thesis or Master's Project but have not yet defended it, may register for one hour of graduate credit in their final semester. Master's students are eligible for the reduced enrollment requirement for no more than one semester.

Additional Graduate Degrees Policy

Graduate students may pursue two graduate degrees concurrently at Old Dominion University, provided that they have been admitted to both degree programs. Minimum credit requirements must be met for each graduate degree that is awarded. In certain cases, students may request that graduate-level coursework used to fulfill requirements for the one graduate degree be applied to the other. Prior approval of the graduate program directors and appropriate college deans is required.

Policy on Nondegree Credits to Complete a Degree

No more than 12 credit hours of graduate-level course work taken at Old Dominion University as a nondegree student may be applied toward a graduate degree or certificate. These 12 credit hours may include only coursework for which grades of B or higher are earned. These credit hours are in addition to the 12 credit hours that can be transferred from other institutions and through experiential learning.

Graduate Writing Proficiency

Each graduate department or program will develop specific policies and procedures for evaluating and, if necessary, upgrading student writing.

Graduate Pass/Fail

Master's-level students may include pass/fail-graded experiences to fulfill a portion of their program requirements provided that they meet a University requirement of 24 credit hours of course work, of which at least 18 hours must be letter-graded course work, and any additional departmental or school requirements. The college, school, and/or department administering the program shall determine which student course work shall be considered for pass/fail credit.

Doctoral students must take dissertation credit as pass/fail and may select from among the designated pass/fail-graded experiences a portion of their program requirements, provided that they take a minimum of 24 credit hours of letter-graded course work, of which at least 18 hours must be letter-graded course work, beyond the master's degree, or equivalent, and meet any additional departmental or school requirements.

Deans may, at their discretion, designate courses as pass/fail, letter graded, or both.

A student electing the pass/fail option for a particular course cannot change his or her registration and elect to take the course for grade point credit after

the end of the “add” period. Similarly, courses cannot be elected as pass/fail after the end of the “add” period.

Readmission to the Institution Following Separation or Dismissal

Graduate students readmitted to the University following eight or more continuous years of separation or dismissal may apply to have all previous course grades and credits removed from the calculation of the GPA.

Students who wish to apply must complete and submit the appropriate form to the graduate program director. The form must be signed and approved by the graduate program director, the department chair, and the college dean before it is submitted to the Office of the University Registrar.

If approved, all previous graduate courses and grades will remain on the transcript but will not be used in calculating the GPA for the new graduate degree program.

Change of Program

A graduate student who wishes to change from his or her current program to a new program must make the request in writing to the Office of Graduate Admissions. The student’s graduate record will be examined to determine which additional supporting credentials must be submitted (e.g., test scores, letters of recommendation) prior to consideration for admission to the new program. If the new program requires additional supporting credentials, the student must submit these before consideration can be given to the change. If it is determined that no additional supporting credentials are necessary, the student’s record will be submitted to the graduate program director of the new program, with a request for consideration of admission. The student will be notified in writing of the graduate program director’s decision. If not admitted to the new program, the student will remain in the current program.

Graduate credits earned toward a degree or certificate from the current program may or may not be accepted by the director of the new graduate program. All grades earned in the original program will remain on the student’s transcript but only grades of B or higher, if accepted, may be used to compute the GPA in the new program. In such cases, the director of the new graduate program will request that the Office of the University Registrar adjust the student’s record.

Conversion from Doctoral to Master’s Program

A student in a doctoral program may be converted to an appropriate master’s program in special situations. The doctoral student making satisfactory progress but wishing to leave the University may apply in writing to the new master’s program director, with copies to the current program director and the applicant’s committee. The new program director, in consultation with the current program director, will review the request following program policy and procedures.

In the case where a doctoral student fails to pass or complete a particular degree requirement, the student’s committee may recommend the student to a master’s degree program. The student will follow the procedure outlined in the preceding paragraph, except that this approach requires supporting documentation from the current committee.

Once the student is accepted, the new program director will send a memorandum and a Notice of Change of Status Form, to the Office of the Registrar. The memo should clearly note which of the Old Dominion University credits and approved transfer credits may be applied to the master’s degree, and which, if any, should be reserved for future doctoral work.

Enrollment Status

Full-Time Status

A minimum of nine credit hours is considered to be a full-time course load for graduate students per fall and spring semesters. No more than twelve (12) credit hours may be carried, except in unusual circumstances and with the

permission of the graduate program director. In summer semesters, six (6) credit hours constitute a full-time load.

Part-Time Status

Graduate students who are registered for fewer than nine (9) credit hours during the fall or spring semesters or fewer than six (6) credit hours in the summer semester are classified as part-time graduate students. During the fall or spring semesters, six to eight (6-8) credit hours is considered to be three-quarter time, four to five (4-5) credit hours half time, and one to three (1-3) credit hours less than half time. During the summer semester, four to five (4-5) credit hours is considered to be three-quarter time, three (3) credit hours half time, and one to two (1-2) hours is less than half time.

Exceptions

Doctoral students who have successfully advanced to candidacy must register for at least one (1) credit hour (usually 899 or 999) every semester until graduation; they are considered full-time for registration and financial aid purposes (see “Continuous Enrollment” policy). Master’s students who have completed all course requirements are not required to be registered continuously; however, they must register for at least one (1) credit hour (998) during the semester of their graduation; they are considered part-time for registration and financial aid purposes.

Requirements for International Students

International students must comply with any regulations or conditions associated with their visa status, in addition to the requirements of this enrollment policy. Those international students taking fewer than nine (9) credit hours in either the fall or spring semesters must file a Reduced Course Load Request Form (RCL) with the Office of Visa and Immigration Service Advising (VISA). F-1 and J-1 visa holders have no summer enrollment requirement per federal immigration regulations; however, if the summer semester is the first semester of a new academic program, six (6) credit hours are required to maintain the visa status.

Requirements for Graduate Assistants

Students appointed as Graduate Assistants may have different minimum enrollment requirements depending on their source of financial support and/or residency status. Please refer to the subheading on “Enrollment Requirements” under the heading of “Graduate Assistantships” in the section of the Graduate Catalog titled “Financial Awards.”

Course-Load Distribution

In graduate study, at least three-fifths of the minimum required hours for a master’s degree or education specialist degree must be completed at the 600 level or above, and at least three-fifths of the minimum required hours for a doctoral degree must be completed at the 800 level. Some programs have instituted more stringent credit-hour distribution requirements at the master’s, education specialist, and/or doctoral levels. Exceptions to the credit-hour distribution requirements at any level must be approved in writing by the graduate program director, the dean or his or her designee, and the provost or his or her designee.

Submission of Written Work To More Than One Class

In general, it is not acceptable for a piece of work such as a term paper to be submitted to more than one class for credit. In cases where submission of the same paper is appropriate, prior approval must always be obtained.

An example of a situation in which the same paper might appropriately be submitted would be one in which a student was enrolled in two classes, in both of which a given research topic was not only of interest to the student but was completely appropriate to both classes. In such circumstances, the student would approach the instructors of the two classes and obtain approval to submit the same term paper to both classes, based on prior agreement concerning the depth of the study, amount of material covered, and the length of the paper to be submitted (which should be longer than a paper submitted to one class).

Re-Validation of Out-of-Date Graduate Credit

Graded coursework granted outside the eight-year time limit established for graduate degrees or certificates must be re-validated by an examination before the work can be applied toward the requirements of a degree program. Courses identified as research, thesis, or dissertation that were graded pass/fail do not require re-validation.

To be re-validated, the work must have been completed at Old Dominion University or be acceptable as transfer credit in lieu of an Old Dominion University course.

The following procedure shall be used to re-validate out-of-date work:

1. The student must receive the permission of his or her graduate program director and the chair of the department/school or dean of the college in which the course is offered to re-validate the course credit. For courses older than ten years, the additional permission of the dean or his or her designee is required, or in the event that the dean or his or her designee represents the second level of approval, the additional permission of the provost or his or her designee is required. The form for re-validation of out-of-date credit shall be used to record all transactions and must be submitted to the Office of the University Registrar upon completion of re-validation of work.
2. The graduate program director, department/school chair, or dean shall make appropriate referrals to faculty member(s) (an individual or a committee) teaching the course to request that an examination be prepared and evaluated. Before the examination, the faculty member(s) shall inform the student of the area of knowledge or course content on which he or she is to be examined.
3. After the examination has been completed, the re-validation form shall be filled out, signed by the examining faculty member(s), and forwarded to the dean of the academic college or his or her designee for approval, or in the event that the dean or his or her designee represents the second level of approval, the provost or his or her designee for approval.
4. Copies of the completed form shall be sent to the student, the graduate program director, and the university registrar.
5. Re-validation for any given course can be sought only once.

Final Examinations

The University firmly believes that a comprehensive evaluation of a student's achievement in a course is a vital part of the educational process. Final examinations for campus-based and higher education center courses, if given, are to be given at the time provided on the Registrar's Office website at www.odu.edu/registrar (<http://www.odu.edu/registrar/>). Upon request of the instructor, exceptions to this regulation may be made only by the dean. Final examinations are normally scheduled in the classroom where the course has met throughout the semester.

In the event that a final examination is changed to other than that of the scheduled time, provisions will be made by the instructor for any student who cannot comply with the schedule change.

Any student who has three examinations scheduled in one calendar day and is unable to resolve the problem informally with the instructor or instructors may petition the dean for relief.

All examinations are to be retained for one year by the faculty members. Students have the privilege of requesting conferences with the instructors in regard to their final grades.

All distance learning final exams shall be available for students to complete in a minimum 24-hour window as defined by the professor, including one business day, during the final examination period as defined for that course.

Students may secure proctoring at a higher education center or a Digital Learning partner site. For more information about proctoring and distance learning examinations, visit <http://dl.odu.edu/how-it-works/exams-proctors>.

Continuance

The following minimum requirements govern a student's continuance in a graduate program. A student is also obligated to meet all additional requirements as delineated in the handbook of the student's graduate program.

The following actions affect a student's continuance:

- Probation occurs when a student's grade point average (GPA) falls below 3.00.
- Suspension occurs when a student is unable to raise the GPA above 3.00 within the next 12 credit hours taken, thus preventing the student from registering for additional courses; reinstatement from suspension occurs only if the student is permitted to return to the graduate program after submitting an approved plan of study.
- Separation occurs when a student withdraws voluntarily from a graduate program.
- Deactivation occurs when a student fails to register for three or more consecutive semesters without permission or an approved leave of absence.
- Dismissal may occur for a variety of academic reasons or for infractions committed against the Code of Student Conduct.

Students who are placed on probation are still eligible to participate in all extracurricular activities as governed by the rules of the specific activity. However, students who are separated, deactivated, suspended, or dismissed from a graduate program are ineligible to participate in any extracurricular activities.

Probation, Suspension and Reinstatement

Degree-Seeking Students

A degree-seeking-student is defined as one who is formally admitted into a graduate program at either the master's, education specialist, or doctoral levels. At the end of each semester – fall, spring, and summer – the record of a degree-seeking student who does not maintain a 3.00 cumulative grade point average (GPA) is reviewed. A student who does not have a cumulative GPA of at least 3.00 will be placed on probation.

Probation and Suspension Policy for Degree-Seeking Students

A degree-seeking student on probation will have 12 credit hours to raise their cumulative GPA to 3.00. The student and Graduate Program Director should meet to discuss a plan for earning the return to good standing. The student must achieve a cumulative GPA of 3.00 after completing the next 12 credit hours. If not, they will be placed on indefinite suspension and prevented from enrolling in graduate courses. This does not affect the student's status with regard to undergraduate courses.

A student who believes the probation or suspension was due to an error in a grade assigned should contact their instructor.

Early Suspension for Degree-Seeking Students

If the Graduate Program Director determines the student cannot mathematically raise the GPA to 3.00 within 12 hours, the limit for degree-seeking students, they may discuss with the student whether an early suspension is warranted. If so, with the student's written approval, the Graduate Program Director can request early suspension in writing to the Dean of the Graduate School, so that the student may consider reinstatement options.

Reinstatement from Suspension Policy for Degree-Seeking Students

A degree-seeking student who has been suspended from a graduate program may be reinstated under the following conditions:

1. The student is responsible for initiating each of the following aspects of the request for reinstatement to the university:
 - a. Providing to the GPD of the program that the student is seeking to either continue enrollment or to be newly admitted a written explanation and documentation of the factors and circumstances that contributed to the failure to achieve the academic standards as well as evidence that these issues have been resolved. Students

should also explain why they will subsequently succeed if reinstated. Moreover, students who wish to maintain confidentiality regarding special medical or other personal issues, must obtain a letter from the Office of Student Outreach Services (SOS) certifying their validity and contribution to the suspension and that these issues have been or will be satisfactorily resolved prior to the reinstatement.

- b. Requesting the reinstatement within 45 calendar days of the suspension unless a later request with appropriate justification is approved by both the graduate program director and Dean of the Graduate School or designee (if the student is pursuing a grade appeal that may overturn the suspension, the grade appeal procedures are to be followed first until a decision is reached on that appeal; if the appeal is denied and suspension upheld, then the student has 45 calendar days to initiate a reinstatement request).
 - c. Developing a plan of study in consultation with the appropriate Graduate Program Director (GPD) of the program that the student is seeking to either continue enrollment or to be newly admitted. The plan of study must specify the initial 12 credit hours to be taken and the steps necessary to complete the degree requirements within the eight-year (master's) and the eight-year (education specialist and doctoral) time period as required by University policy. This plan should recognize that all prior courses in which grades of B- or less were earned must be repeated or replaced with an approved substitution. If reinstated, the student's GPA will revert to 0.00 and courses with a grade of B or above that were earned within the past eight years will be treated as internal transfer credit and have no bearing on the GPA. Courses older than eight years must be recertified prior to internal transfer credit being awarded. Upon reinstatement, the student must achieve a cumulative GPA of at least 3.00 in the next 12 credit hours of graduate credit attempted.
2. The GPD is responsible for each of the following steps of the request for reinstatement:
- a. Reviewing the student's letter and any written documentation the student provides, assisting in the development of the proposed plan of study, and assessing the student's potential for successful completion of the program.
 - b. Assessing the potential impact of reinstatement on departmental resources.
 - c. Submitting a recommendation on the student's request to the department chair either approving reinstatement and the plan of study for the student's return, or providing justifications for denying reinstatement and/or the plan of study. Specifically, the GPD's evaluation must address the reasonableness of i) the proposed plan of study; ii) the potential for successful completion of the program, and, iii) the potential impact of reinstatement on departmental resources. (Note: The GPD and the chair must agree for the student to be reinstated at the department level.)
3. If reinstatement is approved, the student will be informed in writing and the steps outlined in 1.a. and 1.b. of this policy shall be followed. A copy of the letter and the approved plan of study shall be forwarded to the Graduate School. The Graduate School will work with the Office of the Registrar to ensure the academic record is updated so the student may resume their study.
4. Upon reinstatement:
- a. All courses with grades of B- (2.70) or below will be dropped from consideration in the calculation of the grade point average for continuance or graduation. These grades will remain on the student's transcript, but the courses will not be counted toward the degree.
 - b. Courses with grades of B or above may be counted toward the degree if they were earned within the last eight years or have been recertified but will not be used in the calculation of the GPA.
 - c. Reinstated students must achieve a cumulative GPA of at least 3.00 upon completion of the next 12 hours of credit attempted. Subsequent performance will be monitored by the GPD.
5. If the student's request for reinstatement is denied, the student must be informed in writing by the graduate program director. The GPD's

denial must address the lack of reasonableness of i) the proposed plan of study, ii) the potential for successful completion of the program, iii) the potential impact of reinstatement on departmental resources, and iv) the right to appeal and the policy for appealing. A copy of the letter shall be forwarded to the Graduate School along with original materials submitted by the student.

6. The student has the right to appeal the decision to the Graduate Appeals Committee. The student must resubmit the written letter and documentation as outlined in 1.a. and 1.b. to the Graduate School within 45 calendar days of the Graduate Program Director's letter denying reinstatement. The Graduate School will forward the materials to the Graduate Appeals Committee. The Graduate Appeals Committee will review the documentation, including the student's reinstatement request, plan of study, and Graduate Program Director's assessment of the plan of study. The Committee may seek additional information from the program or student to aid its review. The Graduate Appeals Committee will render its decision and inform the Graduate School. The Graduate School will send a letter to the student, with a copy to the GPD, informing him or her of the Graduate Appeals Committee's decision. If the Graduate Appeals Committee supports the GPD's original decision, the student shall remain separated from the program. If the Graduate Appeals Committee approves reinstatement, the steps outlined in 1.a. of this policy shall be followed. The decision of the Graduate Appeals Committee is final.
7. A student may be reinstated only one time to the same academic program.

Non-Degree-Seeking Students

A non-degree-seeking student may fall into one of two categories: one who is pursuing a specific certificate or licensure program or one who is unaffiliated with a specific program.

Probation and Suspension Policy for Certificate or Licensure Students

A student who has been permitted to pursue a certificate or licensure program must maintain a cumulative GPA of at least 3.00. If the student fails to do so, the student will be placed on probation. The student and the certificate director or the licensure director, or the graduate program director should meet to discuss a plan for returning to good standing. The student must raise their cumulative GPA to 3.00 within the remaining allotted hours (not to exceed 12 credits). A student who fails to achieve a cumulative GPA of 3.00 after these remaining hours will be indefinitely suspended and prevented from enrolling in graduate courses. This does not affect the student's status with regard to undergraduate courses.

Early Suspension for Certificate or Licensure Students

If the director determines the student cannot mathematically raise the GPA to 3.00 within the remaining allotted hours (not to exceed 12 credits), then the director may discuss with the student whether an immediate suspension is warranted. If so, with the student's written approval, the director can request immediate suspension in writing to the dean of the Graduate School so that the student may consider reinstatement options.

Reinstatement from Suspension Policy for Certificate or Licensure Students

A suspended certificate or licensure graduate student seeking reinstatement should follow the procedures outlined earlier in this policy under the Reinstatement Policy for Degree-Seeking Students with the exception that the student's plan of study must specify the initial six credit hours (not 12) to be taken. Upon reinstatement, the student must achieve a cumulative GPA of at least 3.00 in the next six credit hours of graduate credit attempted. A student may be reinstated only one time to the same certificate or licensure program.

Probation and Suspension Policy for Unaffiliated Students

An unaffiliated student must maintain a cumulative GPA of at least 3.00. If not, the student is strongly advised to seek guidance from the Graduate School staff. The student must achieve a 3.00 by the completion of 12 hours. If not, the student will be indefinitely suspended and prevented from enrolling in graduate courses. This does not affect the student's status with regard to undergraduate courses. Unaffiliated students may not be reinstated

as unaffiliated students but may return to graduate courses if admitted to a degree program.

Early Suspension for Certificate or Unaffiliated Students

If the student cannot mathematically raise the GPA to 3.00 within the remaining allotted hours (not to exceed 12 credits) then the Graduate School staff may discuss with the student whether an immediate suspension is warranted. If so, with the student's written approval, the dean of the Graduate School may initiate immediate suspension.

Separation and Deactivation from a Graduate Program

A student may separate voluntarily from a graduate program at any time by notifying the graduate program director in writing.

If a student fails to register for three or more consecutive semesters, without prior approval from the graduate program director, their graduate status will be deactivated. To reactivate their graduate status, a student must submit a request in writing to the graduate program director and the Office of Graduate Admissions. The graduate program director must approve the student's request for reactivation to be processed.

Dismissal from a Graduate Program

A degree-seeking student's dismissal from a graduate program may occur for one or more of the following reasons:

1. Failure to maintain good academic standing based on minimum University grade point average (GPA) requirements following reinstatement (see Policy on Probation, Suspension and Reinstatement in the Graduate Catalog above);
2. Failure to maintain good academic standing based on specific program requirements (see specific program handbook);
3. Plagiarism, falsification of data, and/or other instances of academic dishonesty (see the Code of Student Conduct and/or the Policy for Responding to Allegations of Misconduct in Scientific Research and Scholarly Activity);
4. Inability to meet specific technical requirements (see specific program handbook);
5. Failure to pass a required examination or meet a program benchmark as determined by the appropriate review committee (see specific program handbook);
6. Failure to maintain satisfactory progress on a thesis or dissertation as determined by the designated thesis or dissertation committee (see specific program handbook);
7. Unprofessional and/or unethical behavior as a graduate assistant, student intern, student clinician, student teacher, student worker, or other University-affiliated role (see the University Code of Ethics and applicable standards); and/or
8. Any behavior that may involve criminal activity, that may pose a threat to the health or safety of the University community, that may infringe upon the rights or property of others in the University community, and/or that may breach the peace of the University community (see the Code of Student Conduct).

A student must be informed of their dismissal from a graduate program in writing by the graduate program director (GPD). The letter provides reasons for dismissal and information about appealing per the policy in this section.

A copy of the dismissal letter shall also be sent to the dean administering the program or their designee, the Graduate School, and, if relevant, the Office of Visa and Immigration Service Advising. All units notified, including the student, should also receive a copy of the Notice of Student Separation or Dismissal from Program form. Except in cases involving probation and suspension, the Code of Student Conduct, and/or the Policy for Responding to Allegations of Scientific Misconduct in Scientific Research and Scholarly Activity, a student may appeal their dismissal from a graduate program in writing to the dean or their designee within 45 calendar days of the Graduate Program Director's dated letter notifying the student of dismissal. If dissatisfied with the decision of the dean administering the program or their designee, a student may appeal their dismissal from a graduate

program in writing with the Graduate Appeals Committee by submitting a Student Appeal Request Form to the Graduate School. The student is also responsible for submitting all documents related to the dismissal (e.g., copies of decision letters by the GPD and dean and dismissal forms) with the official appeal. The student must submit their appeal of the dean or designee's decision for dismissal within 14 calendar days of the decision letter.

If the original dismissal decision is based in full or in part on a course grade and that grade is being appealed, the student follows procedures for a grade appeal until that decision is rendered. If the dismissal status is unaffected by the grade appeal results (e.g., the appeal is denied, or the overturned grade does not alter the program's dismissal decision), the student must then follow procedures for dismissal appeal, beginning with a maximum of 45 calendar days from the grade appeal decision letter to when the dismissal appeal is received by the dean or designee.

The Graduate Appeals Committee will review materials submitted by the student. It may also seek additional information from the program or student to aid its review. The Committee will render its decision and inform the Graduate School. The Graduate School will send a letter to the student, with a copy to the GPD and dean's office, informing him or her of the Graduate Appeals Committee's decision. If the Graduate Appeals Committee supports the GPD's original decision, the student shall remain separated from the program. If the Graduate Appeals Committee approves reinstatement, the GPD shall work out a plan of study with the student that guides him or her to the successful completion of the program. The decision of the Graduate Appeals Committee is final.

A student's dismissal shall ordinarily remain in effect for eight years before they may seek readmission to the same graduate program at the master's level or for eight years before they may seek readmission to the same graduate program at the education specialist or doctoral levels. If the student seeks readmission to the same program after eight years and is accepted, they will work with the program to recertify courses for which a grade of B or better was awarded for those credits to count toward the degree as transfer credits. Their GPA will be reset to zero as a student returning from reinstatement (see policy Readmission to the Institution Following Separation or Dismissal). A student may appeal dismissal only one time for the same program.

Graduate Registration Requirements and Procedures

Office of the University Registrar

The Office of the University Registrar provides a wide variety of student services, including registration, verification of enrollment, maintenance of student records and academic history, transcripts, degree certification and diplomas. A calendar of important dates, the examination schedule, and information about various policies and procedures is available at <http://www.odu.edu/registrar> (<http://www.odu.edu/registrar/>).

The Office of the University Registrar also is responsible for determining in-state tuition status, athletic eligibility, and registration of students enrolling through the Virginia Tidewater Consortium and the Interinstitutional Study Program with Norfolk State University.

Self-service is available for most processes online at <https://my.odu.edu/>. On the Norfolk main campus, walk-up services are available at the office in 1009 Rollins Hall; on the Macon & Joan Brock Virginia Health Sciences at Old Dominion University campus, walk-up services are available at the office in Lewis Hall Building. Additionally, many services are available at the higher education centers. The offices are open Monday-Friday from 8 a.m. - 5 p.m. and can be reached at 757-683-4425 for the main campus, and at 757-446-5806 for VHS campus.

Academic Calendar and Course Scheduling

The academic calendar includes the fall and spring semesters, as well as a summer term. The fall semester begins one or two weeks prior to Labor Day Weekend and ends 16 weeks later. Classes will be held on Saturday and Sunday of Labor Day weekend, but classes are canceled for the Labor Day holiday. A Fall Break is scheduled for mid-October (Columbus Day Weekend) and runs from Saturday through Tuesday of that weekend. Thanksgiving break begins after classes on Tuesday prior to the holiday, and classes resume on the following Monday. Commencement is scheduled on the Saturday after exams have been administered.

Spring semester includes a Winter session that begins after fall commencement and ends before the rest of the spring semester classes begin.

Spring semester begins on Tuesday following the holiday weekend of Martin Luther King (MLK). Spring Break is scheduled eight weeks after the start of classes, from Monday through Saturday. Classes resume on the following Sunday and continue until Monday of week 15 into the semester. A reading day is held the Tuesday after classes end, with exams beginning on Wednesday and continuing to the following Wednesday. Commencement is scheduled on the Friday and Saturday after exams have been administered; Saturday is the degree conferral date.

Summer term includes a three-week Maymester, along with one 12-week and two six-week sessions.

Note: Asynchronous courses may or may not follow these terms. The University will determine the duration of each course, and students may opt for self-paced study when enrolling in this online format.

Authorization to Enroll in Graduate Courses

Degree Seeking Students

All students who have been admitted in regular or provisional status to graduate degree programs must have the advisor block updated prior to registration each semester. Students should consult with their advisors to discuss their program of study and to schedule appropriate courses in advance of registration whenever possible.

Nondegree Seeking Students

Nondegree graduate students should seek advice from the department/school offering the course, or if registering for engineering or business courses, obtain permission of the department/school.

All nondegree graduate students who have completed six credit hours of graduate courses will receive an “advisory” notice upon attempting to register for additional graduate courses. This notice will advise the student to contact the Graduate School to obtain counseling and recommendations. This “advisory” notice will not prevent registration.

All nondegree graduate students who have completed or will exceed 12 credit hours will be blocked from registering or attempting to register for additional graduate courses. To remove this registration block, a student must contact the Graduate School for advice on gaining admission into a graduate program or to receive written permission to take additional hours as a nondegree student.

Students taking graduate courses for licensure, certification or professional development (e.g., Virginia Department of Education “endorsements”) will not receive the advisory notice and will be exempt from the registration block. Contact the department offering the program for specific registration information and procedures.

Students should consult the Registrar’s Office website at <http://www.odu.edu/registrar> (<http://www.odu.edu/registrar/>) each semester for the most current advising and registration policies.

Audit Status

The audit grading status is available for students who would like to enroll in a course for the knowledge gained or personal satisfaction, not for academic credit. Any course that is elected to be carried as an audit will be subject to the normal fees and regulations of the University. Regular attendance is expected, but neither tests nor examinations are required. No grade will be recorded, except that an instructor may assign a grade of “W&” to a student who misses an appreciable portion of the classes. The student’s record will be marked “audit” by the course so elected. A student may not audit a course and subsequently seek advanced placement credit for the same course. A student may audit a course and register for the same course for credit in a subsequent semester. Registration for the audit option must be selected by the end of the drop/add period in the given semester. Any course elected for audit cannot be changed to that of credit status after the end of the “add” registration period. Students receiving financial aid should be aware that registering for audit status may affect their financial aid eligibility. Selection of the audit status is accomplished through the normal registration procedures.

Graduate Numbering (Graduate Level)

Courses at the 500, 600, 700, and 800 levels are generally for graduate credit.

Courses at the 500 level are cross-listed to undergraduate 400-level courses, with additional work and higher-level outcomes required for 500-level courses. Except in cases where topical content changes by each semester, cross-listed courses taken previously at the 400 level may not be retaken at the 500 level. A limited number of 500-level courses may be used to satisfy the requirements for a master's degree, education specialist degree, or a doctoral degree.

Courses at the 600 level form the core of master's programs, including those taken in connection with a thesis, and they are not cross-listed with numbers at other levels. A limited number of 600-level courses may be used to satisfy requirements for an education specialist degree or a doctoral degree.

700- and 800-level courses are generally, but not always, cross-listed. 700-level courses are generally reserved for master's students and 800-level courses for doctoral students. When 700- and 800-level courses are cross-listed, additional work and higher-level outcomes are required for 800-level courses. Except in cases where topical content changes, cross-listed courses taken previously at the 700 level may not be retaken at the 800 level. A limited number of 700-level courses may be used to satisfy the requirements for a doctoral degree.

Course numbers ending in “29” at all levels are reserved for courses taken through the Virginia Tidewater Consortium Exchange Program.

Cooperative Education course numbers are generally 667 and 867.

Internship course numbers are generally 668 and 868.

Practicum course numbers are generally 669 and 869.

Seminar, Colloquium, and Capstone course numbers include 690, 691, 692, 693, 790, 791, 792, 793, 890, 891, 892, and 893.

Topics course numbers include 595, 596, 695, 696, 795, 796, 895, and 896. These numbers are generally to be used to designate topics courses taught as a class. The course title should be modified to include the particular topic for that semester when the course is scheduled. If a particular topic is offered more than three times, it should be submitted for approval as a regular course offering and assigned a course number.

Individual and Tutorial course numbers include 597, 697, 797, and 897. These numbers are generally to be used to designate courses involving individual or tutorial study within a discipline. These individually arranged courses will require prior approval by the department chair and/or instructor.

Research/Project course numbers are generally 698 for the master's level and 898 for the doctoral level.

The Thesis course number is 699 and is reserved for the master's thesis.

The Dissertation course number is 899 and is reserved for doctoral dissertation courses.

The Continuous Enrollment course number 999 is available for the purpose of maintaining active status at the doctoral level. This may be a discipline-specific 999 course or GRAD 999.

The Continuous Enrollment course number 998 is available for the purpose of maintaining active status at the master's level. This may be a discipline-specific 998 course or GRAD 998.

Grading

Grade	Grade Points	Undergraduate	Graduate
A	4.00	Superior	Excellent
A-	3.70	Superior	Excellent
B+	3.30	Good	Good
B	3.00	Good	Good
B-	2.70	Good	Fair
C+	2.30	Satisfactory	Poor
C	2.00	Satisfactory	Poor
C-	1.70	Passing	Poor
D+	1.30	Passing	Not Used
D	1.00	Passing	Not Used
D-	0.70	Passing	Not Used
F	0.00	Failing	Unsatisfactory
WF	0.00	Unofficial Withdrawal	Unofficial Withdrawal
P	None	Pass	Pass
F (P/F)	None	Fail	Fail
O	None	Audit	Audit
I	None	Incomplete	Incomplete
II	None	Not Used	Incomplete not Subject to Time Limit
W	None	Official Withdrawal	Official Withdrawal
Q	None	Progress but not Proficiency	Not used
Z	None	No Grade Reported	No Grade Reported

The use of plus and minus grades is at the discretion of the instructor.

The grade point average is calculated by dividing the accumulated number of grade points earned by the accumulated number of credit hours attempted. Grades of F and WF and repeats are included, but official withdrawals,

audits, and grades on noncredit courses and pass/fail degree courses are not included. All undergraduate-level courses, including courses taken as a non-degree seeking student and courses taken after graduation, will be included in calculating the undergraduate cumulative grade point average. All graduate-level courses, including courses taken as a non-degree seeking student and courses taken after graduation, will be included in calculating the graduate cumulative grade point average.

For completion of an undergraduate degree or certificate, a student must have a minimum cumulative grade point average of C (grade point average of 2.00) in all courses taken and a grade point average of at least 2.00 in the major except for those degree programs or certificate programs requiring grade point averages above a 2.00.

A minimum cumulative grade point average of 3.00 is required for the award of a graduate degree or certificate.

Grades in courses accepted for transfer credit are not counted in the computation of grade point averages.

Grades are available to students through the secure website. Grades are mailed to students only if a written request is submitted to the Office of the University Registrar.

WF and W Grades. The grades of WF and W indicate withdrawal from a course only under those conditions described in the sections entitled Class Schedule Change Procedure and Grading Policy for Withdrawal From Classes.

Incomplete Grades. A grade of I indicates assigned work yet to be completed in a given course or absence from the final examination and is assigned only upon instructor approval of a student request. The I grade may be awarded only in exceptional circumstances beyond the student's control, such as illness, and only after 80% of the time allocated for the course has elapsed and substantial progress has been made toward completion of course requirements with the exception of courses that do not fit within the traditional semester calendar.

In cases of exceptional circumstances beyond the student's control, it is the responsibility of the student to approach the instructor to request an I grade and to provide documentation, including a written statement of when the work will be completed, to support the request. The authority to award an I grade rests with the instructor whose decision is final. Students whose requests for I grades are approved must not re-register for the class until the I grade has been resolved. The I grade becomes an F if not removed when grades are due the following term according to the following schedule: I grades from the fall semester become F's if not removed by the day grades are due for the spring semester; I grades from the spring semester and the summer session become F's if not removed by the day grades are due for the fall semester.

When there is an existing incomplete grade and the instructor who assigned the incomplete has left the university or is no longer available, the chair of the department or the program director will be responsible for making sure that the completed work is graded, and a final grade is submitted.

An I grade may be changed to a W only in very unusual circumstances and when the student's situation has changed since the I grade was awarded. In these cases, the request for a change to a W must be in writing, documented, and approved by the instructor, department chair and dean. Students will not be allowed to graduate until all grades of I have been resolved.

In the case of courses that do not fit within the traditional semester calendar, the faculty member assigns the I grade. The time periods for the removal of I grades before they become grades of F are the same as those stated in the previous paragraph.

Extension of the I time limitation normally will not be approved except for reasons beyond the student's control and only if the supervising faculty member is available and willing to supervise the work beyond the normal time limit. Students should submit the request to the instructor, who should submit approval, via the chair, to the University Registrar in order to retain the I. The approval from the instructor should designate the expiration date of the extension.

A grade of II indicates incomplete work not subject to the time limits described above for I grades. The II grade can be used only in those courses directly related to the research for and preparation of the graduate thesis/dissertation.

Z Grades. A grade of Z indicates that no grade has been reported by the instructor and will convert to a grade of F if not removed through the last day of classes of the following term (excluding the exam period) according to the following schedule: Z grades from the fall semester become F's if not removed by the last day of classes of the spring semester; Z grades from the spring semester and the summer session become F's if not removed by the last day of classes of the fall semester. Students will not be allowed to graduate until all grades of Z have been resolved.

Interim Academic Evaluation

Faculty teaching 100- and 200-level undergraduate courses will provide specific feedback regarding progress in the course in the fifth week of the semester in the fall and spring semesters. Providing timely information to students on graded work makes students aware of their performance so they can determine whether to seek additional help from the faculty member, tutoring services when available, their academic advisor, and/or withdraw from the course prior to the established deadline for withdrawal.

Mid-Semester Feedback

The University believes that regular assessment of students and feedback to them is essential to effective teaching and learning. Therefore, faculty members will provide all students with evaluation of their progress in a course prior to midsemester (or equivalent in a nonsemester course) so that students have information about their progress before the withdrawal deadline, which is the end of the tenth week of classes.

Registration

There are several registration options available to students: registration via the web at my.odu.edu (<http://my.odu.edu>), click LEO online, in person, on-campus registration, and off-campus registration.

Eligible students are encouraged to preregister in order to improve the likelihood of obtaining satisfactory schedules of classes. Preregistration is reserved for currently enrolled degree-seeking students. Eligible students will be assigned a "time ticket" four to six weeks prior to preregistration. Open registration begins immediately following the preregistration period.

Complete registration information, important deadlines and the final examination schedule can be found at www.odu.edu/registrar (<http://www.odu.edu/registrar>). The course schedule is available at www.leonline.odu.edu (<http://www.leonline.odu.edu>) by March 7 for summer and fall semester classes and by October 7 for spring semester classes.

Priority Preregistration for Active Duty, Veterans, Reservists and Virginia National Guard Service Members

Code of Virginia § 23.1-904 (C) states that:

The governing board of each public institution of higher education shall, in accordance with guidelines developed by the State Council of Higher Education for Virginia, implement policies that recognize the scheduling difficulties and obligations encountered by active-duty members of the United States armed forces.

The State Council of Higher Education for Virginia in consultation with the Military Education Advisory Committee (MEAC) has issued guidelines that require state colleges and universities to establish course registration policies that provide reasonable accommodation to students who are active-duty military members, veterans, reservists and Virginia National Guard members. The policy can be found at the following link: <https://www.odu.edu/about/policiesandprocedures/bov/board-of-visitors-policy-1418> (<https://www.odu.edu/about/policiesandprocedures/bov/board-of-visitors-policy-1418>).

Staff in the Office of the University Registrar, Military Connections Center, and the Office of Admissions will be trained to communicate the policy to students who may be qualified for this benefit.

Dropping, Adding, and Withdrawing From Classes

See the academic calendar in this Catalog or the Registrar's Office website at <http://www.odu.edu/registrar> (<http://www.odu.edu/registrar>) for deadlines for adding or dropping classes. For information regarding the refund schedule, see the chapter on Financial Information or go to the Office of Finance's web page at <http://www.odu.edu/finance> (<http://www.odu.edu/finance>).

Class Schedule Changes and Drop/Add Procedures

During the fall and spring semesters, students may add and drop classes within the first 11 calendar days after the first day of classes for the semester (for full semester classes). Please refer to www.odu.edu/registrar (<http://www.odu.edu/registrar>) and click on the link to "Academic Calendar" for the dates to drop classes in courses not spanning the full semester.

Once registered, a student must drop or add classes via the secure website at <https://portal.odu.edu>, click LEO online or submit a completed drop/add form to the Office of the University Registrar. The date the form is received in the Office of the University Registrar or processed via LEO determines tuition adjustments, if applicable. If needed, drop/add forms can be downloaded from the Registrar's Office website: <http://odu.edu/registrar/forms> (<http://odu.edu/registrar/forms>) and submitted electronically to register@odu.edu.

First-year students are strongly encouraged to seek advising before dropping or adding any class. Students enrolled in degree programs in which sequencing is critical are urged to consult their academic advisors before scheduling changes. In such programs, dropping of courses without prior consultation with academic advisors may necessitate additional time to complete University and/or departmental degree requirements.

See the academic calendar in this Catalog or at <https://www.odu.edu/academics/calendar> (<https://www.odu.edu/academics/calendar>) and click on the link to "calendars" for the dates for adding or dropping classes. For information regarding the refund schedule, see the chapter on Tuition, Fees and Financial Information or go to the Office of Finance's web page at www.odu.edu/finance (<http://www.odu.edu/af/finance>). There may also be financial aid implications to dropping or withdrawing from a course. For more information about how financial aid could be impacted, seek advice from a financial aid advisor or visit the Office of Financial Aid website at www.odu.edu/finaidoffice/manage/dropping-a-class (<https://www.odu.edu/finaidoffice/manage/dropping-a-class>).

ODU does not automatically drop or withdraw students from classes for failure to attend or failure to pay tuition. The student must initiate the process to withdraw from classes.

Withdrawal From Classes or From the University

Policy for Dropping and Withdrawing From Classes

Dropping Classes

Prior to the start of and during the first 11 calendar days of the semester, a student may drop a course; during this period no grade will be assigned and no record of the course will be entered on the student's permanent academic record. Please refer to www.odu.edu/registrar (<http://www.odu.edu/registrar>) and click on the link to "Academic Calendar" for the dates to drop classes in courses not spanning the full semester.

Withdrawal from Classes

After the first 11 calendar days of the semester, a student may withdraw from any course through the end of the twelfth week of classes of a regular semester not including the exam period. For all other non-standard semester

courses (i.e., Summer Sessions, Maymester, Winter Session, or eight-week sessions), a student may withdraw after the drop/add period through the day prior to the last day of classes for that session. A grade of W will be assigned during this period. However, some degree programs have withdrawal, continuance and progression policies that supersede this policy because of the nature of the professional standards and practices underlying the specific curriculum. Students should consult with their advisor or student success coach (for online students) to determine if there are more stringent requirements for withdrawing from courses in specific majors.

Withdrawal from a course after the twelfth week of a regular session (or its equivalent in a non-semester course) is usually not permitted. However, in the event of an illness or other severe hardship beyond the student's control, the student should submit, no later than the last day of classes, a written petition for permission to withdraw to the instructor. If permission is granted, a grade of W will be recorded. If permission is not granted, the student will not be allowed to withdraw from the course. Any appeal of decisions should be brought to the department chair.

Please refer to www.odu.edu/registrar/ and click on the link to "Academic Calendar" for the dates to withdraw from classes in courses not spanning the full semester. Information on tuition refunds can be found on the Office of Finance website at <https://www.odu.edu/tuition/refunds> (<https://www.odu.edu/tuition/refunds/>).

Students are encouraged to contact their instructor, advisor, and Student Success Director (for online students) to discuss the implications of withdrawing. Prior to withdrawing from any course, students receiving financial aid should consult their financial aid counselor. Course withdrawal may adversely impact satisfactory academic progress for financial aid purposes and limit the student's ability to continue receiving financial aid.

Withdrawal from a course after the last day of classes of a regular semester (or after the day prior to the last day of classes for non-semester courses) is not permitted.

Students who have a financial hold on their record are not able to withdraw from classes online. However, they may withdraw by the published deadline at the Registrar's Office between 8:00 a.m. and 5:00 p.m. Monday-Friday or by email to register@odu.edu (registrar@odu.edu). The office is located at 1009 Rollins Hall.

A student who stops attending classes without withdrawing from the course will receive a grade of WF, except if the student's performance was an F at the time the student stopped attending class, in which case a grade of F will be assigned. The grade of WF will carry no grade points, and will be computed in the grade point average as a grade of F.

ODU does not automatically drop or withdraw students from classes for failure to attend or failure to pay tuition. The student must initiate the process to withdraw from classes and file a Tuition Appeal if applicable.

Tuition Appeal forms and full details are available from the Office of Finance web site: <https://www.odu.edu/tuition/refunds/appeals> (<https://www.odu.edu/tuition/refunds/appeals/>).

Drop and Withdrawal Deadlines

Specific deadline dates for dropping and withdrawing from classes can be found on the Academic Calendar at <https://odu.edu/academics/calendar> (<https://odu.edu/academics/calendar/>).

Administrative Withdrawal From the University

During the course of any semester, there will be situations, such as severe illness, death in the immediate family, or disciplinary actions, which will require that the University initiate an administrative withdrawal from the University to assist a student or to implement a University-imposed sanction. The following procedures will be used.

1. The request for withdrawal is initiated either by the student because of an extenuating personal situation or by the University because of a disciplinary situation.

2. This action will normally be handled by the Vice President for Student Enrollment, Engagement & Services or designee. If the student initiates the withdrawal, the Office of the Vice President for Student Enrollment, Engagement & Services will determine what verification is necessary and document the situation.
3. A request will be submitted to the Office of the University Registrar to withdraw the student from all classes.
4. The student's instructors will be notified. If the student is withdrawing after the last day of classes, part of this notification will include the opportunity for the faculty member to raise objections if the student's classroom performance is such that a withdrawal (W) would not be appropriate. If a faculty member objects, the faculty member will inform the University Registrar and the original grade assigned by the faculty member will stand.
5. The request for withdrawal must be initiated by the student within one calendar year counting from the first day of classes of the term for which administrative withdrawal is sought. Requests for withdrawal that have the necessary documentation but are received after the one-year deadline may be reviewed by an appeals committee consisting of at least three members and including both faculty and administrators, to be convened by the Director of Student Outreach and Support in Student Enrollment, Engagement & Services. These requests must include clear and compelling reasons for not submitting the request within one calendar year.
6. Tuition refund appeals are handled separately and must be submitted to the Office of Finance. Students submitting requests after the one-year deadline are not eligible for a tuition appeal.
7. Students receiving financial aid should consult their financial aid counselor prior to submitting a tuition refund appeal.

Any exceptions for undergraduate students must be approved by the Vice Provost for Academic Affairs or designee. Exceptions for graduate students must be approved by the Dean of the Graduate School.

Sudden Withdrawal and Prolonged Absence Due to Military Mobilization

Guidelines are provided for students whose service in the armed forces of the United States has required their sudden withdrawal or prolonged absence from enrollment at Old Dominion University. The policy can be found at the following link:

<https://www.odu.edu/about/policiesandprocedures/bov/board-of-visitors-policy-1416> (<https://www.odu.edu/about/policiesandprocedures/bov/board-of-visitors-policy-1416/>)

Guidelines and Procedures for Grade Adjustments for Nonacademic Reasons

1. Students are responsible for notifying the faculty member of errors in the assignment of grades (e.g., a C received instead of an A) immediately upon receipt of the grade. If confirmed, the instructor will submit a grade change using the "Report a Change of Grade" link in the Faculty & Advisors menu in Leo Online. If the grade is older than two semesters or has previously been changed, the instructor should complete the electronic Grade Change Form available via the MyODU portal. Once submitted, the grade change request is forwarded to the chair or program director for consideration. If the chair or program director approves, the form will be signed electronically and forwarded to the Office of the University Registrar for processing. If the chair or program director does not approve, they should notify the instructor of the reasons for denial.

When a grade change is needed and the instructor who assigned the grade has left the university or is no longer available, the student should contact the chair of the department or program director who will be responsible for verifying the change and submitting the electronic Grade Change Form to the Office of the University Registrar.

Students are responsible for notifying the Office of the University Registrar of administrative errors immediately upon receipt of the grade.

2. Students are notified via email when a change of grade is processed by the Office of the University Registrar.

Grade Appeals: Policy and Procedures

I. Policy and Purpose

- A. The purpose of the grade appeal procedure is to serve the needs of graduate and undergraduate students who believe that they were unjustly awarded a final course grade by a faculty member through prejudice or caprice. This policy applies to the final grade for the award of academic credit and does not apply to graduate and undergraduate examinations that are administered as part of the degree progression and certification processes (such as comprehensive examinations and candidacy examinations at the graduate level).
- B. The basis for a grade appeal is the student's charge that the final grade was awarded through prejudice or caprice. The burden of proof rests with the student.
- C. Students must initiate the first review of the appeal within 45 days of the official end of the semester in which the grade was awarded. For grades awarded and appealed from fall and summer semesters, the entire appeal process must be completed before the official end of the next semester; the entire appeal process for grades awarded and appealed from the spring semester must be completed before the official end of the next fall semester.

II. Procedure

Prior to initiating a formal appeal, the student must attempt to consult with the instructor to request an explanation of the method of evaluation and to determine whether an error has been made. This consultation may be face to face, via e-mail, phone, or video conference if both agree, and efforts to consult with the instructor must be documented by the student. If at any point in the appeals process the student and instructor, or the student and a subsequent appeals body, agree that a grade of P is acceptable, that grade shall be assigned for the course and the appeals process will conclude. At all stages of the grade appeal processes outlined below, the instructor and student shall be notified of any actions recommended or taken by the chair, Grade Appeal Review Committee, Dean (or designated Associate Dean) or Provost and Vice President for Academic Affairs (or designated Vice Provost).

A. First Review of Appeal

1. If the student is not satisfied with the results of the consultation with the instructor, or the instructor is not available as described in section IV. B, then the student may file a grade appeal. The chair of the department in which the instructor is teaching will conduct the first review of the student's appeal, unless the instructor is the department chair. The student's case must be presented on the Grade Appeal Form with supporting documents/explanations to the instructor's department chair within 14 days of the consultation with the instructor.
2. The student's Grade Appeal Form should (1) state specific reasons and give examples of faculty prejudice or caprice, (2) show that prejudice or caprice affected the awarding of the final course grade, and (3) be presented as a complete package and include all other supporting documentation.
3. The chair shall notify the instructor of the appeal and provide the instructor with copies of the form and other documents that were submitted. The chair or Dean (or designated Associate Dean) shall also request a response from the instructor that should include at a minimum the course syllabus, grade distribution for the course, attendance policy, the grading plan for the course, and other grading rubrics.
4. The chair shall review all documents and may hold a hearing where both the instructor and student are present. (See section V. for guidelines for hearings.) No other persons will attend the hearing and the hearing must be recorded.
5. If the chair concludes that there is no cause for complaint, the student and the instructor will be notified in writing of

the decision within seven days of receipt of the request for an appeal and the supporting documents. The student may request a second review of the appeal (see section II.B. for details).

6. If the chair concludes that there is valid cause for the complaint, the chair should consult with the instructor and student and attempt to mediate the dispute by working with both parties to agree on an appropriate course grade. Among the alternatives available for resolution of the case will be the assignment of the grade of P if the chair, the instructor, and the student express their agreement in writing. If the instructor and student agree to a grade change or to award a grade of P, the instructor will make the official grade change.
7. If mediation fails, the chair will notify the college Grade Appeal Review Committee of the need for a review and submit all documents to the committee. The instructor and the student will be notified of this action.
8. The chair will ask the college Grade Appeal Review Committee to appoint the reviewers within five working days. (See Section III for the composition of the committee.)
 - a. The faculty and the student who form the Grade Appeal Review Committee will notify the instructor and student involved in the appeal when the review will take place and request needed documents.
 - b. The Grade Appeal Review Committee will review the documents, consult with relevant parties as needed and determine if there is sufficient evidence in the documents to support the student's appeal, or if more information is needed in which case a hearing with the student and instructor may be held. (See Section V for details about the hearing.) The review and hearing must be scheduled within 15 days of the receipt of the materials by the committee.
 - c. If the Grade Appeal Review Committee finds that there is sufficient evidence that the grade was awarded with prejudice or caprice, they may consult with the instructor to suggest a grade change and provide a rationale for that decision. The decision and rationale must be provided in writing to the instructor. The final outcome of the committee's review will be documented and communicated to the instructor, the student, the department chair, and Dean.
 - d. If the committee finds on behalf of the student and recommends a change of grade and the instructor refuses to change the grade but is willing to assign a grade of P, then the committee will consult with the student about the advisability of accepting a P grade. Should the student agree to accept a grade of P, the instructor will make the official grade change.
 - e. If the committee finds on behalf of the student and recommends a change of grade and the student is unwilling to accept a grade of P, the Dean will review and make a recommendation to the Provost and Vice President for Academic Affairs. The Provost and Vice President for Academic Affairs or a designated Vice Provost will submit the recommended grade change to the Registrar. Only the Provost and Vice President for Academic Affairs or designated Vice Provost is authorized to change an instructor's grade. The instructor, chair, student, and Dean will be notified. The Provost and Vice President for Academic Affairs' decision will be final.
 - f. If the committee finds on behalf of the instructor, the original grade will stand and the instructor and the student will be notified.
9. If the instructor is the department chair, the student will submit the Grade Appeal Form and documents to the Dean (or designated Associate Dean) and the Dean (or designated Associate Dean) will conduct the first review following the procedures described in II.A.1-8.

10. If the instructor is a Dean or Vice President, the student will submit the Grade Appeal Form and documents to the chair of the department in which the Dean or Vice President is teaching the course.

B. Second Review of Appeal

1. The student may request a second review of the appeal if the conclusion of the first review is that there is no cause for complaint. The request for a second review must be submitted within seven days of the denial of the first review. The student should request in writing that the person responsible for conducting the first review forward the grade appeal package to the person responsible for conducting the second review. The instructor is notified of this action.
2. When the instructor is a faculty member, the Dean (or designated Associate Dean) is responsible for conducting the second review. If the instructor is the chair and the Dean (or designated Associate Dean) conducted the first review, the Provost and Vice President for Academic Affairs or designated Vice Provost is responsible for conducting the second review. If the instructor is a Dean or Vice President and the chair of the department in which the Dean or Vice President is teaching conducted the first review, the Provost and Vice President for Academic Affairs or designated Vice Provost is responsible for conducting the second review.
3. The second review shall follow the same procedures as the first review, as described in section II.A.1–4.
4. If the person to whom the second review is submitted concludes that there is no cause for complaint, the student and the instructor will be notified in writing that the grade appeal process is complete. No further appeal will be allowed.
5. If the person to whom the second review is submitted concludes that there may be valid cause for the complaint, the procedures as described in section II.A.6–8 will apply.

III. Grade Appeal Review Committee

A. Committee Composition and Duties

1. Each college will create a Grade Appeal Review Committee that has one representative from each department in the college and a list of potential student members. If an appeal is heard, the Grade Appeal Review Committee will select two faculty members and one student from these lists.
2. Representatives must be full-time tenured or tenure-track faculty in an academic department elected by the department faculty. At least two committee members shall be tenured. No administrator, such as a Chief Departmental Advisor or Graduate Program Director, shall be eligible to serve on the committee.
3. Terms of service will be for two years. Members may be re-elected for an additional two-year term.
4. At the beginning of each academic year, each department in the college will submit a list of full-time students who are eligible and willing to serve on the committee. This list will be formulated each year. When needed, one student will serve on a review committee.
5. The committee will select its own chair and develop guidelines for the review process and procedures.
6. Two faculty members and one student selected from the names submitted by each department will review the appeal including documents from the student filing the appeal and the instructor of record. Neither the faculty members nor the student member shall be from the instructor's or student's department.
7. Both the instructor and the student will have the right to challenge, for valid cause, any or all of the members of the committee, and in that event replacements will be appointed and no further challenge will be permitted.

IV. Instructors' Responsibilities and Rights

- A. The following are guides for the instructor's responsibilities and rights.

1. Instructors have a responsibility to meet with students to explain the course grading procedure and the process for determining the final grade.
2. When requested, instructors must provide the documents requested for a review at all levels. These documents will include at a minimum the course syllabus, grade distribution for the course, attendance policy, and grading procedures for course tasks with rubrics. Other documents may be included or requested.
3. The instructor must assist in making arrangements for a hearing when one is needed.
4. Instructors have the responsibility to participate in a grade appeal.
5. No instructor shall be forced or coerced into making a grade change.

B. Unavailable Instructors

1. In the event a student makes documented efforts to consult with an instructor and is unable to find the instructor, or does not receive a response, the student shall seek assistance from the chair.
2. When the chair has made reasonable efforts to contact an instructor whose final grade is being appealed and is unsuccessful, the Grade Appeal Review Committee and chair will independently review available materials and reach a consensual decision. In the event that these two reviews reach different decisions that are not reconciled, the Provost and Vice President for Academic Affairs or designated Vice Provost will make a final decision. No other appeal can be made.
 - a. If the decision is in favor of the student, and the student is not willing to accept a grade of P, the Provost and Vice President for Academic Affairs or designated Vice Provost will submit the recommended grade change to the Registrar. Only the Provost and Vice President for Academic Affairs or designated Vice Provost is authorized to change an instructor's grade upon the recommendation of the college Grade Appeal Review committee.
 - b. If the decision is not in favor of the student, the instructor's original grade will remain.
3. In the event of an instructor's unavailability due to death, serious illness, or any other cause that would prevent the instructor from participating in the process in time for the process to be completed during the designated semester, the procedure in II.A.1. and IV.B.2 will be followed.

V. Procedures for Hearings

A hearing involving the faculty member and the student may be held at any level of appeal.

- A. After the Grade Appeal Review Committee reviews the appeal form and supporting documents and the instructor's documents, a hearing may be held to clarify issues and/or to receive further evidence. Both the student and the instructor may submit additional materials at the hearing.
- B. Hearings may be held at any level only when both the instructor and the student can participate. No other persons may attend this hearing.
- C. The conclusions, decision(s), and a rationale for these must be disseminated in writing to the instructor and to the student.
- D. If either the instructor or the student believes that the established procedures for the appeal of grades have not been followed, an appeal for an additional hearing may be made to the Dean (or designated Associate Dean), or when the chair or Dean is the instructor, to the Provost and Vice President for Academic Affairs or designated Vice Provost. The only basis for an appeal will be the failure to have been provided due process as prescribed by the policy.

VI. Records

- A. If the grade appeal concludes after the first review, the original Grade Appeal Form and all decision letters for each level of review

will be kept in a secure location in the department chair's office for a minimum of one year.

- B. If the grade appeal advances to the second level, the original Grade Appeal Form and all decision letters for each level of review will be kept in a secure location in the Dean's office for a minimum of one year.
- C. Recordings of hearings will be kept in the department chair's office or the Dean's office for a minimum of one year.

VII. Assignment of P Grade

A P grade established under this policy at any stage of the grade appeal process will be given irrespective of the University policy on hours permitted for P grades or restrictions on when a P grade is permissible and will not prevent progression in the degree program or courses for which this course is a prerequisite.

Transcripts

Transcripts are provided by the Office of the University Registrar and are issued only as requested through LEO Online. Official electronic transcripts (PDF) can be ordered through Parchment, the University's electronic transcript service provider. Transcripts should be requested at least five business days before the date needed to allow for processing and delivery. Students picking up transcripts must present valid identification. Students may access and print unofficial transcripts for personal use through LEO Online at no charge.

All grades, academic standing, degrees awarded, and degree honors are included on the transcript. Recent graduates that need to show proof of the degree earned should confirm that the graduation status in Leo Online shows "Awarded" prior to ordering a transcript.

An official transcript carries the University Seal and an authorized signature. Official transcripts are usually mailed directly to educational institutions, employers, etc. Any transcript mailed to or given directly to a student will be marked, "Issued to Student." Partial transcripts are not issued; each transcript must include the student's complete record at Old Dominion University. A transcript of work completed at any high school or at any college other than Old Dominion University must be obtained directly from that institution.

Graduation Information

All students must apply for graduation during the semester prior to the expected completion of degree requirements. The deadline to file the intent to graduate is generally the last day of November, February, and June for the following semester. Specific deadlines are published on the Registrar's Office website, <http://www.odu.edu/registrar> (<http://www.odu.edu/registrar/>).

Students can view their application and degree status in LEO Online, via <https://my.odu.edu> (<https://my.odu.edu/>). Once the application has been processed, the student's graduation status appears as "pending." The status changes to "awarded" once the degree is conferred. Awarded status may take up to four weeks following the published degree conferral date.

Applications, complete instructions, and deadlines regarding graduation are available on the Registrar's Office website at <http://www.odu.edu/registrar> (<http://www.odu.edu/registrar/>). A separate application for each degree is required if the student is pursuing more than one degree.

Students who do not complete degree requirements as expected must reapply for the next graduation date.

Application for Graduation for Graduate Students

Graduate students should apply online at <https://my.odu.edu> (<https://my.odu.edu/>). Graduation staff members will coordinate the evaluation process with the appropriate graduate program advisor.

All outstanding work and incomplete or unreported grades must be completed or resolved before the degree will be conferred. Master's level and doctoral students must have submitted the thesis (if required) or dissertation to the Registrar's Office no later than the Friday one week before commencement as well as evidence of successful completion of

oral, written or other degree requirements. Graduate students should confer with the graduate program director and review materials available on The Graduate School's website for complete information (<http://www.odu.edu/graduateschool> (<http://www.odu.edu/graduateschool/>)).

Commencement

Commencement exercises are intended for students who are eligible and reasonably expect to complete degree requirements to graduate from the University within the current or following graduation period.

Commencement ceremonies are managed through the Commencement Office. Information about requirements for participation in commencement ceremonies is available at <https://www.odu.edu/commencement> (<https://www.odu.edu/commencement/>). To be eligible to participate in ceremonies, candidates must indicate their intent when they apply for graduation; any change, including changes to graduation dates, must be communicated to the Commencement Office.

May commencement ceremonies are intended for candidates graduating in May and students who expect to complete studies in August. December commencement ceremonies are intended for candidates graduating in December and students who completed studies the preceding August.

Students who expect to attend commencement ceremonies must have applied for graduation. Tickets will not be provided by the Commencement Office to students that have not applied. Participation in commencement ceremonies does not confirm that a degree has been (or will be) conferred. Degree conferral may take four to six weeks from the date of the commencement ceremony. With the exception of doctoral degrees, diplomas are not distributed at commencement.

Diplomas

Diplomas are mailed to the student's permanent address in Banner approximately 6-8 weeks after graduation. Students should verify address information in LEO when applying for graduation.

The student's legal name (as maintained in the official student record) and the degree title (Bachelor of Arts, Bachelor of Science, etc.,) appear on the diploma. Neither the major nor the minor appears on the diploma, but will appear on the transcript.

Interinstitutional Agreements and Opportunities to Fulfill the Degree

Attendance at Other Institutions

Graduate students who are enrolled at Old Dominion University may attend another institution and transfer credit earned to a degree program at Old Dominion University. While formal Old Dominion University permission is not required, students should consult the graduate program advisor to ensure that the credits to be taken at the other institution will transfer to the Old Dominion University program in which the student is enrolled. An official transcript from the other institution must be submitted to the graduate program advisor along with any supporting materials that may be requested such as a syllabus, course description, etc. The graduate program advisor will complete an evaluation of external credits and submit the result to the Office of the University Registrar for posting to the student's academic record.

The other institution may ask the student to provide documentation of good standing or eligibility to continue at Old Dominion. These forms should be submitted to the Office of the University Registrar. Forms that require the student to demonstrate that the course(s) will be accepted for transfer credit at Old Dominion University should be submitted directly to the academic advisor.

Academic Common Market

Old Dominion University, through a number of its undergraduate and graduate programs, participates in the Southern Regional Education Board's Academic Common Market. Eligible residents of participating states may enroll (following admission to degree status) as Academic Common Market students at in-state tuition rates. Evidence of legal domicile must

be presented to the Office of the University Registrar, 1009 Rollins Hall. Information on available programs can be viewed at <https://www.schev.edu/financial-aid/academic-common-market> (<https://www.schev.edu/financial-aid/academic-common-market/>).

Interinstitutional Study Program with Norfolk State University

Old Dominion University students have the opportunity to elect courses at Norfolk State University through a student exchange program agreed to by the two institutions.

The registrar of each institution will register a student for courses at the other institution if the student presents a properly signed form listing the course or courses to be taken at the other institution. The student exchange will be honored both in the regular session and in the summer session and applies to both undergraduate and graduate students. All credits earned by students will be considered as resident credit at the home institution for degree purposes. (Courses taken at NSU under this policy will be considered the same as Old Dominion University courses; all other courses are subject to transfer credit policy limitations.)

Regular bus service is provided between campuses, but is not available for evening classes.

Student Exchange Policy Between the College of William and Mary and Old Dominion University

The registrars at Old Dominion University and the College of William and Mary will each register students in all departments in the College of Sciences (Old Dominion) and the School of Marine Science (William and Mary) for courses at the other institution. If the student presents a properly signed form listing the course(s) to be taken at the other institution, the exchange will be honored in both regular sessions and in summer sessions, and will apply to graduate students at the master's, certificate of advanced study, and doctoral levels at both institutions.

The student must have completed prerequisites for the course(s) for which he/she registers. Core curriculum requirements must be met at the home institution. Elective courses and departmental requirements may be satisfied through exchange courses, but approval is required from the student's department. If a particular course is offered at the home institution, it may not be taken for credit at the other institution. All credits earned will be considered as resident credit at the home institution for degree purposes.

The tuition and fees are determined and retained by the student's home institution.

Navy Education Consortium and Educational Agreements

A consortium of higher education institutions, located near major naval facilities, has developed a means to enhance the opportunities for active duty naval officers to participate in graduate education at the master's level. The institutions are Old Dominion University, George Washington University, The University of Memphis, The University of Rhode Island, San Diego State University, and the University of West Florida. The program areas which may be offered under the auspices of the consortium include international and political studies, computer information sciences, and computer science. These higher education institutions also provide a common curriculum that satisfies competency areas as set forth by the Navy for the ETMS program. Officers participating in the program are enrolled in the Master of Science in Education degree program with a major in educational administration. For current information, contact the Office of Academic Affairs.

Virginia Tidewater Consortium Exchange Program

Old Dominion University students may also take courses at any of the following Virginia Tidewater Consortium institutions: Christopher Newport University (Newport News), College of William and Mary (Williamsburg), Eastern Shore Community College (Melfa), Hampton University (Hampton), Joint Forces Staff College (Norfolk), Norfolk State University, Camp Community College (Franklin), Regent University (Virginia Beach),

Thomas Nelson Community College (Hampton), Tidewater Community College (all campuses), and Virginia Wesleyan College (Norfolk).

Cross-registration is subject to the following regulations:

1. Cross-registration is limited to degree-seeking students with cumulative grade point averages of 3.00 or better.
2. Graduate students who opt to cross-register under the Virginia Tidewater Exchange Program may accumulate a maximum of 12 external credit hours to include any combination of transfer or consortium credit hours. Exceptions are granted to students enrolled in approved joint programs within the Virginia Consortium.
3. Graduate students must get pre-approval from their Graduate Program Director (GPD) before registering for consortium classes.

For further information, contact the Office of the University Registrar, 1009 Rollins Hall or register@odu.edu.

Linked Programs

Old Dominion University hosts a number of linked undergraduate to graduate programs, including bachelor's to master's programs and bachelor's to doctoral programs, that permit undergraduate students to begin graduate study as early as the junior year. If you would like more information on how to apply, please talk with your undergraduate advisor and the graduate program director for the graduate program you are interested in pursuing.

Approved Bachelor's to Master's Linked Degree Programs

Please refer to your specific program page and consult with an advisor for additional information. The programs listed below are bachelor's to master's programs for specific subject areas.

College of Arts and Letters

- Bachelor of Arts or Bachelor of Science (various majors) to Master of Business Administration (see below for details)
- Bachelor of Arts or Bachelor of Science (various majors) to Master of Public Administration (see below for details)
- Bachelor of Arts in English to Master of Arts in Applied Linguistics (<http://catalog.odu.edu/undergraduate/arts-letters/english/english-applied-language-studies-ba/#mastersdegreeoptiontext>)
- Bachelor of Arts in Art History to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)
- Bachelor of Arts or Bachelor of Science in Communication to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)
- Bachelor of Arts or Bachelor of Science in Communication to Master of Arts in Lifespan and Digital Communication (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)

The linked bachelor's/master's degree in communication/lifespan and digital communication is administered by the Communication and Theatre Arts Department. The purpose of this option is to allow exceptional majors in communication to count up to 12 hours of 500-level graduate coursework towards both the BA or BS in communication and, if accepted, the MA in lifespan and digital communication. Students in the linked program must earn a minimum of 150 credit hours (120 discrete credits for the undergraduate degree and 30 discrete credits for the graduate degree). For more information, please contact Dr. Gary Beck.

- Bachelor of Arts or Bachelor of Science in Geography to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)
- Bachelor of Arts in History to Master of Arts in History (<http://catalog.odu.edu/undergraduate/arts-letters/history/#programtext>)
- Bachelor of Arts or Bachelor of Science in Interdisciplinary Studies (Individualized Integrative Studies) to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)
- Bachelor of Arts in International Studies to Master of Arts in International Studies (<http://catalog.odu.edu/undergraduate/arts-letters/political-science-geography/international-studies-ba/#mastersdegreeoptiontext>)
- Bachelor of Arts in Philosophy to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)
- Bachelor of Arts in Visual Studies to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)
- Bachelor of Arts in Women's Studies to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)

- Bachelor of Arts in World Languages and Cultures to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)
- Bachelor of Fine Arts (Art) to Master of Arts in Humanities (<http://catalog.odu.edu/undergraduate/arts-letters/humanities/#programtext>)

Strome College of Business

- Bachelor of Arts or Bachelor of Science (various majors in other colleges) to Master of Business Administration
- Bachelor of Arts or Bachelor of Science (various majors in other colleges) to Master of Public Administration
- Bachelor of Science in Business Administration to Master of Business Administration
- Bachelor of Science in Business Administration to Master of Public Administration
- Bachelor of Science in Business Administration to Master of Science in Accounting (<http://catalog.odu.edu/undergraduate/business/accounting/accounting-bsba/#mastersdegreeoptiontext>)

School of Cybersecurity

- Master of Science in Cybersecurity (may be available in various BA and BS programs)

School of Data Science

- Master of Science in Data Science and Analytics (may be available in various BA and BS programs)

Darden College of Education and Professional Studies

- Bachelor of Science (various majors) to Master of Business Administration (see below for details)
- Bachelor of Science (various majors) to Master of Public Administration (see below for details)
- Bachelor of Science (various majors) to Master of Science in Education (contact program director for details).

Batten College of Engineering and Technology

- Bachelor's to Medical Doctor (in cooperation with Eastern Virginia Medical School)
- Bachelor's in Engineering or Engineering Technology to Master's programs in Engineering
These are designed to allow qualified students to secure a space in a master's program available in the Frank Batten College of Engineering and Technology while they are still pursuing their undergraduate degrees. An eligible student can choose a master's program in the same discipline as his/her bachelor's program or in a complementary discipline. Subject to the approval of the undergraduate and graduate program directors, a student enrolled in a linked program can count up to six credit hours of course work towards both the undergraduate and the graduate degrees. Full-time students may be able to complete the requirements for the bachelor's degree in four years and the master's degree in one additional year. Students in linked programs must earn a minimum of 150 credit hours (120 discrete credit hours for the undergraduate degree and 30 discrete credit hours for the graduate degree).

Students who are matriculated in an undergraduate major in the Frank Batten College of Engineering and Technology with a GPA of at least 3.00 overall and 3.00 in the major are eligible to apply for admission to a linked bachelor's/master's program. Transfer students who desire to be admitted to a linked program at the time they join an undergraduate major at Old Dominion University are eligible to apply if their overall GPA at their previous institution is 3.25 or higher. Prerequisite courses may be required for engineering technology majors to pursue a master's degree in engineering.

Continuance in a linked bachelor's/master's program requires maintenance of a GPA of 3.00 or higher overall and in the major.

College of Health Sciences

- Bachelor of Science in Dental Hygiene to Master of Science in Dental Hygiene (<http://catalog.odu.edu/undergraduate/health-sciences/dental-hygiene/#programtext>)

School of Nursing

- Bachelor of Science in Nursing to Master of Science in Nursing (<http://catalog.odu.edu/undergraduate/nursing/#mastersdegreeoptiontext>)

Joint School of Public Health

- Bachelor of Science in Public Health to Master of Public Health (<http://catalog.odu.edu/undergraduate/joint-school-public-health/programs/public-health-bsph/#mastersdegreeoptiontext>)

College of Sciences

- Bachelor of Science (various majors) to Master of Business Administration (see below for details)
- Bachelor of Science (various majors) to Master of Public Administration (see below for details)
- Bachelor of Science (various majors) to Medical Doctor (in cooperation with the Eastern Virginia Medical School)
- Bachelor of Science in Biochemistry to Master of Science in Chemistry (<http://catalog.odu.edu/undergraduate/sciences/chemistry-biochemistry/biochemistry-bs/#mastersdegreeoptiontext>)
- Bachelor of Science in Chemistry to Master of Science in Chemistry (<http://catalog.odu.edu/undergraduate/sciences/chemistry-biochemistry/chemistry-bs/#mastersdegreeoptiontext>)
- Bachelor of Science in Computer Science to Master of Science in Computer Science (<http://catalog.odu.edu/undergraduate/sciences/computer-science/computer-science-bscs/#mastersdegreeoptiontext>)
- Bachelor of Science in Computer Science to Master of Science in Data Science and Analytics (<http://catalog.odu.edu/undergraduate/sciences/computer-science/computer-science-bscs/#mastersdegreeoptiontext>)
- Bachelor of Science in Mathematics to Master of Science in Computational and Applied Mathematics (<http://catalog.odu.edu/undergraduate/sciences/mathematics-statistics/#programtext>)

General Linked Program Options

BA or BS to MBA (Master of Business Administration) Linked Program

The linked BA/MBA or BS/MBA program is an early entry to the MBA program of study. The early-entry program is designed for qualified non-business undergraduate ODU students to start their MBA program prior to completing their undergraduate degree. Well qualified non-business undergraduate students may take MBA-level courses as early as three semesters prior to graduation and count up to 12 graduate credits toward their undergraduate degree. Students participating in the early-entry program must earn a minimum of 150 credit hours (120 discrete credit hours for the undergraduate degree and 30 discrete credit hours for the graduate degree). Early-entry program students should carefully consider their undergraduate degree program requirements when planning their course of study. Students in the early-entry program work in close consultation with the MBA Program Office and should refer to information in the Strome College of Business section in the graduate catalog (<https://catalog.odu.edu/graduate/stromecollegeofbusiness/>) to develop an individualized plan of study based on the required coursework.

BA or BS to MPA (Master of Public Administration) Linked Program

The linked BA/MPA or BS/MPA program provides qualified Old Dominion University undergraduate students with the opportunity to earn a master's degree in public administration while taking credits in the MPA program as

an undergraduate student. The program is designed for highly motivated students with the desire to immediately continue their education after the bachelor's degree. The program is especially relevant to individuals seeking to work (or currently working) in the public or non-profit sectors, but is suitable for students from any undergraduate major. Graduate courses may be taken during the fall and spring semester of the student's senior undergraduate year. Up to 12 graduate credits can count toward both the undergraduate and graduate degree and can meet upper-level General Education requirements. After receiving the undergraduate degree, a student will continue with the MPA program, taking MPA courses until completing the required 39 credit hours. Students in the linked program must earn a minimum of 150 credit hours (120 discrete credit hours for the undergraduate degree and 30 discrete credit hours for the graduate degree).

Requirements for admission to the graduate program can be found in the School of Public Service section of the Graduate Catalog (<https://catalog.odu.edu/graduate/business/public-service/>). For additional information, please contact the School of Public Service in the Strome College of Business.

Approved linked bachelor's to doctoral degree programs are as follows:

College of Engineering and Technology

- Bachelor's in Engineering or Engineering Technology to PhD in Engineering

For a select number of exceptionally well-qualified students, the college has established a linked doctoral program that enables students to be admitted directly into the PhD program upon completion of the baccalaureate degree. A select number of exceptionally well-qualified students can be admitted to the Bachelor/PhD program in their junior year while they are pursuing one of the undergraduate programs at Old Dominion University. This program encourages admitted students to work closely with faculty members and pursue a research experience. Just as in the linked Bachelor/MS program, six credit hours of graduate course work may again be counted towards the undergraduate degree and doctoral course work mentioned above for the Bachelor/PhD program. For linked bachelor's to doctoral programs, students must earn a minimum of 198 credit hours (120 discrete credit hours for the undergraduate degree and 78 discrete credit hours for the graduate degree). Students in these programs must maintain a GPA of 3.50 or better throughout their bachelor's and doctoral studies.

The student may opt to obtain the master's degree along the way to the doctorate. To obtain the master's degree, the student must utilize the six graduate credits obtained as part of their undergraduate program, use 18 credits of the graduate course work that is part of the PhD, and also write a master's thesis.

University Requirements for Graduate Degrees & Certificates

Completion of Requirements

Graduate students who complete their graduate degree or certificate within eight years following admission to Old Dominion University will follow the requirements in the catalog in effect at the time of their first enrollment. For military service exception, see the policy on Sudden Withdrawal and Prolonged Absence Due to Military Mobilization under Requirements for Graduate Degrees and Certificates. If a catalog other than the catalog of the year of initial enrollment is to be used, written permission of the graduate program director and dean or designee must be obtained. Graduate students should consult their advisors to determine if any out-of-date credits may be re-validated by examination.

In all cases, students must have been duly admitted to the University and an academic program of study and meet all of the requirements for graduation in one catalog. Students may not create their own degrees or certificates by selecting partial requirements from more than one catalog.

Prior Learning Assessment Credit Options at the Graduate Level

Old Dominion University offers Prior Learning Assessment, a program for assessing graduate-level knowledge gained through work and life experience and self-study. Students should meet with their advisors or distance learning representative to determine how Prior Learning Assessment credit affects their degree planning. A student may ordinarily earn a maximum of six semester hours at the graduate level through the following mechanisms:

1. Knowledge-based examinations.* Upon approval of the student's graduate program director and the appropriate chair and/or dean of the college involved, a student may take a knowledge-based examination, and with a satisfactory score, receive academic credit for the course(s).
2. External examinations. Upon approval of the student's graduate program director and the appropriate chair and/or dean of the college involved, a student may submit satisfactory scores of professional examinations that are evaluated and recommended for graduate-level credit by the American Council of Education, and receive academic credit for the relevant course(s).
3. Credit for training. Upon approval of the student's graduate program director and the appropriate chair and/or dean of the college involved, a student may submit documentation of completion of professional and/or military training that is evaluated and recommended for graduate-level credit by the American Council on Education, and receive academic credit for the relevant course(s).
4. Portfolio development. Upon approval of the student's graduate program director and the appropriate chair and/or dean of the college involved, a student may develop a portfolio for a graduate-level course(s) offered by Old Dominion University to earn academic credit. Portfolios are submitted to and assessed for credit by the appropriate department and/or college involved.

The following regulations for Prior Learning Assessment credit apply:

1. Prior Learning Assessment credit may be granted upon the written recommendation of the student's graduate program director and the chair of the department/school (or designated faculty assessor) having jurisdiction over the courses involved.
2. Applicability of Prior Learning Assessment credit toward a specific degree program is subject to departmental/school approval.
3. A student may not receive credit for the same course in which any grade has been previously awarded, including W (withdrawal), F (fail), or O (audit).
4. No letter grades will be entered on the student's transcript for Prior Learning Assessment credit. This credit will be treated in the same way as transfer credit: a "XP" (Pass) will be assigned and it will not count in the student's grade point average.

5. A student should request Prior Learning Assessment credit as early as possible upon admission to degree status. A student must meet with the degree program advisor and the director at the beginning of his or her academic career at Old Dominion University to determine how the Prior Learning Assessment program may be applicable to the degree.
6. Satisfactory scores for knowledge-based examinations and professional examinations are determined by the appropriate department/school and/or dean of the college involved.
7. Necessary documentation for academic credit for professional training is determined by the appropriate department/school and/or dean of the college involved.
8. A maximum of six semester hours of graduate credit may be earned through Prior Learning Assessment mechanisms. The six hours is included in the maximum number of graduate credits that may be transferred into a graduate program at Old Dominion University. The student must be aware of individual degree program requirements. Programs may grant exceptions in the case of approved inter-institutional programs or in extraordinary circumstances with the approval of the dean or designee of the Graduate School.
9. A student in a certificate or endorsement area may earn a maximum of six credit hours through Prior Learning Assessment credit to apply to a certificate, endorsement or teacher licensure program. Prior Learning Assessment hours gained in these programs would be applicable to approved degree programs at Old Dominion University. In an approved graduate degree program at Old Dominion University, a graduate student who has earned six credit hours in a certificate or endorsement program that is applicable to the degree program has met the maximum number of Prior Learning Assessment credit hours. No additional Prior Learning Assessment credit may be applied to that graduate degree program.
10. Prior Learning Assessment credit earned at another institution may be re-evaluated by Old Dominion University faculty at their discretion to determine whether credit may be awarded at Old Dominion University.

Procedures for Prior Learning Assessment

Students wishing to receive academic credit for departmental examinations, training or portfolio development through Prior Learning Assessment should do the following:

1. Contact the Prior Learning Assessment representative to discuss possible challenges. The Prior Learning Assessment representative and student will discuss guidelines on requesting approval to challenge a course(s) through the available Prior Learning Assessment options.
2. Submit a resume and cover letter demonstrating learning outcomes based upon prior learning to the Prior Learning Assessment representative.
3. The Prior Learning Assessment representative will submit the documentation to the department chair, or a designated faculty assessor, who will examine the request and determine eligibility to challenge the course(s). The department's decision will be forwarded to the Prior Learning Assessment representative who will then notify the student.
4. Once determination is made that the student is eligible to challenge the course(s) through Prior Learning Assessment, the student will complete and return to the Office of Prior Learning Assessment the appropriate intake request form. At this time, the student's account will be billed, and the appropriate Prior Learning Assessment fee should be paid. Specific instructions for completing the process will be available from the Office of Prior Learning Assessment.

If the conclusion for the portfolio assessment process results in a negative decision of the award of credit, a student may appeal the decision to the college having the responsibility for the course(s) for which credit is sought. The basis for a portfolio assessment appeal is the student's charge that the assessment decision was awarded through prejudice or caprice. The burden of proof rests with the student.

Students must initiate appeals in writing within three weeks of receiving the completed portfolio evaluation form. The appeal must be written to the Prior Learning Assessment representative.

The Prior Learning Assessment representative will forward the appeal letter to the appropriate department chair. The chair will review the student's appeal. The chair will get input from the student and from the faculty assessor and may form an independent committee to review the appeal. The chair makes the decision on the validity of the appeal. If the chair concludes there is no cause for complaint, the student has the right to appeal to the dean of the college.

If the faculty assessor is the chair, the student may go directly to the dean. The dean will follow the procedures as outlined above. The decision of the dean of the college is final.

External Examinations

External examinations, including CLEP and DANTES, are administered through the Credentialing Center. Students wishing to receive academic credit for external examinations should contact the Credentialing Center at 757 683-6089. Additional information is available from the website at <https://www.odu.edu/academics/academic-records/score-analysis/clep-dantes>.

Prior Learning Assessment Fees*

Students participating in the Prior Learning Assessment program are responsible for assessment fees as follows:

1. External Examination. Students are responsible for the testing fees for external examinations such as CLEP and DANTES, and should check with the Credentialing Center at Old Dominion University for fee information. There is no additional Prior Learning Assessment fee for the granting of academic credit for external examinations.
2. Departmental Examination. The Prior Learning Assessment fee is equal to 30% of the current approved in-state on-campus rate for undergraduate and graduate courses.
3. Training Evaluation. The assessment fee for training not previously evaluated by Old Dominion University is equal to 20% of the current approved in-state on-campus rate for undergraduate and graduate courses. For information about training programs that have been evaluated by Old Dominion University (and therefore incur no additional fee), visit the Prior Learning Assessment web site at: <https://www.odu.edu/academics/academic-records/evaluation-of-credit/prior-learning>.
4. Portfolio. Portfolio assessment fee equal to 50% of the current approved in-state on-campus rate for undergraduate and graduate courses.

Fees are based on the credit hours attempted and are not refundable if the student does not receive credit as a result of the evaluation. There is no appeal of the fee charge. The fees must be paid at the time the student is approved to submit a portfolio, departmental examination or training documentation for evaluation.

For more information call (757) 683-5650, visit the web site at <https://www.odu.edu/academics/academic-records/evaluation-of-credit/prior-learning> or email priorlearning@odu.edu.

* All fees are tentative and subject to final approval by the Board of Visitors and/or the president. Current Prior Learning Assessment fees are available on the website at <http://www.odu.edu/priorlearning>.

Exceptions

In exceptional circumstances, an additional six semester hours of graduate credit may be awarded using Prior Learning Assessment at the request of the graduate program director and with the approvals of the chair or designee and the dean or designee of the college involved. Prior Learning Assessment fees may also be waived under established inter-institutional agreements or in exceptional circumstances at the request of the graduate program director and with the approvals of the chair or designee, the dean or designee of the college involved, and the Office of Prior Learning Assessment.

Graduate Credits by Transfer

A maximum of twelve (12) semester hours of graduate credit earned as a non-degree graduate student at Old Dominion University may be applied

toward a graduate degree program; additional credits may be applied from approved graduate certificate programs within ODU. An extra combined maximum of twelve (12) graduate credits may be applied toward a graduate degree program from another accredited institution, if those credits were not part of a conferred degree, or through Prior Learning Assessment (see the Graduate Catalog Policy on "Prior Learning Assessment Credit Options at the Graduate Level"). Programs may grant exceptions to the number of transfer credits in the case of approved inter-institutional programs or in extraordinary circumstances with the approval of the dean or designee of the Graduate School. Students beginning their graduate studies at another institution and wishing to follow their faculty mentors who may have relocated to Old Dominion University will have their total allowances for transfer credits evaluated on a case-by-case basis and approved by the dean or designee of the Graduate School. Without exception, a majority of the total credits for the completion of a graduate degree or graduate certificate must be earned at Old Dominion University (see the Graduate Catalog Policy on "Institutional Credit Requirements for Graduate Degrees and Graduate Certificates"). Transfer credit will be given only for those courses that are certified as being applicable toward a comparable degree or certificate at the institution that offered the courses, and that were completed with a grade of B or better. Specifically, in-service courses that are established especially for groups of teachers and are not intended by the home institution to be part of a degree program will not be acceptable for transfer at Old Dominion University. Exceptions to this regulation may be made only with the approval of the graduate program director and, the dean of the college. In case of doubt, it is the responsibility of the student to show that the course in question would be acceptable toward a comparable degree at the home institution.

No credit toward a graduate degree may be obtained by examination (except through the Prior Learning Assessment options noted above). Credits earned at another institution for a graduate degree may not transfer, however, experiences gained in those courses could be evaluated with Prior Learning Assessment with appropriate credit given. No credits may be transferred or be eligible for Prior Learning Assessment if they are older than eight years.

Process: Students who wish to transfer allowable credit earned prior to admission to a degree program at Old Dominion University must submit a special request for evaluation of transfer credits through the graduate program director to the Office of the University Registrar. Following admission to a degree program, students must obtain written permission from the graduate program director before registering for a course at another institution with the intention of transferring the credit for that course toward a graduate degree at Old Dominion University. In no case is a transfer of credit final without the signed approval of the graduate program director and the academic dean overseeing the program on the Evaluation of Transfer Credits Form.

Evaluation of Transfer Credits

In the case of a student who has changed programs of study at Old Dominion University, the graduate program director of the new program may or may not accept any previously transferred course work or work completed in the former programs.

Credits accepted for transfer from another institution will satisfy partial hour requirements, but grades earned in such courses are not calculated in the student's overall grade point average.

No credits will be accepted toward the degree or certificate if more than eight years old unless properly validated by examination.

Institutional Credit Requirements for Graduate Degrees and Graduate Certificates

A majority of the total credits for the completion of a graduate degree or graduate certificate must be earned at Old Dominion University. Some colleges, schools, and departments may have additional requirements that must be fulfilled. Students interested in applying for transfer credits and/or prior learning assessment credits should refer to the Graduate Catalog

policies on Prior Learning Assessment Credit Options at the Graduate Level and Graduate Credits by Transfer.

Graduate Assessment Requirement

Old Dominion University has developed an institution-wide plan to assess the quality of its graduate academic degree programs. In addition, students are asked to assess their experiences with support services, University administration, and other aspects of their University experience. Students will complete the assessment at the end of their graduate degree program.

Prior to the completion of degree requirements, all graduate students must complete their assessment. Students will receive advanced notice of their eligibility to complete the measures, which may be accessed through the University's site at www.odu.edu. Failure to complete the assessments normally precludes the student's right to receive his or her graduate degree. Assessment results are used to improve student learning and the educational experience at Old Dominion University, and they do not become part of students' records. Confidentiality is assured, as only aggregate data are reported and used in analyses.

Responsible Conduct of Research Policy

1. All graduate students who were admitted or readmitted to a degree or graduate licensure program as of fall 2010 must complete the Collaborative Institutional Training Initiative (CITI) basic course. The basic course includes the following modules: Misconduct (falsification, fabrication, and plagiarism); Data acquisition, management, sharing and ownership; Mentor/trainee relationships; Publication practice and responsible authorship; Peer review; Conflicts of interest; and Collaborative research. Completion of the RCR modules will be tracked through the CITI website and is a graduation requirement. The RCR modules must be completed prior to completion of 12 semester hours. Students who fail to complete this requirement will have a registration hold placed on their records. As appropriate to their general field of study, students may complete the Biomedical Social and Behavior Research, Physical Science, or Humanities RCR track offered by CITI to fulfill this requirement. Graduate students who are admitted into a certificate program only or are considered non-degree-seeking without being affiliated with a licensure program are exempt from this requirement.
2. All investigators conducting human subjects research protocols (both Exempt and Non-Exempt) as well as all graduate students enrolled in Thesis and Dissertation projects involving human subjects are required to complete the CITI (Collaborative Institutional Training Initiative) Program for Human Subjects Research.
3. All investigators conducting animal subjects research protocols as well as all graduate students enrolled in Thesis and Dissertation projects involving animal subjects are required to complete the LATA (Laboratory Animal Training Association) training program.

Time Limits

All requirements for a graduate degree or graduate certificate must ordinarily be completed within an eight-year period. Exceptions to these time limits must be approved by the graduate program director and the college dean or designee. Graded coursework older than eight years at the time of graduation must be re-validated by an examination before the work can be applied to a graduate degree. Courses identified as research, thesis or dissertation that were graded pass/fail do not require re-validation. See the "Policy on Re-validation of Out-of-Date Graduate Credit."

Students whose graduate study is interrupted by military service will be granted an extension of time for program completion for the period of their military service, not to exceed five years. In such cases, graded coursework older than eight years at the time of graduation must still be revalidated.

Graduate Certificate Programs

Graduate certificate programs are available to both non-degree and degree seeking graduate students. These certificates are ideal for students who want to explore areas of professional interest or meet accreditation requirements. They also provide the opportunity for students to further their knowledge

and become more competent in their profession. The University's minimum requirement for admission into a graduate certificate program is completion of a bachelor's degree. Some colleges, schools, or departments have additional requirements, such as a degree in a particular area or specific coursework. Students seeking a graduate certificate accept responsibility for adhering to the minimum requirements as well as those applied by the department where the certificate is managed.

Graduate certificate programs generally include a minimum of nine credit hours and a maximum of 21 credit hours. An overall grade point average (GPA) of 3.0 or above in all courses specified as a requirement for the certificate is required for the award of a graduate certificate.

Certificates of Advanced Graduate Studies (CAGS) are for students seeking a formal award certifying completion of study beyond the master's degree in an academic or occupational field of study. These programs are intended for professional licensure or professional development and may be completed prior to or concurrently with doctoral studies. These programs generally require a minimum of 24 credit hours. Students must have a 3.0 overall GPA in the required courses to be awarded a certificate of advanced graduate study.

Master's Degrees

This section specifies the minimum requirements for a master's degree from Old Dominion University. Some colleges, schools and departments have requirements in addition to the requirements described below. In seeking a master's degree, each student accepts responsibility for the following University requirements as well as any imposed by the major department.

The master's degree is awarded in recognition of the candidate's command of a comprehensive body of knowledge and ability to perform productively in the field of study. All master's degrees require a minimum of 30 semester hours of graduate credit. Any variation within an individual program's approved degree framework, including course substitutions, must be approved in writing by the graduate program director in consultation with the student's faculty advisor when appropriate.

Thesis and Non-Thesis Option

Candidates for the master's degree at Old Dominion may have the choice of two options: the thesis option or the non-thesis option. The choice will depend upon the availability of the two options within the selected discipline, the professional interests of the candidate, and the advice and approval of the appropriate graduate program director.

Thesis Option

A minimum of 30 semester credits is required, including 24 semester credits in approved course work and six semester credits in research. The candidate is required to prepare and present a thesis or equivalent creative work. A final oral examination covering the research is required. A comprehensive written and/or oral examination covering the program of study may be required.

Non-Thesis Option

A minimum of 30 semester credits of approved course work is required, including one or more courses at the conclusion of study that deal directly with special topics and/or training related to current problems or research in the discipline. A comprehensive written and/or oral examination, or an approved equivalent, on the program of study is required.

Student Advising

The Master's Degree

The graduate program director in consultation with the student, will assign a graduate advisor who must be certified for graduate instruction. An annual evaluation may include student's performance in courses, assistantships (teaching, research), the development and re-evaluation of his/her plan of study, guidance in selecting projects and mentors, preparation and scheduling of qualifying/comprehensive or equivalent exams, time management, and obtaining employment or further education. The advisor's

annual evaluation and recommendation will be shared with the student and the graduate program director.

Program of Study

Prior to completion of 12 semester hours, the degree candidate is required to prepare a program of study with the guidance of the advisor. The purpose of the program of study is to ensure that the student organizes a coherent, individualized plan for the course work and research activities. The program of study is to be consistent with the requirements for the degree as described in the catalog and must be approved by the graduate program director. The successful completion of the program of study, along with the collateral reading, research, practica, etc., will enable the student to demonstrate the high level of professional competence required of all graduate students in their respective fields.

Master's Examination

A comprehensive written examination and/or oral examination, or its equivalent, is required under the non-thesis option and, depending on the program, may be required under the thesis option. The examination tests the candidate's competence in the fields covered by the program of study. The nature of the master's examination will depend on the degree sought and the requirements of the major department and examining committee. A program may propose, through the appropriate college graduate committee and academic dean, replacing the master's examination with an equivalent requirement. Such equivalent requirements shall be approved by the dean of The Graduate School. For further information, the student should consult the section on requirements under each degree program.

The examining committee is appointed by the graduate program director with appropriate notification to the student. The examining committee is composed of a minimum of three members who may or may not be those who serve as advisors or members of the thesis committee. Members are expected to be certified for graduate instruction in the major department/school and college. This examination may not be scheduled until all major requirements have been satisfied.

The results of the examination must be received in the Office of the University Registrar at least two weeks prior to the end of the semester. In order to pass the final examination or approved equivalent, a master's degree candidate must have a favorable vote from a majority of the examining committee. A student who has failed the examination may repeat it once. Students who fail the comprehensive examination twice cannot subsequently elect a thesis option. At the discretion of the graduate program director, a student who passes the examination but does not graduate within twelve months may be required to repeat the examination.

Thesis Committee

The graduate program director, in consultation with the student, appoints a thesis committee of at least three members, two of whom must be full-time current ODU faculty members. All committee members must either be graduate certified at the appropriate level or have the academic backgrounds and research interests necessary to counsel, direct, and evaluate the student's proposed research and progress toward completion of the program of study and the thesis. The graduate program director approves the constitution of the committee and ensures that all committee members are graduate certified.

Two of the committee members must be full-time Old Dominion University faculty. The third member may be one of the following: a full-time University faculty; an adjunct, part-time, or emeritus University faculty; or a non-ODU academic or professional with special knowledge of the thesis subject area. No more than one-third of the committee's membership can be individuals external to the University.

The committee chair must be full-time Old Dominion University faculty, be certified for graduate instruction at the highest level, and be an authority in the field of specialization of the proposed thesis. Research faculty based in the University's research centers may also serve in the role of chair when graduate certified at the appropriate level with a University department or school. Researchers or faculty at affiliated external research institutions may also serve in the role of chair when specifically designated by memoranda

of understanding. External, part-time, adjunct, and/or emeriti faculty may serve in the role of committee co-chair with the approval of the graduate program director and the dean or designee. Full-time University faculty who are appointed to the committee who transition to emeriti status or who leave the University may continue to serve, but if they were chair, they will become co-chair with one of the remaining full-time faculty assuming the role of chair.

Replacement of the thesis committee chair or any other substantial change in the composition of the thesis committee initiated by the student requires that the reconstituted thesis committee re-evaluate and re-approve the thesis prospectus. Committee changes that occur outside of the student's control (e.g., faculty retirement, faculty loss of graduate certification) may or may not require a prospectus re-evaluation pending a discussion among the student, new and continuing committee member(s), and graduate program director.

Decisions to determine whether or not the thesis prospectus, final thesis written document, and oral defense of the thesis passes must have the majority approval of the thesis committee. All committee members sign where relevant on University forms reporting the thesis outcomes.

Thesis

The candidate for the master's degree whose program of study includes a thesis is required to prepare and present a thesis (or equivalent in creative work) acceptable to the thesis director and committee, the graduate program director, and the appropriate academic dean. The thesis must represent in content and methods the skills, disciplines and knowledge required for graduate study, including competence in written language. The character of the final work must testify to the distinction of the student and standards of the University. The thesis or equivalent creative work must be worthy as a culminating experience for graduate study. Candidates will be required to defend the thesis in an oral examination. The Thesis Acceptance Form must be submitted to the Office of the University Registrar upon completion of Part A of this form. The Thesis Delivery Form must accompany this form.

The candidate should consult the Guide for Preparation of Theses and Dissertations available from the Graduate School web site or from the Dean's office of the appropriate college.

Change From Thesis to Non-Thesis Option

A student who wishes to change from the thesis option to the nonthesis option for the master's degree must obtain the permission of the thesis advisory committee and the graduate program director. The permission must be forwarded to the Office of the University Registrar prior to the last semester for the intended graduation using the Change of Status Form. The candidate must meet all requirements of the nonthesis option. A maximum of three credits earned in thesis research can be counted toward the degree requirements for the nonthesis option. The thesis advisory committee must indicate that the thesis research work was productive in and of itself and warrants credit as a special problem or special topics course.

Departmental Requirements

Individual colleges and/or programs may establish requirements above and beyond those set by the University as minimum. Students are obligated to follow the requirements of the appropriate graduate program section of the catalog in effect at the time of their first enrollment for this degree.

Education Specialist Degrees

This section specifies the minimum requirements for an education specialist degree (Ed.S.) from Old Dominion University. Some colleges, schools and departments have requirements in addition to the requirements described below. In seeking an education specialist degree, each student accepts responsibility for the following University requirements as well as any imposed by the major department.

The education specialist degree is normally granted at the end of the sixth collegiate year of study and as such falls between the master's degree and the doctorate in time; however, it is not necessarily viewed as intermediate

between the two degrees. The education specialist degree provides advanced professional preparation for various positions in education.

For admission to an education specialist program, the University requires a master's degree from an accredited institution and a minimum grade point average of 3.00. Some programs have additional requirements such as a minimum Graduate Record Examination (GRE) aptitude score, grade point average, and graduate courses in specific areas.

The education specialist degree requires a minimum of 30 semester hours of graduate credit beyond a master's degree. All requirements for the degree must be completed within a six-year period. Students must pass a written comprehensive examination and satisfy research requirements. Specific course requirements are found in the appropriate section of this catalog. Any variation within an individual program's approved degree framework, including course substitutions, must be approved in writing by the graduate program director in consultation with the student's faculty advisor when appropriate.

Doctoral Degrees

This section specifies the minimum requirements for a doctoral degree from Old Dominion University. Some colleges, schools and departments have requirements in addition to the requirements described below. In seeking a doctoral degree, each student accepts responsibility for the following University requirements as well as any imposed by the major department.

The doctorate is the highest degree awarded at Old Dominion University, and it represents the summit of academic achievement. The University offers four doctoral degrees:

1. Doctor of Engineering (D.Eng.)
2. Doctor of Nursing Practice (D.N.P.)
3. Doctor of Physical Therapy (D.P.T.), and the
4. Doctor of Philosophy (Ph.D.)

Doctoral degrees require at least 78 hours of study beyond the bachelor's degree or 48 hours beyond the master's degree, unless a professional accreditation specifies otherwise. Any variation within an individual program's approved degree framework, including course substitutions, must be approved in writing by the graduate program director in consultation with the student's faculty advisor when appropriate.

Doctor of Engineering

The purpose of the Doctor of Engineering program is to provide the Commonwealth and the nation with exceptionally educated engineering practitioners. These individuals will have developed high-level capabilities to provide innovative solutions in specialized engineering endeavors. The graduates of the program will meet the highest standards for advanced level engineering and leadership positions in industry and government.

The curriculum consists of a minimum of 48 credit hours of graduate work beyond the master's degree, including 18 credit hours of common courses, 18 credit hours of graduate coursework in the student's area of specialization, and 12 credit hours of applied doctoral project.

Doctor of Nurse Practice

This program is designed to develop the roles and practice skills of advanced practice nurses including nurse practitioners, nurse midwives, clinical nurse specialists, nurse anesthetists, and nurse executives. Nurses enrolled in this program will be prepared to serve as leaders, researchers, clinicians, and executives capable of transforming lives and the healthcare of the communities they serve. Specific emphasis is on addressing the needs of underserved and vulnerable populations.

Doctor of Physical Therapy

The professional doctorate degree in physical therapy (D.P.T.) provides individuals with the knowledge, skills, and clinical internship experiences required to sit for licensure in any jurisdiction in the United States. This curriculum is comprised of a series of required didactic and clinical education courses prescribed in a specific sequence that offers students the knowledge, professional skills and competencies necessary for entry into the practice of physical therapy. In the place of a dissertation, each student

is required to develop a selected case study based upon the observations of a patient examined and treated during one of the clinical internships, a research proposal, and a research project with platform and poster presentations. In addition to satisfactorily completing the didactic and clinical education curriculum, students must pass both written and oral comprehensive examinations prior to graduation.

The curriculum consists of 117 credit hours over a three-year, nine-semester period of time including summers. There are five full-time clinical internships in the three years of study totaling 40 weeks.

Doctor of Philosophy

Programs leading to the Ph.D. are designed to help superior students develop the capability to become creative leaders in their chosen fields. The degree is awarded upon mastery of the subject area, the development of appropriate research skills, and a concentration of knowledge in the field of specialization.

It is important to recognize that the attainment of this degree is not a matter of accumulating course credits and satisfying residency and language or research skill requirements, even though minimum requirements for these categories are set forth by the University. The final basis for granting the degree shall be the candidate's knowledge of the field of study and his or her demonstrated ability to do independent, original, scholarly research.

Each graduate program is responsible for setting out the requirements and procedures appropriate to its area of study. The requirements and regulations set forth below are to be construed as the minimal requirements established by the University. Students also are obligated to meet all additional requirements established by the appropriate graduate program.

Prerequisites for Admission

The applicant must complete the appropriate application for admission, submit official transcripts of all college- or university-level work, and supply letters of recommendation and official results of test scores as specified by the individual program. Baccalaureate and post baccalaureate work must reflect superior performance.

Minimum Requirements

Minimum degree requirements for the Doctor of Philosophy which must be considered in preparing the preliminary plan of study are:

1. Satisfactory completion of at least 48 semester hours of post-master's course work, including the dissertation or equivalent level of performance course work;
2. Demonstrated competency in research skills as required by the specific graduate program;
3. The passing of written and oral candidacy examinations at the end of the program of course work;
4. The completion of a dissertation representing independent, original research worthy of publication in a refereed scholarly journal; and
5. The successful oral defense of the dissertation before an appropriately selected committee of faculty knowledgeable in the field of the dissertation research.

Student Advising

The Doctoral Degree

Before completion of nine semester hours, the graduate program director, in consultation with the student, will assign a program advisor or advisory committee. The advisor or advisory committee members must be certified for graduate instruction and will meet with the student at the end of each semester to evaluate student's academic progress. Among the advisor's/ advisory committee's responsibilities are a review of student's performance in courses, assistantships (teaching, research), the development and re-evaluation of his/her plan of study, guidance in selecting projects and mentors, preparation and scheduling of qualifying/comprehensive or equivalent exams, time management, and obtaining employment or further education. These annual evaluations are signed by the advisor/advisory committee and the student. The evaluation is filed in the student's record and a copy given to the graduate program director.

Plan of Study

Before completion of nine semester hours, the student shall prepare a plan of study with the aid and approval of the advisor or advisory committee. The plan of study also should be approved by the graduate program director to ensure that it meets established requirements. Failure to present the plan on time may prolong the period of study for the degree. Before drawing up and approving the plan the graduate program director should verify that there is on file a set of transcripts of all undergraduate and graduate work the student has taken. When appropriate, a diagnostic examination also may be used in developing a plan of study.

The successful completion of all work indicated on the approved plan of study is a fundamental prerequisite to the granting of the degree.

Research Skills

Program skill requirements reflect the University's expectations of one or more significant skills distinct from the dissertation but fundamental to doctoral and postdoctoral research. Specific skill requirements vary with programs. Traditionally, a reading knowledge of one or more foreign languages has been required; more recently a demonstrated proficiency in computer science or quantitative methodology has been introduced.

Under University policy, each academic program leading to the Doctor of Philosophy establishes its own requirements for research skills. Responsibility for the level of competency, the nature of validating the competencies, and the standards utilized in the evaluation rests with the department/school that offers the program. Descriptions of individual programs should be consulted for appropriate regulations and procedures. Information about schedules of examination, standards, and general procedures is available from all departments/schools and graduate program directors.

The research skills requirement must be met before taking the candidacy examination. For specific information, the student should consult the appropriate program, school or college.

Candidacy Examination

The written and oral components qualifying a student for candidacy for the degree of Doctor of Philosophy are comprehensive in nature. The graduate program director is responsible for coordinating the administration of the written and oral candidacy examinations and will appoint a committee to administer the exams. The examination committee will be made up of at least three faculty members, all of whom must be graduate certified. Before taking the qualifying examinations, the student must meet the appropriate departmental, school and college requirements and have the recommendation of the advisor or advisory committee. The examinations are taken near the end of the student's coursework. The candidacy examinations are usually taken during the semester in which the last formal graduate courses listed in the study plan are taken.

When the student and the advisor or advisory committee have determined that the examination should be taken, the student should obtain a Request for Permission to Take the Ph.D. Candidacy Examination no later than one month before the date of the first examination. The student should secure the signature of the advisor or advisory committee and submit the form to the graduate program director, who will verify that the student meets the prerequisites for the candidacy examinations. The graduate program director should be consulted on the schedule of the examinations. Once permission has been granted, postponement of the examinations must have the approval of the graduate program director.

After successful completion of the written examination, an oral examination, which must be taken prior to the end of the next semester, is given addressing topics discussed in the written examination and possible additional materials. The oral examination is a serious and integral part of the qualifying procedure.

A student must pass both the written and oral candidacy examinations. The written examination must be passed before the oral examination may be taken. For either the written or oral examination, more than one negative vote from the examining committee will result in a failure. A failed written examination must be retaken successfully within one year. A student who

passes the written examination on the first attempt need not repeat the written exam in the event of failing the oral exam. A failed oral exam, which also may be attempted a second time, must be retaken prior to the end of the next semester.

Neither the written nor the oral examination can be passed conditionally. A pass cannot be made contingent upon doing extra courses, additional projects, etc.

The examination committee will report, in writing, to the graduate program director and the dean the results of the examinations.

Students must be registered in any semester in which they are scheduled to appear for the examination.

Dissertation Committee

After the candidacy examinations have been passed, the dissertation committee is formed to supervise the dissertation research, which begins with the approval of a topic. Membership of the dissertation committee may overlap with the advisory committee if one has already been established (see section under Student Advising). Faculty who agree to serve on a dissertation committee understand that they are committed to serve until the dissertation is completed.

The student selects a dissertation committee chair and may consult with the graduate program director for assistance in doing so. The committee chair must be full-time Old Dominion University faculty, be certified for graduate instruction at the highest level, and be an authority in the field of specialization of the proposed dissertation. Research faculty based in the University's research centers may also service in the role of chair when graduate certified at the appropriate level with a University department or school. Researchers or faculty at affiliated external research institutions may also serve in the role of chair when specifically permitted by memoranda of understanding.

The dissertation committee chair, in consultation with the student, appoints a dissertation committee of at least three members who are graduate certified at the appropriate level and who have the academic backgrounds and research interests necessary to counsel, direct, and evaluate the student's proposed research and progress. At least two committee members must be full-time current ODU faculty members. At least one member must be from outside the student's department/school at ODU or a non-ODU academic or professional with special knowledge of the dissertation subject area. Faculty may not serve as the outside committee member in the department/school of their primary appointment. No more than one-third of the committee's membership can be individuals external to the University. The graduate program director approves the constitution of the committee. The dean of the college or designee approves the final constitution of the committee and ensures that all committee members are graduate certified.

External, adjunct, and/or emeriti faculty committee members may serve in the role of committee co-chair with the approval of the graduate program director and the dean or designee.

Emeriti faculty who were appointed to the committee while they were full-time faculty may continue to serve as one of the members after receiving emeritus status but cannot continue as chair of the committee although co-chairing is permissible. This or another replacement of the dissertation committee chair or any other substantial change in the composition of the dissertation committee initiated by the student may require that the reconstituted dissertation committee re-evaluate and re-approve the dissertation prospectus. Committee changes that occur outside of the student's control (e.g., faculty retirement, faculty loss of graduate certification) may or may not require a prospectus re-evaluation pending a discussion among the student, new and continuing committee member(s), and graduate program director.

Decisions to determine whether or not the dissertation prospectus, final dissertation written document, or oral defense of the dissertation passes must have the majority approval of the dissertation committee. All committee members sign where relevant on University forms reporting the dissertation outcomes.

Change in Dissertation Committee

Changes must be made in advance of the oral dissertation defense. Changes made in the dissertation committee are made only with the approval of the graduate program director and the college dean.

Advancement to Candidacy

Advancement to candidacy is a formal step that occurs after the student:

- Passes the Ph.D. written and oral candidacy examinations,
- Submits a topic that is approved by the dissertation committee chair, and
- Completes formal course work.

Once these requirements have been met, the graduate program director must file the “Advancement to Candidacy” form with the Office of the University Registrar. Please check with the appropriate graduate program director for further information.

Dissertation Preparation

General regulations and procedures governing the submission of a doctoral dissertation are given in the Guide for Preparation of Theses and Dissertations. Full information, including detailed procedures and qualifications for undertaking a doctoral dissertation, is available in the student’s major/school and should be obtained by the student and the dissertation advisor at the beginning of the planning for research and writing of a dissertation.

After approval of the dissertation proposal, the chair of the dissertation committee shall recommend the student’s admission to candidacy to the graduate program director and the dean.

Oral Dissertation Defense

The format of a defense is determined by the dissertation committee with the approval of the graduate program director. The defense is chaired by the chair of the dissertation committee. The chair will act as moderator, ruling on questions of procedure and protocol that may arise during the defense. The chair of the defense represents the college dean, to whom he or she makes a complete and prompt report on the defense. The chair should also promptly notify the graduate program director of the results of the defense.

The oral dissertation defense is scheduled for the time and place approved in the request for the dissertation defense. A two-week lead time is required for scheduling. This information is published in the appropriate University news media. The oral dissertation defense is open to the University community; all interested members are encouraged to attend the examination.

The aim of the defense is to explore with the candidate the methodological and substantive contributions of the already approved dissertation. Majority approval by the examiners constitutes successful completion of the defense of the dissertation. In case of failure, the dissertation committee may recommend that the candidate be dropped or be allowed re-examination no earlier than three months after the first examination.

Satisfactory performance on this examination and adherence to the regulations outlined above complete the requirements for the degree. The Dissertation Acceptance and Processing Form must be submitted to the Office of the Registrar with the completed dissertation upon completion of requirements for the degree.

Dissertation Load Registration

All doctoral students who have advanced to candidacy are required to be continuously registered for an appropriate number of dissertation units during each semester and summer session. (See “Graduate Student Registration Requirement.”)

Thesis and Dissertation Procedures

Graduate students who plan to write theses or dissertations should obtain a copy of the Guide for Preparation of Theses and Dissertations from The Graduate School's web site (<http://www.odu.edu/graduateschool/>) for use in conjunction with any style manual preferred or required by their respective departments/schools or colleges. Minimum University requirements for

the preparation of theses and dissertations are contained in the guide; departments/schools and/or colleges may set additional requirements.

Information regarding compliance with policies regulating research involving human subjects, animals, radiation, potential biohazards (e.g. recombinant DNA), lasers, controlled substances, or hazardous materials and policies regarding intellectual property can be found on the Office of Research web site at <https://www.odu.edu/researchoffice> (<https://www.odu.edu/researchoffice/>).

All research involving human subjects, animal care and use, radiation, potential biohazards, lasers, controlled substances, or hazardous materials requires the approval signature of the appropriate review committee chair or designee, or safety officer, prior to the initiation of any research activities.

Students should be aware that in most cases, the University owns intellectual property created with University resources and can claim an interest in the intellectual property. Intellectual property must be disclosed to the Office of Research using an invention disclosure form. In order to fulfill its contractual obligations, and to adhere to the Policy on Patents and Copyrights, it may be occasionally necessary for the University to temporarily delay publication of a thesis or dissertation that contains potentially patentable information in order to ensure the availability of worldwide patent protection. Such situations would arise when a faculty member directing the research, under his/her duty as a University employee, discloses potentially patentable subject matter to the Office of Research. A student’s degree requirements can still be fulfilled even though publication of the thesis or dissertation is delayed.

Presentation of a thesis or dissertation in partial fulfillment of degree requirements necessitates submission of the finished original work to the dean of the college for final approval, following oral defense and signature approval by the thesis/dissertation committee and graduate program director. Approval of the dean of the college should be obtained prior to reproduction of the original work, in the event corrections need to be made.

The University has adopted an Electronic Thesis and Dissertation (ETD) submission process which has replaced mandatory productions of bound copies. Instructions for submitting the thesis/dissertation to ProQuest, after the dean of the college has given final approval, can be found on The Graduate School's web site (<http://www.odu.edu/graduateschool/>) or within the Guide for Preparation of Theses and Dissertations. If desired but not required, students can obtain hard copies via ProQuest or another vendor. The Registrar should also receive the Master's or Doctoral-relevant Result of Examination and document Acceptance and Processing forms. The ETD process and submission of forms to the Registrar should occur no later than the last day of classes of the semester in which the degree will be taken. The date on the title page of the thesis/dissertation should be within the same semester that the student intends to graduate.

Leave of Absence

A candidate who finds it necessary to be excused from registration for a semester must report formally, before the beginning of the semester, to the dissertation committee and the graduate program director and request by petition a leave of absence using the Leave of Absence from Doctoral Program form. A leave of absence may not exceed one year and may not be repeated. During a leave of absence, the candidate will not be entitled to assistance from the dissertation committee or to the use of University facilities. The granting of leave of absence does not change the candidate’s responsibility for meeting the time schedule for the completion of degree requirements.

Graduate Student Resources

- Academic Resources (p. 64)
- Research Resources (p. 65)
- Campus Services (p. 67)

Academic Resources

University Libraries

Old Dominion University Libraries enrich the academic, research, and learning experience of the University community by inspiring and empowering the Monarch community to learn, grow, and create. The University Libraries provide students access to extensive digital resources, online journals, e-books, streaming media, and other electronic resources in all fields of research and instruction. The Libraries also offer access to Naro Video @ ODU Libraries (<https://guides.lib.odu.edu/narovideo/>), a collection of 43,000+ videos and materials made available to the Monarch community and to any member of Friends of the ODU Libraries.

On the University Libraries' website at www.odu.edu/library (<http://www.odu.edu/library/>), students can find library guides, instructional videos, Chat reference, and many other services. The Libraries include the Patricia W. and J. Douglas Perry Library, the Elise N. Hofheimer Art Library, and the Music Library and F. Ludwig Diehn Composers Room. Each facility holds specialized book collections, maps, scores, recordings, microforms, and equipment available for borrowing. At our Help Desks, staff are on hand to provide assistance with information, location, instruction, and information technology questions. Additionally, students and faculty members have online access to the Virtual Library of Virginia's collections and may borrow books and other materials from participating libraries across the Commonwealth.

Edward E. Brickell Medical Sciences Library at Macon and Joan Brock Virginia Health Sciences at Old Dominion University

The Edward E. Brickell Medical Sciences Library is the major health care information resource for Macon and Joan Brock Virginia Health Sciences at Old Dominion University. It serves the faculty members, students, and staff of VHS (Virginia Health Sciences) as well as provides a resource for the communities of Hampton Roads.

The Brickell Library subscribes to a variety of information resources including DynaMed, UpToDate, the Cochrane Library, VisualDX, PubMed/MEDLINE, CINAHL, ClinicalKey, BMJ Best Practice, AccessMedicine, PsycINFO, Web of Science, EndNote, and others. Brickell Library employees can provide training sessions in the use of these resources and also assist with copyright questions and evaluating the validity of information.

Our Clinical Medical/Reference Librarians (CML) can help with literature searches, compile bibliographies, and provide systematic and scoping review assistance for VHS. CML librarians also work to support the Institutional Review Board (IRB) and Institutional Animal Care and Use Committee (IACUC).

The Brickell Library includes a computer lab with color and b/w printers and a scanner and is available 24/7 with badge access. Residents have unlimited free printing. VHS students are provided \$200 of printing credit annually. There are also 25 group study rooms: 16 on the second floor and nine on the third floor. These are equipped with DVD players, 52-inch monitors and whiteboards. The Brickell Library also has a collection of hand-held ultrasound probes for check out at the Circulation desk.

Information on staffed hours of operation, additional services and resources can be found at <https://www.evms.edu/library/> or you may call the Brickell Library for information or assistance at (757) 446-5850 or email at library@evms.edu (https://old Dominion-my.sharepoint.com/personal/delneka_b_odu_edu/Documents/Documents/library@evms.edu). The Brickell Library employees look forward to working with you during your time

at Macon and Joan Brock Virginia Health Sciences at Old Dominion University.

Elise N. Hofheimer Art Library

Barry Arts Building, 47th Street and Monarch Way, Room 2008, second floor; 757-683-4059

The Hofheimer Art Library contains specialized books, journals, online resources, videos, audio-visual titles, and other materials for students and faculty in the visual arts. Reserve materials for ODU Art Department classes are available at the service desk. Individual and group study space, computers, drawing tablet, scanner, and network printer are available. Visit the Art Library at www.odu.edu/library/art (<http://www.odu.edu/library/art/>).

Music Library and F. Ludwig Diehn Composers Room

Diehn Center for the Performing Arts, Room 189; 757-683-4173

The Music Library contains print scores, music audio, and video content. Reserve materials for School of Music classes are available at the service desk. Students have access to PC and Mac computers, a DVD/VCR player, CD player, audio cassette player, turntable, flatbed scanner, and network printer.

The Diehn Composers Room is co-located with the Music Library and contains unique and rare manuscripts, scores, audio recordings, memorabilia, and other specialized music materials. Reference and research services are available in the Reading Room, including the use of a Steinway grand piano by appointment only. Visit the Music Library and Diehn Composers Room at www.odu.edu/library/diehn (<http://www.odu.edu/library/diehn/>).

Patricia W. and J. Douglas Perry Library

Perry Library offers quiet study space, collaborative rooms for group projects, accessibility services, a café, meeting space, and other facilities for student success. The Monarch community will also find Naro Video @ ODU Libraries (<https://guides.lib.odu.edu/narovideo/>). This unique collection of 43,000+ videos and materials is located in Room 1222 of Perry Library.

Learning Commons @ Perry Library

First Floor, 757-683-4178

The Learning Commons @ Perry Library is a collaborative project of the University Libraries, Information Technology Services, and the Office of Academic Success Initiatives & Support (ASIS), providing year-round services. The facility includes individual study space, group collaboration space, presentation practice, computers, wireless access, printers, scanners, GIS/digital media/other specialized software, and a sound room that can be reserved by students. Students can access research assistance and resources, information technology assistance, tutoring and writing centers, and other services supporting student success.

At the Perry Library Help Desk, located in the Learning Commons (www.odu.edu/learningcommons (<http://www.odu.edu/learningcommons/>)), students with a valid University ID may borrow equipment, media, books, reserve materials, and other items. Graduate student study carrels are also available. Information on borrowing privileges, loan periods, and policies is available at www.odu.edu/library/services/borrowing (<http://www.odu.edu/library/services/borrowing/>).

Interlibrary Loan and Document Delivery Services

757-683-4170, 4172

Interlibrary loan allows ODU students, faculty, and staff to request journal articles, books, and other needed research materials not available in the University Libraries. The Commonwealth's Virtual Library of Virginia interlibrary loan agreement ensures that students, faculty, and staff may obtain items located in other Virginia libraries. Document delivery services provide copies of materials held in the University Libraries' collection to online and other eligible students, faculty, and staff. Interlibrary loan and document delivery requests can be submitted online at www.odu.edu/library/

services/interlibrary-loan (<http://www.odu.edu/library/services/interlibrary-loan/>).

Research Help Services

Help Desk, First Floor, 757-683-4178

ODU Libraries staff assist students and faculty with all types of research using all formats of library resources. Librarians and staff provide direct individual assistance by telephone, e-mail, live online Chat, and face-to-face and virtual consultation by appointment. Local and online students may obtain assistance by visiting or calling the Help Desk, directly contacting a subject librarian, using the Chat service, or submitting a question through *Ask-A-Librarian* at <https://www.odu.edu/library/help> (<https://www.odu.edu/library/help/>).

Instructional Support

ODU Libraries offer library instruction sessions to courses with research assignments or library-related learning goals. The Libraries also provide online tutorials, videos, and online guides to help students build research skills and increase knowledge in information literacy, as well as workshops and programming designed to support student learning and to facilitate connections between students, the Libraries, and the University community. Additional information can be found at www.odu.edu/library/services/instruction/.

Special Collections & University Archives

Third floor, 757-683-4483

Special Collections & University Archives, located on the third floor of Perry Library, preserves and provides access to the Libraries' unique and rare collections documenting the history of ODU, Virginia, and the region. The collections cover a wide range of topics that enrich scholarly opportunities, and students and faculty are encouraged to visit and use the collections and services. Special Collections' materials include rare books, diaries, letters, legal and campaign files, oral histories, music, film, photographs, maps, and more. Moreover, the University Archives document the history of the University and include yearbooks, department records, student organization records, course catalogs, film, photographs, etc. Special Collections staff are available to assist students and faculty with research requests and host class sessions specializing in active-learning exercises with primary sources. Visit Special Collections at www.odu.edu/library/special-collections/.

Several digitized collections of materials from Special Collections & University Archives are also freely available online. Visit the ODU Digital Collections at <https://olddomuni.access.preservica.com/>.

ODU Digital Commons and Scholarly Communications Services

The Department of Research & Scholarly Communication includes the Libraries' dedicated subject specialist librarians, who provide reference and research assistance, library instruction, collection development, and collaboration to students and faculty at ODU. Our librarians are also available to assist with questions related to copyright and author rights, research data management, publishing, and research impact. The department also oversees ODU Digital Commons (digitalcommons.odu.edu (<https://digitalcommons.odu.edu/>)), the University's institutional repository. Digital Commons brings together scholarly, creative, and institutional works for preservation, visibility, and worldwide open access. Digital Commons also provides a publishing platform for hosting journals, proceedings, and events.

Accessibility Services

First Floor, 757-683-4178

The Library Accessibility Room in the Learning Commons provides specialized equipment and quiet space for students registered with the University's Office of Educational Accessibility (<http://www.odu.edu/educationalaccessibility/>). This wheelchair-accessible room can be reserved for individual use. The facility houses CCTV, workstations with FUSION Professional, Read and Write Gold, and other adaptive technologies. Orientation, reservations, and research consultation appointments are available through the Learning Commons Help Desk.

Also, the Help Desk provides on-demand paging to students who need special assistance with retrieving materials from the upper floors. Information about accessibility is available on the University Libraries' website at www.odu.edu/library/services/accessibility (<http://www.odu.edu/library/services/accessibility/>).

Career Pathways

Career Pathways offers a gateway to resources, programs, events, and planning tools for all Old Dominion University graduate students and postdoctoral scholars. The program is designed to meet graduate students' career and professional development needs, preparing students for successful transition into thriving careers. Career Pathways offers two professional development programs and associated certificates:

- **Preparing Future Faculty (PFF)** - designed for graduate students interested in an academic career. Graduate students can earn the **PFF Certificate** by: (1) completing a mentored teaching experience; (2) creating a CV; (3) attending PFF and other professional development events; and (4) producing an ePortfolio to document and highlight their professional development and growth.
- **Preparing Future Professionals (PFP)** - designed for graduate students interested in a non-academic career such as in industry, non-profit/non-governmental organizations, or government agencies. Graduate students can earn the **PFP certificate** by: (1) developing an individual development plan; (2) creating a resume; (3) attending professional development events or completing professional development activities; and (4) producing an ePortfolio to document and highlight their professional development and growth.

The Career Pathways program is free, and is open to all ODU graduate students. Workshops are offered on campus and can be accessed via web conferencing. An archive of previously offered professional development workshops is also available for students to access 24/7.

More information about Career Pathways is available at <http://sites.wp.odu.edu/careerpathways>. (<http://sites.wp.odu.edu/careerpathways/>)

Writing Center

The Writing Center provides supplemental instruction to help students improve their writing strategies. Instead of providing a proofreading service, the Writing Center offers tutoring sessions that assist students in learning to proofread their own work, in getting projects started, and in developing the writing process for a paper.

The Writing Center offers 45-minute appointments with graduate student tutors who work with individual students or with groups. Most tutoring sessions are by appointment; walk-in appointments are provided when tutors are not in a scheduled session. For online students, we use WOnline for online appointments. Students have the option of making standing appointments with tutors once per week, for up to four weeks at a time.

In addition to tutoring services for undergraduate and graduate students, the Writing Center will visit classrooms to provide writing lessons and group tutorials, and it offers a program called Graduate Student Write-Ins. Graduate Student Write-Ins are weekly retreats hosted by the Writing Center on Saturdays designed to provide a structured time for graduate students to focus on their writing without interruption in a supportive environment, and WC tutors are available for 30-minute appointments during the session.

The Writing Center is located at 1208 Perry Library. For more information, go to <https://www.odu.edu/al/centers/writing-center> (<https://www.odu.edu/al/centers/writing-center/>) or email writingcenter@odu.edu.

Research Resources

Office of Research

Old Dominion University is classified by the Carnegie Foundation as having High research activity. Old Dominion's Office of Research works on behalf of faculty, staff and students to enhance and grow the University's research enterprise through strategic planning, infrastructure support, proposal development services for faculty and administrators, assuring research

compliance, encouraging technology transfer, promoting applied research, and by facilitating opportunities for collaboration with local, state, and federal agencies, foundations, and industry sponsors of research. The office is led by the Vice President for Research and includes staff members who leverage a breadth of experience from both academic and private sector backgrounds. Sponsored research administration services, encompassing the range of pre- and post-award grant and contract administration, are provided by the Old Dominion University Research Foundation, a 501(c) 3 organization.

While most of Old Dominion's research activities and centers are housed within specific colleges, the ones that are the most diverse in terms of their research focus and/or scope are organized in the Office of Research. The Virginia Modeling, Analysis, and Simulation Center (VMASC), the Frank Reidy Research Center for Bioelectrics, the Center for Educational Partnerships (TCEP), and the Commonwealth Center for Recurrent Flooding Resiliency (CCRFR) are four such entities.

The **Virginia Modeling, Analysis, and Simulation Center (VMASC)** is a multidisciplinary modeling, simulation and visualization collaborative research center. With industry, government, and academic partners, VMASC furthers the development and application of modeling, simulation, and visualization as decision-making tools and promotes economic development through transferring its intellectual property into the commercial sector. Its core capabilities are: military modeling and simulation (primarily combat simulations), homeland security and homeland defense modeling and simulation, medical simulations including biomedical representations, social system modeling, transportation modeling, virtual environments for training, coastal resilience analyses, and use of big data in simulations. VMASC creates computer simulations and conducts program analyses to meet stakeholders' needs. Computer simulations provide the capability to: quickly and economically test theories and ideas; help visualize and understand complex situations; prioritize labor and capital investment opportunities; and reduce the risk inherent in business decisions. The research interests and capabilities of VMASC include: simulation methodologies, mathematical modeling, simulation inter-operability, verification and validation, distributed simulation, computer visualization, immersive virtual environments, human factors, social behavior, performance analysis, intelligent systems, decision support and collaboration methodologies, and modeling and simulation systems integration.

The **Frank Reidy Research Center for Bioelectrics (FRRCB)** is recognized as a leader in understanding the interaction of electromagnetic fields and ionized gases with biological cells and applying this knowledge to the development of medical diagnostics, therapeutics, and environmental decontamination. The center is part of an International Consortium for Bioelectrics that includes universities and research institutes from Japan, Germany, France and the United States. The objectives of the center are to perform leading edge interdisciplinary and multi-institutional research, recruit top faculty and exceptional graduate students, support regional, national and international programs, and increase external funding and institutional visibility. Research conducted at the FRRCB has attracted substantial federal agency support including multiple grants from the National Institutes of Health, Department of Defense, and the National Science Foundation. The FRRCB has expertise in pulsed power technology for biological and medical applications in the sub-nanosecond to the millisecond range and includes the design and modeling of pulse delivery systems. A wide range of research is conducted at the center including new cancer therapies, wound healing, decontamination, imaging, and cardiovascular applications. Old Dominion University is licensing proprietary FRRCB technology in medicine and biology.

The **Center for Educational Partnerships (TCEP)** establishes collaborative educational enterprises with schools and school divisions that support dissemination of proven practices, rigorous field trials of promising models, and development and testing of innovative research-based models in collaboration with Old Dominion University's primary educational partners.

TCEP focuses its efforts on the following activities:

- Developing broad-based partnerships with school divisions in the Hampton Roads area and greater Virginia.

- Serving as a conduit through which Old Dominion University will endeavor to make available the best local, state, national, and international resources to the primary partners to fulfill our mutual obligation to assure academic achievement, development of responsible citizenship, and self-fulfillment of the youth served by our partner schools.
- Pursuing selected inter-institutional and international educational partnerships that capitalize on identified areas of strength at ODU or enhance strategic relationships between these partners and the Hampton Roads community.

The **Commonwealth Center for Recurrent Flooding Resiliency (CCRFR)**, a full partnership between ODU, the Virginia Institute of Marine Science, and William and Mary, was established in 2016 by the Virginia General Assembly. The center engages the expertise, resources, and intellectual vibrancy of the partner institutions in support of building resilience to recurrent flooding and sea level rise. The center serves, advises, and supports Virginia by conducting interdisciplinary studies and providing training, technical and non-technical services, and policy guidance in recurrent flooding resilience to the Commonwealth and its local governments, state agencies, industries, and citizens. Recognizing that flooding impacts the entire Commonwealth, the CCRFR works throughout Virginia by supporting short- and long-term projects within cities, in regions or throughout the state. Faculty are currently engaged in research that will provide cities and counties with localized subsidence data, build risk communication strategies within stakeholder groups, increase resilience within the tourism industry, map flood hazards in western Virginia, and test resilience strategies. The CCRFR is committed to working with partners across the Commonwealth and aims to leverage and enhance existing resilience strategies in Virginia.

Research and Enterprise Centers

The University has established a number of research and enterprise centers: <https://www.odu.edu/impact/centers> (<https://www.odu.edu/impact/centers/>). Please check the web pages of the Office of Research <http://www.odu.edu/research> (<http://www.odu.edu/research/>) and those of the individual colleges for information regarding centers in specific areas.

Research Policies

The Office of Research is responsible for regulatory oversight of research involving human subjects, animal subjects, and biological materials. Students intending to conduct research in these areas should be aware that approval from a relevant committee (i.e. IRB, IACUC, IBC) may be required before the research can be initiated. The Office of Research also provides oversight and guidance regarding Responsible Conduct of Research, Conflicts of Interest, and Export Controls.

Students engaged in scientific research or other scholarly activity at Old Dominion University should also be aware of the University's Policy, Procedures and Timeline for Responding to Allegations of Misconduct in Scientific Research and Scholarly Activity. The policy can be found in its entirety in the Board of Visitors manual section on Research Policies at <http://www.odu.edu/about/policiesandprocedures/bov> (<http://www.odu.edu/about/policiesandprocedures/bov/>).

Innovations Commercialization

Students who are self-sponsored and did not use significant resources of Old Dominion University own their inventions. Only students who receive compensation through sponsored research, tuition/fee waivers, scholarships, assistantships, or other financial arrangements and/or make substantial use of University facilities in developing proprietary ideas or technology are covered by Old Dominion University's Policy on Intellectual Property. This policy covers the ownership and use of copyrighted works, inventions, and any other form of intellectual property. In those cases where the University has a vested interest in intellectual property, the policy specifies how inventions are disclosed, evaluated for protection and commercialization, and how any revenues derived will be distributed between the inventor/author and the University. The policy can be found in

its entirety at: <https://www.odu.edu/research/innovations-commercialization> (<https://www.odu.edu/research/innovations-commercialization/>).

Students who used significant resources of Old Dominion University could be offered exclusive licenses at very attractive terms. Please call the Office of Research for more details at 757-683-4027.

Research Foundation

The Old Dominion University Research Foundation is a separate, private, not-for-profit corporation chartered under the laws of the Commonwealth of Virginia in 1965. The foundation serves as the fiscal and administrative agent to manage research and sponsored programs for Old Dominion University. The foundation's purpose is to promote the education, research, and public service objectives of Old Dominion University by encouraging, advancing, fostering, and conducting research and sponsored programs in engineering, the physical and life sciences, the humanities, education, and all other branches of learning.

The foundation is the contracting agent for University research grants and contracts with external funding agencies. In fiscal year 2016, the Research Foundation received \$47.3 million in awards for research and sponsored programs. Research and sponsored program activity for fiscal year 2016, measured by amount of expenditures, totaled \$50.5 million for projects sponsored by federal, state, and local government agencies and a variety of corporations and private foundations.

Technical direction of a sponsored program remains the responsibility of the principal investigator. The foundation supports the University and assists investigators by providing a broad range of administrative and technical support services. Among these services are: financial administration, budget preparation and monitoring, financial compliance guidance, proposal preparation and submission assistance, project payroll and human resources, financial reporting, technical reporting support, procurement, and equipment inventory control.

Campus Services

Center for Career & Leadership Development

The Center for Career and Leadership Development (CCLD) empowers undergraduate and graduate students and alumni in their career and leadership development from their first day as a Monarch through graduation and their career. Through strategic collaboration with campus and community partners, CCLD offers several programs and services, including career coaching and workshops, leadership development, resume reviews and job search preparation, career fairs and employer connections, a job search database called Handshake, student employment coordination and training, volunteer and service-learning programs, career treks, professional mentorship programs, living-learning and theme communities, and the Monarch Pantry.

The Student Employment Program is designed to assist students in locating on- or off-campus, part-time, seasonal, or Federal Work-Study (FWS) positions for those who qualify.

The Center for Career and Leadership Development collaborates with on- and off-campus organizations to post open jobs of all types, including permanent full-time positions, as well as on-campus roles, through ODU Handshake. This powerful interactive web-based system is available for free to students and alumni of Old Dominion University. The ODU Handshake database contains employer information, career information, a career events calendar and interview schedules, and the means to electronically apply for positions posted. Handshake is the primary tool used by CCLD to communicate with students about various career opportunities and events to help students succeed at Old Dominion University and into their careers.

Individual career coaching and electronic assessment tools, as well as workshops on career exploration, development, and the job search, are available to assist in major and career path selection. Students may sign up for an appointment with a career coach via Handshake or by visiting the office during drop-in coaching hours. CCLD also provides students with

experiential learning opportunities through leadership seminars, service-learning course partnerships, career treks, job shadow, and mentorship opportunities. Students can also volunteer in and receive support from the Monarch Pantry and Monarch Clothing Closet. More information on career coaching, workshops, and experiential learning opportunities are located on CCLD's website at odu.edu/career-leadership (<https://www.odu.edu/career-leadership/>).

Career and internship fairs are held twice a year and are supplemented by specialized fairs for specific populations. Employers are also present on campus through information and tabling sessions, as well as employer and alumni career information panels and etiquette meals. Additional opportunities to connect with internships and co-operative opportunities are coordinated by ODU's Monarch Internship and Co-Op Office (odu.edu/internship) (<https://www.odu.edu/internship/>).

More information is available by calling the CCLD main office at 757-683-4388 during normal office hours, via email at cclld@odu.edu, or via the website at <http://www.odu.edu/career-leadership> (<http://www.odu.edu/career-leadership/>). Staff members are also available in 2202 Webb Student Center.

Health Insurance for Graduate Students and Post-Doctoral Fellows

Degree-seeking graduate students enrolled in courses at Old Dominion University's main campus or one of the higher education centers are eligible to enroll. Graduate assistants being paid \$5,000 or more per semester are eligible to enroll as subsidized graduate assistants. Degree-seeking domestic graduate students who reside within a 50-mile radius of campus and who are enrolled in online courses are eligible to enroll for the plan. These students have access to the Student Health Center with payment of the student health fee. All other eligible graduate students may enroll as non-subsidized graduate students. In addition, individuals in post-doctoral fellow positions hired by Old Dominion University or the ODU Research Foundation are eligible to enroll in this insurance plan. For more information, go to <http://www.odu.edu/graduateschool/graduate-student-health-insurance> (<http://www.odu.edu/graduateschool/graduate-student-health-insurance/>) or email gradhealth@odu.edu.

Mission

The College of Arts and Letters is committed to the ideals of the liberal arts. Its curriculum introduces students to the full range of human experiences through the study of cultural heritage, forms of artistic and literary expressions, patterns of social and political behavior, and methods of critical inquiry. The mission of the College of Arts and Letters is to prepare students for rigorous, intellectual and creative inquiry leading to their full development as human beings and to their responsible engagement with society. We accomplish this mission by:

1. Endowing all students with the essential skills of critical reading and thinking, effective oral and written communication, and proficient use of technology
2. Providing foundational knowledge in the arts, humanities and social sciences for all undergraduates
3. Offering excellent disciplinary and interdisciplinary programs of study and training that introduce students to accumulated knowledge, scholarly debate, and innovations in the field
4. Fostering global awareness and sensitivity to the breadth and diversity of the human condition, which includes acquiring an understanding of the roles of gender, race, ethnicity, and culture
5. Providing an environment for the free exchange of ideas among faculty and students, and by vigorously defending academic and intellectual freedom
6. Promoting research projects, collaborative learning experiences, and challenging internships that connect our students to the community and prepare them for the world of work
7. Supporting a broad array of cultural experiences that enrich the lives of students, faculty, the University, and the community

Overview

Graduate programs in the College of Arts and Letters foster the scholarship and creativity of individual students through close personal contact between faculty and students. Arts and Letters faculty members dedicate themselves to excellence in teaching; take pride in their achievements in research; and commit to enhancing in every way possible the exciting and stimulating environment that is Old Dominion University. The College of Arts and Letters has graduate programs in Applied Linguistics, Applied Sociology, Creative Writing, Criminology and Criminal Justice, English, History, Humanities, International Studies, Lifespan and Digital Communication, and Music Education. The College offers M.A. degrees in Applied Linguistics, Applied Sociology, English, History, Humanities, Lifespan and Digital Communication, International Studies, and Music Education; the M.F.A. degree in Creative Writing; and Ph.D. degrees in Criminology and Criminal Justice, English, and International Studies.

Departments

- Department of Communication & Theatre Arts (p. 69)
- Department of English (p. 70)
- Department of History (p. 86)
- Department of Political Science and Geography (p. 92)
- Department of Sociology and Criminal Justice (p. 100)
- Department of Women's and Gender Studies (p. 101)

- F. Ludwig Diehn School of Music (p. 89)
- Institute for the Humanities (p. 88)

Programs

Doctor of Philosophy Programs

- Criminology and Criminal Justice (PhD) (p. 100)
- English (PhD) (p. 81)
- International Studies (PhD) (p. 95)

Master of Arts Programs

- Applied Linguistics (MA) (p. 70)
- Applied Linguistics with a Concentration in Language, Society, and Social Justice (MA) (p. 71)
- Applied Linguistics with a Concentration in Teaching of English to Speakers of Other Languages (TESOL) (MA) (p. 72)
- Applied Sociology (MA) (p. 100)
- English with a Concentration in Literature (MA) (p. 76)
- English with a Concentration in Rhetoric and Composition (MA) (p. 78)
- English with a Concentration in Teaching of English (MA) (p. 79)
- English with a Concentration in Technical Writing (MA) (p. 80)
- History (MA) (p. 86)
- Humanities (MA) (p. 88)
- International Studies (MA) (p. 93)
- Lifespan and Digital Communication (MA) (p. 69)

Master of Fine Arts Programs

- Creative Writing with a Concentration in Fiction (MFA) (p. 73)
- Creative Writing with a Concentration in Non-Fiction (MFA) (p. 74)
- Creative Writing with a Concentration in Poetry (MFA) (p. 75)

Master of Music Education Programs

- Music Education with a Concentration in Applied Studies (MME) (p. 89)
- Music Education with a Concentration in Pedagogy (MME) (p. 90)
- Music Education with a Concentration in Research (MME) (p. 91)

Certificate Programs

- Geographic Information Science Certificate (p. 98)
- International Development Certificate (p. 99)
- Literature Certificate (p. 85)
- Maritime History Certificate (p. 87)
- Modeling and Simulation - International Studies Certificate (p. 99)
- Music Performance Certificate (p. 91)
- Professional Writing Certificate (p. 85)
- Spatial Analysis of Coastal Environments Certificate (p. 99)
- Teaching English to Speakers of other Languages (TESOL) Certificate (p. 85)
- Teaching of Writing Certificate (p. 85)
- Women's Studies Certificate (p. 101)

Centers and Institutes

China Center

The China Center's mission is to promote and coordinate research, cultural exchanges, and academic programs in China-related Studies; to enhance mutual understanding of the two cultures; and to facilitate economic and business cooperation between China, other Chinese societies, and the United States with particular emphases on the Commonwealth of Virginia.

Gay Cultural Studies

ODU's Gay Cultural Studies Advisory Council has established a program, unique in Virginia's academic community, that focuses on the contributions, concerns, and challenges associated with LGBT culture. The Gay Cultural Studies program promotes academic research and provides graduate and undergraduate educational opportunities, and engages the local Hampton Roads LGBT community through ongoing dialogue and community involvement.

Institute for Ethics and Public Affairs

The Institute for Ethics and Public Affairs seeks to raise awareness and stimulate discussion of the ethical dimension of matters of public concern within the campus community and the larger Hampton Roads community; to strengthen moral community and foster a commitment to ethical ideals in public life; to facilitate reflection on the ethical standards that govern the professions; and to highlight the unique and valuable contribution that philosophical reasoning can make to practical decision making.

Institute for the Humanities

The Institute for the Humanities offers a Master of Arts degree in the Humanities that fosters cross-disciplinary learning and interdisciplinary research outcomes with a primary focus on humanistic methodologies. The program allows students to pursue individualized programs of study that incorporate classes from across the College of Arts and Letters. In alignment with the mission of the college and university, the program aims to develop students' skills in critical thinking, effective communication, and creative problem solving. Students will become engaged citizens and stewards of the value of the human experience to transform the world and improve their own lived experiences. You can peruse our catalog page (p. 88) and visit our website (<https://ww1.odu.edu/al/institutes/humanities.html>).

Institute for Jewish Studies and Interfaith Understanding

In 2002, with a \$300,000 matching grant from the Dudley Cooper Trust, Old Dominion University announced the establishment of an Institute for Jewish Studies and Interfaith Understanding dedicated to the idea that interfaith understanding involves both an appreciation of Judaism's historic role in the development of Western civilization and an understanding of the cross-cultural development of the world's religions. To this end, the Institute coordinates lectures, symposia, and reading groups related to Jewish history and thought, as well as Judaism's continuing dialogue with Christian, Islamic, and Asian faith traditions. Presenting information about the world's religious and ethnic diversity in a University setting of open dialogue to thoughtful students, young and old, can enrich overall understanding of the issues and challenges that confront us in the twenty-first century.

Institute for the Study of Race and Ethnicity

In support of the mission of Old Dominion University to place special emphasis upon understanding the perspectives of women, minorities, and non-Western cultures, the Institute for the Study of Race and Ethnicity (ISRE) seeks to develop, promote and implement academic, research and public service programs that focus on the study of race and ethnicity in the region, the nation, and globally. The political, social, economic, and cultural experiences of African Americans, Filipino Americans, and other communities of color are emphasized in the work of the institute. ISRE seeks to establish itself as a major archive and research center in Virginia and the southeastern region of the United States by providing archival resources through its Resource Center and engaging in the collection, analysis, and dissemination of data and research.

Institute of Asian Studies

Old Dominion University seeks to promote an expanded awareness and understanding of the nations and cultures of Asia, to support and encourage research on Asia, and to make resources available to foster better understanding and more effective interaction between organizations and individuals in the Hampton Roads area and those in Asia. To achieve these goals, the Institute of Asian Studies coordinates special programs and administers a major and minor in Asian studies. It also facilitates cooperative

relationships with higher education institutions and other organizations within the United States and throughout Asia. The Institute director works closely with the Office of International Programs regarding scholarships and study abroad programs and opportunities.

Model United Nations

The Old Dominion University Model United Nations Society is ODU's window on the United Nations and international activism. The Society's mission is promoting global, multicultural education and leadership experience through experiential learning, stressing student participation in simulation conferences and academic courses. The Society represents the university at model U.N., European Union, NATO and crisis simulation conferences around the country, and by organizing major simulations of its own, including U.N. Day in October and ODUMUNC, held every February. Membership is open to students from all colleges and disciplines at the university.

Monarch Institute for Game Design and Development (MIGDD)

The Monarch Institute for Game Design and Development (MIGDD) supports the college's Game Design, Development, and Criticism majors, which are housed in the Department of Interdisciplinary Studies. Its mission includes promoting collaborative gaming research and interdisciplinary cooperation between existing colleges and departments, encouraging the translation of research into product development and commercialization, providing students with internships and other experiential learning opportunities, and facilitating community engagement and outreach.

Social Science Research Center

The Social Science Research Center is located on the campus of Old Dominion University in Norfolk, Virginia. The SSRC has been in operation since 1998 and is staffed by two, full-time research and management professionals, a full-time project coordinator, and several part-time research assistants. The SSRC has successfully managed a variety of research and evaluation projects involving several national, regional and statewide surveys, and many program evaluations.

Programs

Master of Arts Program

- Lifespan and Digital Communication (MA) (p. 69)

Master of Arts Lifespan and Digital Communication (MA)

Gary Beck, Ph.D., Graduate Program Director

The Master of Arts in Lifespan and Digital Communication focuses on the study of human communication and digital media as they develop across the lifespan and is based on the assumption that relational communication, information gathering, conflict management, entertainment consumption, and social media use differs among, within, and between people at various stages of life (childhood, adolescence, young adulthood, middle age, and elder adulthood). Understanding and analyzing the inseparable relationship between lifespan communication and digital media is a key to success in most 21st century jobs, particularly in the interrelated employment areas of applied research and policy, community networking and outreach, creative industries, education and training, and health and wellness. *This program is offered traditionally and fully online.*

Admission Information

In addition to meeting all general University requirements, an applicant must have an undergraduate average of at least 3.25 in Communication or a related field and a 3.0 overall; two letters of recommendation from faculty members, or those who can evaluate the applicant's academic potential; and a 500-word essay that outlines the applicant's professional and personal goals in pursuing this degree, while explaining the relationship of these aforementioned goals to the Lifespan and Digital Communication degree program. The GRE is waived for this degree.

Curriculum Requirements

The Master of Arts degree in Lifespan and Digital Communication requires 36 credit hours for either the non-thesis or thesis option. No more than 12 credit hours may be taken at the 500 level. Both non-thesis and thesis option students take five required core courses (15 hours) as well either a thesis preparation course (3 hours) or a capstone course (3 hours) for a total of 18 hours of required classes that include:

COMM 601	Lifespan Communication Research and Theory	3
COMM 602	Digital Communication Theory and Research	3
COMM 603	Social Change and Communication Systems	3
COMM 604	Lifespan Communication Research Methods	3
COMM 605	Critical Methods and Digital Communication	3
Total Credit Hours		15

Additional Requirements

In addition, students pursuing the non-thesis option take 18 credit hours of COMM electives and a required 3-credit hour capstone seminar COMM 685. Students pursuing the thesis option take an additional 9 credit hours of COMM electives, COMM 689 (3 hours) (in the first semester they register for thesis hours) as well as COMM 698 & COMM 699: Thesis (six hours) in lieu of COMM 685. This thesis is based on original scholarly research and must address a specific and viable topic salient to the student's core and elective coursework in Lifespan and Digital Communication.

The thesis option is recommended for those students who have maintained a high GPA, have the support of a faculty advisor from the Communication and Theatre Arts department, and who are considering further studies at the doctoral level. The thesis committee, consisting of a chair and two other faculty members certified for graduate instruction, direct and evaluate the student's work. Approval of the thesis proposal by the student's committee and GPD is required before the completion of 27 hours of coursework. Upon completion of the thesis, the committee will conduct a two-hour examination and defense of the thesis.

Graduate Programs in English

There are four graduate programs in the English department:

1. Master of Arts in English;
2. Master of Arts in Applied Linguistics;
3. Master of Fine Arts in Creative Writing, and
4. Ph.D. in English.

Each program has its own guidelines and admissions policy.

Programs

Doctor of Philosophy Programs

- English (PhD) (p. 81)

Master of Arts Programs

- Applied Linguistics (MA) (p. 70)
- Applied Linguistics with a Concentration in Language, Society, and Social Justice (MA) (p. 71)
- Applied Linguistics with a Concentration in Teaching of English to Speakers of Other Languages (TESOL) (MA) (p. 72)
- English with a Concentration in Literature (MA) (p. 76)
- English with a Concentration in Rhetoric and Composition (MA) (p. 78)
- English with a Concentration in Teaching of English (MA) (p. 79)
- English with a Concentration in Technical Writing (MA) (p. 80)

Master of Fine Arts Programs

- Creative Writing with a Concentration in Fiction (MFA) (p. 73)
- Creative Writing with a Concentration in Non-Fiction (MFA) (p. 74)
- Creative Writing with a Concentration in Poetry (MFA) (p. 75)

Graduate Certificates

- Literature Certificate (p. 85)
- Professional Writing Certificate (p. 85)
- Teaching English to Speakers of other Languages (TESOL) Certificate (p. 85)
- Teaching of Writing Certificate (p. 85)

Master of Arts Applied Linguistics (MA)

Staci Defibaugh (sdefibau@odu.edu), Graduate Program Director

The Master of Arts in Applied Linguistics prepares students to pursue advanced graduate study in fields like linguistics, applied linguistics, law, psychology, and education; for careers in government and industry; to teach in colleges, adult education programs, businesses, private schools, or institutions in the U.S. or abroad, and for other professions requiring good analytical, linguistic, discourse, and writing skills. The program has two concentrations: Teaching English to Speakers of Other Languages (TESOL) and Language, Society, and Social Justice. Students may elect to pursue a concentration area by taking the required 9 credits of specialized coursework for each concentration or they may complete a general MA degree in Applied Linguistics without a concentration. Students in the program can complete their degree in-person on the main campus in Norfolk as well as by taking select courses synchronously online or asynchronously online. They may also earn a graduate certificate in TESOL and/or use appropriate courses in the program as requirements toward obtaining the Commonwealth of Virginia Endorsement for English as a Second Language.

Admission Information

In addition to general University admission requirements, applicants must have a grade point average of 3.0 or better, and must have taken some upper-level English, linguistics, or foreign language courses. The Graduate Record Examination (GRE), General Test is optional. Applicants must also submit a sample of scholarly writing, statement of purpose, and two letters of recommendation. International students must submit scores from the TOEFL iBT, (88 for regular admission and 80 for provisional admission), from the TOEFL PBT (570 for regular admission and 550 for provisional admission) or from IELTS Academic Module (6.5 or higher), a sample of scholarly writing, statement of purpose, and two letters of recommendation, both of which should also address the applicant's proficiency in English. After 12 hours of graduate work, international students must meet the language proficiency requirement for regular admission if admitted provisionally.

Applications submitted after the deadlines will be considered for review but admission for the desired semester is not guaranteed.

Curriculum Requirements

The M.A. in Applied Linguistics requires 33 credit hours, including 18 credit hours of program core courses and 15 credit hours of electives, and the passing of an oral comprehensive examination. Elective credit hours may be used to complete one of two concentration areas offered by the program or a general MA degree in Applied Linguistics without a concentration. Students should discuss their plans with the graduate program director at the beginning of their studies. No more than 12 hours may be taken at the 500 level. Courses taken PASS/FAIL are not included in the 33 credit hours.

Applied Linguistics: Core Courses

ENGL 540	General Linguistics	3
ENGL 671	Phonology	3
ENGL 672	Language Structure Analysis	3
ENGL 673	Discourse Analysis	3
or ENGL 763	Seminar in Discourse Analysis	
ENGL 679	First and Second Language Acquisition	3
ENGL 770	Research Methods in Language Analysis	3
or ENGL 780	Corpus Use, Research, and Material Design	
Total Credit Hours for Concentration or Electives		15
Total Credit Hours		33

Additional Requirements

Master of Arts - Applied Linguistics, Thesis Option

Writing a thesis may benefit those who contemplate further graduate work, as well as those who have a desire to pursue a single topic in depth. Under the guidance of a member of the graduate faculty, a student may earn six hours of credit for a completed approved thesis. Students who write a thesis will defend the thesis early in their final semester and complete their oral exam in a separate examination.

Master of Arts - Applied Linguistics, Oral Comprehensive Examination

At the end of the program, all students must complete an oral comprehensive examination that covers each student's program of study and, where applicable, the thesis. Students who fail the oral comprehensive examination may re-take it one more time in a different semester. Students who fail a second time will no longer be eligible to receive the Master of Arts degree in applied linguistics from Old Dominion University. During their final semester, students must submit an electronic portfolio that will include course syllabi, a selection of assignments for each course, along with a reflection on their experiences in the MA program.

Continuance

Students must:

1. Meet all university and program requirements;
2. Maintain a 3.0 grade point average or better;
3. Retake any core course in which grades below B- are earned.

Exit

In order to graduate from the program, students must:

1. Complete the required course of study for a total of, at least, 33 credit hours of course work. Credit hours with grades below B- and courses taken PASS/FAIL are not included in the 33 credit hour total;
2. Submit a program electronic portfolio;
3. Pass an oral comprehensive examination;
4. Fulfill all university exit requirements.

Master of Arts

Applied Linguistics with a Concentration in Language, Society, and Social Justice (MA)

Staci Defibau (sdefibau@odu.edu), Graduate Program Director

The Master of Arts in Applied Linguistics prepares students to pursue advanced graduate study in fields like linguistics, applied linguistics, law, psychology, and education; for careers in government and industry; to teach in colleges, adult education programs, businesses, private schools, or institutions in the U.S. or abroad, and for other professions requiring good analytical, linguistic, discourse, and writing skills. Elective courses can be at the 500, 600, or 700 level and they should be pre-approved by the Graduate Program Director.

Additional Requirements

Master of Arts - Applied Linguistics, Thesis Option

Writing a thesis may benefit those who contemplate further graduate work, as well as those who have a desire to pursue a single topic in depth. Under the guidance of a member of the graduate faculty, a student may earn six hours of credit for a completed approved thesis. Students who write a thesis will defend the thesis early in their final semester and complete their oral exam in a separate examination.

Master of Arts - Applied Linguistics, Oral Comprehensive Examination

At the end of the program, all students must complete an oral comprehensive examination that covers each student's program of study and, where applicable, the thesis. Students who fail the oral comprehensive examination may re-take it one more time in a different semester. Students who fail a second time will no longer be eligible to receive the Master of Arts degree in applied linguistics from Old Dominion University. During their final semester, students must submit an electronic portfolio that will include course syllabi, a selection of assignments for each course, along with a reflection on their experiences in the MA program.

Continuance

Students must:

1. Meet all university and program requirements;
2. Maintain a 3.0 grade point average or better;
3. Retake any core course in which grades below B- are earned.

Exit

In order to graduate from the program, students must:

1. Complete the required course of study for a total of, at least, 33 credit hours of course work. Credit hours with grades below B- and courses taken PASS/FAIL are not included in the 33 credit hour total;
2. Submit a program electronic portfolio;
3. Pass an oral comprehensive examination;
4. Fulfill all university exit requirements.

Master of Fine Arts

Creative Writing with a Concentration in Fiction (MFA)

Kent Wascom, Graduate Program Director
kwascom@odu.edu

The Master of Fine Arts in creative writing is widely regarded as a terminal degree. It is designed to prepare students for careers as published writers in fiction, poetry, or creative nonfiction. A secondary goal is to emphasize not only preparation for college-level teaching (the practical vocational goal of most M.F.A. programs in creative writing), but also includes preparation of graduates for careers in literary editing and publishing, or as free-lance writers (magazines, newspapers, reviews, and features).

Admission

Applicants must have completed a bachelor's degree from an accredited institution with at least a 3.0 G.P.A. Candidates must also submit writing samples in their genre (candidates should note genre on title page of submission), three letters of recommendation, academic transcripts, and a personal statement.

Curriculum Requirements

Students in the M.F.A. program must complete 54 total credit hours (39 hours of required courses and 15 hours of approved electives). In addition, students must also maintain a 3.00 GPA overall, satisfy a mid-program review at the end of the third semester in the program, and complete all work within three years (full-time students) or six years (part-time students). Students choose courses based upon their genre of study, and should consult the graduate program director or their advisor when selecting a schedule.

Students must take at least 12 credit hours of ENGL 650 (CREATIVE WRITING WORKSHOP), most of these in the genre area of concentration, to count toward core requirements for the degree.

*	These are the Graduate Creative Writing Workshops in Fiction, Poetry, and Nonfiction; course may be repeated up to 6 times with 3 different topics. Cross-genre experience is recommended (taking ENGL 650 Creative Writing Workshops in a concentration other than the student's major), but ONLY after the first year in the program. Instructor approval must be sought.
**	No more than 12 hours of courses at the 500 level may be counted toward the degree.
***	Should be taken in the last semester of the second year, or the first semester of the third year.
+	Additional Creative Writing Workshops, additional American, British, or World Literature Courses, or courses in other fields (approved in advance by GPD) that may count toward Electives ~ MFA Creative Writing students may also elect to take ENGL 596 Topics: Writing Tutorial (1 credit), which offers the opportunity to work in tutorials with the program's Visiting Writer in Residence. Three (3) of these 1-credit ENGL 596 Writing Tutorial courses are equivalent to one Elective (3 credits) in the MFA Creative Writing curriculum. Students <i>in their first year</i> of the program, especially those with GTAs/GAAs/RAAs, are strongly encouraged to take as one of their Electives, ENGL 664 The Teaching of College Composition; this course is typically a

requirement for any teaching assistantship assignments in the classroom.

Additional Requirements

Master of Fine Arts in Creative Writing Thesis

All candidates for the M.F.A. in creative writing must complete a thesis manuscript of publishable quality in their chosen genre (poetry, fiction, or creative nonfiction). Each student will select an advisor from the graduate faculty and work with that advisor and a committee of readers to prepare the manuscript. At the completion of the thesis, students will schedule an oral defense with the advisor and the committee, at which point the thesis will be adjudged as to its readiness for final acceptance.

Master of Arts English with a Concentration in Literature (MA)

Ruth Osorio, Graduate Program Director
rosorio@odu.edu

The Master of Arts program in English presents a full array of opportunities in literary studies, technical writing, composition and rhetoric, and the teaching of English. Our faculty, due to their varied areas of expertise, offer unique learning experiences in areas such as gaming, web design, environmental sustainability, Indigenous studies, digital humanities, postcolonialism, and ethnic and gender diversity. Faculty take a hands-on approach to teaching with manageable classroom sizes allowing for personalized instruction and a dynamic culture of learning. Whether you are looking for a professional leg up or simply wish to continue your education, a Master's Degree at ODU promises in-depth exploration of critical discourses that harness the force of language, technology, and literature. The program prepares students for further graduate study in English; for technical writing and editing; for teaching in secondary schools and colleges; for careers in publishing, grant writing, medical writing, social media managing, and community building; for further study in such fields as anthropology, law, psychology, and philosophy; for careers in government and industry; and for other professions requiring analytical, literary, linguistic, digital media, or writing skills.

Admission Information

The student must initially meet all general University admission requirements. For regular admission, students must generally have at least 24 undergraduate hours in English, or a closely related field, with a grade point average of 3.0 or better. However, students applying to the technical writing concentration (see technical writing concentration) may have little or no undergraduate course work relating to English, provided that they have an average of 3.0 or better in their undergraduate major.

Students applying to all concentrations must also, in addition to other admissions materials, provide: a 1-2 page single-spaced statement of purpose outlining the applicant's research interests and goals for the program and past relevant academic and/or work experience that has prepared the applicant for graduate work in English studies and an 8-12 page writing sample that demonstrates the applicant's writing ability, analytical skills, and engagement with scholarly sources.

International students must submit scores from the TOEFL examination, a sample of scholarly writing, and three recommendations, at least one of which evaluates ability in English. For regular admission, students must score 230 on the computer-based TOEFL (the equivalent of 570 in the older, paper-based score scale or 80 on the TOEFL iBT). Students may be admitted provisionally with a TOEFL score of 213 (550 in the paper-based scale), but must attain the scores required for regular admission after 12 hours of graduate work.

Curriculum Requirements

The Master of Arts degree in English requires 30 credit hours and the passing of one of the three examination options below. No more than 12 credit hours on the 500 level may be counted toward a degree. An identifiable unifying principle is required for each student’s program.

Literature Concentration

This concentration, which offers a comprehensive grounding in literary and cultural studies and critical theory, prepares students for careers in community college and four-year university teaching, public media, and a variety of jobs in the public sphere. It also prepares students for advanced literary and cultural studies at the Ph.D. level. For students in other programs, this concentration offers as well a Certificate in Literature, which helps to qualify them for secondary school teaching.

This concentration requires:

ENGL 600	Introduction to Research and Criticism	3
This course is to be taken in the student's first fall semester		

Controlled Electives (18 hours)

British Literature before 1800

One course from:		3
ENGL 507	Chaucer's Canterbury Tales	
ENGL 516	English Renaissance Drama	
ENGL 521	British Literature 1660-1800	
ENGL 532	Origins and Early Development of the British Novel to 1800	
ENGL 595	Topics in English (when topic is appropriate as approved by the Literature Coordinator)	
ENGL 596	Topics in English (when topic is approved by the Literature Coordinator)	
ENGL 615	Shakespeare	
ENGL 695	Topics (when topic is appropriate as approved by the Literature Coordinator)	
ENGL 728	Eighteenth Century British Literature

ENGL 791	Seminar in Literary Studies (when topic is appropriate as approved by the Literature Coordinator)	
ENGL 795	Topics (when topic is appropriate as approved by the Literature Coordinator)	

Methodology

One course from:		3
ENGL 672	Language Structure Analysis	
ENGL 725	Scholarly Editing and Textual Scholarship	
ENGL 730	The Digital Humanities	
ENGL 735	Postcolonial Literature and Theory	
ENGL 737	Narratology	

ENGL 753	Queer of Color Critique
ENGL 755	Critical Race Theory
ENGL 764	Theories of Literature
ENGL 770	Research Methods in Language Analysis
ENGL 780	Corpus Use, Research, and Material Design
ENGL 790	Seminar in Textual Studies (when topic is appropriate as approved by the Literature Coordinator)
ENGL 791	Seminar in Literary Studies (Seminar in Literary Studies [when topic is appropriate as approved by the Literature Coordinator])
ENGL 795	Topics (when topic is appropriate as approved by the Literature Coordinator)

Seminar

One course from:	3
ENGL 790	Seminar in Textual Studies
ENGL 791	Seminar in Literary Studies (Seminar in Literary Studies)

Free Electives 9

Note: Six hours must be from Literature courses

Total needed to graduate 30

Note: Of the total 30 hours needed to graduate no more than 12 hours can be at the 500 level

For any further questions regarding course offerings contact the Literature Coordinator or the Graduate Program Director for the M.A. in English.

Additional Requirements

Master of Arts Thesis Option

The opportunity to undertake a long research project or other appropriate project is available to students in the Master of Arts in English. Writing a thesis may be of particular benefit to those who contemplate further graduate work or who have a strong desire to pursue a single topic in great depth. Under the guidance of an advisor (a member of the graduate faculty), the student must earn at least six hours of credit over the course of two semesters (ENGL 698 & ENGL 699) for a completed, approved thesis. The oral defense of the thesis by a student will cover the thesis and its related areas, as well as a comprehensive oral examination of all course work taken during the degree program. Students who fail the oral comprehensive examination may retake the test only once in a different semester. Students who fail a second time will no longer be eligible to receive the Master of Arts in English from Old Dominion University.

Master of Arts Oral Comprehensive Examination Option

During the first three weeks of the semester in which they intend to graduate, students must contact the graduate program director in English to schedule their comprehensive examination. The oral comprehensive examination covers each student's particular program of study; apart from the development or defense of a thesis. Based on the courses taken by the student, the examination tests the student's mastery of materials and concepts, interpretive skills, and ability to make critical distinctions and connections. Students who fail the oral comprehensive examination may retake the test only once in a different semester. Students who fail a second time will no longer be eligible to receive the Master of Arts in English from Old Dominion University.

Master of Arts Portfolio Project Option

Students may choose to develop a portfolio as the capstone project for the MA in English for the technical writing, rhetoric and composition, or teaching of English concentrations. Students choosing the portfolio will propose the scope of their individual projects to the graduate program director and the committee chair. Portfolios are a collection of individual texts with a meta-narrative that explains the connection between these texts

and the portfolio's intellectual underpinnings. The entire portfolio should range between 10,000 and 15,000 words. Portfolios can be, but are not limited to, a collection of extensively revised course work, a collection of teaching materials, or a collection of new media texts. To help prepare the portfolio, students will be encouraged to take an independent study for up to 3 credits (ENGL 697) as one of their electives; the student's committee chair should direct this independent study. As with the oral examination, students must contact the graduate program director during the first three weeks of the semester in which they intend to graduate to schedule the defense of their portfolio project. This defense will cover the portfolio and its related areas as well as a comprehensive oral examination of all course work taken during the semester.

Master of Arts

English with a Concentration in Rhetoric and Composition (MA)

Ruth Osorio, Graduate Program Director
rosorio@odu.edu

The Master of Arts program in English presents a full array of opportunities in literary studies, technical writing, composition and rhetoric, and the teaching of English. Our faculty, due to their varied areas of expertise, offer unique learning experiences in areas such as gaming, web design, environmental sustainability, Indigenous studies, digital humanities, and ethnic and gender diversity. Faculty take a hands-on approach to teaching with manageable classroom sizes allowing for personalized instruction and a dynamic culture of learning. Whether you are looking for a professional leg up or simply wish to continue your education, a Master's Degree at ODU promises in-depth exploration of critical discourses that harness the force of language, technology, and literature. The program prepares students for further graduate study in English; for technical writing and editing; for teaching in secondary schools and colleges; for further study in such fields as anthropology, law, psychology, and philosophy; for careers in government and industry; and for other professions requiring analytical, literary, linguistic, digital media, or writing skills.

Admission Information

The student must initially meet all general University admission requirements. For regular admission, students must generally have at least 24 undergraduate hours in English, or a closely related field, with a grade point average of 3.0 or better. However, students applying to the technical writing concentration (see technical writing concentration) may have little or no undergraduate course work relating to English, provided that they have an average of 3.0 or better in their undergraduate major.

Students applying to all concentrations must also, in addition to other admissions materials, provide: a 1-2 page single-spaced statement of purpose outlining the applicant's research interests and goals for the program and past relevant academic and/or work experience that has prepared the applicant for graduate work in English studies and an 8-12 page writing sample that demonstrates the applicant's writing ability, analytical skills, and engagement with scholarly sources.

International students must submit scores from the TOEFL examination, a sample of scholarly writing, and three recommendations, at least one of which evaluates ability in English. For regular admission, students must score 230 on the computer-based TOEFL (the equivalent of 570 in the older, paper-based score scale or 80 on the TOEFL iBT). Students may be admitted provisionally with a TOEFL score of 213 (550 in the paper-based scale), but must attain the scores required for regular admission after 12 hours of graduate work.

Curriculum Requirements

The Master of Arts degree in English requires 30 credit hours and the passing of one of the three examination options below. No more than 12 credit hours on the 500 level may be counted toward a degree. An identifiable unifying principle is required for each student's program.

Rhetoric and Composition Concentration

Designed to prepare students to teach and administer writing in language arts, community college, or university contexts, and to prepare students for doctoral work in composition and/or rhetoric.

ENGL 539	Writing in Digital Spaces	3
ENGL 664	Teaching College Composition	3
ENGL 685	Writing Research	3
Select one of the following:		3
ENGL 686	Introduction to Rhetoric and Writing Studies	
ENGL 760	Classical Rhetoric and Theory Building	
ENGL 765	Modern Rhetoric and Theory Building	
Select one of the following:		3
ENGL 540	General Linguistics	
ENGL 550	American English	
ENGL 577	Language, Gender and Power	
ENGL 595	Topics in English	
ENGL 722	Multilingualism and Writing Instruction	
Select one of the following:		3
ENGL 721	Compositions as Applied Rhetoric	
ENGL 760	Classical Rhetoric and Theory Building	
ENGL 765	Modern Rhetoric and Theory Building	
Select two of the following:		6
ENGL 527	Writing in the Disciplines	
ENGL 586	Media Law and Ethics	
ENGL 595	Topics in English	
ENGL 662	Cybercultures and Digital Writing	
ENGL 665	Teaching Writing with Technology	
ENGL 673	Discourse Analysis	
ENGL 687	Colloquium for Teachers of English	
ENGL 695	Topics	
ENGL 697	Portfolio Preparation	
ENGL 701	Texts and Technologies	
ENGL 706	Visual Rhetoric and Document Design	
ENGL 720	Pedagogy and Instructional Design	
ENGL 721	Compositions as Applied Rhetoric	
ENGL 760	Classical Rhetoric and Theory Building	
ENGL 763	Seminar in Discourse Analysis	
ENGL 765	Modern Rhetoric and Theory Building	
ENGL 766	New Media Theory and Practice I	
ENGL 771	New Media Theory and Practice II	
ENGL 795	Topics	
Six hours of electives		6
Total Credit Hours		30

Additional Requirements

Master of Arts Thesis Option

The opportunity to undertake a long research project or other appropriate project is available to students in the Master of Arts in English. Writing a thesis may be of particular benefit to those who contemplate further graduate work or who have a strong desire to pursue a single topic in great depth. Under the guidance of an advisor (a member of the graduate faculty), the student must earn at least six hours of credit over the course of two semesters (ENGL 698 & ENGL 699) for a completed, approved thesis. The oral defense of the thesis by a student will cover the thesis and its related areas, as well as a comprehensive oral examination of all course work taken during the degree program. Students who fail the oral comprehensive examination may retake the test only once in a different semester. Students who fail a second time will no longer be eligible to receive the Master of Arts in English from Old Dominion University.

Master of Arts Oral Comprehensive Examination Option

During the first three weeks of the semester in which they intend to graduate, students must contact the graduate program director in English to schedule their comprehensive examination. The oral comprehensive examination covers each student's particular program of study; apart from the development or defense of a thesis. Based on the courses taken by the student, the examination tests the student's mastery of materials and concepts, interpretive skills, and ability to make critical distinctions and connections. Students who fail the oral comprehensive examination may retake the test only once in a different semester. Students who fail a second time will no longer be eligible to receive the Master of Arts in English from Old Dominion University.

Master of Arts Portfolio Project Option

Students may choose to develop a portfolio as the capstone project for the MA in English for the technical writing, rhetoric and composition, or teaching of English concentrations. Students choosing the portfolio will propose the scope of their individual projects to the graduate program director and the committee chair. Portfolios are a collection of individual texts with a meta-narrative that explains the connection between these texts and the portfolio's intellectual underpinnings. The entire portfolio should range between 10,000 and 15,000 words. Portfolios can be, but are not limited to, a collection of extensively revised course work, a collection of teaching materials, or a collection of new media texts. To help prepare the portfolio, students will be encouraged to take an independent study for up to 3 credits (ENGL 697) as one of their electives; the student's committee chair should direct this independent study. As with the oral examination, students must contact the graduate program director during the first three weeks of the semester in which they intend to graduate to schedule the defense of their portfolio project. This defense will cover the portfolio and its related areas as well as a comprehensive oral examination of all course work taken during the semester.

Master of Arts English with a Concentration in Teaching of English (MA)

Ruth Osorio, Graduate Program Director
rosorio@odu.edu

The Master of Arts program in English presents a full array of opportunities in literary studies, technical writing, composition and rhetoric, and the teaching of English. Our faculty, due to their varied areas of expertise, offer unique learning experiences in areas such as gaming, web design, environmental sustainability, Indigenous studies, digital humanities, and ethnic and gender diversity. Faculty take a hands-on approach to teaching with manageable classroom sizes allowing for personalized instruction and a dynamic culture of learning. Whether you are looking for a professional leg up or simply wish to continue your education, a Master's Degree at ODU promises in-depth exploration of critical discourses that harness the force of language, technology, and literature. The program prepares students for further graduate study in English; for technical writing and editing; for teaching in secondary schools and colleges; for further study in such fields as anthropology, law, psychology, and philosophy; for careers in government and industry; and for other professions requiring analytical, literary, linguistic, digital media, or writing skills.

Admission Information

The student must initially meet all general University admission requirements. For regular admission, students must generally have at least 24 undergraduate hours in English, or a closely related field, with a grade point average of 3.0 or better. However, students applying to the technical writing concentration (see technical writing concentration) may have little or no undergraduate course work relating to English, provided that they have an average of 3.0 or better in their undergraduate major.

Students applying to all concentrations must also, in addition to other admissions materials, provide: a 1-2 page single-spaced statement of purpose outlining the applicant's research interests and goals for the program and past relevant academic and/or work experience that has prepared the applicant for graduate work in English studies and an 8-12 page writing sample that demonstrates the applicant's writing ability, analytical skills, and engagement with scholarly sources.

International students must submit scores from the TOEFL examination, a sample of scholarly writing, and three recommendations, at least one of which evaluates ability in English. For regular admission, students must score 230 on the computer-based TOEFL (the equivalent of 570 in the older, paper-based score scale or 80 on the TOEFL iBT). Students may be admitted provisionally with a TOEFL score of 213 (550 in the paper-based scale), but must attain the scores required for regular admission after 12 hours of graduate work.

Curriculum Requirements

The Master of Arts degree in English requires 30 credit hours and the passing of one of the three examination options below. No more than 12 credit hours on the 500 level may be counted toward a degree. An identifiable unifying principle is required for each student's program.

Teaching of English Concentration

This concentration requires:

ENGL 600	Introduction to Research and Criticism (This course is to be taken in student's first fall semester of classes)	3
British Literature before 1800*		3
British Literature after 1800*		3
American Literature*		3
Pedagogy:		
ENGL 555 or ENGL 664	The Teaching of Composition, Grades 6-12 Teaching College Composition	3
ENGL 687	Colloquium for Teachers of English	3
Rhetoric:		
ENGL 760 or ENGL 765	Classical Rhetoric and Theory Building Modern Rhetoric and Theory Building	3
Linguistics		3
Electives		6
Total Credit Hours		30

* For a complete listing of courses to satisfy this specific concentration, see the complete course listing for the MA in Literature.

Additional Requirements

Master of Arts Thesis Option

The opportunity to undertake a long research project or other appropriate project is available to students in the Master of Arts in English. Writing a thesis may be of particular benefit to those who contemplate further graduate work or who have a strong desire to pursue a single topic in great depth. Under the guidance of an advisor (a member of the graduate faculty), the student must earn at least six hours of credit over the course of two semesters (ENGL 698 & ENGL 699) for a completed, approved thesis. The oral defense of the thesis by a student will cover the thesis and its related areas, as well as a comprehensive oral examination of all course work taken during the degree program. Students who fail the oral comprehensive examination may retake the test only once in a different semester. Students may be admitted provisionally with a TOEFL score of 213 (550 in the paper-based scale), but must attain the scores required for regular admission after 12 hours of graduate work.

Curriculum Requirements

The Master of Arts degree in English requires 30 credit hours and the passing of one of the three examination options below. No more than 12 credit hours on the 500 level may be counted toward a degree. An identifiable unifying principle is required for each student's program.

Technical Writing Concentration

Designed to prepare students to expand and theorize their practices of workplace writing and to prepare students for doctoral work in the field. *This is available on-campus and online.* This concentration requires:

ENGL 539	Writing in Digital Spaces	3
ENGL 685	Writing Research	3
ENGL 706	Visual Rhetoric and Document Design	3
ENGL 715	Technical Communication Theories and Practices	3
Select one of the following:		3
ENGL 760	Classical Rhetoric and Theory Building	
ENGL 765	Modern Rhetoric and Theory Building	
Select one of the following:		3
ENGL 540	General Linguistics	
ENGL 550	American English	
ENGL 577	Language, Gender and Power	
ENGL 595	Topics in English	
ENGL 672	Language Structure Analysis	
Select one of the following:		3
ENGL 664	Teaching College Composition	
ENGL 665	Teaching Writing with Technology	
ENGL 717	Teaching Professional and Technical Writing	
ENGL 720	Pedagogy and Instructional Design	
Select one of the following:		3
ENGL 527	Writing in the Disciplines	
ENGL 535	Management Writing	
ENGL 536	Writing for the Government	
ENGL 595	Topics in English	
ENGL 664	Teaching College Composition	
ENGL 665	Teaching Writing with Technology	
ENGL 668	Graduate Internship and Project in Professional Writing	
ENGL 673	Discourse Analysis	
ENGL 695	Topics	
ENGL 697	Portfolio Preparation	
ENGL 701	Texts and Technologies	
ENGL 720	Pedagogy and Instructional Design	
ENGL 734	Theories of Networks	
ENGL 760	Classical Rhetoric and Theory Building	

ENGL 765	Modern Rhetoric and Theory Building
ENGL 770	Research Methods in Language Analysis
ENGL 780	Corpus Use, Research, and Material Design
Six hours of electives	6
Total Credit Hours	30

Additional Requirements

Master of Arts Thesis Option

The opportunity to undertake a long research project or other appropriate project is available to students in the Master of Arts in English. Writing a thesis may be of particular benefit to those who contemplate further graduate work or who have a strong desire to pursue a single topic in great depth. Under the guidance of an advisor (a member of the graduate faculty), the student must earn at least six hours of credit over the course of two semesters (ENGL 698 & ENGL 699) for a completed, approved thesis. The oral defense of the thesis by a student will cover the thesis and its related areas, as well as a comprehensive oral examination of all course work taken during the degree program. Students who fail the oral comprehensive examination may retake the test only once in a different semester. Students who fail a second time will no longer be eligible to receive the Master of Arts in English from Old Dominion University.

Master of Arts Oral Comprehensive Examination Option

During the first three weeks of the semester in which they intend to graduate, students must contact the graduate program director in English to schedule their comprehensive examination. The oral comprehensive examination covers each student's particular program of study; apart from the development or defense of a thesis. Based on the courses taken by the student, the examination tests the student's mastery of materials and concepts, interpretive skills, and ability to make critical distinctions and connections. Students who fail the oral comprehensive examination may retake the test only once in a different semester. Students who fail a second time will no longer be eligible to receive the Master of Arts in English from Old Dominion University.

Master of Arts Portfolio Project Option

Students may choose to develop a portfolio as the capstone project for the MA in English for the technical writing, rhetoric and composition, or teaching of English concentrations. Students choosing the portfolio will propose the scope of their individual projects to the graduate program director and the committee chair. Portfolios are a collection of individual texts with a meta-narrative that explains the connection between these texts and the portfolio's intellectual underpinnings. The entire portfolio should range between 10,000 and 15,000 words. Portfolios can be, but are not limited to, a collection of extensively revised course work, a collection of teaching materials, or a collection of new media texts. To help prepare the portfolio, students will be encouraged to take an independent study for up to 3 credits (ENGL 697) as one of their electives; the student's committee chair should direct this independent study. As with the oral examination, students must contact the graduate program director during the first three weeks of the semester in which they intend to graduate to schedule the defense of their portfolio project. This defense will cover the portfolio and its related areas as well as a comprehensive oral examination of all course work taken during the semester.

Doctor of Philosophy English (PhD)

Julia Romberger, Graduate Program Director
jromberg@odu.edu

The PhD in English is an innovative program that integrates writing, rhetoric, discourse, technology, literary, and textual studies. Offering opportunities for creative reinterpretation of these areas within the field of English, the program emphasizes research that examines texts in a variety of overlapping and sometimes competing language-based worlds. Our focus is

on how the creation and reception of texts and media are affected by form, purpose, technology of composition, audience, cultural location, social practices, and communities of discourse. Students may pursue full- or part-time study through a combination of on-campus and online. There are four concentrations:

- 1. Writing, Rhetoric, and Discourse Studies
- 2. Literary and Cultural Studies
- 3. Technology and Media Studies
- 4. Student Designed Concentration (must be approved by the graduate program director)

Each concentration prepares students for academic careers, as well as other careers in which reading and writing figure prominently; the program also helps students professionalize within their current careers.

Admission Information

Applications are accepted for entrance in fall semester only and all documents must be submitted no later than January 15. All required forms and documents should be sent directly to the Office of Graduate Admissions. Applications packets are available online at the Office of Graduate Admissions website. The following should be submitted along with the appropriate applications forms: 1) a 1500-word statement of the applicant’s research interests, academic and professional goals and discussion of how the PhD in English will contribute to the achievement of those goals; 2) three letters of reference from sources capable of commenting on the applicant’s readiness for advanced graduate study in English; 3) a 15-20 double-spaced-page writing sample demonstrating applicant’s scholarly abilities; and 4) a résumé or curriculum vitae.

Admission standards include the following, which are required, unless otherwise stated: 1) A completed master’s degree (or its equivalent) in English or in an appropriate field (such as rhetoric, composition, English education, communications, journalism, linguistics, philosophy, or science and technology studies) from a regionally accredited institution of higher education; 2) A minimum grade point average (GPA) of 3.5 (on a 4.0 scale) overall for the master’s degree. For students whose first language is not English, a current score for the Test of English as a Foreign Language (TOEFL) of at least 600 on the paper version, 250 on the computer-based version, or 80 on the iBT version. Students without at least some significant background in an English-related field are encouraged to take master’s level coursework in English before applying. Applicants may be contacted for additional information.

Curriculum Requirements

The Doctor of Philosophy degree in English requires 48 credit hours (39 credit hours of course work and 9 credit hours of dissertation), completion of a research competency, and the passing of a candidacy examination and an oral defense of the dissertation. An identifiable unifying principle is required for each student’s program.

ENGL 810	Major Debates in English Studies	3
ENGL 840	Empirical Research Methods and Project Design	3
ENGL 892	Dissertation Seminar	3
Concentration 1 *		9
Concentration 2 *		9
Electives **		12
ENGL 899	Dissertation	9
Total Credit Hours		48

* Students are allowed to take only one ENGL 897 per emphasis with a total of two different sections of English 897 for the entire course of study.

** Students are allowed to take one course at the 600-level towards their course of study. The remaining four courses are electives, which may include additional courses in the student’s chosen concentrations, course in other concentrations, or other 800-level courses from other

programs. Students are encouraged to select electives that contribute to defining a coherent area of specialization or subfield. Note: Students and advisors should select a pedagogy course when students’ previous work experience or course work does not prepare them for instructional activities related to their field.

Concentrations

(18 credit hours)

Students will choose two nine-hour concentrations from those described below. NOTES:

- 1. Some courses appear in multiple concentrations, but the same course cannot be counted toward the required nine hours in multiple concentrations. (No “double-dipping” is allowed.)
- 2. A concentration is defined by a minimum of three courses, but students are free to select additional courses from their concentration areas as electives (see below, ELECTIVES).
- 3. Students who choose the “Student-Designed Concentration” as one of their two concentrations MUST follow the process for defining it specified in the description below in order for courses they take to constitute a concentration.
- 4. Students may count only one “Student-Designed Concentration” toward the requirement to complete two concentrations. That is, all students must select as least one of the pre-defined disciplinary concentrations, but all students may also design their own concentrations according to the process stipulated below.

Literary and Cultural Studies Concentration

The Literary and Cultural Studies concentration will teach students to apply a range of methodologies to the study of literature and other textually informed cultural practices. By the conclusion of their studies in this concentration, students will be proficient in interpreting texts and cultural practices by critically employing methodologies that include:

- Theories of Form, such as the technical protocols of scholarly editing and the physical description of manuscript and printed texts.
- Critical Theories such as New Historicism, Feminism, Queer Theory, and Poststructuralism.
- Cultural Theories such as Critical Race Theory, Disability Studies, New Materialism, Mass/Popular Culture Theory, Posthumanism, and Postcolonial and Decolonial Studies.

Select three of the following: 9

ENGL 801	Texts and Technologies
ENGL 803	Technologies of the Book
ENGL 805	Discourse and Rhetoric Across Cultures
ENGL 822	Multilingualism and Writing Instruction
ENGL 825	Scholarly Editing and Textual Scholarship
ENGL 826	The British Periodical Press
ENGL 827	London Calling: 20th and 21st Century British Literature
ENGL 828	Eighteenth Century British Literature
ENGL 830	The Digital Humanities
ENGL 832	Digital Activisms
ENGL 835	Postcolonial Literature and Theory
ENGL 836	(Against) World Literature
ENGL 837	Narratology
ENGL 841	Nineteenth Century British Literature
ENGL 851	American Literature to 1810
ENGL 853	Queer of Color Critique
ENGL 854	Cultural Studies
ENGL 855	Critical Race Theory

ENGL 856	Pocahontas Unplugged: Jamestown, Pocahontas and the Forging of American Identity
ENGL 857	American Literature 1810-1870
ENGL 858	American Literature 1870-1945
ENGL 864	Theories of Literature
ENGL 890	Seminar in Textual Studies
ENGL 891	Seminar in Literary Studies
ENGL 895	Topics (when appropriate for emphasis)

Total Credit Hours 9

Rhetoric, Writing, and Discourse Studies Concentration

This concentration prepares students for placement and advancement in careers centered on the history and theory of rhetoric, composition studies, technical communication, writing program administration, workplace studies, and/or rhetorical and linguistic approaches to discourse and culture.

It emphasizes how communications are composed, constructed, and produced as well as how they affect (inter) personal, social, cultural, and political situations. Possible areas of inquiry include:

- Institutional assessment procedures for writing and critical thinking.
- Writing practices and language use in a variety of educational, public, professional, scientific, and workplace settings.
- The influence of institutional, cultural, and disciplinary assumptions about language and language users upon rhetorical and linguistic choices.
- The rhetorical constraints and strategies of underrepresented groups.
- The historical development of rhetoric and composition and professional and technical communication in terms of theory, practice, and instruction.

Select three of the following: 9

ENGL 805	Discourse and Rhetoric Across Cultures
ENGL 806	Visual Rhetoric and Document Design
ENGL 815	Technical Communication Theories and Practices
ENGL 817	Teaching Professional and Technical Writing
ENGL 820	Pedagogy and Instructional Design
ENGL 821	Compositions as Applied Rhetoric
ENGL 822	Multilingualism and Writing Instruction
ENGL 824	Online Writing Instruction
ENGL 834	Theories of Networks
ENGL 860	Classical Rhetoric and Theory Building
ENGL 863	Seminar in Discourse Analysis
ENGL 865	Modern Rhetoric and Theory Building
ENGL 870	Research Methods in Language Analysis
ENGL 875	Seminar in English Studies - Pedagogy and Curriculum Design
ENGL 878	Seminar in Sociolinguistics
ENGL 880	Corpus Use, Research, and Material Design
ENGL 883	Seminar in Professional Writing
ENGL 893	Seminar in Rhetoric
ENGL 895	Topics (when appropriate for this emphasis)

Total Credit Hours 9

Technology and Media Studies Concentration

The study of technology as a political, cultural, economic, systematic, and aesthetic force is a crucial area of analysis in contemporary scholarship. This concentration prepares students for interdisciplinary work with a focus on domains of technological complexity with foundations in the materiality of rhetorical work. A major tenet of this concentration is that in addition to studying issues of technology, society, communication, and media design, we also develop practical solutions for the situations we confront. This concentration prepares students for both academic and industry positions

where they can use their skills as researchers and strategists. Possible areas of research and application include:

- Ethical, social, and political dimensions of information, technology, and networked communication
- Copyright and intellectual property, including the legal implications of technological regulation and change
- Privacy issues in information technologies and media
- Implications of digital methods in the humanities
- Design and development of digital humanities tools
- Technologically mediated communication such as experience design, usability studies, and information architecture
- Visual and participatory cultures

Select three of the following: 9

ENGL 801	Texts and Technologies
ENGL 803	Technologies of the Book
ENGL 806	Visual Rhetoric and Document Design
ENGL 815	Technical Communication Theories and Practices
ENGL 824	Online Writing Instruction
ENGL 830	The Digital Humanities
ENGL 832	Digital Activisms
ENGL 834	Theories of Networks
ENGL 866	New Media Theory and Practice I
ENGL 871	New Media Theory and Practice II
ENGL 880	Corpus Use, Research, and Material Design
ENGL 894	Seminar in New Media
ENGL 895	Topics (when appropriate to emphasis)

Total Credit Hours 9

Student Designed Concentration

A student-designed concentration is a coherent cluster of at least three courses that are not included in the other concentration chosen by the student. The courses selected must define a cross-curricular focus that is clearly different from the foci of the predefined disciplinary concentrations listed above and may include classes from other units in the College or across the University. Students should construct concentrations under the guidance of an advisor, with advice from other mentors as needed. Students must submit a proposal for the concentration that includes a title, a description of the focus, and a tentative or exemplary selection of at least three courses. Both the advisor and the GPD must approve the proposal and place a signed approval letter in the student's advising file. Because course offerings may change, a final description of the concentration (including a title, a description of the focus, and a justification of how courses taken support the focus) must be approved by the student's advisor (in a signed letter) and submitted with the letter to the GPD before the student enrolls in Dissertation Seminar.

Additional Requirements

Dissertation Seminar

(3 credit hours)

Taken in the semester of the student's candidacy examination, this course (ENGL 892) supports students in preparing their dissertation prospectus. It sets up writing groups for cohorts of students entering the dissertation stage of their graduate studies.

Dissertation Credits

(minimum of 9 credit hours)

A dissertation is required of all PhD students. A dissertation prospectus will be submitted after the student's successful completion of the candidacy exam. If the student's proposed dissertation committee approves the prospectus, the student will proceed to research and write the dissertation (ENGL 899). An oral defense of the dissertation will be scheduled after a

draft of the completed dissertation is approved by the student's dissertation committee.

Research Competency

Because the PhD is a research degree, all students are expected to present evidence of mastery of a basic research competency over and above the usual course work. Students select one of the following three options to meet this requirement:

Foreign Language

To enter candidacy for the doctoral degree, students may present evidence of mastery of a foreign language equivalent to second-year undergraduate facility. This can be done by transcript, by demonstration of native language proficiency (for those who speak English as a second language), by taking coursework at Old Dominion or elsewhere equivalent to second-year language facility (at Old Dominion University, through language courses numbered 202), by passing a standardized test at the appropriate level, or by passing an examination administered by the Department of Foreign Languages geared to second-year language mastery. A grade of B or above in both semesters of second-year instruction will demonstrate competency in that language. Evidence of completion of the foreign language requirement should be presented to the GPD as soon as possible in the student's career and certainly before enrolling in the Dissertation Seminar.

New Media Application

Students may choose the option of presenting evidence of mastery of computer and new media applications beyond the usual knowledge of word processing, spread sheets, projection applications (e.g., PowerPoint), portable document format (pdf), and similar, common applications and software. This would include programming languages such as:

- C, C++, or C#
- Java or JavaScript
- Go
- PHP
- Python
- Ruby
- Scala
- Shell
- TypeScript

In lieu of standardized examinations to test such knowledge, students choosing this option must submit a multimodal digital project in which demonstration of one of the allowed programming languages is paramount. The project should include:

- a project proposal for approval,
- a project log,
- 3 versions (revisions) of a portfolio of self-produced material,
- a statement of which applications or programs one is presenting and level of expertise,
- and, if needed, a demonstration of facility before members of the PhD Advisory Council, which shall have final say on whether the option has been satisfied.

Projects should be multimodal and interactive. As with seeking credit in a foreign language, students should submit evidence of completion of the requirement to the GPD as soon as possible in their careers and certainly before enrolling in the Dissertation Seminar.

Statistics

Students whose research requires advanced knowledge of quantitative research design and statistics may show mastery of statistical methods through the following:

- Successful completion of one graduate-level course in statistics with a grade of B or higher (courses completed as part of the student's master's degree may count for this requirement). Courses offered at ODU that may fulfill this requirement include:

- STAT 613
- FOUN 722

OR

- Successful completion of two undergraduate-level courses in quantitative research design and statistics with a grade of B or higher in both courses.

AND

- Providing evidence to the GPD that they designed and completed a project using statistical methods (e.g., a course project, conference paper, or journal article).

Candidacy Exams

After students have completed all course requirements and research requirements, they must pass a written and an oral examination related to their chosen field. Students who fail either exam will not be allowed to submit their dissertation proposal or to begin work on their dissertation.

Grade Requirements

All PhD students will be graded on the traditional A, B, C, F scale (with pluses and minuses) in all courses. Pass/Fail evaluations will be used only in the case of registration for internships or for thesis or dissertation research, or when specifically approved by the director. Graduate students whose grade point averages fall below 3.00 (B) will be placed on a probationary status. After two consecutive semesters below this average or the accumulation of two grades of "C" or below, the graduate program director may dismiss the student from the doctoral program.

Time Limit and Continuance

Students will be required to complete and successfully defend a dissertation prospectus two years after the student passes the Dissertation Seminar, ENGL 892. Students who take/pass the candidacy exam the spring after ENGL 892 will have two years from the last day of the exam. Students, however, can appeal for an extension by submitting to the PhD GPD 1) a letter that explains the reasons for needing an extension, the length of the extension, and what the student will do during this time to complete and successfully defend the prospectus, and 2) a letter from the dissertation director supporting or dismissing the appeal. The PhD program will consider the student's appeal and make a decision. If the program does not accept the appeal, the student may be dismissed; this decision is final. If the student does not complete the work according to the approved plan, the student will be dismissed from the program.

Similarly, students will be required to complete, successfully defend, and deposit a dissertation eight years after entering the program. Students, however, can appeal for an extension. For this form to be approved, students will need to submit to the PhD GPD 1) a letter that explains the reasons for needing an extension, the length of the extension, and what the student will do during this time to complete, successfully defend, and deposit the dissertation and 2) a letter from the dissertation director supporting or dismissing the appeal. The PhD program will consider the student's appeal and make a decision. If the PhD program does not accept the appeal, the student may be dismissed; this decision is final. If the appeal is approved, the student will need to re-validate courses that had been taken eight years prior in accordance with ODU policy and this should be reflected in the student's proposed plan. If the student does not complete the work according to the approved plan, the student may be dismissed from the program.

Transfer Credit

Twelve graduate hours not used to fulfill the requirements of a degree at other institutions or at Old Dominion University may be applied toward the fulfillment of degree requirements. Transfer credit is accepted as degree credit at the discretion of the graduate program director.

Financial Aid

Full-time students are eligible to apply for university fellowships and teaching and research assistantships, which are awarded on a competitive basis.

For more information relating to this program and its requirements, please visit website (<https://odu.edu/englishdept/graduate/phd-english/>).

Certificate Literature Certificate

Easily completed in one calendar year, this certificate gives students who already hold at least a master's degree in a different field the 18 hours of graduate study in literature that are the minimum requirement for teaching that subject at the post-secondary level in Virginia.

Curriculum Requirements

British Literature before 1800	3
British Literature after 1800 *	3
American Literature	3
Electives in Literature **	9
Total Credit Hours	18

* Or Post-colonial Literature and Theory.
** which may include ENGL 600 and ENGL 764.

NOTE: at least nine of the 18 hours must be at the 600-level.

Certificate Professional Writing Certificate

Easily completed in 12-16 months, this certificate is designed for:

- professionals who want to supplement their degrees and stay updated on the most recent scholarship in the field
- students interested in graduate education but wanting to start a bit smaller (note: courses can be applied toward an MA or PhD after the completion of the certificate)
- anyone looking to sharpen their writing and communication skills

To apply for the certificate, contact the coordinator of Technical and Professional Writing.

Daniel P. Richards, Certificate Coordinator
dprichar@odu.edu

Curriculum Requirements

Select four of the following:	12
ENGL 527	Writing in the Disciplines
ENGL 535	Management Writing
ENGL 536	Writing for the Government
ENGL 539	Writing in Digital Spaces
ENGL 590	Professionalization in English
ENGL 595	Topics in English (if relevant to the field of professional writing)
ENGL 668	Graduate Internship and Project in Professional Writing
ENGL 715	Technical Communication Theories and Practices
ENGL 717	Teaching Professional and Technical Writing
ENGL 760	Classical Rhetoric and Theory Building
ENGL 765	Modern Rhetoric and Theory Building
Total Credit Hours	12

Certificate Teaching English to Speakers of other Languages (TESOL) Certificate

This certificate would be of interest to students who want to teach English to speakers of other languages. There are two concentrations for this certificate. The first one is the Adult Learner concentration which can be used for teaching English to adult learners or for teaching English as an additional language abroad. The second concentration is designed for teachers in K-12 who may want to pursue an added endorsement in ESL. Each concentration is a total of 15 credit hours, with the option of being completed online or traditionally.

Curriculum Requirements

Core Course		
ENGL 679	First and Second Language Acquisition	3
Concentrations		
Select one of the following:		12
<i>Adult Learner Concentration</i>		
ENGL 540 or ENGL 672	General Linguistics Language Structure Analysis	
ENGL 670 or TLED 775	Methods and Materials in TESOL English Language Learners in the PK-12 Classroom	
ENGL 675 or ENGL 722/822	Practicum in TESOL Multilingualism and Writing Instruction	
ENGL 677 or ENGL 705/805	Language and Communication Across Cultures Discourse and Rhetoric Across Cultures	
<i>Post-Baccalaureate K-12 Endorsement Concentration</i>		
READ 619	Word Study, Phonics, and Linguistics	
READ 622	Culturally Responsive Literacy for All Learners	
READ 686	Advanced Language Development and Reading	
TLED 775	English Language Learners in the PK-12 Classroom	
Total Credit Hours		15

The certificate may be taken independently of the degree, but students must be either admitted to the graduate program or as non-degree graduate certificate seeking students. A maximum of 6 semester hours of graduate credit may be transferred into the TESOL certificate program.

Certificate Teaching of Writing Certificate

Easily completed in one calendar year, this certificate gives students who already hold at least a master's degree in a different field the 18 hours of graduate study in the teaching of writing that are the minimum requirement for teaching that subject at the post-secondary level in Virginia.

Curriculum Requirements

Pedagogy:		
ENGL 664	Teaching College Composition	3
Rhetoric:		3
Select one of the following:		3
ENGL 686	Introduction to Rhetoric and Writing Studies	
ENGL 760	Classical Rhetoric and Theory Building	

ENGL 765	Modern Rhetoric and Theory Building	
Technology:		
Select one of the following:		3
ENGL 539	Writing in Digital Spaces	
ENGL 665	Teaching Writing with Technology	
ENGL 717	Teaching Professional and Technical Writing	
Language:		
Select one of the following:		3
ENGL 540	General Linguistics (Language)	
ENGL 542	English Grammar	
ENGL 550	American English	
ENGL 577	Language, Gender and Power	
ENGL 722	Multilingualism and Writing Instruction	
English electives in Rhetoric, Professional Writing, Journalism, Linguistics, or Creative Writing		6
Total Credit Hours		21

NOTE: At least nine of the 18 hours must be at the 600-level.

Department of History

Web Site: <http://www.odu.edu/historydept> (<http://www.odu.edu/historydept/>)

Ingo Heidbrink, Chair

8000 Batten Arts and Letters Building

757-683-3949

The Department of History offers two programs: the Master of Arts in History and a Graduate Certificate in Maritime History.

The Master of Arts degree that prepares competent graduates for modern careers in business, government, teaching, non-profit work, and further graduate study in history, law, library science, or business. The program offers an introduction to the major debates and cutting-edge topics in the field while also providing education in most regions and periods in global history.

The Graduate Certificate in Maritime History is designed to provide history graduate students the opportunity to develop a special emphasis in maritime history as part of their graduate education. Students earn certification following the successful completion of twelve hours of maritime history.

Master of Arts History (MA)

Web Site: <https://ww1.odu.edu/historydept/graduate> (<https://ww1.odu.edu/historydept/graduate/>)

For details, contact the Graduate Program Director
Email Address: graduatehistory@odu.edu

The Department of History offers a Master of Arts degree that prepares competent graduates for modern careers in business, government, teaching, non-profit work, and further graduate study in history, law, library science, or business. The program offers an introduction to the major debates and cutting-edge topics in the field while also providing education in most regions and periods in global history.

Students select from a broad variety of courses with the ability to emphasize a particular geographic region or time period through electives. Completion of the degree requires choosing from one of three options: examinations to ensure mastery in the field, a written thesis to demonstrate the student's research expertise, or a portfolio of projects to prepare for a future career in history. The degree requires a minimum of 30 credit hours.

The Department's academic offerings reflect the diversity of the faculty. Students are encouraged to sample the course offerings that investigate the histories of societies and cultures from across the globe. The M.A. program offers many varied options to expand one's horizons beyond the required number of classroom courses, including individualized independent studies on focused topics, original thesis research, and practical hands-on work experience.

Admissions

Applicants must meet all University requirements and regulations for admission. Applications must include a short essay of 500 words or less addressing academic interests and goals and two letters of recommendation attesting to academic achievement and potential. A writing sample of 10 or more pages, preferably showing an applicant's work with primary sources, is also required.

An undergraduate major or minor in history is desirable but is not required for admission. Generally, 24 semester credit hours in history and closely related cognates are required for regular admission. Applicants with 18 semester credit hours may be considered for admission on a provisional basis. These credit hours should include survey and upper-level courses. The Graduate Program Director may prescribe certain undergraduate courses to be completed before recommending admission to the program. Under certain circumstances, students can be admitted to graduate courses while simultaneously completing an undergraduate prerequisite.

The requirement for admission to full standing (regular status) is 24 semester credit hours with a grade point average (GPA) of at least 3.00 in history and a general GPA of 3.00. Provisional admission requires a minimum of 18 credits (as described above) with a GPA of 3.00 in history and a GPA of 2.70. Students with averages below these minimums can attempt to improve their standing in undergraduate courses approved by the Graduate Program Director. However, they cannot be admitted to graduate courses until they have achieved acceptable averages in history. Applicants who are denied admission to the M.A. program in history are not permitted to enroll in history graduate courses as non-degree students.

Prospective applicants with questions about their admission credentials and preparedness should contact the Graduate Program Director in the Department of History. Those certain of their qualifications should apply through the Office of Admissions.

Admissions forms should reach Old Dominion University well in advance of the intended term of entry, but no later than November 1 for spring admission and June 1 for fall. All required forms and documents must be sent directly to the Admissions Office, which creates a central file for each applicant. Those seeking a graduate assistantship should file the Application for Institutional Graduate Financial Assistance (available from the Office of Graduate Admissions) and send a letter of application for fellowship consideration to the Graduate Program Director.

Graduate Financial Aid

Old Dominion University offers financial assistance to qualified graduate students. Types of aid include research and teaching assistantships, fellowships, grants, scholarships, and part-time employment. Nearly all forms of aid require that the student be engaged in full-time graduate study or nine semester credit hours.

Fellowships, assistantships, tuition grants, and small research grants may be available. Departmental funds may affect fellowship and assistantship amounts. The establishment of student need and academic promise also affect some grant amounts. The application deadline is February 15. International students must pass the SPEAK test (or an equivalent) of spoken English to become eligible for teaching assistantships.

Curriculum Requirements

Three courses of study are available. The examination option is a 30-credit program capped by written comprehensive examinations in two general fields and an oral examination. The thesis option is a 30-credit program capped by a thesis for which students earn six credits (HIST 698-HIST 699) on a pass/fail basis, and an oral defense. The portfolio option is a 30-credit program capped by two portfolio components and an oral defense. Completion of any of the three options leads to an M.A. in history.

All candidates for the M.A. in history must meet the general graduate degree requirements established for the University. In addition, all students must complete HIST 600 during their first year in the program. No more than nine of the required 30 hours may be earned in 500-level courses. Students are permitted a maximum of six credits in other departments offering graduate courses if the work is germane to their historical studies; prior approval of the Graduate Program Director is required. Students who have received two grades of C+ or below will be indefinitely suspended from the program. Those students whose grade point average falls below 3.00 will be subject to the University's probation/suspension policy.

Examination Option

Students pursuing the examination option must take course work as follows:

HIST 600	Historical Theory and Practice	3
Electives *		
American History		6
Non-American History		6
Other Electives		12
HIST 675	M.A. Exam Preparation and Research	3
Total Credit Hours		30

* Elective courses can be at the 500, 600, or 700 level.

Students choose two fields of concentration for the Examination Option, which will conform to the expertise of two of the three committee members who constitute the student's exam committee. The fields can be tailored to the geographical areas, topical interests, or other fields of study in consultation with the exam committee.

Students pursuing the examination option must complete HIST 675 during their last year in the program. Written comprehensive field examinations may be taken in conjunction with HIST 675. The two field exams are taken during a department designated time each Fall and Spring semester. Within a two-week period following the successful completion of written exams, the student will take a two-hour oral examination. Exams are individualized by the student's examining committee but competence in the entire field is essential. Examinations are completed no later than 30 days before the end of a semester, and thus are normally scheduled in April and November. A field exam is judged in its entirety and is rated Pass or Fail by the examining committee; the same is true of the oral examination. Students who fail an exam can be re-examined in the next scheduled round of exams. Only one re-examination is permitted.

Thesis Option

Students pursuing the thesis option must take course work as follows:

HIST 600	Historical Theory and Practice	3
Electives *		
American History		6
Non-American History		6
Other Electives		9
HIST 698	Thesis	3
HIST 699	Thesis	3-9
Total Credit Hours		30-36

* Elective courses can be at the 500, 600, or 700 level.

The thesis option will be recommended for those students who have maintained a high GPA and have the support of a faculty thesis advisor. The master's thesis is written under the direction of the thesis advisor selected by the candidate in consultation with the Graduate Program Director. The thesis is reviewed and the candidate examined by a faculty committee chaired by the thesis advisor. The thesis defense—normally a two-hour oral examination—focuses on the thesis, the historical context, and related aspects of the student's concentration. Final approval of the thesis is the responsibility of the thesis advisor, the Graduate Program Director, and ultimately of the dean of the College of Arts and Letters, who certify the candidate for graduation.

Portfolio Option

Students pursuing the portfolio option must take course work as follows:

HIST 600	Historical Theory and Practice	3
Electives*		
American History		6
Non-American History		6
Other Electives		12
HIST 677	Portfolio Option Preparation	3
Total Credit Hours		30

* Elective courses can be at the 500, 600, or 700 level.

Students choose two components for the Portfolio Option: one or two research papers, a single examination field, a teaching preparation component, or a public history project. The portfolio is reviewed and the candidate examined by a faculty committee composed of three faculty members, each of whose fields of expertise relate to components of the portfolio. The defense of the portfolio is scheduled during a department-designated time each Fall and Spring semester, normally scheduled in November and April.

Students pursuing the portfolio option must complete HIST 677 during their last year in the program. Students may submit their materials and/or sit for the oral defense for the components in conjunction with HIST 677. The portfolio is judged in its entirety and is rated Pass or Fail by the examining committee. Students who fail the oral defense can defend again in the next scheduled period. Only one additional defense is permitted.

Certificate Maritime History Certificate

The Department of History offers a Graduate Certificate in Maritime History. The certificate program is open to current MA candidates, students already possessing an MA in History, or other graduate students who seek to complete the certificate alone. Current MA candidates should apply to the Graduate Program Director for permission to pursue the course of study for the certificate. Students already possessing an MA in History or graduate students who seek to pursue the certificate should contact the Graduate Program Director in the Department of History to be advised on admissions and applications procedures.

The Graduate Certificate in Maritime History is designed to provide history graduate students the opportunity to develop a special emphasis in maritime history as part of their graduate education. Courses offer perspectives of the history of maritime developments throughout the centuries. The Certificate may be of interest to those who seek to develop expertise in maritime studies, maritime museums, or to enhance their career opportunities in maritime business or interdisciplinary studies of marine communities and environments. The department develops interdisciplinary coursework on historical and contemporary maritime and coastal environments and their many interdependencies: landscapes, seascapes and ports. Topics covered include oceanic and naval history, history of the use of marine resources,

maritime environmental history, and other topics like the history of maritime trade and technology and the trans-atlantic slave trade. These courses explore the past and present of the world's waterways and the human and natural environments of maritime and marine locales, and offers students an introduction to maritime history and its global dynamic.

Curriculum Requirements

HIST 600	Historical Theory and Practice *	3
HIST 668	Internships in History **	3
Electives:		
Select two of the following:		6
HIST 611	The Military in America	
HIST 622	The Atlantic Slave Trade	
HIST 636	The British Empire	
HIST 641	Individual & Society in Ancient Greece	
HIST 647	Studies in Maritime History	
HIST 662	North Atlantic Resources	
HIST 696	Tutorial in Maritime History	
Other 600-level course with a focus on maritime history as approved by the Graduate Program Director		
Total Credit Hours		12

- * Ideally taken in the first semester of enrollment.
- ** Internship must be in a maritime field, as determined by the Graduate Program Director.

For current MA candidates, the certificate will be awarded at the time of graduation on certification of the completion of requirements by the Graduate Program Director in accordance with the policies of the University Registrar. For those already holding the MA in History or other graduate students seeking the certificate, the certificate will be awarded on completion of the 12 hours of required coursework as certified by the Graduate Program Director in accordance with the policies and procedures of the University Registrar.

Students pursuing the Graduate Certificate are subject to all GPA and other requirements and policies of the department, college and university applicable to students pursuing a degree in the MA in History program.

Institute for the Humanities

Web Site: <https://ww1.odu.edu/al/institutes/humanities> (<https://ww1.odu.edu/al/institutes/humanities/>)

Overview

Dr. Anne H. Muraoka, Director
3042 Batten Arts & Letters
Norfolk, VA 23529
757-683-4678
E-mail: amuraoka@odu.edu

The Institute for the Humanities at Old Dominion University offers an interdisciplinary Master of Arts degree in the Humanities. The program allows students to pursue individualized programs of study that incorporate classes from across the College of Arts and Letters. As humanists, we are stewards of the value of the human experience to transform the world and improve the lives of our students.

Programs

Master of Arts Humanities (MA)

Overview

Dr. Anne H. Muraoka, Director
3042 Batten Arts & Letters
Norfolk, VA 23529
757-683-4678
E-mail: amuraoka@odu.edu

Department website: <https://ww1.odu.edu/al/institutes/humanities> (<https://ww1.odu.edu/al/institutes/humanities/>)

The Master of Arts in Humanities program is interdisciplinary in focus. Students in the Humanities may choose to design a program to meet their own intellectual and professional objectives comprised of graduate-level courses from across the disciplines in the College of Arts and Letters or they may focus within a specific academic discipline. This individualized program of study will encourage critical thinking, independence of thought, solid scholarship, and visionary solutions to real-world issues.

Admission

The Master of Arts in Humanities program is open to all qualified holders of a BA or BS degree and is designed for full-time or part-time students, students who have recently completed their bachelor's degree, as well as nontraditional or adult students. Although admission is selective, the Humanities program recognizes that everyone has unique qualifications that should be taken into consideration.

In addition to meeting general University requirements, an applicant must:

- Possess an overall undergraduate grade point average of 3.25
- Have earned at least 24 credit hours in liberal arts disciplines

To be considered, applicants must:

- Submit an academic writing sample reflecting their ability to do research and write effectively
- Submit two recommendation letters
- Submit a statement of purpose that proposes an interdisciplinary program of study, discusses personal, intellectual and professional goals, and explain the relationship of those goals to the intended program of study

We accept students from all semesters (fall, spring, or summer). There is no deadline to apply (although the student may not be admitted for a semester that is already under way).

All application inquiries should be made to the Office of Graduate Admissions.

Requirements

Once students gain admission to the program, they may pursue the 36-hour thesis option or the capstone project. All students must take HUM 601 (<https://odu-preview.courseleaf.com/search/?P=HUM%20601>), HUM 602 (<https://odu-preview.courseleaf.com/search/?P=HUM%20602>), HUM 603 (<https://odu-preview.courseleaf.com/search/?P=HUM%20603>), HUM 704 (<https://odu-preview.courseleaf.com/search/?P=HUM%20704>), and HUM 698 (<https://odu-preview.courseleaf.com/search/?P=HUM%20698>).

In their final semester and under the direction of their advisor, capstone students must take HUM 693 (<https://odu-preview.courseleaf.com/search/?P=HUM%20693>), and thesis students HUM 699 (<https://odu-preview.courseleaf.com/search/?P=HUM%20699>). In either case, the Director of the Institute for the Humanities will help guide students. Students may only take 12 hours at the 500 level. Students are required to complete their graduate work within a 8-year period.

Curriculum Requirements

All students must take the following five required courses. These courses provide an introduction to humanities research (HUM 601 (<https://odu-preview.courseleaf.com/search/?P=HUM%20601>)), critical methods in humanities (HUM 602 (<https://odu-preview.courseleaf.com/search/?P=HUM%20602>)), guidance in building a strategic professional development plan, interdisciplinary research and teaching (HUM 603 (<https://odu-preview.courseleaf.com/search/?P=HUM%20603>)), familiarity with ongoing debates about the future of the humanities in a digital era (HUM 704 (<https://odu-preview.courseleaf.com/search/?P=HUM%20704>)), and a foundation for each student's individualized program of study by preparing students for their thesis or capstone project (HUM 698 (<https://odu-preview.courseleaf.com/search/?P=HUM%20698>)).

Core Requirements

HUM 601	Introduction to the Humanities	3
HUM 602	Critical Methods in Humanities	3
HUM 603	Strategic Professional Development Pro-Seminar	3
HUM 704	Technology and the Humanities	3
HUM 698	Capstone Project and Thesis Preparation Seminar	3

Electives * 18

Thesis or Thesis Option 3

Non-Thesis Option

HUM 693	Capstone Project	

Thesis Option

HUM 699	Thesis	

Total Credit Hours 36

* Elective courses are chosen under the advisement and approval of the Program Director.

Thesis Option

Students pursuing the thesis must take HUM 699 (<https://odu-preview.courseleaf.com/search/?P=HUM%20699>) Thesis (3 credits) in their final semester. The thesis must be based on original scholarly research and should reflect the interdisciplinary nature of the Humanities degree. Each student will choose a graduate-teaching certified faculty advisor who will chair a thesis committee appointed by the Director of the Institute for the Humanities. The thesis committee will direct and evaluate the student's work and must consist of graduate-teaching certified faculty members from at least two different disciplines in the College of Arts and Letters. Students must circulate the thesis to the thesis committee at least 3-4 weeks prior to the oral defense. Students must submit their thesis for style editing and upload the final thesis to ProQuest based on the College of Arts and Letters submission deadlines.

Non-Thesis Option - Capstone Project

Students pursuing the Capstone Project must take HUM 693 (<https://odu-preview.courseleaf.com/search/?P=HUM%20693>) Capstone Project (3 credits) in their final semester. Students must work with an Old Dominion University graduate-teaching certified faculty advisor who will guide and evaluate their work. It is the responsibility of the student to locate, contact, and gain the commitment of the advisor. The student in collaboration with the advisor and the Director of the Institute for the Humanities will determine the topic to ensure the interdisciplinary and humanistic scope of the project. Capstone projects must include a scholarly component combined with either a creative, experiential community event, or project. The length, content, and direction of the project will be determined by the student in coordination with the faculty advisor and the Director of the Institute for the Humanities. Students must upload their Capstone Projects to ODU Digital Commons.

F. Ludwig Diehn School of Music

2123 Diehn Center for the Performing Arts
757-683-4061

Emily Ondracek-Peterson, Executive Director
Nancy K. Klein, Director/Chair
Douglas T. Owens, Graduate Program Director

The Master of Music Education degree is designed to stress the development of advanced knowledge of broad-based principles and practices in music and music education for application in the public or private school, private studio, or higher education setting. A minimum of 34 semester hours of coursework is required to complete the degree, with the hours distributed according to the area of concentration. Virginia Department of Education teacher licensure is not included with this degree.

Programs

Master of Music Education Programs

- Music Education with a Concentration in Applied Studies (MME) (p. 89)
- Music Education with a Concentration in Pedagogy (MME) (p. 90)
- Music Education with a Concentration in Research (MME) (p. 91)

Certificates

- Music Performance Certificate (p. 91)

Master of Music Education Music Education with a Concentration in Applied Studies (MME)

Douglas T. Owens, Graduate Program Director

The College of Arts and Letters and the F. Ludwig Diehn School of Music offer the Master of Music Education degree with concentrations in Applied Studies (performance, conducting, composition), Research, and Pedagogy. The graduate degree is designed to develop advanced knowledge of broad-based principles and practices in music and music education for application in the public or private school, private studio, or higher education setting. A minimum of 34 semester hours of coursework is required to complete the degree, with the hours distributed according to the area of concentration. Virginia Department of Education teacher licensure is not included with this degree.

Admission

For admission to the Master of Music Education program, each candidate must have earned a bachelor's degree in music and have earned an overall GPA of 3.0 with a 3.0 GPA in the major field of study. Candidates seeking the concentration in Applied Studies are required to complete the music performance audition for selected Diehn School of Music graduate faculty. See the F. Ludwig Diehn School of Music Graduate Admissions page (<https://www.odu.edu/music/admission/graduate/>) for complete information.

Curriculum Requirements

The three areas of concentration for the Master of Music Education degree are:

1. Applied Concentration, requiring 34 hours of coursework and full master's recital in either performance or composition, or various conducting performances with the assigned ensembles;
2. Research Concentration, requiring 34 hours of coursework and a thesis or problems paper;
3. Pedagogy Concentration, requiring 34 semester hours of coursework and a culminating portfolio presentation.

Required credits for each concentration will include core coursework as well as coursework in the Concentration and Cognate/Elective areas.

Before the completion of 12 credits, each candidate must declare a concentration of study. Those admitted to the applied option must pass an applied jury or performance presented before the graduate faculty for continuance review during each semester of study. Students in all concentration areas must pass the graduate music theory placement test prior to or during their studies. **Note:** The graduate music theory placement test is waived for students that earned their undergraduate degree in Music at Old Dominion University. All students must pass the written comprehensive examination near the completion of their studies.

Music Education Core

Master of Music Education Music Education with a Concentration in Pedagogy (MME)

Douglas T. Owens, Graduate Program Director

The College of Arts and Letters and the F. Ludwig Diehn School of Music offer the Master of Music Education degree with concentrations in Applied

Studies (performance, conducting, composition), Research, and Pedagogy. The graduate degree is designed to develop advanced knowledge of broad-based principles and practices in music and music education for application in the public or private school, private studio, or higher education setting. A minimum of 34 semester hours of coursework is required to complete the degree, with the hours distributed according to the area of concentration. Virginia Department of Education teacher licensure is not included with this degree.

Admission

For admission to the Master of Music Education degree program, each candidate must have earned a bachelor's degree in music and have earned an overall GPA of 3.0 with a 3.0 GPA in the major field of study. The music performance audition is not required for the Concentration in Pedagogy. See the F. Ludwig Diehn School of Music Graduate Admissions page (<https://www.odu.edu/music/admission/graduate/>) for complete information.

Curriculum Requirements

The three areas of concentration for the Master of Music Education degree are:

1. Applied Concentration, requiring 34 hours of coursework and full master's recital in either performance or composition, or various conducting performances with the assigned ensembles;
2. Research Concentration, requiring 34 hours of coursework and a thesis or problems paper;
3. Pedagogy Concentration, requiring 34 semester hours of coursework and a culminating portfolio presentation.

Required credits for each concentration will include core coursework as well as coursework in the Concentration and Cognate/Elective areas.

Before the completion of 12 credits, each candidate must declare a concentration of study. Those admitted to the applied option must pass an applied jury or performance presented before the graduate faculty for continuance review during each semester of study. Students in all concentration areas must pass the graduate music theory placement test prior to or during their studies. **Note:** The graduate music theory placement test is waived for students that earned their undergraduate degree in Music at Old Dominion University. All students must pass the written comprehensive examination near the completion of their studies.

Certificate

Music Performance Certificate

The Graduate Certificate in Music Performance is a 12-credit program designed to strengthen the performance skills of musicians and music educators. Full-time and part-time students may enroll in the certificate program. Both non-degree seeking students, and degree seeking students may enroll. Degree seeking students may take courses in conjunction with their regular course load.

Degree seeking students can take courses any time during their program. It is anticipated that students who are enrolled full-time can complete the certificate program in one year (two semesters). Students attending part-time, maintaining a course load of three to six credit hours per semester can complete the program in two years (three to four semesters).

Non-degree seeking students who are enrolled full-time can complete the certificate program in one year (two semesters). Students attending part-

time, maintaining a course load of three to six credit hours per semester can complete the program in two years (three to four semesters).

Students have eight years from initial enrollment to complete the coursework for the certificate.

Admission

All students will be required to apply to the certificate program. The admission requirements will be based on enrollment status at ODU. The Graduate Certificate in Music Performance has the following admission requirements:

Non-degree seeking applicants will:

- Possess a graduate degree from an accredited institution with a GPA of 3.0 or better
- Submit a completed online Non-Degree admission application (<https://www.odu.edu/admission/apply/>) and application fee. See the Non-degree admission information (<https://odu.edu/admission/graduate/>) for added details. Include official transcripts of all undergraduate and graduate coursework from regionally accredited institutions.
- Complete the Graduate Performance Audition (<https://odu.edu/music/admission/auditions/graduate/>) juried by the F. Ludwig Diehn School of Music faculty.

Degree seeking applicants will:

- Gain advisor approval before applying to the program
- Submit a completed online application and application fee
- Submit official transcripts of all undergraduate and graduate coursework
- Complete the Graduate Performance Audition (<https://odu.edu/music/admission/auditions/graduate/>) juried by the F. Ludwig Diehn School of Music faculty

In addition, applicants who have earned a graduate degree outside of the United States must submit:

- Current scores on the Test of English as a Foreign Language (TOEFL), with a minimum score of 230 on the computer-based TOEFL or 80 on the TOEFL iBT.
- A sample of scholarly writing.
- Three letters of recommendation describing the candidate's musical experience and level of musicianship from previous applied lesson faculty or other music faculty.

Curriculum Requirements

Required Core Courses

MUSA 651	Advanced Applied Music	3
MUSA 652	Advanced Applied Music	3

Restricted Electives

Select 6 credits of the following: 6

MUSC 614	Workshop in Instrumental Music
MUSC 615	Workshop in Choral Music
MUSC 680	Performing Ensembles
MUSC 692	Portfolio
MUSC 695	Topics in Music
MUSC 697	Independent Study

Additional courses are available upon advising. Contact Graduate Program Director Dr. Douglas T. Owens for additional information.

Dr. Regina Karp, Graduate Program Director

Old Dominion University offers MA and PhD degrees in international studies through the Graduate Program in International Studies (GPIS).

GPIS is an interdisciplinary unit, offering advanced research and graduate training in global problems and transnational issues. Fields of concentration include Comparative Cultural and Political Studies, Conflict and Cooperation, International Political Economy and Development, Modeling and Simulation, Strategic Leadership, and US Foreign Policy and International Relations.

Graduate Certificates

Working with other units across campus, GPIS offers interdisciplinary graduate certificates in International Development, Women's Studies, Global Health, and Modeling & Simulation. Each certificate can be earned with 12 credit hours and can be pursued independently or in conjunction with a MA or PhD. Certificates provide practical skills and insight into the organization and operation of specific challenges associated with the implementation and delivery of the products studied within each certificate.

Additional Information

Please see the GPIS Handbook and website at <http://www.odu.edu/gpis> (<http://www.odu.edu/gpis/>). For other issues concerning GPIS, please contact:

Geography

7000 Batten Arts and Letters
757-683-3841
Dr. Jennifer Whytlaw, Geography Graduate Certificate Program Director

Graduate Certificates

The Geography program offers a graduate certificate in Geographic Information Science. The graduate certificate in Geographic Information Science provides knowledge and tools for students and professionals pursuing careers in geographic information systems (GIS) and related spatial technologies. The certificate can be earned with 18 credit hours and can be pursued independently or in conjunction with a graduate degree program.

As well, in conjunction with the Department of Earth and Ocean Sciences, the Geography program offers a graduate certificate in the Spatial Analysis of Coastal Environments. The certificate in Spatial Analysis of Coastal Environments provides an interdisciplinary program for students wishing to pursue careers in coastal management or research, remote sensing, or geographic information system (GIS) applications. The certificate can be earned with 15 credit hours and can be pursued independently or in conjunction with a graduate degree program.

Dr. Regina Karp
Graduate Program Director
7044 Batten Arts & Letters
757-683-5700

Graduate Program in International Studies (<https://www.odu.edu/intlstudies/gpis.html.html>)

Admission Requirements

1. All candidates for admission into the MA must submit Graduate Record Examination (GRE) scores.
2. Official transcripts of all undergraduate or prior graduate course work submitted directly by all universities attended.
3. An essay of not more than 500 words describing interest in and capacity for advanced training in global/transnational issues.
4. One example of writing or research (a paper submitted to a seminar, a publication or report, or another comparable example).
5. Two letters of recommendation addressing the candidate's capacity to undertake graduate work on international global issues.

Any prior graduate course work taken at Old Dominion University (e.g., in nondegree status) or at another institution can be counted toward the MA degree only in accordance with the provisions governing transfer of credit and the director's approval.

Admission Standards

1. All applicants to the MA program must hold a baccalaureate degree or equivalent.
2. Candidates for the MA must attain a 3.00 cumulative GPA in all undergraduate courses. A GRE score of 146 Quantitative, and 156 Verbal is normally expected. (1100 Old Score).
3. Individuals whose native language is not English must submit a score of 230 on the computer-based TOEFL (the equivalent of 570 in the older, paper-based score scale) or 80 on the TOEFL iBT.

Application Deadline, MA

GPIS admits students for fall and spring semesters. We prefer applications to reach us by February 15 and October 15. Applications outside these timelines will be considered on a case-by-case basis. With the permission of the GPIS Director, individuals who want to begin graduate work but do not intend to finish their degree with GPIS or individuals who want to join GPIS at a later date, may be considered for taking graduate courses on a non-degree basis. GPIS offers a number of doctoral and master's graduate assistantships and awards them on the basis of availability and

competitiveness. Applicants who want to be considered for a graduate assistantship are advised to submit their application by the above deadlines.

Curriculum Requirements

Credits for the MA

The MA requires 33 credits, of which at least 27 must be at the 600 level or above. The required course work for all MA students includes IS 600 Research Methods in International Studies, but does not include any courses needed for demonstrating foreign language competency. MA candidates writing theses will incorporate into their 33 credit program six credits of directed research on the thesis. Students pursuing a non-thesis track will take a four and 1/2 hour comprehensive examination after the completion of the course work.

Curriculum

MA students will NOT be allowed to take more than nine credit hours per semester. Each required course must be completed with a grade of B (3.00) or above. MA students must fulfill the requirements of nine credit hours in one field of concentration.

Core Courses		
IS 600	Research Methods in International Studies	3
IS 601	Seminar in International Relations Theory	3
IS 655	International History	3
IS 708	Asian Politics	3
IS 726	American Foreign Policy and World Order	3
ECON 650	International Economics	3
Field of Concentration		
Select a Concentration		9
Electives*		
IS 698 or IS 699	Directed Research Thesis	6
Total Credit Hours		33

* If thesis option, 6 of these credits will be directed research. Up to six credits of elective coursework may be taken at the 500 level.

Fields of Concentration

Select one of the following six fields of concentration: Comparative Cultural and Political Studies, Conflict and Cooperation, International Political Economy and Development, Modeling and Simulation, Strategic Leadership or U.S. Foreign Policy. Students must choose courses from the below lists as specified. IS 795 Topics in International Studies courses may be accepted with the approval of the program director in coordination with the concentration coordinators. IS 668 Internship in International Studies, IS 697 Independent Research in International Studies, or IS 698 Directed Research may be accepted one time with the approval of the program director in coordination with the concentration coordinators. Courses not on these lists may be accepted with the approval of the program director in coordination with the concentration coordinators.

Comparative Cultural and Political Studies Concentration

Students must take IS 716 Theories of Comparative Sociopolitical Studies and IS 760 International Cultural Studies: History, Theory and Application and one additional course from the following list.

IS 716	Theories of Comparative Sociopolitical Studies	3
IS 760	International Cultural Studies: History, Theory and Application	3
Select one of the following:		3
IS 668	Internship in International Studies	
IS 697	Independent Research in International Studies	

IS 698	Directed Research
IS 703	Ethics and International Relations
IS 704	Latin American Politics
IS 722	Democracy and International Relations
IS 725	Politics of the Middle East
IS 728	Ghosts of French Colonization
IS 731	Media & Migration
IS 738	European Politics
IS 740	Political Economy of Development
IS 741	Globalization and Social Change in the World System
IS 748	Gender and Globalization
IS 770	Transnational Media Practices
IS 795	Topics in International Studies (Gender & International Migration)
HLSC 776	Global Health

Total Credit Hours 9

Conflict and Cooperation Concentration

Students must take IS 702 Approaches to Collective Security and two additional courses from the following list.

IS 702	Approaches to Collective Security	3
Select two of the following:		6
IS 668	Internship in International Studies	
IS 697	Independent Research in International Studies	
IS 698	Directed Research	
IS 707	Interdependence, Power, and Transnationalism	
IS 720	Research Seminar in Global Security	
IS 721	New World Order: Chaos and Coherence	
IS 734	U.S. Grand Strategy	
IS 735	International Relations of the Middle East	
IS 790	Advanced Seminar Conflict & Cooperation	
IS 795	Topics in International Studies	

Total Credit Hours 9

International Political Economy and Development Concentration

Students must take IS 724 International & Comparative Political Economy and IS 740 Political Economy of Development and one additional course from the following list.

IS 724	International & Comparative Political Economy	3
IS 740	Political Economy of Development	3
Select one of the following:		3
IS 668	Internship in International Studies	
IS 697	Independent Research in International Studies	
IS 698	Directed Research	
IS 707	Interdependence, Power, and Transnationalism	
IS 711	International Migration and Refugee Movement	
IS 713	Global Political Economy	
IS 716	Theories of Comparative Sociopolitical Studies	
IS 717	World Population and Development	
IS 722	Democracy and International Relations	

IS 741	Globalization and Social Change in the World System
IS 795	Topics in International Studies

Total Credit Hours 9

Modeling and Simulation Concentration

Students must take MSIM 601 Introduction to Modeling and Simulation or MSIM 602 Simulation Fundamentals and IS 723 Advanced Statistical Techniques in International Studies and one additional course from the following list.

MSIM 601	Introduction to Modeling and Simulation	3
or MSIM 602	Simulation Fundamentals	
IS 723	Advanced Statistical Techniques in International Studies	3
Select one of the following:		3
BNAL 722	Agent-Based Simulation and Modeling	
ECON 707	Econometrics II	
ECON 708	Econometrics III	
ENMA 712	Multi-Criteria Decision Analysis and Decision Support Systems	
ENMA 724	Risk Analysis	
ENMA 754	Big Data Fundamentals	
GEOG 600	Geospatial Data Analysis	
GEOG 601	Spatial Statistics and Modeling	
IDT 755	Theory and Design of Instructional Simulation	
IDT 756	Instructional Gaming: Theories and Practice	
IS 668	Internship in International Studies	
IS 697	Independent Research in International Studies	
IS 698	Directed Research	
IS 762	Game Theory	
IS 765	Agent-Based Modeling and Simulation for International Studies	
IS 772	Modeling Global Events	
IS 795	Topics in International Studies	
MSIM 673	Threat Modeling and Risk Analysis	
MSIM 725	Principles of Combat Modeling and Simulation	
PSYC 736	Multilevel Models: HLM	
STAT 625	Probability Theory for Data Science	
STAT 640	Survival Analysis	

Total Credit Hours 9

Strategic Leadership Concentration

Students must take IS 721 New World Order: Chaos and Coherence and two additional courses from the following list.

IS 721	New World Order: Chaos and Coherence	3
Select two of the following:		6
IS 668	Internship in International Studies	
IS 697	Independent Research in International Studies	
IS 698	Directed Research	
IS 701	Global Change and American Foreign Policy	
IS 702	Approaches to Collective Security	
IS 708	Asian Politics	
IS 713	Global Political Economy	
IS 720	Research Seminar in Global Security	
IS 734	U.S. Grand Strategy	

IS 741	Globalization and Social Change in the World System	
IS 795	Topics in International Studies	
COMM 600	Intercultural Communication: History, Theory and Application (MA students only)	
Total Credit Hours		9

US Foreign Policy

Students must take IS 734 U.S. Grand Strategy and two additional courses from the following list.

IS 734	U.S. Grand Strategy	3
Select two of the following:		6
IS 668	Internship in International Studies	
IS 697	Independent Research in International Studies	
IS 698	Directed Research	
IS 701	Global Change and American Foreign Policy	
IS 702	Approaches to Collective Security	
IS 703	Ethics and International Relations	
IS 714	Law in the International System	
IS 720	Research Seminar in Global Security	
IS 721	New World Order: Chaos and Coherence	
IS 740	Political Economy of Development	
IS 741	Globalization and Social Change in the World System	
IS 795	Topics in International Studies	
Total Credit Hours		9

Additional Information

Methodology Requirements

The MA requires one methodology course (IS 600). MA students are encouraged to take further methods courses as electives.

Language Requirements

MA students must demonstrate reading competence in one foreign language other than English. International students who have English as a second language fulfill this requirement.

Foreign language competence can be demonstrated in one of two ways:

1. Students may complete a third year of language instruction at Old Dominion University (students may choose to enter the third year through a University placement test) or other institutions. A grade of B or above in both semesters of third-year instruction will demonstrate competency in that language.
2. Students may take a language test. Exams are administered (for a fee) by the Department of Foreign Languages and Literatures. GPIS requirements concern reading comprehension competence. For more information about which skills will be tested and what standards of competency are required refer to the language requirements website <https://www.odu.edu/international-studies/graduate-program/language-requirements> (<https://www.odu.edu/international-studies/graduate-program/language-requirements/>).

Comprehensive Examinations

In consultation with their advisors, MA students will select either a thesis or non-thesis option. Students selecting the non-thesis track must pass a written comprehensive examination.

The MA comprehensive examination may not be scheduled before students have completed all core and methodology requirements, nor may the MA comprehensive examination be scheduled prior to the last semester in which regular course work is taken. MA examinations are scheduled twice a year. If MA students fail the written comprehensive on the first attempt, they may

retake the entire written comprehensive exam only once, no earlier than one semester later.

Theses

MA students choosing the thesis option will submit a thesis prospectus to the chair of their thesis committee for approval after the completion of 18 credits or at the beginning of the third semester in the program. The thesis should be submitted to the thesis committee for its approval at least two weeks before a defense is scheduled. The committee will schedule the student's oral defense of the thesis when the thesis appears to meet GPIS standards for master's theses. The oral defense will concern questions of substance and methodology. Thesis students must pass an oral defense of their thesis.

Grade Requirements

All MA students will be graded on the traditional A, B, C, F scale (with pluses and minuses) in all courses. Pass/Fail evaluations will be utilized only in the case of registration for internships, independent research, directed research or for thesis research, or when specifically approved by the director.

Graduate students for whom grade point averages fall below 3.00 (B) will be placed on a probationary status. After two consecutive semesters below this average or the accumulation of two grades of "C" or below, the director will take under consideration, in consultation with faculty, termination of the student's program.

Time Limit and Residency Requirements

The master's degree can be completed in four full-time semesters, although many MA candidates continue the degree over a longer period on a part-time basis. The MA must be completed within a six-year period.

For other issues concerning GPIS, please contact:

Graduate Program in International Studies (GPIS)
7044 Batten Arts and Letters Building
Old Dominion University

E-mail: isgpd@odu.edu

Doctor of Philosophy International Studies (PhD)

GPIS is an interdisciplinary unit, offering advanced research and graduate training in global problems and transnational issues. Fields of concentration include Comparative Cultural and Political Studies, Conflict and Cooperation, International Political Economy and Development, Modeling and Simulation, Strategic Leadership, and U.S. Foreign Policy.

Dr. Regina Karp
Graduate Program Director
7044 Batten Arts & Letters
757-683-5700

Graduate Program in International Studies (<https://www.odu.edu/intlstudies/gpis.html.html>)

Admission Requirements

All candidates for admission into the PhD must submit:

1. Graduate Record Examination (GRE) scores (may be waived on a case-by-case basis for PhD applicants depending on prior qualifications at the master's level).
2. Official transcripts of all undergraduate or prior graduate course work submitted directly by all universities attended.
3. An essay of not more than 500 words describing interest in and capacity for advanced training in global/transnational issues.
4. One example of writing or research (a paper submitted to a seminar, a publication or report, or another comparable example).

- Three letters of recommendation addressing the candidate's capacity to undertake graduate work on international global issues.

Any prior graduate course work taken at Old Dominion University (e.g., in nondegree status) or at another institution can be counted toward the PhD degree only in accordance with the provisions governing transfer of credit and the director's approval.

Admission Standards

- Applicants to the PhD program must hold a master's degree in a related field of study.
- PhD candidates are generally expected to attain a GRE score of 148 Quantitative and 160 Verbal (1200 Old Score) and have at least a 3.00 cumulative GPA in undergraduate and graduate courses, with a somewhat higher GPA for courses related to international, global or transnational issues.
- Individuals whose native language is not English must submit a score of 230 on the computer-based TOEFL (the equivalent of 570 in the older, paper-based score scale) or 80 on the TOEFL iBT.
- The Admissions Committee strongly recommends prior international experience (residence, study or work) and foreign language training for all PhD applicants. Evidence of substantial international and foreign language background is highly desirable for applicants.

Application Deadline, PhD

GPIS admits students for fall and spring semesters. We prefer applications to reach us by January 15 and October 15. Applications outside these timelines will be considered on a case-by-case basis.

With the permission of the GPIS Director, individuals who want to begin graduate work but do not intend to finish their degree with GPIS or individuals who want to join GPIS at a later date, may be considered for taking graduate courses as non-degree seeking students.

GPIS offers a number of doctoral and master's graduate assistantships and awards them on the basis of availability and competitiveness. Applicants who want to be considered for a graduate assistantship are advised to submit their application by the above deadlines.

Curriculum Requirements

The PhD requires 48 credits at the post-master's level (courses at the 800 level). These 48 hours include a minimum of 12 dissertation credits. The 48 credits do not include any courses needed for demonstrating foreign language competency.

Upon completion of coursework, PhD students must pass a written and an oral candidacy examination, submit a dissertation prospectus, write a dissertation, and undergo an oral defense of the dissertation.

PhD students will NOT be allowed to take more than nine credit hours per semester. Each required course must be completed with a grade of B (3.00) or above. PhD students must take 12 credit hours of core courses, 15 credit hours in the primary field of concentration and 9 credit hours in the secondary field, totaling 36 credit hours. Twelve credit hours of dissertation preparation credits must be taken to complete the credit hour requirement of 48 hours at the post-master's level (courses at the 800 level).

Required Prerequisites

Prerequisites do not count towards degree requirement.

Students must choose courses from the below lists as specified. IS 895 Topics in International Studies course may be accepted with the approval of the program director in coordination with the concentration coordinators. IS 868 Internship in International Studies, IS 897 Independent Research in International Studies or IS 898 Directed Research may be used only one time to satisfy an elective for primary or secondary concentration with the approval of the program director in coordination with the concentration coordinators. Courses not on these lists may be accepted with the approval of the program director in coordination with the concentration coordinators.

Comparative Cultural and Political Studies Concentration

Students must take IS 816 Theories of Comparative Sociopolitical Studies and IS 860 International Cultural Studies: History, Theory and Application and three additional courses for the primary concentration or one for the secondary concentration from the following list.

IS 816	Theories of Comparative Sociopolitical Studies	3
IS 860	International Cultural Studies: History, Theory and Application	3
Select three of the following if primary concentration, or one if secondary concentration:		3-9
IS 803	Ethics and International Relations	
IS 804	Latin American Politics	
IS 808	Asian Politics	
IS 822	Democracy and International Relations	
IS 825	Politics of the Middle East	
IS 828	Ghosts of French Colonization	
IS 831	Media & Migration	
IS 838	European Politics	
IS 840	Political Economy of Development	
IS 848	Gender and Globalization	
IS 868	Internship in International Studies	
IS 870	Transnational Media Practices	
IS 897	Independent Research in International Studies	
IS 898	Directed Research	
IS 895	Topics in International Studies (Gender & International Migration)	
HLSC 876	Global Health	

Total Credit Hours	9-15

Conflict and Cooperation Concentration

Students must take IS 802 Approaches to Collective Security and four additional courses for the primary concentration or two for the secondary concentration from the following list.

IS 802	Approaches to Collective Security	3
Select four of the following if primary concentration, or two if secondary concentration:		6-12

IS 807	Interdependence, Power, and Transnationalism	
IS 808	Asian Politics	
IS 821	New World Order: Chaos and Coherence	
IS 834	U.S. Grand Strategy	
IS 835	International Relations of the Middle East	
IS 868	Internship in International Studies	
IS 890	Advanced Seminar Conflict & Cooperation	
IS 895	Topics in International Studies	
IS 897	Independent Research in International Studies	
IS 898	Directed Research	
Total Credit Hours		9-15

International Political Economy and Development Concentration

Students must take IS 840 Political Economy of Development and four additional courses for the primary concentration or two for the secondary concentration from the following list.

IS 840	Political Economy of Development	3
Must take four other courses if primary concentration, or two if secondary concentration:		6-12
IS 807	Interdependence, Power, and Transnationalism	
IS 811	International Migration and Refugee Movement	
IS 813	Global Political Economy	
IS 816	Theories of Comparative Sociopolitical Studies	
IS 817	World Population and Development	
IS 822	Democracy and International Relations	
IS 841	Globalization and Social Change in the World System	
IS 868	Internship in International Studies	
IS 895	Topics in International Studies	
IS 897	Independent Research in International Studies	
IS 898	Directed Research	
Total Credit Hours		9-15

Modeling and Simulation Concentration

Students must take MSIM 601 Introduction to Modeling and Simulation or MSIM 602 Simulation Fundamentals and four additional courses for the primary concentration or two for the secondary concentration from the following list.

MSIM 601	Introduction to Modeling and Simulation	3
*MSIM 601/602 count at the 800-level for PhD students.		
or MSIM 602	Simulation Fundamentals	
Select four of the following if primary concentration or two of the following if secondary concentration:		6-12
BNAL 822	Agent-Based Simulation and Modeling	
ECON 807	Econometrics II	
ECON 808	Econometrics III	
ENMA 812	Multi-Criteria Decision Analysis and Decision Support Systems	
ENMA 824	Risk Analysis	
ENMA 854	Big Data Fundamentals	
IDT 855	Theory and Design of Instructional Simulation	
IDT 856	Instructional Gaming: Theories and Practice	
IS 862	Game Theory	

IS 865	Agent-Based Modeling and Simulation for International Studies	
IS 868	Internship in International Studies	
IS 872	Modeling Global Events	
IS 895	Topics in International Studies	
IS 897	Independent Research in International Studies	
IS 898	Directed Research	
MSIM 825	Principles of Combat Modeling and Simulation	
PSYC 836	Multilevel Models: HLM	
Total Credit Hours		9-15

Strategic Leadership Concentration

Students must take IS 821 New World Order: Chaos and Coherence and four additional courses for the primary concentration and two for the secondary concentration from the following list.

IS 821	New World Order: Chaos and Coherence	3
Select four of the following if primary concentration or two of the following if secondary concentration:		6-12
IS 801	Global Change and American Foreign Policy	
IS 802	Approaches to Collective Security	
IS 808	Asian Politics	
IS 813	Global Political Economy	
IS 834	U.S. Grand Strategy	
IS 841	Globalization and Social Change in the World System	
IS 868	Internship in International Studies	
IS 895	Topics in International Studies	
IS 897	Independent Research in International Studies	
IS 898	Directed Research	
Total Credit Hours		9-15

US Foreign Policy

Students must take IS 834 U.S. Grand Strategy and IS 826 American Foreign Policy and World Order and three additional courses for the primary concentration or one for the secondary concentration from the following list.

IS 826	American Foreign Policy and World Order	3
IS 834	U.S. Grand Strategy	3
Select three of the following if primary concentration, or one if secondary concentration:		3-9
IS 801	Global Change and American Foreign Policy	
IS 802	Approaches to Collective Security	
IS 803	Ethics and International Relations	
IS 821	New World Order: Chaos and Coherence	
IS 840	Political Economy of Development	
IS 841	Globalization and Social Change in the World System	
IS 868	Internship in International Studies	
IS 895	Topics in International Studies	
IS 897	Independent Research in International Studies	
IS 898	Directed Research	
Total Credit Hours		9-15

Additional Requirements

Methodology Requirements

All PhD students must complete a sequence of two basic methods courses beginning with IS 600. Students holding an MA from another institution

who enter the PhD program may present transcripts showing a B (3.00) or above, plus syllabi and other documentation, from a similar introductory methods course to be exempt from IS 600.

Language Requirements

PhD students must demonstrate reading competence in one foreign language other than English. International students who have English as a second language fulfill this requirement.

Foreign language competence can be demonstrated in one of two ways:

1. Students may complete a third year of language instruction at Old Dominion University (students may choose to enter the third year through a University placement test) or other institutions. A grade of B or above in both semesters of third-year instruction will demonstrate competency in that language.
2. Students may take a language test. Exams are administered (for a fee) by the Department of Foreign Languages and Literatures. GPIS requirements concern reading comprehension competence. For more information about which skills will be tested and what standards of competency are required refer to the language requirements website <https://www.odu.edu/international-studies/graduate-program/language-requirements> (<https://www.odu.edu/international-studies/graduate-program/language-requirements/>).

Candidacy Examinations

All PhD students must pass a written candidacy examination. Students who pass the written candidacy examination must then pass an oral candidacy examination.

The PhD candidacy examination may not be scheduled before students have completed all core and methodology requirements, nor may the PhD candidacy examination be scheduled prior to the last semester in which regular course work is taken. PhD students are also required to fulfill the foreign language requirement before taking the candidacy examination. PhD examinations are scheduled twice a year. PhD students failing the written examination on the first attempt may retake the written exam only once, no earlier than the following semester.

Dissertations

A dissertation is required of all PhD students. A dissertation prospectus will be prepared after the successful completion of the candidacy examination. If the student's graduate committee approves the prospectus, the student will proceed to research and write the dissertation. An oral defense of the dissertation will be scheduled after a draft is approved by the committee.

Grade Requirements

PhD students will be graded on the traditional A, B, C, F scale (with pluses and minuses) in all courses. Pass/Fail evaluations will be utilized only in the case of registration for internships, independent research, directed research or dissertation research, or when specifically approved by the director.

Graduate students for whom grade point averages fall below 3.00 (B) will be placed on a probationary status. After two consecutive semesters below this average or the accumulation of two grades of "C" or below, the director will take under consideration, in consultation with faculty, termination of the student's program.

Time Limit and Residency Requirements

The doctoral program must be completed within eight years of entry into PhD course work.

Transfer Credit

Twelve graduate credits earned at other institutions or at Old Dominion University may be applied toward the fulfillment of degree requirements. Transfer credit, including nondegree credit earned at Old Dominion, is accepted as degree credit at the discretion of the director.

Financial Aid

Full-time students are eligible to apply for university fellowships, graduate assistantships, and tuition grants which are awarded on a competitive basis.

Nondegree Students

Nondegree students must obtain the approval of the director before enrolling in graduate international studies classes.

Certificate Geographic Information Science Certificate

Dr. Jennifer Whytlaw, Graduate Certificate Program Director

The graduate certificate in geographic information science provides knowledge and tools for students and professionals pursuing careers in geographic information systems (GIS) and related spatial technologies. The certificate is an affidavit of academic proficiency in GIS and related areas such as remote sensing, global positioning systems, cartography, and spatial data analysis. This certificate is designed for graduate students and professionals employed in geographic information science fields. The certificate is available to postgraduate professionals who meet the requirements. Students with comparable professional experience may be able to show competence in selected courses through examination. For information regarding the undergraduate certificate in Geographic Information Science, please consult the Undergraduate Catalog.

Admission Requirements

Submission of:

- Graduate Record Examination (GRE) scores; no minimum score required—results represent one factor considered for admission;
- Official transcripts of all undergraduate and prior graduate coursework;
- Two letters of recommendation addressing the candidate's capacity to undertake graduate work in geographic information science;
- An essay of not more than 500 words describing interest in and capacity for advanced training in geographic information science; and
- One example of writing or research (a paper submitted to a seminar, a publication or report, or another comparable example).

Curriculum Requirements

Students must take 15 credit hours in the areas listed below and complete them with a cumulative GPA of 3.00 or higher and no grade below a C (2.00) for undergraduate students or B (3.00) for graduate students.

Core Courses		
GEOG 502	Geographic Information Systems	3
GEOG 504	Digital Techniques for Remote Sensing	3
GEOG 508	Cartography	3
Elective Courses		
Select two of the following:		6
GEOG 519	Spatial Analysis of Coastal Environments	
GEOG 525	Internet Geographic Information Systems	
GEOG 532	Advanced GIS	
GEOG 563	GIS Programming	
GEOG 573	Geographic Information Systems for Emergency Management	
GEOG 590	Applied Cartography/GIS	
GEOG 595	Topics in Geography	
or GEOG 596	Topics in Geography	
GEOG 697	Independent Research in Geography *	
Total Credit Hours		15

* Advanced approval required to count toward the certificate.

Certificate International Development Certificate

Careers in International Development involve working for a variety of organizations, both locally in the United States and abroad, mandated to support development efforts in lesser developed nations on topical issues such as humanitarian assistance and disaster relief, public health, poverty alleviation, debt relief, good governance, and economic development.

Prospective employers include government agencies such as the U.S. Agency for International Development (USAID); international and nongovernmental organizations such as the United Nations Development Program, United Nations Population Division, World Bank, Asian Development Bank, Inter-American Development Bank, Oxfam International and local affiliates, International Committee of the Red Cross, Physicians for Peace, and World Vision. The categories of employment often include skills such as program management, procurement, logistics, and monitoring and evaluation.

Admission

To be admitted to this program, potential students may apply online through the Office of Admissions as a non-degree, certificate/life learner student. All applicants must meet the requirements for graduate admission. Graduate degree-seeking students interested in pursuing this certificate in conjunction with a degree should consult with their graduate program director or advisor for assistance.

Curriculum Requirements

Twelve credit hours are required to complete this certificate.

IS 713	Global Political Economy	3
PPCM 727	Public Procurement and Project Management	3
Select one of the following:		3
IS 740	Political Economy of Development	
IS 741	Globalization and Social Change in the World System	
ECON 754	Economic Development	
HLSC 776	Global Health	
Select one of the following:		3
HLSC 702	Health Management	
PORT/MSCM 641	Supply Chain Management and Logistics	
PORT/MSCM 615	Maritime Security and Risk Analysis	
Total Credit Hours		12

Continuance

Students must maintain a cumulative GPA of 3.0 to be in good academic standing. Students unable to maintain good academic standing will be placed on probation and may be suspended.

Certificate Modeling and Simulation - International Studies Certificate

The Graduate Program in International Studies (GPIS) offers a certificate in modeling and simulation.

Curriculum Requirements

Twelve credit hours are required to complete the certificate.

Introductory Course(s)

MSIM 601	Introduction to Modeling and Simulation	3

Core Courses *

Select three of the following:		9
ENMA 712/812	Multi-Criteria Decision Analysis and Decision Support Systems	
ENMA 724/824	Risk Analysis	
IS 762/862	Game Theory	
IDT 755/855	Theory and Design of Instructional Simulation	
IDT 756/856	Instructional Gaming: Theories and Practice	
IS 765/865	Agent-Based Modeling and Simulation for International Studies	
IS 762/862	Game Theory	
MSIM 772/872	Modeling Global Events	

Total Credit Hours		12

* Other courses may be included from across the University's modeling and simulation programs with approval of the track coordinator.

Certificate Spatial Analysis of Coastal Environments Certificate

Jennifer Whytlaw, Graduate Certificate Program Director

The certificate in spatial analysis of coastal environments provides an interdisciplinary program for students wishing to pursue careers in coastal management or research, remote sensing, or geographic information system (GIS) applications. Rendered upon completion of the requirements, the certificate is an academic affidavit comprised of courses in geography and ocean, earth, and atmospheric sciences, and is administered by the two departments. The certificate is available to postgraduate professionals who meet the requirements. Students with comparable professional experience may be able to show competence in selected courses through examination. For information regarding the undergraduate certificate in Spatial Analysis of Coastal Environments, please consult the Undergraduate Catalog.

Curriculum Requirements

Students must take 15 credit hours in the areas listed below and complete them with a cumulative GPA of 3.00 or higher and no grade below a B (3.00).

Core courses

GEOG 504	Digital Techniques for Remote Sensing	3
GEOG 562	Advanced Spatial Analysis	3

Interpretive Analysis Courses

Select two of the following:		6
GEOG 522	Coastal Geography	
GEOG 520	Marine Geography	
BIOL 504	Conservation Biology and Sustainable Development	
GEOG 590	Applied Cartography/GIS *	
OEAS 595	Special Topics *	
GEOG 595	Topics in Geography *	

Capstone Seminar

GEOG/OEAS 519	Spatial Analysis of Coastal Environments	3
Total Credit Hours		15

* Advanced approval required to count toward the certificate.

Department of Sociology and Criminal Justice

The Department of Sociology and Criminal Justice offers one graduate degree - a Ph.D. in Criminology and Criminal Justice. The Ph.D. in Criminology and Criminal Justice is a sociological criminology program that highlights social inequality and public policy in the study of crime and justice issues. The program produces scholars with strong backgrounds in the substantive areas of criminology, criminal justice, theory, inequality, and policy as well as in research methods and statistics. Designed primarily for students who are interested in pursuing careers in higher education, the course offerings also provide students the education and skills needed to be employed as researchers in public and private agencies. Graduates are prepared as scholars able to conduct research, teach college and university courses in their areas of specialization, and to provide service to the discipline and community.

Vanessa Panfil, Graduate Program Director, vpanfil@odu.edu

Programs

Doctor of Philosophy Program

- Criminology and Criminal Justice (PhD) (p. 100)

Master of Arts Program

- Applied Sociology (MA) (p. 100)

Master of Arts Applied Sociology (MA)

Ingrid Whitaker, Graduate Program Director

This program has been recommended for closure to the State Council for Higher Education of Virginia. Pending their approval and SACSCOC approval, all degrees for the program must be earned by August 2025. New students will not be able to enter the program after August 28, 2020.

The Master of Arts degree in Applied Sociology emphasized research skills necessary in many professions. The M.A. degree served as professional training for students seeking employment in federal, state and local government agencies or in private-sector organizations. In addition, the M.A. program provided excellent training in the fundamentals of sociology for students who wished to pursue a Ph.D. in the social sciences.

Doctor of Philosophy Criminology and Criminal Justice (PhD)

Vanessa Panfil, Graduate Program Director

The Ph.D. in Criminology and Criminal Justice is a sociological criminology program that highlights social inequality and public policy in the study of crime and justice issues. The program produces scholars with strong backgrounds in the substantive areas of criminology, criminal justice, theory, inequality, and policy as well as in research methods and statistics. Designed primarily for students who are interested in pursuing careers in higher education, the course offerings also provide students the education and skills needed to be employed as researchers in public and private agencies. Graduates are prepared as scholars able to conduct research, teach college and university courses in their areas of specialization, and to provide service to the discipline and community.

Regular Admission Requirements

1. A completed master's degree (or its equivalent) in criminology, criminal justice, or in an appropriate field (e.g., administration of justice, sociology, or political science) from a regionally accredited institution of higher education – a thesis is generally expected;
2. A minimum grade point average (GPA) of 3.25 (on a 4.0 scale) overall for the master's degree;
3. The Graduate Record Examination (GRE) is required of all applicants;
4. Successful completion of prior coursework in research methods and statistics at least equivalent to that required by the ODU B.A. in sociology/criminal justice and M.A. degree in applied sociology (research methods, statistics, computer and data analysis);
5. Three letters of reference from sources capable of commenting on the applicant's readiness for advanced graduate study in criminology & criminal justice;
6. A writing sample of at least 20 double-spaced pages on a topic related to the applicant's expertise or area of interest;
7. A typed statement of approximately 1,000 words summarizing the individual's motivation for applying to the program as well as the professional contributions s/he intends to make assuming successful completion of the degree;
8. If the applicant's native language is not English, a current score for the Test of English as a Foreign Language (TOEFL) of at least 540 and/or an interview in which the applicant's comprehension and fluency in English can be assessed.

Provisional Admission

Provisional admission may be granted on rare occasions when an applicant's credentials suggest aptitude for doctoral study but do not meet the criteria outlined above. Admission under this standard requires a variable amount of preliminary coursework in addition to that which is normally required for the degree. The amount and content of additional coursework required for conditional admissions is determined by the Ph.D. Committee on a case-by-case basis.

Students who have an appropriate undergraduate degree and a law degree (J.D.) but lack graduate work in the social sciences will normally be required to complete 18 hours of graduate work as follows: 12 hours in theory, research methods, social statistics, computer statistical applications, and 6 hours of substantive courses.

International Students

Graduate international students on non-immigrant visas whose native language is not English or who have not lived in the U.S. ten years must provide evidence of English language proficiency through one of the following:

1. Submission of a minimum required TOEFL score or successful completion of Old Dominion University's Graduate Bridge Program,
2. Possession of an American Bachelor's or Master's degree equivalent from an accredited institution located in a country where English is the native language,
3. GRE verbal score of 480.

Non-degree seeking students must secure permission from the GPD prior to registering for doctoral classes in the program.

Application Deadlines

January 15 – Students applying for funding (Graduate Assistantship) and fall admission; there is no spring admission. All students must submit all original application materials directly to Old Dominion University's Graduate Admissions Office. Students requesting funding (Graduate Assistantship) must submit the Application for Graduate Financial Assistance to the Program Director.

Curriculum Requirements

The Ph.D. in Criminology & Criminal Justice requires a minimum of 48 credit hours at the post-master's level (i.e., courses at the 700 to 800 level) as detailed below. Students must maintain a cumulative GPA of at least 3.25. In addition, each of the core courses must be completed with a grade of B or better. The core courses may be taken a maximum of two times. Students who receive two grades of B- or below in any course, or whose grade point average falls below a 3.25 will be dismissed from the program.

Coursework

Core Courses

CRIM 800	Proseminar in Criminology and Criminal Justice	3
CRIM 801	Criminology and Public Policy	3
CRIM 802	Advanced Criminological Theory	3
CRIM 803	Inequality, Crime and Justice	3
CRIM 890	Professional Development and Dissertation Seminar	3

Research Skills

CRIM 805	Multivariate Statistics in Criminological Research	3
CRIM 810	Qualitative Methods in Criminology and Criminal Justice	3
CRIM 815	Advanced Quantitative Techniques in Criminology & Criminal Justice	3
CRIM 820	Advanced Research Methods in Criminology & Criminal Justice	3

Electives

Elective Hours	12

Dissertation Credits

CRIM 899	Dissertation	9

Total Credit Hours	48

Additional Requirements

Comprehensive Examinations

The comprehensive exam assesses a student's expertise of the literature in criminology and criminal justice (in terms of both breadth and depth) in theory, research methods and statistics, inequality and policy as applied to questions of criminological interest; and her/his ability to think broadly and critically and to present her/himself as a sophisticated intellectual thinker. Preparation for the comprehensive exam gives students the opportunity to organize their knowledge of the field as gained from coursework, their own independent readings, teachings, and research.

The written comprehensive exam is taken by students following completion of all coursework except the dissertation seminar; students may petition the Ph.D. Committee to take the exam prior to the completion of all coursework. The written exam will be in a take-home format distributed during August. Details about the structure of the exam will be announced to students by the end of the spring semester before the exam. Student names will be removed from the exams for grading. No more than three faculty members will grade each section of the exam as "pass" or "fail" and more than one negative vote from the exam committee will result in a failure of the section. Students may pass or fail the exam in whole or in part. Students need to retake only those sections that are failed. Students who fail any section of the exam may register for fall classes but must retake the failed section in accordance with the directions stipulated by the comprehensive exam committee, generally in late November/early December of that same year. Students who do not successfully pass the written comprehensive exam following the retake will be dismissed from the program; they may complete the classes they are enrolled in that semester for credit if they wish. Students may not defend a dissertation proposal until they have passed the written comprehensive exam.

Admission to Candidacy

Students are admitted to candidacy for the degree once the following criteria are satisfied:

- They have completed all Ph.D. coursework (excepting dissertation hours) with a GPA of at least 3.25;
- They have successfully passed the comprehensive examinations;
- They have successfully defended a dissertation prospectus.

The Dissertation

The dissertation is a scholarly work investigating a problem of significance and should constitute a meaningful contribution to the body of existing knowledge regarding matters of criminology and criminal justice policy or practice. It is the culmination of a program of advanced study leading to a doctoral degree and, as such, is expected to demonstrate a high level of scholarly competence. It must show that the candidate is capable of conceptualizing and conducting sophisticated original research, as well as analysis and reporting on an approved topic related to crime and justice by use of accepted scientific methods. Complete information about the dissertation is found on the program's website.

For more information relating to this program and its requirements, please visit <http://www.odu.edu/sociology/academics/graduate/doctoral> (<http://www.odu.edu/sociology/academics/graduate/doctoral/>)

Department of Women's and Gender Studies

Dr. Elizabeth Groeneveld, Chair
Department of Women's and Gender Studies
3041 Batten Arts and Letters
(757) 683-3823
wgs@odu.edu

Women's and Gender Studies is a multi and interdisciplinary field of study that examines gender in historical and contemporary contexts with an emphasis on women's perspectives. We value the complex intersections of gender, race, class, sexuality, ability, nation, and other identities. We are committed to a social justice-based approach and seek to bridge academic and community work. Contact the Department of Women's and Gender Studies to speak with the Graduate Certificate Director.

Women's Studies Certificate

Jennifer N. Fish, Ph.D., Graduate Certificate Director
jfish@odu.edu
Department of Women's and Gender Studies
3041 Batten Arts and Letters
(757) 683-3823

Women's and Gender Studies is a multi- and interdisciplinary field of study that examines gender in historical and contemporary contexts with an emphasis on women's lives and perspectives. The department values the complex intersections of gender, race, class, sexuality, ability, nation, and other identities. We are committed to a social justice-based approach and seek to bridge academic and community work.

Students who want to pursue only the Graduate Certificate in Women's Studies, must hold either a B.A. or B.S. degree with an overall GPA of 2.80 OR a graduate degree.

Those admitted to a graduate program have the option of earning a Graduate Certificate in Women's Studies in conjunction with a graduate degree from another department or college. Students must satisfy all admission

requirements for their chosen graduate program before enrolling in the courses required for the Graduate Certificate in Women's Studies. Please consult the Director of the Women's Studies Graduate Certificate and the relevant sections of the Catalog for additional information.

Students pursuing the Certificate in combination with another graduate degree will be advised by both a Women's and Gender Studies faculty member and an advisor from their graduate program.

The Certificate will be awarded upon completion of the required program of courses.

Curriculum Requirements

Students must maintain a 3.00 GPA in the 15 credit hours required for the Certificate.

Required Courses

WGS 560	Feminist and Queer Theory	3
WGS 570	Feminist Research Methods	3
Additional Courses */**		9
Total Credit Hours		15

- *

Additional courses must be approved for the Women's and Gender Studies curriculum. In addition to Women's and Gender Studies (WGS-listed) courses, students may draw from various disciplines (e.g., Art History, English, History, Humanities, International Studies, Philosophy, Political Science & Geography, Sociology & Criminal Justice). At least one of the courses must be at or above the 600 level. With the exception of Women's and Gender Studies courses, students may not take more than six credit hours in any single field.
- **

Students planning to teach Women's and Gender Studies courses at the post-secondary level in Virginia must complete an additional three credit hours, for a total of 18 credit hours, in order to meet accreditation requirements.

Strome College of Business

Kiran Karande, Associate Dean for Faculty Affairs and Research
Martin Goossen, Interim Associate Dean for Graduate Programs

Overview

Old Dominion University's Strome College of Business has as its principal objective the preparation of problem-solving specialists who will enter the challenging world of business or public administration. All programs in the college are designed to promote the following: professional competence; facility in the communication arts; analytical skills; leadership abilities; an understanding of social, political, and economic forces; and, a strong sense of business ethics and public purpose. This foundation enables graduates of these programs to advance in a broad range of careers in the public and private sectors.

The Strome College of Business is one of approximately 469 schools in the world to have achieved accreditation for business programs on the graduate and undergraduate levels by the Association to Advance Collegiate Schools of Business - International (AACSB). The Master of Science in Accounting program has received its own accreditation through the same agency. The Master of Public Administration program is one of approximately 164 graduate programs certified as meeting the standards of the National Association of Schools of Public Affairs and Administration (NASPAA).

The college offers master's degrees in accounting, business administration, economics, and public administration. The college also offers a Ph.D. program in business administration and a Ph.D. program in public administration and urban policy.

Also housed within the college is the Department of Military Science and Leadership. The mission of this department is to provide professional instruction and leadership development for selected students who desire to serve in the active or reserve components of the U.S. Army. Additional information about this program may be obtained through the Military Science and Leadership Department.

Graduate courses are taught in person during day and evening, and online to facilitate flexible combinations of formal learning and full- or part-time employment. Students come from a variety of backgrounds with undergraduate degrees from many different colleges and universities.

All graduate students are advised to check specific program requirements before enrolling in 400/500 level courses. Nondegree graduate students must satisfy the admission index for graduate study or receive special permission from the graduate program director in the Strome College of Business in order to enroll for graduate credit.

Mission and Vision Statements

The mission of the Strome College of Business is The Business of Problem Solving. Our vision is to be the preeminent source for problem solving in business, government, and non-profit organizations.

Centers and Institutes

Dragas Center for Economic Analysis and Policy

Robert McNab, Director

The primary objectives of the center are to conduct research and develop a knowledge base relating to regional issues concerning Hampton Roads. In addition, via its annual *State of the Region* report, the center provides a forum for analysis and discussions of vital issues relating to the region and its cities.

Loyalty Science Lab

Yuping Liu-Thompkins, Director

The Loyalty Science Lab at the Strome College of Business its mission is to create and promote cutting-edge scientific research on brand and customer loyalty. Through collaborative efforts between marketing practitioners and academic researchers from multiple disciplines and multiple industries, the Loyalty Science Lab identifies high-priority loyalty-related issues, engages in deep, evidence-based scientific research on these issues, and disseminates the insight to benefit loyalty research and practice. The Lab aims to become the go-to place for the best insights into brand and customer loyalty.

E. V. Williams Center for Real Estate

Simon Stevenson, Director

The mission of the E.V. Williams Center for Real Estate is to connect the multi-disciplinary analyses, innovative curriculum and research underway at Old Dominion University with students, industry and the public sector interested and engaged in the real estate and economic development communities. By hosting topical seminars on key development issues and

working closely with real estate and economic development professionals, the E.V. Williams Center builds relationships throughout the community, to facilitate research, growth and development. The E.V. Williams Center publishes annual real estate market reviews on the office, industrial, retail, single family and multi-family real estate markets and sponsors the Hampton Roads Real Estate Market Review and Forecast.

Insurance & Financial Services Center

Michael McShane, Director

The Insurance and Financial Services Center supports undergraduate and graduate curricula in the disciplines of professional financial planning and risk and insurance. In addition, it provides for active involvement with the Eastern Virginia financial services community as a placement, research, consultative, and resource agency. The center further supports educational programs and seminars for the profession including a professional development program for practitioners that leads to the designation of Professional Financial Planner (PFP).

Lumsden Trading Room & Research Lab

Andrew Cohen, Lab Manager

The students who take advantage of the resources in the Gregory A. Lumsden Trading Room and Research Lab will have an appealing skill to put on their resume. They can even use the lab to earn a Bloomberg Essentials Certificate or prepare for and take the Bloomberg Aptitude Test.

Thurmond Negotiations Lab

Contact: Aaron Arndt

The Thurmond Negotiations Lab was created from the generous donation of Dick Thurmond. A core mission of the Thurmond Negotiations Lab is to provide access to negotiation skills education in underserved Hampton Roads communities. His vision is to empower women through negotiations and we have made his vision central to our core mission.

Hudgins Transitional Entrepreneurship Lab

Contacts: Anil Nair, Jay O'Toole, Robert Pidduck

The Hudgins Transitional Entrepreneurship Lab is a research-driven academic lab that specializes in both advancing understanding of, and practically helping, local people to utilize entrepreneurship as a vehicle for specifically enhancing the sustainable prospects of underserved communities.

Strome Entrepreneurial Center

Contact: Sarah Jane Kirkland

The Strome Entrepreneurial Center helps guide University students, from any discipline, through the entrepreneurial process from nurturing ideas through the first stages of operation.

Jensen Communications Lab

The lab, made possible through a gift from George '70 and Linda '72 Jensen, provides an immersive, technology-rich laboratory and classroom setting for students to learn and develop tools to empower them in the workplace. This lab contains the latest communication technology so that students, no matter their field of business, can be successful.

Master of Business Administration Business Administration (MBA)

Overview

Erika Marsillac, Program Director
Shanna Wood, Associate Program Director
Everett Judd, Recruitment and Engagement Coordinator

The Master of Business Administration (MBA) program at Old Dominion University is designed to present broad but thorough insights into the issues relevant for effective business management. The curriculum incorporates contemporary business topics yet stresses the core competencies every business professional must possess. Throughout the program, students develop the skills needed to be successful participants in a rapidly evolving, and increasingly global, business environment.

The Old Dominion University (ODU) MBA is offered on campus and online.

The program is accredited by AACSB – International.

Admission

The Strome College of Business's MBA program welcomes applicants who have earned bachelor's degrees from regionally accredited institutions. Admission to the program is competitive and is granted only to those who show high ability and likelihood of success in graduate business education.

Criteria used for admission include the candidate's undergraduate coursework GPA, graduate coursework GPA (if available), relevant work experience (if available), scores on GMAT or GRE tests (if available), career statement, and two letters of recommendation.

To apply, submit the following to the Graduate (for domestic applicants) or International (for Visa bearing applicants) Admissions Office:

- Official transcripts of previous college work (required). Initially, unofficial transcripts can be used but official transcripts are required after admission.
- Two letters of recommendation (required).
- Career statement (required). This statement should outline career goals and how the MBA helps toward achieving it.
- Evidence of English language skills (for non-native English speakers).
- Overview of prior work experience (optional).
- Test scores for GRE or GMAT test (optional).

For further information and questions concerning applications, contact:

ODU MBA Admissions

Curriculum

MBA Electives and Concentrations

The MBA Program is no longer offering this concentration and does not require electives.

Foundations

The ODU MBA program is designed with both business and non-business undergraduates in mind. All students are required to meet the program's foundational course requirements to demonstrate mastery of the fundamental business concepts related to economics, accounting, probability and statistics, spreadsheet modeling, and management in organizations.

Sequence of Course Offerings

Students are strongly encouraged to follow one of the plans outlined on the program website for the most effective learning plan that meets an individual's schedule requirements. These plans are designed to both accommodate typical student program time-to-completion needs and ensure a successful path through the coursework to program completion.

If a student is unable to follow one of the prescribed degree completion plans, that student needs to contact the MBA Program Office to request an alternative path to degree completion.

Additional Requirements

Prior Learning, Internship and Independent Study

Students may apply a maximum of 6 credit hours earned through any combination of prior learning, internship, or independent study (only 3 credit hours are allowed from any category).

- Prior learning offers students the opportunity to translate their professional work knowledge into academic credit. 1-3 credits allowed.
- Internship opportunities offer on-the-job experiences to well-qualified students and are limited to those who have already made significant progress toward the completion of their MBA degree. 1-3 credits allowed.
- Independent study courses afford students the opportunity to work with a graduate-certified SCB faculty member on a topic of mutual interest, and must be arranged in advance. Faculty are not obligated to accept a student's petition for independent study. Independent study is reserved for students whose academic accomplishment is meritorious and whose potential for successful independent study is deemed sufficiently high. 1-3 credits allowed.

Transfer Credit

A maximum of 12 credit hours may be transferred from another AACSB-I program, other ODU graduate courses outside of the Strome College of Business, and / or prior learning coursework (including 6 credit hours earned

through prior learning, internship, or independent study as noted above) and applied toward the MBA course requirements.

Transfer credit is approved at the discretion of the MBA Program Office in consultation with the corresponding department faculty in the major field of study of the coursework to be reviewed.

Continuance Policy

The MBA Program follows the University's Graduate Continuance Policy.

Non-Degree Seeking Students

Old Dominion University permits non-degree seeking students to take up to 12 credit hours (refer to the catalog section on Non-Degree Seeking Applicants). In the MBA program, a distinction is made between those who can present competitive GMAT/GRE scores or GPA and those who cannot. The MBA Program requires an evaluation of GMAT/GRE scores or GPA to qualify for enrollment in Core Courses as a non-degree seeker. Unofficial copies of all transcripts can be used for this purpose. Details are outlined on the MBA website.

Linked MBA Program

A linked MBA program is available for exceptional undergraduate students currently pursuing a degree at Old Dominion University. Students may begin taking courses toward the MBA degree while still completing their undergraduate degrees. For specific information, please contact the MBA Program Office (mbainfo@odu.edu).

Doctor of Philosophy

Business Administration with a Concentration in Finance (PhD)

Harris Wu, Graduate Program Director
Katrina Davenport, Graduate Program Manager

The Doctor of Philosophy degree in business administration (Ph.D.) is a scholarly, research-based program with a professional orientation. The objective of the program is to prepare individuals of superior promise and potential for careers in higher education as faculty members engaged in teaching and research and for high level administrative and research careers in the private and public sectors. Persons completing the degree program must have demonstrated an in-depth knowledge of international business, research methods, and high potential for making significant contributions to their field of specialization in business.

The Ph.D. degree requires competence in basic disciplines of international business, research tools, and in one of the following concentrations: finance, information technology, marketing, or strategic management.

Admission Requirements

Work for the doctoral degree is usually preceded by the successful completion of a Master's degree in a business-related field (i.e., MBA) from a recognized AACSB-accredited college or university. The applicant must submit an application, official transcripts of all college or university-level work, provide Graduate Management Admission Test scores taken within the last five years, and provide three letters of recommendation, two from academic references, which attest to the individual's academic potential and ability for achievement. The applicant must also submit a personal statement of goals, approximately two to three pages, on how the completion of the doctoral program will assist in achieving personal and professional career goals.

The completed application materials will be reviewed by the graduate program director and faculty in the major area of study. They will evaluate the individual's abilities and motivation to succeed in the doctoral program. A personal interview may be required before the admission decision can be reached. A recommendation is made by the faculty and a final decision on admission is made by the graduate program director.

Curriculum Requirements

The following are the minimum requirements for the Ph.D. degree and must be considered in preparing the student’s plan of study:

1. Satisfactory completion of at least 48 semester hours of course work . (At least 48 hours of post-master’s course work (including dissertation) is a University requirement);
2. Demonstrated competency in the following areas: international business, research methods and techniques, and the chosen functional field of business. Passage of a comprehensive examination covering international coursework is required. A student may retake the International Business comprehensive examination only one time;
3. Acceptable performance on a written and oral candidacy examination in the major field of study. A student may retake the candidacy examinations only one time;
4. Completion of a dissertation representing the candidate’s ability to conduct scholarly, original research. The quality of this research should be such that it would be worthy of publication in a refereed, scholarly journal; and,
5. Successful oral defense of the dissertation.

Total Credit Hours		54

International Business Comprehensive Examination to be taken in May after the completion of coursework in the second year of the program.

Field Comprehensive Examination to be taken in August after the completion of coursework in the second year of the program.

Additional Requirements

Retention Standards

To remain in good standing after admission to the program, students must maintain a minimum, cumulative grade point average of 3.20 in all graduate course work completed at the University. Students who fall below this minimum standard will have nine credit hours to remedy this deficiency. Further, students may earn no more than three credit hours with the grade of C. Any student receiving a grade lower than C in a graduate course work will be dismissed from the program.

Time Limitation and Residency

The Ph.D. program assumes that a well qualified and highly motivated student can complete all degree requirements in four years of full-time work. If a student is unable to pursue the degree on a full-time basis, or if the major field is different from previous academic training, more time to complete the degree is usually required. The maximum time allowed to complete all degree requirements is eight calendar years from the date of initial enrollment in the program.

Each student is required to complete at least four regular semesters in full-time residency. These need not be consecutive. Full-time residency is defined as a minimum of nine credit hours per semester.

Transfer Credit

A maximum of 12 semester-hour credits (or equivalent) may be transferred from another university (including six hours earned through experiential learning credit options) and applied toward the Ph.D. course requirements. Transfer credit is approved at the discretion of the program director in consultation with the faculty in the student’s major field of study.

Candidacy Examination

The examination qualifying the doctoral student for candidacy for the Ph.D. in business administration is comprehensive in nature and designed to test the student’s knowledge of subject matter in the major field, international business, and the ability to engage in independent research. These examinations are given in two parts:

1. international business and
2. field of study.

The International Business Exam is a written exam scheduled for the third week of May and may be taken by a student in good standing after the student has completed BUSN 800, FIN 862, MGMT 821, and MKTG 826 . The candidacy examination in the field of study is scheduled at the beginning of fall semester classes. Students in good standing may take the Field of Study Examination after completing all courses in their field which are to be taken during the first two years of the program. See Curriculum. The Field examination contains both a written and oral component. The written portion is administered first. After successful completion of the written examination, the student sits for an oral examination, which includes topics discussed in the written examination and any additional materials that the advisory committee feels are appropriate. The student will be expected

to perform well on both the written and oral components of the examination. Rather than being merely pro forma, the oral examination is a serious and integral part of the qualifying procedure for candidacy. A student must pass both the written and oral sections. The candidacy examinations are prepared and evaluated by the examination committees composed of the graduate faculty who are primarily responsible for teaching doctoral courses in international business and the field of study. The results of all examinations are reported to the student and program director.

Dissertation

The dissertation represents the final stage in obtaining the doctoral degree and provides evidence of the student's ability to conduct independent scholarly research. To effectively initiate, conduct, and conclude the dissertation phase of the program, the candidate must:

1. form a dissertation committee;
2. develop and defend a dissertation proposal;
3. complete the dissertation research and report the results in writing; and
4. orally defend the dissertation.

Dissertation Committee

The dissertation committee is formed by the student with the approval of the program director. The committee's purpose is to supervise the selection of the dissertation topic, constructively critique the research methodology, and serve as a guidance body until its completion. The committee should have at least three members, one of whom is from outside the department of the major field of study. The chair of the committee will be from the candidate's major field and be an authority in the field of specialization chosen for the dissertation research. The proposal, dissertation, and the final oral defense of the dissertation must have the majority approval of the members of the dissertation committee and subsequent approval by the program director and dean of the college.

Dissertation Proposal Defense

A candidate will select a topic for dissertation research under the guidance of his/her committee. The candidate will defend a proposal for the dissertation demonstrating the originality of the research, requisite literature review, and the methodology that will be used in conducting the research. The committee will judge the merits of the proposal, making any suggestions and/or additions as deemed necessary, and approve the proposal in writing, providing copies to the program director.

Dissertation Research and Preparation

Progress on the dissertation should be reported on a periodic basis to the chair of the dissertation committee and the appropriate members. In most instances, research results, drafts of the manuscript, and guidance will be forthcoming between the committee and the candidate during the research phase. While preparing the dissertation, candidates must be continuously enrolled for a minimum of one credit hour per semester. The total number of credit hours for the dissertation shall be no less than 18 and no more than 24 credit hours. Advice or assistance from committee members should not be expected unless the candidate is officially enrolled. General regulations and procedures governing the submission of the doctoral dissertation are provided in the University Guide for Preparation of Theses and Dissertations available from the Office of the University Registrar.

Oral Dissertation Defense

The objective of the oral defense of the dissertation is to explore with the candidate the methodological and substantive contributions of the dissertation. Through this process, the examiners and the candidate reach a common understanding of the research area and can mutually agree upon its merits for publication. Majority approval by the examiners constitutes successful completion of the defense of the dissertation. The Doctor of Philosophy in business administration will be awarded upon successful completion of this examination and all other program requirements within the eight-year time limit.

Doctor of Philosophy Business Administration with a Concentration in Information Technology/Supply Chain Management (PhD)

Harris Wu, Graduate Program Director

Katrina Davenport, Graduate Program Manager

The Doctor of Philosophy degree in business administration (Ph.D.) is a scholarly, research-based program with a professional orientation. The objective of the program is to prepare individuals of superior promise and potential for careers in higher education as faculty members engaged in teaching and research and for high level administrative and research careers in the private and public sectors. Persons completing the degree program must have demonstrated an in-depth knowledge of international business, research methods, and high potential for making significant contributions to their field of specialization in business.

The Ph.D. degree requires competence in basic disciplines of international business, research tools, and in one of the following concentrations: finance, information technology, marketing, or strategic management.

Admission Requirements

Work for the doctoral degree is usually preceded by the successful completion of a Master's degree in a business related field (i.e., MBA) from a recognized AACSB-accredited college or university. The applicant must submit an application, official transcripts of all college or university-level work, provide scores on the Graduate Management Admission Test taken within the last five years, and provide three letters of recommendation, two from academic references, which attest to the individual's academic potential and ability for achievement. The applicant must also submit a personal statement of goals, approximately two to three pages, on how the completion of the doctoral program will assist in achieving personal and professional career goals.

The completed application materials will be reviewed by the graduate program director and faculty in the major area of study. They will evaluate the individual's abilities and motivation to succeed in the doctoral program. A personal interview may be required before the admission decision can be reached. A recommendation is made by the faculty and a final decision on admission is made by the graduate program director.

Curriculum Requirements

The following are the minimum requirements for the Ph.D. degree and must be considered in preparing the student's plan of study:

1. Satisfactory completion of at least 48 semester hours of course work . (At least 48 hours of post-master's course work (including dissertation) is a University requirement);
2. Demonstrated competency in the following areas: international business, research methods and techniques, and the chosen functional field of business. Passage of a comprehensive examination covering international coursework is required. A student may retake the International Business comprehensive examination only one time;
3. Acceptable performance on a written and oral candidacy examination in the major field of study. A student may retake the candidacy examinations only one time;
4. Completion of a dissertation representing the candidate's ability to conduct scholarly, original research. The quality of this research should be such that it would be worthy of publication in a refereed, scholarly journal; and,
5. Successful oral defense of the dissertation.

Additional Requirements

Retention Standards

To remain in good standing after admission to the program, students must maintain a minimum, cumulative grade point average of 3.20 in all graduate course work completed at the University. Students who fall below this minimum standard will have nine credit hours to remedy this deficiency. Further, students may earn no more than three credit hours with the grade of C. Any student receiving a grade lower than C in a graduate course work will be dismissed from the program.

Time Limitation and Residency

The Ph.D. program assumes that a well qualified and highly motivated student can complete all degree requirements in four years of full-time work. If a student is unable to pursue the degree on a full-time basis, or if the major field is different from previous academic training, more time to complete the degree is usually required. The maximum time allowed to complete all degree requirements is eight calendar years from the date of initial enrollment in the program.

Each student is required to complete at least four regular semesters in full-time residency. These need not be consecutive. Full-time residency is defined as a minimum of nine credit hours per semester.

Transfer Credit

A maximum of 12 semester-hour credits (or equivalent) may be transferred from another university (including six hours earned through experiential learning credit options) and applied toward the Ph.D. course requirements. Transfer credit is approved at the discretion of the program director in consultation with the faculty in the student's major field of study.

Candidacy Examination

The examination qualifying the doctoral student for candidacy for the Ph.D. in business administration is comprehensive in nature and designed to test the student's knowledge of subject matter in the major field, international business, and the ability to engage in independent research. These examinations are given in two parts:

1. international business and
2. field of study.

The International Business Exam is a written exam scheduled for the third week of May and may be taken by a student in good standing after the student has completed BUSN 800, FIN 862, MGMT 821, and MKTG 826. The candidacy examination in the field of study is scheduled at the beginning of fall semester classes. Students in good standing may take the Field of Study Examination after completing all courses in their field which are to be taken during the first two years of the program. See Curriculum. The Field examination contains both a written and oral component. The written portion is administered first. After successful completion of the written examination, the student sits for an oral examination, which includes topics discussed in the written examination and any additional materials that the advisory committee feels are appropriate. The student will be expected to perform well on both the written and oral components of the examination. Rather than being merely pro forma, the oral examination is a serious and integral part of the qualifying procedure for candidacy. A student must pass both the written and oral sections. The candidacy examinations are prepared and evaluated by the examination committees composed of the graduate faculty who are primarily responsible for teaching doctoral courses in international business and the field of study. The results of all examinations are reported to the student and program director.

Dissertation

The dissertation represents the final stage in obtaining the doctoral degree and provides evidence of the student's ability to conduct independent scholarly research. To effectively initiate, conduct, and conclude the dissertation phase of the program, the candidate must:

1. form a dissertation committee;
2. develop and defend a dissertation proposal;
3. complete the dissertation research and report the results in writing; and
4. orally defend the dissertation.

Dissertation Committee

The dissertation committee is formed by the student with the approval of the program director. The committee's purpose is to supervise the selection of the dissertation topic, constructively critique the research methodology, and serve as a guidance body until its completion. The committee should have at least three members, one of whom is from outside the department of the major field of study. The chair of the committee will be from the candidate's major field and be an authority in the field of specialization chosen for the dissertation research. The proposal, dissertation, and the final oral defense of the dissertation must have the majority approval of the members of the dissertation committee and subsequent approval by the program director and dean of the college.

Dissertation Proposal Defense

A candidate will select a topic for dissertation research under the guidance of his/her committee. The candidate will defend a proposal for the dissertation demonstrating the originality of the research, requisite literature review, and the methodology that will be used in conducting the research. The committee will judge the merits of the proposal, making any suggestions and/or additions as deemed necessary, and approve the proposal in writing, providing copies to the program director.

Dissertation Research and Preparation

Progress on the dissertation should be reported on a periodic basis to the chair of the dissertation committee and the appropriate members. In most instances, research results, drafts of the manuscript, and guidance will be forthcoming between the committee and the candidate during the research phase. While preparing the dissertation, candidates must be continuously enrolled for a minimum of one credit hour per semester. The total number of credit hours for the dissertation shall be no less than 18 and no more than 24 credit hours. Advice or assistance from committee members should not be expected unless the candidate is officially enrolled. General regulations and procedures governing the submission of the doctoral dissertation are provided in the University Guide for Preparation of Theses and Dissertations available from the Office of the University Registrar.

Oral Dissertation Defense

The objective of the oral defense of the dissertation is to explore with the candidate the methodological and substantive contributions of the dissertation. Through this process, the examiners and the candidate reach a common understanding of the research area and can mutually agree upon its merits for publication. Majority approval by the examiners constitutes successful completion of the defense of the dissertation. The Doctor of Philosophy in business administration will be awarded upon successful completion of this examination and all other program requirements within the eight-year time limit.

Doctor of Philosophy Business Administration with a Concentration in Marketing (PhD)

Harris Wu, Graduate Program Director
Katrina Davenport, Graduate Program Manager

The Doctor of Philosophy degree in business administration (Ph.D.) is a scholarly, research-based program with a professional orientation. The objective of the program is to prepare individuals of superior promise and potential for careers in higher education as faculty members engaged in teaching and research and for high level administrative and research careers in the private and public sectors. Persons completing the degree program must have demonstrated an in-depth knowledge of international business,

research methods, and high potential for making significant contributions to their field of specialization in business.

The Ph.D. degree requires competence in basic disciplines of international business, research tools, and in one of the following concentrations: finance, information technology, marketing, or strategic management.

Admission Requirements

Work for the doctoral degree is usually preceded by the successful completion of a Master's degree in a business related field (i.e., MBA) from a recognized AACSB-accredited college or university. The applicant must submit an application, official transcripts of all college or university-level work, provide scores on the Graduate Management Admission Test taken within the last five years, and provide three letters of recommendation, two from academic references, which attest to the individual's academic potential and ability for achievement. The applicant must also submit a personal statement of goals, approximately two to three pages, on how the completion of the doctoral program will assist in achieving personal and professional career goals.

The completed application materials will be reviewed by the graduate program director and faculty in the major area of study. They will evaluate the individual's abilities and motivation to succeed in the doctoral program. A personal interview may be required before the admission decision can be reached. A recommendation is made by the faculty and a final decision on admission is made by the graduate program director.

Curriculum Requirements

The following are the minimum requirements for the Ph.D. degree and must be considered in preparing the student's plan of study:

1. Satisfactory completion of at least 48 semester hours of course work . (At least 48 hours of post-master's course work (including dissertation) is a University requirement);
2. Demonstrated competency in the following areas: international business, research methods and techniques, and the chosen functional field of business. Passage of a comprehensive examination covering international coursework is required. A student may retake the International Business comprehensive examination only one time;
3. Acceptable performance on a written and oral candidacy examination in the major field of study. A student may retake the candidacy examinations only one time;
4. Completion of a dissertation representing the candidate's ability to conduct scholarly, original research. The quality of this research should be such that it would be worthy of publication in a refereed, scholarly journal; and,
5. Successful oral defense of the dissertation.

Total Credit Hours		54

International Business Comprehensive Examination to be taken in May after the completion of coursework in the second year of the program.

Field Comprehensive Examination to be taken in August after the completion of coursework in the second year of the program.

Additional Requirements

Retention Standards

To remain in good standing after admission to the program, students must maintain a minimum, cumulative grade point average of 3.20 in all graduate course work completed at the University. Students who fall below this minimum standard will have nine credit hours to remedy this deficiency. Further, students may earn no more than three credit hours with the grade of C. Any student receiving a grade lower than C in a graduate course work will be dismissed from the program.

Time Limitation and Residency

The Ph.D. program assumes that a well qualified and highly motivated student can complete all degree requirements in four years of full-time work. If a student is unable to pursue the degree on a full-time basis, or if the major field is different from previous academic training, more time to complete the degree is usually required. The maximum time allowed to complete all degree requirements is eight calendar years from the date of initial enrollment in the program.

Each student is required to complete at least four regular semesters in full-time residency. These need not be consecutive. Full-time residency is defined as a minimum of nine credit hours per semester.

Transfer Credit

A maximum of 12 semester-hour credits (or equivalent) may be transferred from another university (including six hours earned through experiential learning credit options) and applied toward the Ph.D. course requirements. Transfer credit is approved at the discretion of the program director in consultation with the faculty in the student's major field of study.

Candidacy Examination

The examination qualifying the doctoral student for candidacy for the Ph.D. in business administration is comprehensive in nature and designed to test the student's knowledge of subject matter in the major field, international business, and the ability to engage in independent research. These examinations are given in two parts:

1. international business and
2. field of study.

The International Business Exam is a written exam scheduled for the third week of May and may be taken by a student in good standing after the student has completed BUSN 800, FIN 862, MGMT 821, and MKTG 826. The candidacy examination in the field of study is scheduled at the beginning of fall semester classes. Students in good standing may take the Field of Study Examination after completing all courses in their field which are to be taken during the first two years of the program. See Curriculum. The Field examination contains both a written and oral component. The written portion is administered first. After successful completion of the written examination, the student sits for an oral examination, which includes topics discussed in the written examination and any additional materials that the advisory committee feels are appropriate. The student will be expected to perform well on both the written and oral components of the examination. Rather than being merely pro forma, the oral examination is a serious and integral part of the qualifying procedure for candidacy. A student must pass both the written and oral sections. The candidacy examinations are prepared and evaluated by the examination committees composed of the graduate faculty who are primarily responsible for teaching doctoral courses in international business and the field of study. The results of all examinations are reported to the student and program director.

Dissertation

The dissertation represents the final stage in obtaining the doctoral degree and provides evidence of the student's ability to conduct independent scholarly research. To effectively initiate, conduct, and conclude the dissertation phase of the program, the candidate must:

1. form a dissertation committee;
2. develop and defend a dissertation proposal;
3. complete the dissertation research and report the results in writing; and
4. orally defend the dissertation.

Dissertation Committee

The dissertation committee is formed by the student with the approval of the program director. The committee's purpose is to supervise the selection of the dissertation topic, constructively critique the research methodology, and serve as a guidance body until its completion. The committee should have at least three members, one of whom is from outside the department of the major field of study. The chair of the committee will be from the candidate's major field and be an authority in the field of specialization chosen for the dissertation research. The proposal, dissertation, and the final oral defense of the dissertation must have the majority approval of the members of the dissertation committee and subsequent approval by the program director and dean of the college.

Dissertation Proposal Defense

A candidate will select a topic for dissertation research under the guidance of his/her committee. The candidate will defend a proposal for the dissertation demonstrating the originality of the research, requisite literature review,

and the methodology that will be used in conducting the research. The committee will judge the merits of the proposal, making any suggestions and/or additions as deemed necessary, and approve the proposal in writing, providing copies to the program director.

Dissertation Research and Preparation

Progress on the dissertation should be reported on a periodic basis to the chair of the dissertation committee and the appropriate members. In most instances, research results, drafts of the manuscript, and guidance will be forthcoming between the committee and the candidate during the research phase. While preparing the dissertation, candidates must be continuously enrolled for a minimum of one credit hour per semester. The total number of credit hours for the dissertation shall be no less than 18 and no more than 24 credit hours. Advice or assistance from committee members should not be expected unless the candidate is officially enrolled. General regulations and procedures governing the submission of the doctoral dissertation are provided in the University Guide for Preparation of Theses and Dissertations available from the Office of the University Registrar.

Oral Dissertation Defense

The objective of the oral defense of the dissertation is to explore with the candidate the methodological and substantive contributions of the dissertation. Through this process, the examiners and the candidate reach a common understanding of the research area and can mutually agree upon its merits for publication. Majority approval by the examiners constitutes successful completion of the defense of the dissertation. The Doctor of Philosophy in business administration will be awarded upon successful completion of this examination and all other program requirements within the eight-year time limit.

Doctor of Philosophy Business Administration with a Concentration in Strategic Management (PhD)

Harris Wu, Graduate Program Director
Katrina Davenport, Graduate Program Manager

The Doctor of Philosophy degree in business administration (Ph.D.) is a scholarly, research-based program with a professional orientation. The objective of the program is to prepare individuals of superior promise and potential for careers in higher education as faculty members engaged in teaching and research and for high level administrative and research careers in the private and public sectors. Persons completing the degree program must have demonstrated an in-depth knowledge of international business, research methods, and high potential for making significant contributions to their field of specialization in business.

The Ph.D. degree requires competence in basic disciplines of international business, research tools, and in one of the following concentrations: finance, information technology, marketing, or strategic management.

Admission Requirements

Work for the doctoral degree is usually preceded by the successful completion of a Master's degree in a business-related field (i.e., MBA) from a recognized AACSB-accredited college or university. The applicant must submit an application, official transcripts of all college or university-level work, provide Graduate Management Admission Test scores taken within the last five years, and provide three letters of recommendation, two from academic references, which attest to the individual's academic potential and ability for achievement. The applicant must also submit a personal statement of goals, approximately two to three pages, on how the completion of the doctoral program will assist in achieving personal and professional career goals.

The completed application materials will be reviewed by the graduate program director and faculty in the major area of study. They will evaluate the individual's abilities and motivation to succeed in the doctoral program. A personal interview may be required before the admission decision can be

reached. A recommendation is made by the faculty and a final decision on admission is made by the graduate program director.

Curriculum Requirements

The following are the minimum requirements for the Ph.D. degree and must be considered in preparing the student's plan of study:

1. Satisfactory completion of at least 48 semester hours of course work . (At least 48 hours of post-master's course work (including dissertation) is a University requirement);
2. Demonstrated competency in the following areas: international business, research methods and techniques, and the chosen functional field of business. Passage of a comprehensive examination covering international coursework is required. A student may retake the International Business comprehensive examination only one time;
3. Acceptable performance on a written and oral candidacy examination in the major field of study. A student may retake the candidacy examinations only one time;
4. Completion of a dissertation representing the candidate's ability to conduct scholarly, original research. The quality of this research should be such that it would be worthy of publication in a refereed, scholarly journal; and,
5. Successful oral defense of the dissertation.

International Business Comprehensive Examination to be taken in May after the completion of coursework in the second year of the program.

Field Comprehensive Examination to be taken in August after the completion of coursework in the second year of the program.

Additional Requirements

Retention Standards

To remain in good standing after admission to the program, students must maintain a minimum, cumulative grade point average of 3.20 in all graduate course work completed at the University. Students who fall below this minimum standard will have nine credit hours to remedy this deficiency. Further, students may earn no more than three credit hours with the grade of C. Any student receiving a grade lower than C in a graduate course work will be dismissed from the program.

Time Limitation and Residency

The Ph.D. program assumes that a well qualified and highly motivated student can complete all degree requirements in four years of full-time work. If a student is unable to pursue the degree on a full-time basis, or if the major field is different from previous academic training, more time to complete the degree is usually required. The maximum time allowed to complete all degree requirements is eight calendar years from the date of initial enrollment in the program.

Each student is required to complete at least four regular semesters in full-time residency. These need not be consecutive. Full-time residency is defined as a minimum of nine credit hours per semester.

Transfer Credit

A maximum of 12 semester-hour credits (or equivalent) may be transferred from another university (including six hours earned through experiential learning credit options) and applied toward the Ph.D. course requirements. Transfer credit is approved at the discretion of the program director in consultation with the faculty in the student's major field of study.

Candidacy Examination

The examination qualifying the doctoral student for candidacy for the Ph.D. in business administration is comprehensive in nature and designed to test the student's knowledge of subject matter in the major field, international business, and the ability to engage in independent research. These examinations are given in two parts:

1. international business and
2. field of study.

The International Business Exam is a written exam scheduled for the third week of May and may be taken by a student in good standing after the student has completed BUSN 800, FIN 862, MGMT 821, and MKTG 826. The candidacy examination in the field of study is scheduled at the beginning of fall semester classes. Students in good standing may take the Field of Study Examination after completing all courses in their field which are to be taken during the first two years of the program. See Curriculum. The Field examination contains both a written and oral component. The

written portion is administered first. After successful completion of the written examination, the student sits for an oral examination, which includes topics discussed in the written examination and any additional materials that the advisory committee feels are appropriate. The student will be expected to perform well on both the written and oral components of the examination. Rather than being merely pro forma, the oral examination is a serious and integral part of the qualifying procedure for candidacy. A student must pass both the written and oral sections. The candidacy examinations are prepared and evaluated by the examination committees composed of the graduate faculty who are primarily responsible for teaching doctoral courses in international business and the field of study. The results of all examinations are reported to the student and program director.

Dissertation

The dissertation represents the final stage in obtaining the doctoral degree and provides evidence of the student's ability to conduct independent scholarly research. To effectively initiate, conduct, and conclude the dissertation phase of the program, the candidate must:

1. form a dissertation committee;
2. develop and defend a dissertation proposal;
3. complete the dissertation research and report the results in writing; and
4. orally defend the dissertation.

Dissertation Committee

The dissertation committee is formed by the student with the approval of the program director. The committee's purpose is to supervise the selection of the dissertation topic, constructively critique the research methodology, and serve as a guidance body until its completion. The committee should have at least three members, one of whom is from outside the department of the major field of study. The chair of the committee will be from the candidate's major field and be an authority in the field of specialization chosen for the dissertation research. The proposal, dissertation, and the final oral defense of the dissertation must have the majority approval of the members of the dissertation committee and subsequent approval by the program director and dean of the college.

Dissertation Proposal Defense

A candidate will select a topic for dissertation research under the guidance of his/her committee. The candidate will defend a proposal for the dissertation demonstrating the originality of the research, requisite literature review, and the methodology that will be used in conducting the research. The committee will judge the merits of the proposal, making any suggestions and/or additions as deemed necessary, and approve the proposal in writing, providing copies to the program director.

Dissertation Research and Preparation

Progress on the dissertation should be reported on a periodic basis to the chair of the dissertation committee and the appropriate members. In most instances, research results, drafts of the manuscript, and guidance will be forthcoming between the committee and the candidate during the research phase. While preparing the dissertation, candidates must be continuously enrolled for a minimum of one credit hour per semester. The total number of credit hours for the dissertation shall be no less than 18 and no more than 24 credit hours. Advice or assistance from committee members should not be expected unless the candidate is officially enrolled. General regulations and procedures governing the submission of the doctoral dissertation are provided in the University Guide for Preparation of Theses and Dissertations available from the Office of the University Registrar.

Oral Dissertation Defense

The objective of the oral defense of the dissertation is to explore with the candidate the methodological and substantive contributions of the dissertation. Through this process, the examiners and the candidate reach a common understanding of the research area and can mutually agree upon its merits for publication. Majority approval by the examiners constitutes successful completion of the defense of the dissertation. The Doctor of Philosophy in business administration will be awarded upon successful

completion of this examination and all other program requirements within the eight-year time limit.

School of Accountancy

2155 Constant Hall
(757) 683-3177

Hong (Kim) Duong, Ph.D., Chair

Master of Science, Accounting

Frank Holman, Graduate Program Director

Accounting services are becoming both broader and more specialized. The major changes that have occurred in the accounting profession dictate expanded and updated educational programs. An ideal model for a professional accounting education embodies a Master of Science (MS) in Accounting program that augments a broad undergraduate education. The MS in Accounting program at Old Dominion University is designed to accommodate both full-time and part-time students with courses offered in the evenings.

Programs

Master of Science Program

- Accounting with a Concentration in Financial Management (MS) (p. 113)
- Accounting with a Concentration in Taxation (MS) (p. 114)

Linked BSBA/MS in Accounting

Undergraduate students pursuing a BSBA in accounting at Old Dominion University may complete up to nine hours toward a Master of Science, Accounting (MS) degree by choosing from ACCT 623, ACCT 626, ACCT 627, ACCT 630, and ACCT 662 while enrolled as an undergraduate BSBA student. Students in the linked BSBA/MS program must earn a minimum of 150 credit hours (120 discrete credit hours for the undergraduate degree and 30 discrete credit hours for the graduate degree).

A student may apply to the linked BSBA/MS program after completing ACCT 305 and 12 hours from ACCT 306, ACCT 307, ACCT 311, ACCT 425, or ACCT 426 with a C or better. Students must have an overall grade point average of 3.00 in all course work taken at Old Dominion University to be admitted to the linked program. Students must apply for admission to the MS program after completion of the undergraduate degree. Students should note that being in the undergraduate accounting major does not guarantee acceptance to the MS program.

Once admitted to the linked program, a student will take 600-level core graduate accounting courses, and these courses will be applied to the MS course requirements as long as the student already has 120 discrete credit hours for the undergraduate degree. By completing these nine hours, students will only have 21 hours to complete in the MS program during an additional year of study after graduating from the undergraduate program as long as the student earns 120 discrete credit hours for the undergraduate degree and 30 discrete credit hours for the graduate degree for a total of 150 credit hours.

Master of Science Accounting with a Concentration in Financial Management (MS)

Frank Holman, Graduate Program Director

Objective: To provide a curriculum that facilitates the promotion of professional judgment/skepticism and critical thinking skills that add value in decision making.

Focus: Students have the option of aligning coursework based on two areas of interest (concentrations): *Financial Management* addresses the needs of students who have an interest in operational and financial decision making,

and *Taxation* provides the requisite skills set for those interested in tax compliance and planning. Both associate with careers in Public Accounting, Industry, or Government/Not-For-Profit organizations and prepare students for the CPA and other professional designations/licenses (i.e. CMA, CIA, CFE, CISA, CGFM, etc.).

Admission Requirements

Prospective students may apply for admission to the program for the fall, spring, and summer semesters. Admission is granted to those who demonstrate the likelihood of successful completion of this graduate accounting program.

Criteria for admission include cumulative undergraduate and upper-level accounting grade-point averages (GPA), and Graduate Management Admission Test (GMAT) scores. In general: applicants should possess a cumulative undergraduate GPA of 2.8 or higher; and applicants should possess an upper-level accounting course GPA of 3.0 or higher. The sum of the GMAT score plus 200 times the upper-level accounting curriculum GPA should equal 1,000.

For students without a degree in accounting, the cumulative upper level accounting GPA of 3.0 will be based on performance in the following prerequisite courses (with no grade below a C.): ACCT 305, Essentials of Financial Accounting I; ACCT 306, Essentials of Financial Accounting II; ACCT 311, Managerial Accounting; ACCT 425, Taxation of Individuals; and **ACCT 411**, Financial Auditing.

To be considered for admission, the following must be submitted to the Office of Graduate Admissions:

- application forms (may be done on-line) for graduate study in business,
- official transcripts of all previous college work,
- one letter of recommendation,
- a brief resume,
- an one-page essay setting forth the applicant's work experience, and goals and objectives for the program, and
- scores on the Graduate Management Admission Test (GMAT) if applicable.

Applicants whose native language is not English are also required to submit an acceptable score on the Test of English as a Foreign Language (TOEFL) Exam.

The following courses are prerequisites to the MS, Accounting program:

Financial Accounting

ACCT 201	Principles of Financial Accounting *	3
ACCT 305	Essentials of Financial Accounting I	3
ACCT 306	Essentials of Financial Accounting II	3
ACCT 411	Financial Auditing	3

Management Accounting

ACCT 202	Principles of Managerial Accounting *	3
ACCT 311	Managerial Accounting (Three Hours of Taxation) *	3

Taxation

ACCT 425	Taxation of Individuals	3

Economics, Statistics/Business Analytics, Marketing, Information Technology, Finance, and Commercial Law

Select 18 credits	18

Total Credit Hours	39

* Or equivalent from an accredited institution.

Application deadlines are July 1 for fall admission, November 1 for spring admission, and April 1 for summer admission. International student deadlines are April 15 (fall semester), October 1 (spring semester), and February 15 (summer semester).

Applicants who have not obtained an acceptable GMAT score, or an acceptable TOEFL score for those applicants whose native language is not English, will not be permitted to enroll in graduate accounting courses.

GMAT Waiver

Applicants can waive taking the GMAT and disregard the GMAT-related admission requirements if any of the following are met:

- Applicant has passed all parts of the United States Uniform CPA exam;
- Applicant holds a Masters Degree with a posted GPA of 3.0 or higher;
- Applicant is a member of the Old Dominion University chapter of Beta Alpha Psi with a posted GPA of 3.0 in upper level accounting courses; or
- Applicant has a Bachelors Degree with an overall GPA of 3.0 overall and in the prerequisite accounting courses with a grade of C or better in the prerequisite accounting courses.

Curriculum Requirements

A minimum of 30 semester hours of graduate courses are required to complete the MS, Accounting program. Students must maintain a cumulative grade point average of a least 3.00 in all graduate work taken.

Accounting Core

Foundation Strengthening Courses

ACCT 623	Accounting Analytics and Operational Reviews	3
ACCT 626	Financial and Global Accounting	3
ACCT 627	Operational Cost Control	3
ACCT 630	Business Valuations using Financial Statement Analysis	3
ACCT 662	Tax Procedure and Practice	3

Department of Economics

2042 Constant Hall

(757) 683-3153

Robert M. McNab, Chair

Programs

Master of Arts Program

- Economics (MA) (p. 115)

Master of Arts Economics (MA)

Dr. Jay K. Walker, Graduate Program Director
gradecon@odu.edu

Economics is “the social science concerned with how individuals, institutions, and society make optimal choices under conditions of scarcity.” This is a broad field, covering everything from unemployment and inflation to stock market crashes and depressions, from perfect competition among firms to oligopoly and monopoly. Microeconomics studies firms, consumers, goods markets, resource markets, labor markets, and the price system. Macroeconomics studies unemployment, inflation, money supplies, interest rates, exchange rates, national debt, and economic growth. Economics is generally concerned with the problems of incentives, wealth, poverty, and income distribution.

Economics provides a good background for jobs in business, banking, finance, marketing, law, government, politics, military, diplomacy, and journalism. Our graduates have typically found economics positions in banks and firms, go to work in government, teach economics at community colleges, or enter MBA or Ph.D. programs in Economics and Finance.

Attention International Students: Please note the M.A. Economics program is a STEM-designated degree according to the U.S. Department of Homeland Security. International students receiving the M.A. degree may apply for the extended OPT program which allows up to 3 years of work in the United States after program completion.

Economics is very important for the formulation of public policy, business strategies, and financial strategies and at the graduate level tends to be very quantitative. In the Master of Arts in Economics program, students will develop strong mathematical and statistical skills, as well as learn about how the economy works. Economists do economic analysis, make economic and econometric models of the economy, formulate economic policy, make business strategies, forecast economic variables, and do benefit-cost analysis. At the end of the program, an additional goal is that students will be prepared to earn the Certified Business Economist (CBE) designation from National Association for Business Economists (NABE).

The Old Dominion University Department of Economics is especially strong in regional economics, international economics, and econometrics. The department is the home of the Hampton Roads Regional Economic Forecasting Project and the State of the Region Report with our MA students often being involved in those projects.

If taken full time, the MA in Economics program can be easily completed within 21 months. At a faster pace, the program can be completed in as little as 16 months. Alternatively, the program can be completed attending part-time, but more time will be required.

If not taken as part of their prior undergraduate curriculum certain prerequisites must be completed before enrolling in MA core courses. A student must have completed courses in calculus (3 hours), statistics (3 hours), and intermediate microeconomics or intermediate macroeconomics (3 hours from at least one of the two) with a grade of B or better. If a potential student has not completed the pre-requisites, a provisional admission can be granted and these courses may be completed at Old Dominion University prior to taking the MA program core courses.

The MA program in Economics is more intensive than the Bachelor's degree (BA/BS) in Economics. The MA courses study economics at a deeper level than in the undergraduate courses, and are more mathematical. Graduate students must maintain a grade point average of 3.0 or better. All students

in the program are trained in economic theory and research methods, and take several courses emphasizing business or government policy analysis in various specialty areas. An independent research project is required, permitting students an opportunity to apply theory and empirical research techniques to real-world problems.

The Department of Economics encourages interdisciplinary training. The Master's program can be adapted for students desiring a diverse background by combining economics with graduate courses in sociology, political science, computer science, statistics, mathematics, finance, management, marketing research, or public administration.

Admission

General Admissions Requirements

In addition to the University's graduate admission requirements, applicants seeking regular admission must have at least a 3.0 grade point average in their major. Applicants are required to take either the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT), and they must submit at least one letter of recommendation. If the cumulative undergraduate GPA is greater than 3.3 the GRE or GMAT may be waived. If the undergraduate grade point average falls below that required for regular status, applicants may qualify for provisional admission.

Applications are considered on a rolling basis. Applications can be submitted at any point up to the initiation of courses in any semester and be considered for admission. The Department of Economics offers a limited number of graduate assistantships each semester that are competitively awarded. Priority consideration for assistantships for fall semester admits is given to those who submit applications on or before March 1. Priority consideration for assistantships for spring semester admits is given to those who submit applications on or before August 1.

Linked Undergraduate Program Option

Undergraduate students wishing to earn credit toward the M.A. Program in Economics in aspiration of completing the master's requirements in less time have the option of applying to the linked program. Undergraduate students who meet qualification criteria may take up to twelve credits from the master's program while still completing their undergraduate study. This would entail advising students into specific master's program classes to be taken for their electives. Students who complete these twelve credits prior to completion of the bachelor's degree and maintain full time status during both semesters of the subsequent academic year could feasibly complete the MA program in one additional academic year.

Undergraduate students wishing to enter the linked program must meet admission guidelines to the graduate school, have a cumulative GPA of 3.0 or greater and have completed the pre-requisite courses for admission to the master's program in economics. This requires a university level course in statistics, calculus, and a course in either intermediate macroeconomic theory or intermediate microeconomic theory (or their equivalents). Students would be eligible for application to the linked program at the end of their second year of UG study, or equivalent in hours although most students would not be likely to meet these requirements until reaching senior level status. This would entail advising students into specific master's program classes to be taken for their electives. In order for the graduate level courses which are taken to be applied toward the eventual awarding of a graduate degree, students must complete those graduate level courses with a grade of B or greater.

Potential students can contact the graduate program director at gradecon@odu.edu for full guidelines, to receive potential courses of study to participate in the program, or to begin the process of formally applying for the program.

International Student English Language Proficiency Requirements:

For students whose native language is not English, a minimum score of 550 on the paper-based TOEFL, 79 on the internet-based TOEFL, or 6.5 on the IELTS. Other tests are acceptable in meeting this requirement, for full information regarding English proficiency requirements visit here: <https://www.odu.edu/admission/proficiency>

www.odu.edu/admission/proficiency (<https://www.odu.edu/admission/proficiency/>).

For students who are unable to meet the testing requirements there are alternative methods of proving proficiency. Provisional acceptance can be granted pending successful completion of two university or college level English courses at a regionally accredited U.S. institution. Another alternative is completion of the Monarch English Transition (MET) Program where a student would matriculate at ODU and complete the English competency courses on our campus. Full information regarding the MET program is available here: <https://ww1.odu.edu/elc/courses/met> (<https://ww1.odu.edu/elc/courses/met/>).

To Apply

The Old Dominion University Graduate Application is completed online at <https://odu.edu/admission/graduate> (<https://odu.edu/admission/graduate/>). The system will prompt the applicant to complete all components needed to apply to the Master of Arts in Economics program. Applications to the MA program are accepted on a rolling basis in the Fall and Spring semesters, though Fall semester matriculation is preferred. It is recommended that prospective international students submit their applications at least three months prior to the start of their intended semester as there can be delays in the visa issuance process. Questions about the online process should be directed to the Office of Graduate Admissions with any questions regarding requirements for admission or the program curriculum directed to the program director.

Financial Assistance

Financial aid is available to graduate students at Old Dominion University. Financial aid may be available in the form of University fellowships, tuition grants, and research assistantships. The Department of Economics offers a limited number of graduate assistantships each semester that are competitively awarded. Priority consideration for assistantships for fall semester admits is given to those who submit applications on or before March 1. Priority consideration for assistantships for spring semester admits is given to those who submit applications on or before August 1. In addition to the financial aid offered by the University, graduate students may be eligible for aid and student loans administered by other agencies. For information about Work-Study programs, scholarships, and student loans, please contact the Office of Financial Aid.

Curriculum Requirements

Undergraduate prerequisites include calculus (three credit hours), statistics (three credit hours), intermediate microeconomics or intermediate macroeconomics with grades of at least a B. Students who do not yet meet the undergraduate prerequisites can choose to complete those courses at Old Dominion University before taking the advanced courses.

Thirty semester credit hours (ten courses) of approved graduate work are required for the award of the Master of Arts degree in economics. A maximum of six credit hours of 500-level courses approved for graduate credit may be applied toward the degree. The remaining courses must be taken from 600-and/or 700-level courses. Up to six credit hours (two courses) of electives (approved by the graduate program director) may be taken from courses outside the Department of Economics. Required core economics courses for the graduate program are:

Core Courses

ECON 625	Mathematical Economics	3
ECON 700	Economic Analytics	3
ECON 701	Advanced Microeconomic Analysis	3
ECON 703	Advanced Macroeconomic Analysis	3
ECON 706	Econometrics I	3
ECON 707	Econometrics II	3
ECON 708	Econometrics III	3

Restricted Electives

Select two of the following:

ECON 502	Transportation Economics

ECON 507	Labor Market Economics	
ECON 521	Public Economics	
ECON 531	Money and Banking	
ECON 535	Health Economics: A Global Perspective	
ECON 545	Urban Economics	
ECON 547	Natural Resource and Environmental Economics	
ECON 554	Economic Development	
ECON 752	International Trade	
ECON 754	Economic Development	
Capstone		
ECON 698	Economic Methodology and Research	3
Total Credit Hours		30

Writing skills commensurate with the level of this degree are also a requirement for graduation from this program. Near the completion of formal course work, candidates conduct independent research projects as part of ECON 698. All students must register for ECON 698 in their last semester, a guided research seminar where students meet to discuss, present, and critique research.

Department of Information Technology and Decision Sciences

2072 Constant Hall
(757) 683-3571

Weiyong Zhang, Chair

The Department of Information Technology and Decision Sciences is the largest academic department in the Strome College of Business. It is comprised of two separate, yet interrelated, academic disciplines - Business Analytics and Information Technology. The department offers programs at the bachelor, master, and PhD levels.

The department offers common body of knowledge courses in information technology, operations management, decision analysis, business statistics, data analysis, and management science to all of Strome's undergraduate students, as well as electives in various aspects of the disciplines.

Students from both the undergraduate and graduate programs land jobs at companies such as Oracle, Microsoft, Booz Allen Hamilton, BP (British Petroleum), Norfolk Southern, A.P. Møller, Northrop Grumman, CMA CGM, ZIM, Walmart, Dollar Tree and the federal government.

Our faculty's research has been funded by the National Science Foundation, the U.S. Federal Highway Administration and the U.S. Department of Transportation. The department's maritime research was ranked eighth in the world at 2015 by ISI Web of Science.

Programs

Certificate Programs

- Business Analytics and Big Data Certificate (p. 117)

Master of Science - Computer Science - Information Communication Technology

The Department of Information Technology and Decision Sciences offers this degree program jointly with the Department of Computer Science; please see the entry under the Department of Computer Science for degree requirements.

Certificate

Business Analytics and Big Data Certificate

The graduate certificate in Business Analytics and Big Data is designed to give the students a background in some of the basic statistical and modeling/optimization tools used in business analytics. In addition the certificate provides a working knowledge of data bases and an introduction to the analysis of "big data." This certificate program is designed for students to satisfy their elective requirements as part of the MBA program or it can be taken as a stand alone certificate program.

Admission Requirements

An appropriate undergraduate degree is required to be admitted to the Business Analytics and Big Data Certificate program.

Curriculum Requirements

The award of this certificate is based upon the student's successful completion of 15 credit hours as follows:

BNAL 530	Probability and Statistics	3
BNAL 711	Multivariate Statistical Methods for Business	3
or BNAL 503	Data Visualization and Exploration	
BNAL 515	Advanced Business Analytics/Big Data Applications	3
IT 650	Database Management Systems	3
BNAL 507	Prescriptive Analytics of Management Science	3
or BNAL 721	Simulation Modeling for Business and Supply Chain Systems	
Total Credit Hours		15

Master of Public Administration

Master of Public Administration (MPA)

Vickie Carnegie, Graduate Program Director
Meg Jones, Associate Director

Email: mpa@odu (mpa@odu.edu).edu (mpa@odu.edu)

The mission of the Master of Public Administration (MPA) program in the School of Public Service at Old Dominion University is to develop professionals with the knowledge, skills, and abilities to lead and advance public service in a diverse, multi-sector environment. We expect our graduates to be capable of critical problem solving, effective communication, skillful implementation of policy and programs, and ethical application of management and leadership concepts. The MPA program serves the region, state, and nation; supports the professions of public administration and public service; and advances the state of knowledge through applied and scholarly research. *This program is available on-campus and online.*

The Application Package

The Old Dominion University Graduate Application is done online at <https://odu.edu/admission/graduate> (<https://odu.edu/admission/graduate/>). Questions about the online process should be directed to gradadmit@odu.edu or by calling (757) 683-3685. The system will prompt the applicant to complete all components needed to apply to the Master of Public Administration program. Applications to the MPA program are accepted on a rolling basis in the Fall, Spring, and Summer semesters, though it is recommended that prospective students submit their applications at least three months prior to the start of their intended semester. To be considered for admission, applicants must submit the following:

1. Transcripts of **all** previous college work. During the admissions process, you may submit unofficial transcripts, but you will be required to provide official transcripts after admission;
2. A written statement describing how your experience in work and other settings and your choice of graduate study in public administration will lead to achieving your career goals. The statement must be cogent and have a good demonstration of writing ability; this should be considered a writing sample (1000 word maximum length);
3. A resume that includes your education and any/all work experience (the GRE is no longer required);
4. Minimum of **two** letters of recommendation from academic sources and/or employment supervisors. Please do not provide letters from friends, co-workers, or family; and
5. For students whose native language is not English, a minimum score of 550 on the paper-based TOEFL, 79 on the internet-based TOEFL, or 6.5 on the IELTS.; conditional admission is not offered for applicants who have not confirmed successful completion of the University English language proficiency requirements.

Linked Master of Public Administration Program

The School of Public Service offers a linked program to high-performing Old Dominion University students from a variety of undergraduate majors. Interested students can complete up to 12 graduate-level credit hours in their senior year, and continue in the Master of Public Administration program upon receiving their bachelor's degree. These 12 credits may be applied to both the undergraduate degree as well as the MPA degree, pending admission. Students who wish to pursue this linked program should submit their application to the MPA program prior to beginning their last academic year of undergraduate study, and should apply for the semester immediately following their expected undergraduate graduation. Undergraduate students enrolling in the linked program must have completed all general education requirements and possess a cumulative GPA of at least 3.0 at the end of their junior year. Students from all majors are welcome to apply, but some undergraduate majors that relate best to this program include Criminal Justice, Human Services, Management, Political Science, and Sociology.

Financial Assistance

Financial aid is available to graduate students at Old Dominion University. Financial aid may be available in the form of University fellowships, tuition grants, and research assistantships. The School of Public Service offers a limited number of graduate assistantships each semester. In addition to the financial aid offered by the University, graduate students may be eligible for aid and student loans administered by other agencies. For information about

Work-Study programs, scholarships, and student loans, please contact the Office of Financial Aid.

For information and forms concerning application, contact:

Office of Graduate Admissions
Old Dominion University
Norfolk, VA 23529
Phone: (757) 683-3685
Email: gradadmit@odu.edu

Phone: (757) 683-3683

<https://ww1.odu.edu/tuition-aid> (<https://ww1.odu.edu/tuition-aid/>)

Curriculum Requirements

The MPA curriculum consists of 39 credit hours (13 courses). Courses are required in two categories:

1. **Core Concentration** (eight required courses)
2. **Electives** (five courses)

Core Curriculum

The following courses are required of all public administration students.

PADM 651	Administrative Theory I: The Context of Public Administration	3
PADM 671	Public Budgeting and Financial Management	3
PADM 701	Public Policy and Evaluation	3
PADM 723	Ethics in Public Administration	3
PADM 736	Diversity, Equity, & Inclusion: A Public Administration and Public Policy Perspective	3
PADM 753	Research Methods in Public Administration	3
Data Analysis		
Select one of the following:		3
FOUN 722	Introduction to Applied Statistics and Data Analysis	
PADM 752	Introduction to Data Analysis	
MPHO 605	Introduction to Biostatistics for Public Health	
PADM 746	Capstone Seminar in Public Administration	3
Core Requirements		24
Concentration Courses		15
Total Credit Hours		39

Electives

Students choose their elective courses in the general area of public administration. With the approval of the MPA Program Director, students may take graduate-level courses outside of the Department. If a student elects to do an MPA-approved concentration or certificate program, those would count as elective hours.

MPA Elective courses

Select 5 of the following:		15
PADM 634	Regional Planning	
PADM 652	Administrative Theory II: The Process of Public Administration	
PADM 653	Wicked Problems in Public Administration	
PADM 668	Internship/Field Experience *	
PADM 695	Advanced Topics **	
PADM/PPCM 704	Methods of Public Program Evaluation	
PADM 708	Urban and Regional Economic Development	
PADM 711	Tools of Government	
PADM 712	Emergency Management and Policy	

PADM 713	Fundraising for Nonprofit Organizations	
PADM/PPCM 714	Public-Private Partnerships	
PADM 715	Management and Governance of Nonprofit Organizations	
PADM 716	Introduction to Nonprofit Sector	
PADM 717	Nonprofit Financial Management	
PADM 718	Public Sector Contract Administration	
PADM/PPCM 719	Leadership	
PADM 720	Public Human Resources Management	
PADM 721	Transportation Policy	
PADM 724	Administration of Human Services	
PADM 725	Government, Society, and Business	
PADM 726	Introduction to Public Procurement	
PADM 727	Public Procurement and Project Management	
PADM 728	Public Sector Contract Planning and Formation	
PADM 731	Public Sector Procurement Law and Ethics	
PADM/PPCM 734	Negotiation and Dispute Resolution	
PADM 735	History of Race and Government Institutions	
PADM 739	Cultural Competency	
PADM 740	Community Participation and Civic Engagement	
PADM 745	Managing Development and Change in Organizations	
PADM 750	Performance Measurement and Management	
PADM 760	Collaboration in Public Administration	
PADM 772	Public Financial Management	
PADM 780	Local Government Management	
PADM/PPCM 781	Intergovernmental Management	
PADM 785	Social Marketing in the Public Sector	
PPCM/PADM 718	Public Sector Contract Administration	
PPCM/PADM 726	Introduction to Public Procurement	
PPCM/PADM 728	Public Sector Contract Planning and Formation	
PPCM/PADM 731	Public Sector Procurement Law and Ethics	
Total Credit Hours		15

- * Students are required to consult the MPA Graduate Program Director to confirm that a specific internship position or field experience role is eligible for PADM 668 course credit, and to determine if any additional requirements are necessary.
- ** From time to time, courses under the heading of PADM 695 “Advanced Topics” will be offered that students may choose to take as electives. Students may take more than one PADM 695, as long as the course is different.

Recommended Core Course Sequence

Students are required to enroll in Administrative Theory I: The Context of Public Administration (PADM 651) as early as possible in their program of study. The remaining core courses are not required to be taken in a specific order. However, the Capstone Seminar (PADM 746) must be taken after the other core courses have been completed (or in the same semester as the last of the core courses are being completed). Students should note that course offerings are limited during the summer term and should plan accordingly.

Additional Requirements

Internship/Field Experience

Practical professional experience in a public or nonprofit agency setting is an important component of the MPA curriculum. A formal internship is highly recommended for students who lack significant experience in a

public or nonprofit agency. Internships give students the opportunity to gain professional level experience and provide government or nonprofit agencies with the services of graduate students with high potential for future achievement. MPA students have the opportunity to earn up to three credits for an internship position, which will count as an elective course. PADM 668 Internship/Field Experience is the course students register for to earn credit for their public service experiences. Because the School of Public Service does not offer a comprehensive internship program within our department, these positions are most often acquired externally, though they must be approved by the MPA Graduate Program Director in order to count for course credit. Please contact the MPA Graduate Program Director with any questions you may have about internships or field experience projects: mpa@odu.edu.

For assistance in searching for and obtaining an internship position, contact the Old Dominion University Center for Career and Leadership Development.

- have a good demonstration of writing ability; this should be considered a writing sample (1000 word maximum length);
3. A resume that includes your education and any/all work experience (the GRE is no longer required);
 4. Minimum of **two** letters of recommendation from academic sources and/or employment supervisors. Please do not provide letters from friends, co-workers, or family; and
 5. For students whose native language is not English, a minimum score of 550 on the paper-based TOEFL, 79 on the internet-based TOEFL, or 6.5 on the IELTS.; conditional admission is not offered for applicants who have not confirmed successful completion of the University requirements for English language proficiency.

Linked Master of Public Administration Program

The School of Public Service offers a linked program to high-performing Old Dominion University students from a variety of undergraduate majors. Interested students can complete up to 12 graduate-level credit hours in their senior year, and continue in the Master of Public Administration program upon receiving their bachelor's degree. These 12 credits may be applied to both the undergraduate degree as well as the MPA degree, pending admission. Students who wish to pursue this linked program should submit their application to the MPA program prior to beginning their last academic year of undergraduate study, and should apply for the semester immediately following their expected undergraduate graduation. Undergraduate students enrolling in the linked program must have completed all general education requirements and possess a cumulative GPA of at least 3.0 at the end of their junior year. Students from all majors are welcome to apply, but some undergraduate majors that relate best to this program include Criminal Justice, Human Services, Management, Political Science, and Sociology.

Financial Assistance

Financial aid is available to graduate students at Old Dominion University. Financial aid may be available in the form of University fellowships, tuition grants, and research assistantships. The School of Public Service offers a limited number of graduate assistantship positions each semester. In addition to the financial aid offered by the University, graduate students may be eligible for aid and student loans administered by other agencies. For information about Work-Study programs, scholarships, and student loans, please contact the Office of Financial Aid.

For information and forms concerning application, contact:

Office of Graduate Admissions
Old Dominion University
Norfolk, VA 23529

<https://ww1.odu.edu/tuition-aid> (<https://ww1.odu.edu/tuition-aid/>)

Curriculum Requirements

The MPA curriculum consists of 39 credit hours (13 courses). Courses are required in two categories:

1. **Core Concentration** (eight required courses)
2. **Electives** (five courses)

Core Curriculum

The following courses are required of all public administration students.

PADM 651	Administrative Theory I: The Context of Public Administration	3
PADM 671	Public Budgeting and Financial Management	3
PADM 701	Public Policy and Evaluation	3
PADM 723	Ethics in Public Administration	3

PADM 736	Diversity, Equity, & Inclusion: A Public Administration and Public Policy Perspective	3
PADM 753	Research Methods in Public Administration	3
Data Analysis		
Select one of the following:		3
FOUN 722	Introduction to Applied Statistics and Data Analysis	
PADM 752	Introduction to Data Analysis	
MPHO 605	Introduction to Biostatistics for Public Health	
PADM 746	Capstone Seminar in Public Administration	3
Core Requirements		24
Concentration Courses		15
Total Credit Hours		39

Electives

Students choose their elective courses in the general area of public administration. With the approval of the MPA Program Director, students may take graduate-level courses outside of the Department. If a student elects to do an MPA-approved concentration or certificate program, those would count as elective hours.

MPA Elective courses

Select 5 of the following:		15
PADM 634	Regional Planning	
PADM 652	Administrative Theory II: The Process of Public Administration	
PADM 653	Wicked Problems in Public Administration	
PADM 668	Internship/Field Experience *	
PADM 695	Advanced Topics **	
PADM/PPCM 704	Methods of Public Program Evaluation	
PADM 708	Urban and Regional Economic Development	
PADM 711	Tools of Government	
PADM 712	Emergency Management and Policy	
PADM 713	Fundraising for Nonprofit Organizations	
PADM/PPCM 714	Public-Private Partnerships	
PADM 715	Management and Governance of Nonprofit Organizations	
PADM 716	Introduction to Nonprofit Sector	
PADM 717	Nonprofit Financial Management	
PADM 718	Public Sector Contract Administration	
PADM/PPCM 719	Leadership	
PADM 720	Public Human Resources Management	
PADM 721	Transportation Policy	
PADM 724	Administration of Human Services	
PADM 725	Government, Society, and Business	
PADM 726	Introduction to Public Procurement	
PADM 727	Public Procurement and Project Management	
PADM 728	Public Sector Contract Planning and Formation	
PADM 731	Public Sector Procurement Law and Ethics	
PADM/PPCM 734	Negotiation and Dispute Resolution	
PADM 735	History of Race and Government Institutions	
PADM 739	Cultural Competency	
PADM 740	Community Participation and Civic Engagement	
PADM 745	Managing Development and Change in Organizations	
PADM 750	Performance Measurement and Management	
PADM 760	Collaboration in Public Administration	
PADM 772	Public Financial Management	
PADM 780	Local Government Management	

PADM/PPCM 781	Intergovernmental Management
PADM 785	Social Marketing in the Public Sector
PPCM/PADM 718	Public Sector Contract Administration
PPCM/PADM 726	Introduction to Public Procurement
PPCM/PADM 728	Public Sector Contract Planning and Formation
PPCM/PADM 731	Public Sector Procurement Law and Ethics
Total Credit Hours	
15	

- * Students are required to consult the MPA Graduate Program Director to confirm that a specific internship position or field experience role is eligible for PADM 668 course credit, and to determine if any additional requirements are necessary.
- ** From time to time, courses under the heading of PADM 695 "Advanced Topics" will be offered that students may choose to take as electives. Students may take more than one PADM 695, as long as the course is different.

Recommended Core Course Sequence

Students are required to enroll in Administrative Theory I: The Context of Public Administration (PADM 651) as early as possible in their program of study. The remaining core courses are not required to be taken in a specific order. However, the Capstone Seminar (PADM 746) must be taken after the other core courses have been completed (or in the same semester as the last of the core courses are being completed). Students should note that course offerings are limited during the summer term and should plan accordingly.

Nonprofit Management and Governance Concentration

Marina Saitgalina, Program Director

The Nonprofit Management and Governance concentration will consist of 12-credit hours, covering the theory underpinning the nonprofit sector, critical issues in the nonprofit sector, the management and governance of nonprofit organizations, budgeting and financial management, and fundraising.

Students will develop knowledge and skills relevant to analysis, synthesis, and critical thinking necessary to solve problems and make recommendations regarding issues faces by nonprofit organizations. Students will be able to articulate current issues and challenges of the nonprofit sector, develop recommendations rooted in theory and research evidence, and contribute to policy and practices of nonprofit organizations by actively and effectively engaging with its administrative processes.

The required courses are:

PADM 716	Introduction to Nonprofit Sector	3
PADM 715	Management and Governance of Nonprofit Organizations	3
PADM 717	Nonprofit Financial Management	3
PADM 713	Fundraising for Nonprofit Organizations	3
Total Credit Hours for Concentration		12
Elective		3
Total Credit Hours		15

Additional Requirements

Internship/Field Experience

Practical professional experience in a public or nonprofit agency setting is an important component of the MPA curriculum. A formal internship is highly recommended for students who lack significant experience in a public or nonprofit agency. Internships give students the opportunity to gain professional level experience and provide government or nonprofit

agencies with the services of graduate students with high potential for future achievement. MPA students have the opportunity to earn up to three credits for an internship position, which will count as an elective course. PADM 668 Internship/Field Experience is the course students register for to earn credit for their public service experiences. Because the School of Public Service does not offer a comprehensive internship program within our department, these positions are most often acquired externally, though they must be approved by the MPA Graduate Program Director in order to count for course credit. Please contact the MPA Graduate Program Director with any questions you may have about internships or field experience projects: mpa@odu.edu.

For assistance in searching for and obtaining an internship position, contact the Old Dominion University Center for Career and Leadership Development.

Phone: (757) 683-4388

Email: cclcd@odu.edu

For information about on-campus housing, contact:

Housing & Residence Life

Old Dominion University

Norfolk, VA 23529

Phone: (757) 683-4283

Email: housing@odu.edu

Doctor of Philosophy Public Administration and Policy (PhD)

Adam Eckerd, Graduate Program Director

Katrina Davenport, Graduate Program Manager

The mission of the Ph.D. in Public Administration & Policy program is to develop expert leaders and scholars in public and non-profit administration and policy who are capable of creating and disseminating knowledge that advances public service in a multi-sector environment with 37 hours of doctoral level course work and 12 hours of dissertation credit. This program is available on-campus and online.

Admission

Applications for admission to the program will be considered once per year in March. Students begin classes in the fall.

Prospective students will submit the following for consideration:

- An online graduate application.
- Two (2) letters of recommendation from academic sources (e.g., professors from previous degree work). If it is not possible to secure two academic references, please contact the GPD for advice on acceptable substitutes
- Transcripts from a regionally accredited institution or a comparable foreign institution showing completion of a master's degree by the time of enrollment with a minimum GPA of 3.25 on a 4.0 scale
- Aptitude scores on the GRE, or in cases of substitution, the GMAT, taken within five years prior to applying for admission. Scores from the Miller Analogies Test (MAT) are not accepted or considered for admission. The requirement for the GRE or GMAT may be waived for applicants with at least a grade of B or higher in a graduate level statistics or research methods course, or with a 3.5 or above GPA in a regionally accredited master's degree program. Applicants who wish to be exempted from the GRE or GMAT requirement should complete the "Request for GRE/GMAT Waiver" form and submit it with their application package for review by the admissions committee. The decision to waive the GRE or GMAT is the sole responsibility of the admissions committee and its decision is final
- A three- to six-page double-spaced written statement of academic and professional goals. The focus of the essay should be on how the Ph.D.

- Résumé with educational and professional experience.
- For students whose native language is not English, a minimum score of 550 on paper based TOEFL, 79 on internet based TOEFL, or 6.5 on the IELTS.

Core Courses

PADM 800	Colloquium - Public Administration and Policy	1
PADM 801	Policy Theory	3
PADM 802	Public Administration I	3
PADM 803	Public Administration II	3
PADM 804	Multi-Sector Administration	3

PADM 805	Research Design	3
FOUN 722	Introduction to Applied Statistics and Data Analysis	3
PADM 806	Multivariate Analysis in Public Administration	3
TLCI 814	Qualitative Research Design in Education	3

Select one of the following: 3

CRIM 805	Multivariate Statistics in Criminological Research
CRIM 810	Qualitative Methods in Criminology and Criminal Justice
CRIM 815	Advanced Quantitative Techniques in Criminology & Criminal Justice
CRIM 820	Advanced Research Methods in Criminology & Criminal Justice
BNAL 712	Advanced Statistical Models in Business Research
FOUN 812	Research Design and Analysis
TLCI 815	Advanced Qualitative Research
FOUN 823	Analysis of Variance Applied to Educational Research
FOUN 826	Applied Structural Equation Modeling in Educational Research
FOUN 840	Educational Measurement and Assessment
GEOG 502	Geographic Information Systems
HLSC 810	Research Design and Application
HLSC 811	Quantitative Research Methods in Health Care
HLSC 812	Qualitative Research Methods
HLSC 813	Health Outcomes Research
MKTG 813	Fundamentals of Survey Research

Electives

PADM 808	Urban and Regional Economic Development
PADM 810	Policy and Program Evaluation
PADM 814	Public-Private Partnerships
PADM 815	Management and Governance of Nonprofit Organizations
PADM 816	Introduction to Nonprofit Sector
PADM 820	Public Human Resources Management
PADM 823	Ethics in Public Administration

PADM 825	Government, Society and Business
PADM 850	Performance Measurement and Management
PADM 860	Collaboration in Public Administration
PADM 872	Public Financial Management
PADM 881	Intergovernmental Relations
PADM 895	Advanced Topics

Dissertation

PADM 899	Dissertation	12

Prerequisites

- PADM 651 Introduction to Public Administration
- PADM 671 Public Budgeting and Financial Management

Students may be able to transfer up to 6 credits—earned outside of the PhD in Public Administration and Policy program—to satisfy course credit requirements for their doctoral degree. Students may be eligible for the following:

- Contact the PhD Program Manager (<https://www.odu.edu/public-service/directory/>) to discuss a potential transfer of credit. All transfer credits must be approved by the PhD GPD, SPS Director, and SCB Dean.

Prospective students who wish to take courses prior to being formally admitted to the PhD program are considered nondegree seeking students. For more information on nondegree seeking options, see the Graduate Catalog section on Graduate Registration Requirements and Procedures (<https://catalog.odu.edu/graduate/graduateregistrationrequirementsandprocedures/>).

If a student is considering taking courses as a nondegree seeking student, they should note the limit for transfer credits earned as a nondegree student (see above section on Transfer Credits) and the SPS requirement that at least 23 of 37 course credits applied towards the doctoral degree must be from 800-level courses. Grades earned in courses taken by nondegree seeking students will not be considered by the admissions committee during an application review.

Old Dominion University Graduate Catalog 2025-2026

achievement and motivation for full admission to the PhD program. If permission to take courses is granted, students should apply through Graduate Admissions (<https://www.odu.edu/admission/graduate/>) for admission as a nondegree seeking student. Nondegree seeking students are not eligible to receive financial assistance.

Student Advising

The PhD GPD (<https://www.odu.edu/public-service/directory/>) will serve as the initial academic advisor for all new students. Students are required to meet with the PhD GPD to discuss academic goals, interests, class schedules, and registration requirements prior to registering for classes. Students must also submit a completed Advising Form (<http://catalog.odu.edu/applewebdata/FCCD3F4E-98B3-4CC1-B29B-4BE35AF0A4E2>) (attached) to the PhD Program Manager (<https://www.odu.edu/public-service/directory/>) before attempting to register for their first class; students will be unable to register for classes until the Advising Form has been submitted and processed. Students may register only for courses approved by the PhD GPD and will be dropped from any course for which they registered without prior permission.

By no later than the end of a student's first nine hours of coursework in the PhD program, the student must select an advisor who is within SPS and is certified for graduate instruction at Level I or Level II. Students will be informed once per year about those eligible to serve as advisors, but students can check any time with the PhD Program Manager for the certification level of faculty members. Once a faculty member has been chosen and has agreed to serve as an advisor, the Strome College of Business – Appointment of Doctoral Faculty Advisor (<http://catalog.odu.edu/applewebdata/FCCD3F4E-98B3-4CC1-B29B-4BE35AF0A4E2>) form (attached) must be completed and submitted to the PhD Program Manager. The PhD Program Manager can provide all forms.

A doctoral student's advisor serves many purposes, including but not limited to the following:

- assist the student in developing a plan of study that fulfills course requirements and follows appropriate course sequencing
- approve registration selections for each semester while ensuring the student remains on an appropriate track to fulfill course requirements
- provide mentorship regarding expectations of performance, behavior, values, and integration into the discipline of public administration and public policy
- encourage and assist the student with preparing manuscripts for presentation at scholarly conferences and for publication
- evaluate the student's performance and progress toward the doctoral degree through an annual performance review
- provide the student with advice and counseling to ensure their success in the PhD program

Students should meet with their advisor at least once per semester. Each PhD student will also undergo a performance review by their advisor and/or the PhD GPD at the end of each academic year, as described below.

The role of the advisor is completed when the student selects a comprehensive exam committee. A student may choose to include or not include the advisor as an exam committee member. A student may also choose a new advisor at any time by submitting a new Appointment of Doctoral Faculty Advisor form to the PhD Program Manager.

Student Funding

Doctoral students may apply for a variety of need-based and merit-based financial support offered by the school, university, and outside sources, including teaching, administrative, and research assistantships; fellowships, tuition grants, and scholarships; Federal Direct Stafford Loan Programs; and part-time student employment. For general information on funding options and requirements, please see the Graduate Catalog sections on Graduate Financial Aid (<https://catalog.odu.edu/graduate/graduatefinancialaid/>) and Financial Awards for Graduate Students (<https://catalog.odu.edu/graduate/financialawardsforgraduatestudents/>), as well as information provided by the Office of Financial Aid (<https://www.odu.edu/finaidoffice/>).

SPS doctoral students may receive an assistantship, or less commonly a fellowship, or combination of both. Assistantship awards are typically \$20,000 per academic year. Additionally, tuition is waived for PhD assistants (for a maximum of 9 credit hours each semester). Please note that student funding is generally not available during the summer term.

SPS research assistantships require students to work 20 hours per week with an assigned faculty member(s).

Teaching assistantships require 20 hours per week, which may include assisting faculty in the classroom, teaching independent sections of a course in the Public Service Minor, or a combination of activities. Students with an assistantship position may not hold other full-time or part-time employment positions.

Students seeking an assistantship or tuition grant should complete the Application for Institutional Graduate Financial Assistance (<https://www.odu.edu/sites/default/files/documents/graduate-financial-assistance.pdf>) when submitting their admission packet. Offers of financial assistance are generally made at the beginning of a student's program of study, however students may apply for financial assistance at any point during their course of study.

Award decisions are made during each admissions cycle when the SPS Admissions Committee reviews applications and submits funding recommendations to the SPS Chair. Award decisions are made based on merit and the academic qualifications of the applicant, as well as the program's available financial resources. Students are not guaranteed any funding while completing their doctoral studies.

A student in good standing in the PhD program who has been granted a financial award may expect up to three years of funding. In exceptional circumstances, and pending availability of funds, students may apply for a limited amount of funding beyond the three-year limit. A student's financial award is contingent on funding being available from the college and the university, or through grant funding available within the SPS, as well as the student meeting the following requirements:

- the student maintains a GPA of 3.20, as described in the Retention Standards section of this handbook, and continues to make satisfactory progress toward completion of a doctoral degree
- the quality and quantity of the student's work as a research or teaching assistant is deemed acceptable by the faculty member(s) to whom the student is assigned, and the PhD GPD
- the student makes satisfactory progress toward completion of their dissertation (for students working on a dissertation)
- the student does not hold other full-time or part-time employment while receiving financial assistance, unless approved by the PhD GPD and SPS Chair

A student's assistantship or fellowship performance is evaluated once per year by the student's supervising faculty member and the PhD GPD. Any student whose work performance is deemed to be unsatisfactory may immediately be placed on a one semester probationary period by a majority vote of the SPS tenure-track faculty. If the student's performance is not rated to be satisfactory in all subsequent semesters, the student's funding will be discontinued, regardless of academic standing. In cases of egregious behavior, the faculty may discontinue a student's financial assistance immediately, regardless of previous ratings or performance.

Additional Requirements

Retention Standards

Students must maintain a minimum 3.00 grade point average (GPA) to remain in good standing in the Graduate School and PhD program. Students must also earn at least a B- in each course; if a student receives less than a B- grade in one course, they must repeat the course and receive a B- or higher on the second attempt. Students may not receive a B- in more than one course and may never receive an F in any course. Funded students

must maintain a minimum 3.20 GPA to retain their funding. See additional details on grade requirements and ramifications under “Retention Standards” in the School of Public Service section of the Graduate Catalog (<https://catalog.odu.edu/graduate/business/public-service/public-administration-policy-phd/>) and under “Continuance” in the Graduate Policies and Procedures section of the Graduate Catalog (<https://catalog.odu.edu/graduate/policies/graduatepolicies/>).

Time Limit for Degree Completion

All doctoral degree requirements must be completed within eight (8) calendar years of the student’s first semester in the PhD program. This time limit may be extended under exceptional circumstances but will require re-validation of any course credit that is more than eight years old at the time of graduation. Re-validation should occur after successful completion of the dissertation requirements. Students should work with their dissertation committee chair and/or the GPD to ensure re-validation. See additional details under “Re-Validation of Out-of-Date Graduate Credit” in the Graduate Policies and Procedures section of the Graduate Catalog (<https://catalog.odu.edu/graduate/graduatepoliciesandprocedures/>).

Continuous Enrollment

This policy outlines the requirements for continuous enrollment in the PhD program to ensure that students remain active in their academic pursuits and make steady progress toward the completion of their doctoral degrees.

1. **Continuous Enrollment Requirement:** All PhD students are required to maintain continuous enrollment from the time they are admitted to the program until they successfully defend their dissertation and receive their degree.
2. **Registration for Coursework:** Students are expected to register for a minimum of 1 credit hour per semester (including summer). This may include coursework, directed readings, or research/dissertation credits.
3. **Leave of Absence:** In exceptional circumstances, a student may request a leave of absence. A leave of absence can be granted for reasons such as medical issues, family emergencies, or military service. Students must submit a formal request for a leave of absence to the department, providing a clear explanation of the reason and expected duration.
4. **Readmission After Leave of Absence:** Students who have taken a leave of absence must apply for readmission to the program.
5. **Continuous Dissertation Enrollment:** After successful completion of coursework, students are required to maintain continuous enrollment in dissertation research credits until the dissertation is successfully defended.
6. **Financial Obligations:** Students must meet all financial obligations, including tuition and fees, to maintain continuous enrollment. Failure to do so may result in a hold on the student’s account, which can affect their ability to register for courses or access university resources.

Coursework

Lists and descriptions of the required and elective courses to satisfy the PhD program’s 37 hours of coursework may be found under “Doctor of Philosophy – Public Administration & Policy” in the School of Public Service section of the Graduate Catalog (<https://catalog.odu.edu/graduate/business/public-service/public-administration-policy-phd/>). When contemplating their course selection, students should keep in mind that at least 23 credit hours must be completed at the 800 level.

Core Courses (13 semester credit hours)

The core courses offer an important theoretical framework for the PhD program. These courses provide a foundation for understanding the production and application of social science knowledge in the field of public administration and public policy. As a starting point for all students in the program, these courses help to develop a common frame of reference and give focus to the program.

Research Core Courses and Research Elective Course (15 semester credit hours)

Research courses are designed to provide students with the tools and skills to conduct quality research in the

social sciences, and to apply research methodology as a problem-solving process. Students are exposed to the philosophy undergirding social inquiry, statistical techniques, qualitative methodologies, research design, and program evaluation.

Electives (9 semester credit hours)

Students are encouraged to use electives to develop their area of research interest and expertise. Electives must be at the 600 level or above and may be taken outside of the SPS with the approval of the PhD GPD or the student’s advisor. With the approval of the PhD GPD, students may also complete 3-credit hours of directed research (PADM 898) to fulfill an elective requirement.

Student Performance Review

Each PhD student undergoes a performance review by their advisor and/or the PhD GPD at the end of each academic year. In addition to certifying that the student is making satisfactory progress toward the degree (in compliance with the continuance and retention policies), the evaluation will include an examination of the following factors:

- professional integrity, professionalism, and ethical behavior, as reflected in the American Society for Public Administration (ASPA) Code of Ethics (<https://www.aspanet.org/ASPA/ASPA/Code-of-Ethics/Code-of-Ethics.aspx>)
- participation in socialization events
- collegiality and personal behavior
- non-academic performance (e.g., publication efforts, conference papers, participation in SPS and program events, etc.)
- capability and desire to pass comprehensive examinations and complete a dissertation in a timely fashion

If a student receives an unacceptable review, the student will be brought before the faculty to discuss their past performance as well as their future in the PhD program. An integral part of this meeting would be to counsel the student. In lieu of an appearance, students may elect to write a letter of explanation to the faculty. The faculty will have the ability, by majority vote of the tenure-track faculty, to place the student on probation for one semester or to dismiss the student immediately, regardless of academic standing or time in the program. If the faculty chooses to place the student on probation and the student fails to meet faculty expectations by the end of the semester following this decision, the student will be automatically dismissed.

If a student improves but then receives a second unacceptable review, they will be automatically placed on a one-semester suspension from the program; if there is a third occurrence, the student will be automatically dismissed, regardless of their academic standing or time in the program. Students may appeal the faculty decision to the Dean of the Strome College of Business (see Retention Policy).

Socialization Requirement

An integral component of successful doctoral study is the socialization of the student into the discipline and the academy. This socialization process is critical to the long-term success of any PhD student, whether they seek a career in academia or elsewhere. All PhD students are required to attend at least seven (7) designated socialization events during their PhD program. These are non-credit events, but no student will be certified for graduation until this requirement is met as determined by the PhD GPD. The SPS will designate at least 3-4 socialization events each year, and the events will be advertised in PhD classes and via email. Events may also be held during the summer term.

Students can meet some of the socialization requirement by participating in the Graduate School’s Career Pathways (<https://sites.wp.odu.edu/careerpathways/>) programs. Additional events that count as socialization events include attendance at prospectus and dissertation defenses, local ASPA chapter events, conference research presentations, and Dean’s Research Seminars. Students must maintain records and ensure documentation of these events with the PhD GPD by the end of the semester in which they occur.

Certificate Public Administration and Policy Certificate

Vickie Carnegie, Graduate Program Director

The School of Public Service in the Strome College of Business at Old Dominion University offers a Graduate Certificate in Public Administration and Policy. The objective of the program is to help working professionals upgrade their skills in the areas of policy analysis and public management, by developing analytical and management knowledge and capabilities.

Courses are available in a live or online setting, depending on semester and demand.

Curriculum Requirements

The curriculum consists of the courses listed below. Students are required to take four courses, totaling 12 credit hours, to complete the certificate program. There are three required courses and a choice of an elective.*

Required

PADM 651	Administrative Theory I: The Context of Public Administration	3
PADM 701	Public Policy and Evaluation	3
PADM 723	Ethics in Public Administration	3

Elective

Select one of the following:		3
PADM 652	Administrative Theory II: The Process of Public Administration	
PADM 671	Public Budgeting and Financial Management	
PADM 708	Urban and Regional Economic Development	
PADM 714	Public-Private Partnerships	
PADM 719	Leadership	
PADM 724	Administration of Human Services	
PADM 760	Collaboration in Public Administration	
PADM 734	Negotiation and Dispute Resolution	
PADM 781	Intergovernmental Management	

Total Credit Hours 12

* Any alteration(s) in required or elective course selection require(s) prior faculty advisor approval.

Certificate Public Procurement and Contract Management Certificate

Vickie Carnegie, Interim Program Director

The Graduate Certificate in Public Procurement & Contract Management (PPCM) can provide excellent job opportunities and career growth. This online program prepares students with the skills and tools needed to improve the effectiveness and efficiency of procurement and contract management. The Certificate is designed for Public Administration students, Business Administration students, Engineering students, and students from many other disciplines. The PPCM program consists of four required courses and one elective (15 credits total).

Admission Requirements

Admission to this Graduate Certificate program will require a bachelor's degree (or equivalent). Interested students can enroll by completing an online application using the ODU application portal.

Curriculum Requirements

The award of this certificate is based upon the student's successful completion of 15 credit hours of graduate level courses in Public Administration:

PPCM/PADM 718	Public Sector Contract Administration	3
PPCM/PADM 726	Introduction to Public Procurement	3
PPCM/PADM 728	Public Sector Contract Planning and Formation	3
PPCM/PADM 731	Public Sector Procurement Law and Ethics	3
Select one of the following:		3
PADM/PPCM 704	Methods of Public Program Evaluation	
PADM/PPCM 714	Public-Private Partnerships	
PADM/PPCM 719	Leadership	
PADM/PPCM 727	Public Procurement and Project Management	
PADM/PPCM 734	Negotiation and Dispute Resolution	
PADM/PPCM 781	Intergovernmental Management	

Total Credit Hours 15

Additional Requirements

For more information relating to this program and its requirements, please visit <http://www.odu.edu/business/departments/sps/academics/procurement> (<http://www.odu.edu/business/departments/sps/academics/procurement/>).

School of Cybersecurity

Daniel Takabi, Director

The School of Cybersecurity administers two degrees (a BS in Cybersecurity with majors in cybersecurity and cyber operations and an MS in Cybersecurity) and an interdisciplinary minor in cybersecurity. The School's strategic priority is to deliver exceptional academic programs for both on-campus and online students to cultivate the cybersecurity workforce and enhance the nation's cybersecurity talent. The School supports undergraduate and graduate students and faculty to achieve healthy and sustainable growth of the cybersecurity program. The mission of the School also includes developing high-impact, cross-disciplinary research initiatives that center on cybersecurity and conducting outreach and community engagement, being a source of cybersecurity expertise to the community, the Hampton Roads region, the Commonwealth of Virginia, and the nation.

Programs

Master of Science Programs

- Cybersecurity (MS) (p. 128)
- Cybersecurity with a Concentration in AI for Cybersecurity (MS) (p. 129)
- Cybersecurity with a Concentration in AI Security (MS) (p. 131)
- Cybersecurity with a Concentration in Cyber Conflict and Cyber Crime (MS) (p. 132)
- Cybersecurity with a Concentration in Cybersecurity Risk Management (MS) (p. 134)

Certificate Program

- Artificial Intelligence (AI) in Cyber Defense Certificate (p. 135)
- Cybersecurity Risk Management Certificate (p. 135)
- Trustworthy Artificial Intelligence Certificate (p. 136)

Master of Science Cybersecurity (MS)

Master of Science in Cybersecurity

Rafael Diaz, Graduate Program Director

The Master of Science in Cybersecurity is a 30-credit hour non-thesis degree program. It is designed to prepare cyber security technology leaders.

Graduates will develop skills and competencies in technical aspects of cyber security and will be prepared to assume responsibility for the management of cybersecurity projects and coordination of cyber operation teams. It also provides preparation for students desiring to pursue doctoral studies or teach cybersecurity courses in 2- and 4-year colleges and universities.

The program is offered in online format and with the option for local students to attend classes on campus. The required core courses focus on the fundamental knowledge of cybersecurity, covering advanced cybersecurity principles, techniques, and operations, as well as advanced topics in law, policy, management and leadership in cybersecurity. Students will have opportunities to choose five restricted electives to learn about different aspects of cybersecurity. The capstone course provides opportunities to synthesize and apply the knowledge and skills to solve real-world cybersecurity problems.

Financial Aid

Sources of financial aid available to students include

1. Research and teaching assistantships and
2. Loans.

Admission

Application Procedures

The completed application for the Master of Science Cybersecurity program will include the following items:

1. Official copies of transcripts from all colleges/universities attended.
2. Two letters of recommendation from individuals familiar with applicant's professional and/or academic background.
3. A current resume.
4. A statement of professional goals and academic objectives.
5. A completed application form.
6. Receipt of the application fee. Checks should be made payable to Old Dominion University
7. TOEFL test scores, sent directly from the ETS to ODU International Graduate Admission Office must accompany international applications for applicants with a degree issued outside of the United States.

Applications to Old Dominion University can be completed on-line at <http://www.odu.edu/admission/graduate> (<http://www.odu.edu/admission/graduate/>).

The applicant is responsible to ensure that all application materials are received and the application is complete in all respects.

Curriculum Requirements

This program consists of four core courses (12 credit hours), five electives (15 credit hours), and one capstone course (3 credit hours). The four core courses focus on the fundamental knowledge of cybersecurity, covering advanced cybersecurity principles, techniques, and operations, as well as advanced topics in law, policy, management and leadership in cybersecurity.

The five electives provide students with opportunities to learn about different aspects of cybersecurity, e.g., in information systems, network systems, mobile and wireless systems, operating systems, and cyber-physical systems. Courses are also offered to address such important cybersecurity topics as reverse software engineering, digital forensics, thread modeling, and ethical hacking and penetration testing.

The capstone course brings together students in their final semester of study to synthesize knowledge from their previous coursework and apply it to solve real-world cybersecurity problems. The faculty member who teaches the capstone course will work with industrial and academic partners who will serve as external mentors of the capstone course. Each student in the capstone course will discuss—with both faculty member and mentor—development of her/his master's project that aims to solve a cybersecurity problem in a real-world business setting.

Cybersecurity Core

Core Courses

CYSE 600	Cybersecurity Principles	3
or CYSE 625	Advanced Ethical Hacking and Penetration Testing	
CYSE 601	Advanced Cybersecurity Techniques and Operations	3
or CYSE 602	Advanced Techniques for Cyber Defense	
CYSE 603	Advanced Cybersecurity Law and Policy	3
CYSE 605	Leadership and Management in Cybersecurity	3

Total Credit Hours 12

Cybersecurity Concentration

Restricted Elective Courses

Select 15 credits of the following:		15
CS 533	Web Security	
CS 564	Networked Systems Security	
CS 565	Information Assurance for Cybersecurity	

CS 566	Principles and Practice of Cyber Defense	
CS 567	Introduction to Reverse Software Engineering	
CS 569	Data Analytics for Cybersecurity	
CS 761	Malware Analysis and Reverse Engineering	
CYSE 516	Cyber Defense Fundamentals	
CYSE 519	Cyber Physical System Security	
CYSE 520	Applied Machine Learning in Cybersecurity	
CYSE 521	Generative AI in Cybersecurity	
CYSE 525	Cybersecurity Strategy and Policy	
CYSE 526	Cyber War	
CYSE 530	Introduction to Cybersecurity Risk Management	
CYSE 531	Advanced Techniques Cybersecurity Risk Management	
CYSE 532	Cyber Risk CSF/CMMC	
CYSE 533	Cyber Risk FedRAMP/Audit	
CYSE 595	Topics in Cybersecurity *	
CYSE 597	Tutorial Work in Special Topics in Cybersecurity	
CYSE 607	Advanced Digital Forensics	
CYSE 608	Windows System for Cybersecurity	
CYSE 609	Fundamentals of Linux System for Cybersecurity	
CYSE 610	Advanced Cryptography	
CYSE 615	Mobile and Wireless Security	
CYSE 625	Advanced Ethical Hacking and Penetration Testing	
CYSE 635	AI Security and Privacy	
CYSE 695	Advanced Topics in Cybersecurity	
CYSE 697	Independent Study in Cybersecurity *	
ENMA 625	Introduction to Homeland Security Logistics	
MSIM 670	Cyber Systems Engineering	
Capstone Course		
CYSE 698	Master's Project	3
Total Credit Hours		18

Note on CYSE 595 and CYSE 697 : CYSE 595 can be taken multiple times by a student as long as the CYSE 595 courses have different titles. However, if a student has already taken a CYSE 595 course, which is converted to a regularly numbered course (generally the same title) in a future semester, the student cannot take the converted course any more. CYSE 697 can also be taken multiple times by a student, but the research topics on different CYSE 697 courses need to be different.

Cybersecurity Risk Management Concentration

The MS in Cybersecurity concentrations are designed for the students who are interested to focus on a specific area in cybersecurity. An admitted student can be accepted to a concentration upon the approval of the Graduate Program Director. The concentration will be posted on the transcript.

The Cybersecurity Risk Management concentration is a linked concentration for the students in Cybersecurity Risk Management Certificate program. After the students complete the certificate program, if they seek to further enhance knowledge and skills in cybersecurity, they can be accepted to this concentration. When students complete the program, they will have a comprehensive understanding of cybersecurity as well as project experience in applying the NIST Risk Management Framework (RMF) to practical problems of information security and security auditing.

Certificate Artificial Intelligence (AI) in Cyber Defense Certificate

The Graduate Certificate in Artificial Intelligence in Cyber Defense is designed to educate students in methods to prevent, detect, and responding to cyber threats in a timely manner. Cyber defense specifically focuses on defending against external threats and attacks. The application of Artificial Intelligence (AI) to Cyber Defense can assist in monitoring for abnormalities in data access and predicting potential threats to prevent compromise to information or infrastructure.

Admission Information

The following admission requirements will apply to all applicants. All students must:

- Submit a completed online application and the application fee.
- Submit transcripts of all undergraduate and graduate work from regionally accredited institutions.
- Have earned a baccalaureate degree from a regionally accredited institution of higher education, or international equivalent.

Applicants who have not earned a degree in the United States must also submit:

- Current scores on the Test of English as a Foreign Language (TOEFL), with a minimum score of 230 on the computer-based TOEFL or 80 on the TOEFL iBT.

Curriculum Requirements

The certificate is awarded based upon the student's successful completion of 12* credit hours of graduate level courses:

AI/CYSE 510	Artificial Intelligence (AI) Methods and Models	3
AI/PHIL 546	Artificial Intelligence (AI) Ethics and Policy	3
AI/CYSE 521	Generative AI in Cybersecurity	3
CYSE 520	Applied Machine Learning in Cybersecurity	3
AI Practicum *		0
Total Credit Hours		12

* AI 669/DASC 669

Certificate Cybersecurity Risk Management Certificate

A key tool for addressing the mounting cyber threats is the NIST Risk Management Framework required by the Federal Information Security Act (FISMA). When students complete the certificate program, they will have a comprehensive understanding of it as well as project experience in applying the NIST Risk Management Framework (RMF)—the foundational framework which guides information security and information security auditing.

Admission Information

The following admission requirements will apply to all applicants. All students must:

- Submit a completed online application and the application fee,
- Submit transcripts of all undergraduate and graduate work from regionally accredited institutions.

Applicants who have not earned a degree in the United States must also submit:

- Current scores on the Test of English as a Foreign Language (TOEFL),
- A sample of scholarly writing, and three recommendations, at least one of which evaluates proficiency in English.

Curriculum Requirements

Students are required to complete the following six graduate courses. The curriculum is based on standards established by the National Institute of Standards and Technology. Students are required to maintain a minimum GPA of 3.0/4.0.

Required Courses

CYSE 530	Introduction to Cybersecurity Risk Management	3
CYSE 531	Advanced Techniques Cybersecurity Risk Management	3
CYSE 532	Cyber Risk CSF/CMMC	3
CYSE 533	Cyber Risk FedRAMP/Audit	3

Electives **6**

Select two of the following:

CYSE 608	Windows System for Cybersecurity
CYSE 609	Fundamentals of Linux System for Cybersecurity
MSIM 670	Cyber Systems Engineering
ENMA 625	Introduction to Homeland Security Logistics
ENMA 670	Cyber Systems Engineering
ENMA 724	Risk Analysis

Total Credit Hours 18

Certificate

Trustworthy Artificial Intelligence Certificate

The purpose of this interdisciplinary certificate is to provide an understanding of trustworthy and responsible Artificial Intelligence (AI) concepts in the context of cybersecurity. The program includes coursework focusing on the basics of machine learning and artificial intelligence, as well as the concepts of trustworthiness and security in the domain of cybersecurity. Students will gain knowledge on the representation and simulation by computers and software of human learning and reasoning processes. Students will be able to describe the essential building blocks of trustworthiness with a focus on reliability, transparency, interpretability, fairness, and ethics. Graduates will be able to describe and understand the concepts necessary for developing AI systems in a responsible and trustworthy manner with a focus on applications related to cybersecurity.

All applicants admitted to the certificate program must meet ODU requirements for graduate admission: an earned baccalaureate degree from a regionally accredited institution or an equivalent degree from a foreign institution.

Non-degree seeking students are required to have these same credentials, though documentation is not required. Ultimately, students must apply to the certificate program in order to obtain the certificate. The courses offered under this program may be taken by current ODU students or new students.

Curriculum Requirements

This certificate requires 12 credits and a 3.0 GPA.

CS 580	Introduction to Artificial Intelligence	3
CYSE 640	Trustworthy and Responsible AI	3

Select one of the following: **3**

CS 522	Introduction to Machine Learning
CS 733	Natural Language Processing

Select one of the following: **3**

CYSE 520	Applied Machine Learning in Cybersecurity
CYSE 635	AI Security and Privacy

Total Credit Hours 12

School of Data Science

The School of Data Science is designed to organize data science academic and research activities (with degrees and certificates tailored to regional workforce needs) while leveraging research partnerships with nearby national labs (Jefferson Lab, NASA Langley, and Wallops Flight Facility) to develop a targeted scientific focus in data science. The School's objectives include developing high-impact, cross-disciplinary research initiatives that center on data science and conducting outreach and community engagement, being a sources of data science expertise to the community, the Hampton Roads region, the Commonwealth of Virginia, and the nation.

For information, contact the Graduate Program Director: dsgpd@odu.edu

Programs

Master of Science Programs

- Data Science and Analytics with a Concentration in Artificial Intelligence and Machine Learning (MS) (p. 137)
- Data Science and Analytics with a Concentration in Business Intelligence and Analytics (MS) (p. 137)
- Data Science and Analytics with a Concentration in Engineering and Big Data Analysis (MS) (p. 138)
- Data Science and Analytics with a Concentration in Full Stack (MS) (p. 139)
- Data Science and Analytics with a Concentration in Geospatial Analytics (MS) (p. 139)
- Data Science and Analytics with a Concentration in Physics (MS) (p. 140)

Certificate Programs

- Artificial Intelligence (AI) in Data Science Certificate (p. 140)
- Artificial Intelligence (AI) in Healthcare Certificate (p. 141)

Master of Science Data Science and Analytics with a Concentration in Artificial Intelligence and Machine Learning (MS)

This program will provide students with a foundation to use state-of-the-art programming tools and software packages to develop machine learning models. Students will learn how to use data for identifying trends and patterns, solving problems, communicating results, and recommending optimal solutions.

Coursework for the computational data analytics concentration focuses on teaching programming language, the use of complex statistical tools, and mathematical modeling. Graduates will be able to enter data science, analytical, and statistical fields. This program is available on-campus and online.

Artificial Intelligence & Machine Learning

In this concentration, students will prepare to enter rapidly emerging fields related to data science and analytics. The coursework addresses relevant data analytics topics such as text analytics, visualization, algorithms and data structures, and information retrieval. Students will learn computational data analysis, data visualization, and natural language processing. Students will select four courses in consultation with the faculty advisor.

Admission

The requirements for admission to the Master of Science in Data Science and Analytics are as follows:

1. A baccalaureate degree in computer science, electrical and/or computer engineering, mathematics, statistics, information system & technology,

- or a related field from a regionally-accredited institution or an equivalent institution outside the U.S.; students holding a bachelor's degree in an unrelated field will need competency in topics related to basic statistics and computer science.
2. Current scores on the Test of English as a Foreign Language (TOEFL) of at least 230 on the computer based TOEFL or 79 on the TOEFL iBT, or IELTS 6.5 overall.

Students with previously completed work at a regionally-accredited institution may submit a request for a maximum of 12 elective graduate credit hours to be transferred into the program. If approved by the admission committee, it will be added to the transcript.

Curriculum Requirements

The program requires 30 credit hours. A capstone project is required.

Data Science & Analytics Core

Core Requirements

Master of Science Data Science and Analytics with a Concentration in Business Intelligence and Analytics (MS)

This program will provide students with a foundation to use state-of-the-art programming tools and software packages to develop statistical models. Students will learn how to use data for identifying trends and patterns, solving problems, communicating results, and recommending optimal solutions.

Coursework for the business intelligence and analytics concentration focuses on providing students with the skills to gather, analyze, and use data to make informed decisions. Graduates will be prepared to enter business and organizations that need educated professionals to help make informed recommendations. This program is available on-campus and online.

Business Intelligence & Analytics Concentration

This concentration will prepare students for organizations looking for data-driven recommendations. The coursework addresses the use of tools to store, access, and analyze data to support making informed business recommendations. Students will learn how to retrieve data, gain insights, make decisions, and communicate solutions to various constituents in specific settings of data science and analytics. Students will select four courses in consultation with the faculty advisor.

Admission

1. A baccalaureate degree in computer science, electrical and/or computer engineering, mathematics, statistics, information system & technology, or a related field from a regionally-accredited institution or an equivalent institution outside the U.S.; students holding a bachelor's degree in an unrelated field will need competency in topics related to basic statistics and computer science.
2. Current scores on the Test of English as a Foreign Language (TOEFL) of at least 230 on the computer based TOEFL or 79 on the TOEFL iBT, or IELTS 6.5 overall.

Students with previously completed work at a regionally-accredited institution may submit a request for a maximum of 12 elective graduate credit hours to be transferred into the program. If approved by the admission committee, it will be added to the transcript.

Curriculum Requirements

The program requires 30 credit hours. A capstone project is required.

Master of Science Data Science and Analytics with a Concentration in Engineering and Big Data Analysis (MS)

Engineering & Big Data Analytics Concentration

The purpose of this concentration is to provide students with a thorough understanding of the methods and technologies to handle big data and to instill engineering problem-solving skills rooted in big data solutions. It will further prepare them to become professionals trained in advanced data analytics, with the ability to transform large streams of multiple data sources into understandable and actionable information for the purpose of making decisions. The coursework (12 credits) will enable students to learn and practice the following competencies: data collection, data storage, processing and analyzing data, reporting statistics and patterns, drawing conclusions and insights and making actionable recommendations.

Admission

The requirements for admission to the Master of Science in Data Science and Analytics are as follows:

1. A baccalaureate degree in computer science, electrical and/or computer engineering, mathematics, statistics, information system & technology, or a related field from a regionally-accredited institution or an equivalent institution outside the U.S.; students holding a bachelor's degree in an unrelated field will need competency in topics related to basic statistics and computer science.
2. Current scores on the Test of English as a Foreign Language (TOEFL) of at least 230 on the computer-based TOEFL or 79 on the TOEFL iBT, or IELTS 6.5 overall.

Students with previously completed work at a regionally-accredited institution may submit a request for a maximum of 12 elective graduate credit hours to be transferred into the program. If approved by the admission committee, it will be added to the transcript.

Curriculum Requirements

The program requires 30 credit hours. A capstone project is required.

Master of Science

Data Science and Analytics with a Concentration in Full Stack (MS)

This program will provide students with a foundation to use state-of-the-art programming tools and software packages, and includes the flexibility to explore the application of tools and methods across disciplines. Students will learn how to use data for identifying trends and patterns, solving problems, communicating results, and recommending optimal solutions.

Coursework for the full stack concentration provides the flexibility for students to take courses on a wide variety of Data Science topics, and includes electives from a variety of subject areas. Graduates will be able to enter data science, analytical, and statistical fields. This program is available on-campus and online.

Full Stack

In this concentration, students will prepare to enter rapidly emerging fields related to data science and analytics. The coursework addresses relevant data analytics topics such as text analytics, visualization, algorithms and data structures, and information retrieval. Students will learn computational data analysis, data visualization, and natural language processing. Students will select four courses in consultation with the faculty advisor.

Admission

The requirements for admission to the Master of Science in Data Science and Analytics are as follows:

1. A baccalaureate degree in computer science, electrical and/or computer engineering, mathematics, statistics, information system & technology, or a related field from a regionally-accredited institution or an equivalent institution outside the U.S.; students holding a bachelor's degree in an unrelated field will need competency in topics related to basic statistics and computer science.
2. Current scores on the Test of English as a Foreign Language (TOEFL) of at least 230 on the computer based TOEFL or 79 on the TOEFL iBT, or IELTS 6.5 overall.

Students with previously completed work at a regionally-accredited institution may submit a request for a maximum of 12 elective graduate credit hours to be transferred into the program. If approved by the admission committee, it will be added to the transcript.

Curriculum Requirements

The program requires 30 credit hours. A capstone project is required.

Master of Science

Data Science and Analytics with a Concentration in Geospatial Analytics (MS)

Geospatial Analytics Concentration

This concentration enables MS Data Science students to develop advanced skills and expertise in geospatial science and technology. Incorporating Geographic Information Systems (GIS), remote sensing, and location-based data allows data scientists to uncover spatial patterns. The concentration provides a foundation across the breadth of geospatial technology to prepare data for analysis, perform suitability analysis, spatial predictive modeling, geostatistics, and space-time pattern mining and object detection. The concentration coursework (12 credits) incorporates advanced geovisualization and webmapping technology to also enhance cartography analytics and communications.

Admission

The requirements for admission to the Master of Science in Data Science and Analytics are as follows:

1. A baccalaureate degree in computer science, electrical and/or computer engineering, mathematics, statistics, information system & technology, or a related field from a regionally-accredited institution or an equivalent institution outside the U.S.; students holding a bachelor's

degree in an unrelated field will need competency in topics related to basic statistics and computer science.

2. Current scores on the Test of English as a Foreign Language (TOEFL) of at least 230 on the computer-based TOEFL or 79 on the TOEFL iBT, or IELTS 6.5 overall.

Students with previously completed work at a regionally-accredited institution may submit a request for a maximum of 12 elective graduate credit hours to be transferred into the program. If approved by the admission committee, it will be added to the transcript.

Curriculum Requirements

The program requires 30 credit hours. A capstone project is required.

Certificate

Artificial Intelligence (AI) in Data Science Certificate

The purpose of this interdisciplinary certificate is to provide an understanding of Artificial Intelligence within the context of Data Science. The program includes coursework focusing on the principles of data science,

machine learning and artificial intelligence, as well as the role of the human in interpreting the results. Students will gain knowledge on methods to process, model and visualize different types of data utilizing machine learning techniques. Students will be able to describe the major areas of artificial intelligence, including natural language processing, machine logic and robotics. Graduates will be better able to describe and understand Artificial Intelligence created by data science processes.

Admission Information

All applicants admitted to the certificate program must meet ODU requirements for graduate admission: an earned baccalaureate degree from a regionally accredited institution or an equivalent degree from a foreign institution.

Non-degree seeking students are required to have these same credentials, though documentation is not required. Ultimately, students must apply to the certificate program in order to obtain the certificate.

Curriculum Requirements

This certificate requires 12 credits and a 3.0 GPA.

CS 522	Introduction to Machine Learning	3
CS 580	Introduction to Artificial Intelligence	3
DASC 620	Introduction to Data Science and Analytics	3
DASC 771	Fundamentals of Interpretable Machine Learning and Explainable AI	3
Total Credit Hours		12

Certificate

Artificial Intelligence (AI) in Healthcare Certificate

The Graduate Certificate in Artificial Intelligence in Healthcare is designed to educate students in methods to improve healthcare delivery and improve patient outcomes using machine learning and explainable Artificial Intelligence (AI). The application of AI systems to healthcare enhances the efficiency and effectiveness of healthcare professionals and clinical processes for patient care.

Admission Information

The following admission requirements will apply to all applicants. All students must:

- Submit a completed online application and the application fee,
- Submit transcripts of all undergraduate and graduate work from regionally accredited institutions,
- Have earned a baccalaureate degree from a regionally accredited institution of higher education, or international equivalent.

Applicants who have not earned a degree in the United States must also submit:

- Current scores on the Test of English as a Foreign Language (TOEFL), with a minimum score of 230 on the computer-based TOEFL or 80 on the TOEFL iBT.

Curriculum Requirements

The certificate is awarded based upon the student's successful completion of 12 credit hours of graduate level courses:

AI/CYSE 510	Artificial Intelligence (AI) Methods and Models	3
AI/PHIL 546	Artificial Intelligence (AI) Ethics and Policy	3
AI/CS 581	Trustworthy Health Analytics	3
AI/HLSC 583	Artificial Intelligence Applications in Health	3

Jennifer Simmons, Assistant Dean, Student Affairs & Engagement

The Darden College of Education and Professional Studies offers the Master of Science (MS), Master of Science in Education (MSEd), Educational Specialist (EdS), and the Doctor of Philosophy (PhD) degrees in the following broad concentrations and areas. More complete information is found on the following department web pages.

Mission

The Darden College of Education and Professional Studies is committed to excellence in teaching, scholarly activities, and service. The college strives to meet the needs of the community while maintaining national and international prominence and is dedicated to preparing distinguished professionals who are leaders in their field. The college fulfills its mission through its undergraduate and graduate programs in the fields of education, counseling and human services, athletic training, sport management, training, fashion, and instructional and industrial technology, as well as its continuing education activities.

Departments

- Department of Counseling and Human Services (p. 143)
- Department of Human Movement Studies and Special Education (p. 161)
- Department of STEM Education & Professional Studies (p. 183)

- Educational Leadership and Workforce Development (p. 147)
- Teacher Education (p. 221)

Programs

Doctor of Philosophy Programs

- Community College Leadership (PhD) (p. 148)
- Education with a Concentration in Counseling (PhD) (p. 146)
- Education with a Concentration in Curriculum and Instruction (PhD) (p. 197)
- Education with a Concentration in Educational Leadership (PhD) (p. 152)
- Education with a Concentration in Educational Psychology and Program Evaluation (PhD) (p. 184)
- Education with a Concentration in Higher Education (PhD) (p. 157)
- Education with a Concentration in Human Movement Sciences - Applied Kinesiology (PhD) (p. 161)
- Education with a Concentration in Human Movement Sciences - Health and Sport Pedagogy (PhD) (p. 163)
- Education with a Concentration in Human Movement Sciences - Sport and Recreation Management (PhD) (p. 164)
- Education with a Concentration in Instructional Design and Technology (PhD) (p. 185)
- Education with a Concentration in Special Education (PhD) (p. 174)
- Education with a Concentration in Workforce and Organizational Development (PhD) (p. 159)

Education Specialist Programs

- Counseling (EdS) (p. 146)
- Educational Leadership with a Concentration in Administration and Supervision (Non-Licensure) (EdS) (p. 152)
- Educational Leadership with a Concentration in Administration and Supervision - Licensure (EdS) (p. 151)
- Educational Leadership with a Concentration in Higher Education (EdS) (p. 155)
- Educational Leadership with a Concentration in Occupational and Technical Studies (EdS) (p. 158)

Master of Arts in Teaching Programs

- Master of Arts in Teaching - Elementary Education (MAT) (p. 203)
- Master of Arts in Teaching - Secondary Education (MAT) (p. 204)

Master of Library and Information Studies Programs

- Library and Information Studies (MLIS) (p. 188)
- Library and Information Studies with a Concentration in School Librarianship (MLIS) (p. 189)

Master of Science Programs

- Occupational and Technical Studies (MS) (p. 191)
- Sport Management (MS) (p. 176)
- Sport Management with a Concentration in Sport Analytics (MS) (<http://catalog.odu.edu/graduate/education/human-movement-studies-special-education/sport-management-sport-analytics-ms/>)

Master of Science in Education Programs

- Counseling with a Concentration in Clinical Mental Health Counseling (MSEd) (p. 144)
- Counseling with a Concentration in School Counseling (MSEd) (p. 145)
- Early Childhood Education with a Concentration in Initial Licensure - Pre-K-3 (MSEd) (p. 196)
- Educational Leadership with a Concentration in Administration and Supervision (K-12 Licensure) (MSEd) (p. 150)
- Educational Leadership with a Concentration in Higher Education (MSEd) (p. 153)
- Elementary Education with a Concentration in Elementary Education Pre-K-6 (MSEd) (p. 198)
- Elementary Education with a Concentration in Elementary Education Pre-K-6 - IDS (Initial Licensure) (MSEd) (p. 200)
- Elementary Education with a Concentration in Instructional Design and Technology (MSEd) (p. 187)
- Elementary Education with a Concentration in Licensed Teachers (MSEd) (p. 201)
- Elementary Education with a Concentration in Mathematics Specialist PK-8 (MSEd) (p. 202)
- Physical Education with a Concentration in Adapted Physical Education (MSEd) (p. 165)
- Physical Education with a Concentration in Coaching (MSEd) (p. 166)
- Physical Education with a Concentration in Curriculum & Instruction (MSEd) (p. 167)
- Physical Education with a Concentration in Initial Virginia Licensure in Health and Physical Education (MSEd) (p. 168)

Degrees: Master of Science in Education, Education Specialist, Doctor of Philosophy in Education (Counseling)

Major: Counseling

MS.Ed. Concentrations:

- Clinical Mental Health Counseling
- School Counseling

Counseling Graduate Program

Emily Goodman-Scott, Master's Program Graduate Program Director
Gulsah Kemer, Doctoral Program Graduate Program Director

The master's degree program (including the two concentrations) and the PhD program are accredited by the Council for the Accreditation of Counseling and Related Programs (CACREP). CACREP does not accredit education specialist degree programs. Program objectives and other important information can be found in the program handbooks which are located on the department's webpages at <http://education.odu.edu/chs/academics/counseling> (<http://education.odu.edu/chs/academics/counseling/>).

As part of the program's mission, a commitment to social justice, cultural inclusivity, and reducing inequities and oppression is infused throughout coursework. The admissions process, the use of experiential and didactic learning approaches, supervision requirements, and ongoing comprehensive review and evaluation of students ensures that all graduates possess the academic and personal characteristics necessary to be effective counselors.

Master of Science in Education (MSEd)

The master's degree program offers a curriculum that emphasizes the following core components: professional orientation and ethical practice; social and cultural diversity; human growth and development; career development; helping relationships; group work; assessment; and research and program evaluation. The MSEd in counseling includes two concentration areas: Clinical Mental Health Counseling or School Counseling.

Clinical Mental Health Counseling graduates meet the educational requirements to pursue the Licensed Professional Counselor (LPC) credential in Virginia. Clinical Mental Health Counseling graduates will be prepared to work in community mental health settings, college counseling centers, hospital-based behavioral health programs, the criminal justice field, veterans' mental health, and private practice. The clinical mental health counseling concentration includes courses in substance abuse counseling, family dynamics, diagnosis and psychopathology, and clinical supervision. Additionally, evidence-based practice, assessment and diagnosis, the role of the counselor in health care, and client and population-centered advocacy are emphasized in the clinical mental health concentration.

School Counseling graduates meet requirements for the Virginia Licensed School Counselor credential. The school counseling concentration prepares graduates to act as systems-change agents throughout K-12 settings in order to address the academic and developmental needs of children, adolescents, and youth. Through the use of experiential and didactic instruction, graduates from the school counseling concentration learn to think systemically, lead effectively, and collaborate with other professionals and stakeholder groups in schools as well as communities. As advocates for children, adolescents, and youth, graduates are encouraged to embrace the belief that school counselors are a major force in closing the achievement

gap and that changes in students and programs will be observable, measurable, and impactful. The school counseling concentration includes courses in school climate and culture, counseling children and adolescents, professional issues, and program development. School Counseling students who complete electives in diagnosis, addictions, and family dynamics can also meet the educational requirements for the LPC credential in Virginia.

Education Specialist (EdS)

The Counseling Program also offers an Education Specialist degree for those seeking to re-specialize beyond their master's training in counseling or a related mental health field, and this degree can be tailored to meet the LPC or Licensed School Counselor educational requirements. The EdS degree extends counseling knowledge and skills for individuals who already hold master's degrees in counseling, and provides core master's level counseling coursework for individuals who have master's degrees in closely related fields (e.g., psychology, special education) who wish to become counselors.

Doctor of Philosophy in Education (PhD)

The PhD in Education (Counseling) prepares graduates to become counselor educators, clinical supervisors, scholars, and leaders in a variety of professional settings. Graduates are prepared for employment as counselor educator faculty members in colleges and universities and as clinicians and leaders in counseling settings in colleges, community mental health agencies, private practices, and schools or school districts. This program provides doctoral students with the skills to supervise other counselors, teach counseling skills, conduct scholarly research, lead organizations, and create new knowledge in the field of counseling. Learners in the PhD program are actively mentored to develop their competency in specific topics through presentations, extra-curricular research, and service-leadership to the counseling field.

Field Placement Experiences

The MSED and PhD programs require field placement experiences as part of students' coursework near the end of their programs. Most EdS students also complete a field placement experience. Required field placement experiences, such as practicum, internship, and observation hours, involve work in counseling settings where learners apply the knowledge, attitudes, awareness, and skills developed during their coursework. Prior to any placement in the field for observation or practicum/internship all students are required to complete a background check. Background checks are handled by the Office of Clinical Experiences. Instructions can be found on their web page (<http://www.odu.edu/success/academic/teacher-education/placement/background-checks> (<http://www.odu.edu/success/academic/teacher-education/placement/background-checks/>)). Further information about the field placement experiences can be found in the Practicum & Internship Handbooks on the department's webpages at <https://www.odu.edu/chs/internship-opportunities> (<https://www.odu.edu/chs/internship-opportunities/>).

Master of Science in Education Counseling with a Concentration in Clinical Mental Health Counseling (MSED)

Overview

The master's degree program offers a curriculum that emphasizes the following core components: professional orientation and ethical practice; social and cultural diversity; human growth and development; career development; helping relationships; group work; assessment; and research and program evaluation. The MSED in counseling includes two concentration areas: Clinical Mental Health Counseling or School Counseling.

Clinical Mental Health Counseling graduates meet the educational requirements to pursue the Licensed Professional Counselor (LPC) credential in Virginia. Clinical Mental Health Counseling graduates will be prepared to work in community mental health settings, college counseling centers, hospital-based behavioral health programs, the criminal justice field, veterans' mental health, and private practice. The clinical mental health counseling concentration includes courses in substance abuse counseling, family dynamics, diagnosis and psychopathology, and clinical supervision. Additionally, evidence-based practice, assessment and diagnosis, the role of the counselor in health care, and client and population-centered advocacy are emphasized in the clinical mental health concentration.

Linked Program Information

There is a linked program available to qualified students under existing university policy to link the Bachelor of Science with a major in Human Services (<http://catalog.odu.edu/undergraduate/education/counseling-human-services/human-services-bs/>) undergraduate program with the Master of Science in Education (Counseling with a Concentration in Clinical Mental Health Counseling) (p. 144) graduate program. See program director for additional details.

Admission

Applicants may hold a bachelor's degree in any field.

Deadlines for Admission

- New students are admitted twice each year and are eligible to begin during fall, spring, or summer semesters.
- Summer or Fall Semesters
 - March 1 – Deadline for completed applications
- Spring Semester
 - October 1 – Deadline for completed applications
- Application Requirements

For details regarding the application process, criteria used to select students, materials required of applicants, where to send application materials, and taking courses prior to admission as a non-degree graduate student, see the program web site at <http://www.odu.edu/chs/academics/m-s-ed-admissionsrequirements> (<http://www.odu.edu/chs/academics/m-s-ed-admissionsrequirements/>).

Curriculum Requirements

A minimum of 60 semester credits is required for the Master of Science in Education - Counseling with a concentration in clinical mental health counseling or school counseling. Toward the conclusion of the program, all students must pass a comprehensive exam. All students are required to take 30 credits of common-core course work. Additional course work in concentration areas is required. All students complete 100 hours of practicum and 600 hours of internship. Students are also required to complete the Responsible Conduct of Research Training (visit the ODU Office of Research webpage for additional information).

Core Courses

COUN 601	Principles of Professional Counseling and Ethics	3
COUN 631	Counseling for Lifespan Development	3
COUN 633	Counseling and Psychotherapy Techniques	3
COUN 634	Advanced Counseling and Psychotherapy Techniques, Crisis, and Trauma	3
FOUN 611	Introduction to Research Methods in Education	3
COUN 645	Testing and Client Assessment	3
COUN 648	Foundations of Career Development	3
COUN 650	Theories of Counseling and Psychotherapy	3
COUN 655	Social and Cultural Issues in Counseling	3
COUN 669	Practicum in Counseling (100 hrs min)	3
Concentration Credit Hours		30
Total Credit Hours		60

Clinical Mental Health Counseling Concentration

Required Coursework

COUN 644	Group Counseling and Psychotherapy	3
COUN 647	Addictive Disorders	3
COUN 670	Introduction to Counseling Supervision	3
COUN 680	Mental Health Counseling	3
COUN 685	Diagnosis and Treatment Planning in Mental Health Counseling	3
COUN 691	Family Systems and Family Development	3
COUN 667	Internship in Mental Health Counseling (600 hrs minimum)	6
COUN Electives		6
Total Credit Hours		30

Additional Requirements

For more information relating to this program and its requirements, please visit <http://www.odu.edu/chs>. (<http://www.odu.edu/chs/>)

Students must meet all University and program requirements to continue toward degree completion once they have been admitted. Students who earn three or more grades of C+ or lower will be dismissed from the Counseling Program. Students are also assessed on their interpersonal comportment and behavior. If faculty members have serious concerns about a student's satisfactory progress in the program, they may initiate a process that could lead to the student being asked to withdraw. Students have the right to appeal decisions on continuance made by faculty.

Program Completion and Exit

Students must successfully complete a multiple choice comprehensive examination covering the 8 core counseling competency areas, the required course of study for their concentration, and must have a minimum GPA of 3.00 to graduate.

Master of Science in Education Counseling with a Concentration in School Counseling (MSEd)

Overview

The master's degree program offers a curriculum that emphasizes the following core components: professional orientation and ethical practice; social and cultural diversity; human growth and development; career development; helping relationships; group work; assessment; and research and program evaluation. The MSEd in counseling includes two concentration areas: Clinical Mental Health Counseling or School Counseling.

School Counseling graduates meet requirements for the Virginia Licensed School Counselor credential. The school counseling concentration prepares graduates to act as systems-change agents throughout K-12 settings in order to address the academic and developmental needs of children, adolescents, and youth. Through the use of experiential and didactic instruction, graduates from the school counseling concentration learn to think systemically, lead effectively, and collaborate with other professionals and stakeholder groups in schools as well as communities. As advocates for children, adolescents, and youth, graduates are encouraged to embrace the belief that school counselors are a major force in closing the achievement gap and that changes in students and programs will be observable, measurable, and impactful. The school counseling concentration includes courses in school climate and culture, counseling children and adolescents, professional issues, and program development. School Counseling students who complete electives in diagnosis, addictions, and family dynamics can also meet the educational requirements for the LPC credential in Virginia.

Total Credit Hours		30

Additional Requirements

LPC Electives

Students in the school counseling specialization who wish to pursue the Licensed Professional Counselor (LPC) credential in Virginia should include the elective courses COUN 647 (Addictive Disorders), COUN 691 (Family Systems and Family Development), and COUN 685 (Diagnosis and Treatment Planning in Mental Health Counseling). A post-master's residency of 3400 supervised hours, plus the National Clinical Mental Health Counselor Exam (NCMHCE), are also required for the Virginia LPC.

For more information relating to this program and its requirements, please visit <http://www.odu.edu/chs>. (<http://www.odu.edu/chs/>)

Education Specialist Counseling (EdS)

The Education Specialist (Ed.S.) degree in counseling is designed to further develop learners' knowledge and skills in counseling and to cultivate their capacity for leadership as professionals. The Ed.S. is suitable for master's degree level counselors who wish to earn an additional graduate degree in counseling, or for individuals with master's degrees in related fields who wish to satisfy the academic portion of the state requirements for licensure as a professional counselor or a school counselor. It is considered a terminal counseling practitioner's degree.

Admission

Applicants may hold a bachelor's degree in any field. A master's degree in counseling or related field is also required.

Deadlines for Admission

- New students are admitted twice each year and are eligible to begin during fall, spring, or summer semesters.
- Summer or Fall Semesters
 - March 1 – Deadline for completed applications
- Spring Semester
 - October 1 – Deadline for completed applications

Application Requirements

For details regarding the application process, criteria used to select students, materials required of applicants, where to send application materials, and taking courses prior to admission as a non-degree graduate student, see the

program web site at <http://education.odu.edu/chs/academics/counseling> (<http://education.odu.edu/chs/academics/counseling/>).

Curriculum Requirements

The Education Specialist degree in counseling requires a minimum of 30 semester hours of course work beyond the master's degree. When licensed as a professional counselor or school counselor is an objective, more than 30 semester hours usually is required.

Required Courses

Ed.S. students select courses depending on their objectives. For required courses, see the website at http://education.odu.edu/chs/academics/counseling/counseling_eds.shtml (http://education.odu.edu/chs/academics/counseling/counseling_eds.shtml/).

Additional Requirements

Non-Matriculated or Non-Degree Status

Students may take a maximum of 12 credits beyond their master's degree as a non-matriculated or non-degree student before being admitted into the program.

Continuance

Students must meet all University and program requirements to continue toward degree completion once they have been admitted. Students who earn three or more grades of C+ or lower will be dismissed from the Counseling Program. If faculty members have serious concerns about a student's satisfactory progress in the program, they may initiate a process that could lead to the student being asked to withdraw. Students have the right to appeal decisions on continuance made by faculty.

Exit

Students must successfully complete the required course of study (a minimum of 30 credits) with a grade point average of 3.00 or better, and pass a written comprehensive examination.

Doctor of Philosophy Education with a Concentration in Counseling (PhD)

The Doctor of Philosophy in Education with a concentration in counseling prepares individuals for employment as counselor educators in higher education settings. Graduates are also prepared to act as leaders in clinical mental health counseling or school counseling settings as well as the professional counseling field including advocacy, supervision, assessment, and research.

Admission

Deadlines for Admission

- New students are admitted once each year and are eligible to begin during fall, spring, or summer semesters. Fall is the preferable start for PhD admits.
- October 1st of each year- Deadline for completed applications

For details regarding the application process, criteria used to select students, materials required of applicants, and where to send application materials, see the program website at <http://education.odu.edu/chs/academics/counseling> (<http://education.odu.edu/chs/academics/counseling/>).

Curriculum Requirements

Required Courses

FOUN 722	Introduction to Applied Statistics and Data Analysis	3

FOUN 822	Applied Linear Models in Educational Research	
FOUN 823	Analysis of Variance Applied to Educational Research	
COUN 898	Dissertation Seminar	3
Total Credit Hours		60

Additional Requirements

Program Course Requirements

The Doctor of Philosophy in Education (Counseling) is comprised of courses totaling 60 academic credit hours beyond the master's degree. The curriculum includes advanced courses in counseling, supervision, teaching, and research, a doctoral practicum and an internship, and 12 credits of dissertation.

Program Completion and Exit

In order to complete the program, students must complete required courses in a satisfactory manner, pass examinations, and complete an acceptable dissertation. Ph.D. students must meet all requirements included in the University Graduate Catalog, the Ph.D. in Education (Counseling) Program Handbook. It is the responsibility of the student to obtain these documents and complete requirements.

Prerequisites

Graduation from a master's degree program in counseling that was accredited by the Council on Accreditation of Counseling and Related Educational Programs (CACREP) is a prerequisite. If a doctoral student's master's degree program was not accredited by CACREP, the student must take master's-level courses and field experiences they are missing as part of their Ph.D. program.

Certificate

Advanced Counseling Practice Certificate

The Advanced Counseling Practice Certificate is a 12 hour certificate program that allows students to complete additional coursework needed for their professional endeavors.

Admissions

1. Master's in counseling or closely related field
2. Eligibility to pursue the Licensed Professional Counselor in the Commonwealth of Virginia
3. Evaluation of all graduate transcripts and resume or vita by program faculty for fitness within the scope of the certificate and future practice as a licensed counseling professional
4. Criminal background check consistent with criteria for license eligibility

Curriculum

COUN 647	Addictive Disorders	3
COUN 691	Family Systems and Family Development	3
COUN 685	Diagnosis and Treatment Planning in Mental Health Counseling	3
COUN 670	Introduction to Counseling Supervision	3
Total Credit Hours		12

Additional Requirements

Continuance

Students must maintain a cumulative 3.0 GPA to be in good academic standing.

Exit

To successfully complete the program, students must complete the four required courses with a cumulative GPA of 3.0 or better.

Educational Leadership and Workforce Development

4100 Education Building
757-683-4305

Mickey Kosloski, Chair

The Department of Educational Foundations and Leadership offers graduate programs in workforce and organizational development (PhD, career and technical education post-baccalaureate), educational leadership (MSEd, EdS, PhD), higher education (MSEd, EdS, PhD), and community college leadership (certificate, PhD).

Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in the catalog. Students should obtain current program information from their advisors and the Darden College of Education and Professional Studies website at <http://www.odu.edu/education> (<http://www.odu.edu/education/>).

Doctor of Philosophy
Community College Leadership
(PhD)

4100 Education Building
757-683-4575

James E. Bartlett, II, Ph.D., Graduate Program Director

The Ph.D. degree in Community College Leadership is designed to equip leaders for the nation's community colleges and develop researchers focusing on community college topics. The curriculum is tailored for professionals aiming to expand their knowledge and advance their careers. It includes courses in leadership, administration, workforce development, curriculum design, finance, and policy development, with an emphasis on improving student success and labor market outcomes. Participants will acquire skills that prepare them for high-level leadership positions at community colleges, as well as roles as faculty members, researchers, national policy advocates, and leaders in federal and state organizations (such as system offices, state

agencies, and federal agencies), workforce development leaders, as well as other related careers.

Students engage in a cohort model, promoting a shared learning experience, community engagement, and the broadening of professional networks. Working professionals from across the U.S. participate in live, online classes throughout the year and attend an annual, one-week Summer Institute. At the Institute, they connect with faculty, colleagues, and guest scholars. The curriculum is divided into four main areas: core community college content courses, research methods courses, electives, and a dissertation. This program is available online, with the face-to-face Summer Institute.

Admission

Prospective students seeking admission to the Ph.D. program in Community College Leadership must:

1. Meet all University admission requirements as listed in the Old Dominion University Catalog;
2. Have a completed Master's degree;
3. Provide three (3) letters of recommendation. At least one letter must come from an individual can describe the applicant's academic performance and writing ability. Letters from senior-level leaders that endorse the applicant's leadership potential are encouraged;
4. Provide a 1-page, single-spaced essay that presents a concise statement about your academic and professional background, your career goals, and your reasons for applying to this degree program. Please be specific in explaining how this program aligns with your educational and career objectives.
5. Provide an original academic writing sample, up to 2 pages double-spaced, in which you identify at least one thematic research area of interest and explain your interest in this area. Possible topics may include completion and transfer, learning outcomes, labor market outcomes, equity, technology, culture/organizational behavior, or a topic of your choosing. Be sure to describe the issue at hand and explain its significance to community college research and practice. (Possible Outline: Introduction, Area of Interest and Problem, Significance of Problem to Community College Leadership, and Conclusion)
6. Provide a CV or resume that describes the applicant's academic and professional background;
7. Applicants whose native language is not English must submit a current score for the Test of English as a Foreign Language (TOEFL) iBT of at least 80.

Applications for admission are on a rolling basis. Graduate assistantships are awarded in February annually. The admissions committee will review and select applicants. Interviews may be used to determine final admissions decisions.

Admitted students will complete the first Summer Institute in the summer semester following their admission. Students admitted for the summer will start with the Summer Institute, while those admitted in the fall or spring will complete their first Summer Institute in the subsequent summer. Both first- and second-year students are expected to attend the Summer Institute and will enroll in two courses, with the majority of the meeting time scheduled during their week at Old Dominion University's main campus. The dissertation requires a minimum of nine credit hours, depending on the time necessary for a student to complete their dissertation work.

CCL 899	Dissertation	
Total Credit Hours		54

- * Prerequisites: Doctoral students with no prior coursework in statistics must enroll in FOUN 722.
- ** CCL 868 Internship in Community College Leadership (3 credits) is required for all doctoral students who have not served in a full-time administrative position for at least three years.

Additional Requirements

Continuance

Students must meet all department, college, and university policy requirements for continuation in their academic program. See department policy above.

Exit

In order to graduate from the program, students must successfully complete all degree requirements including all coursework, candidacy requirements, and the dissertation.

Non-Degree

Non-degree students are limited to a maximum of 2 courses prior to admission unless they receive permission from the GPD. Students must receive academic advising from a program faculty member prior to enrollment in any course as a non-degree student. Taking courses as a non-degree student does not guarantee admission into the program

Certificate Community College Leadership Certificate

4100 Education Building
757-683-4375

Mitch Williams, Graduate Program Director

The synchronous, online graduate certificate in Community College Leadership is designed for emerging leaders in community college administration, as well as administrators who have recently transitioned to a community college from careers in other industries. The 15-credit program targets the American Association for Community Colleges (AACCC) standards.

Admission

Prospective students seeking admission to the graduate certificate program in Community College Leadership must:

1. Meet all University admission requirements as listed in the Old Dominion University Catalog;
2. Provide one letter of recommendation that demonstrates the applicant's academic and writing ability as well as leadership potential;
3. Provide a CV or resume that describes the applicant's academic and professional background;
4. Complete an online application; and
5. Upload transcripts of all undergraduate and/or graduate work at regionally-accredited institutions.

There are two windows for applications. Materials for Fall admission are due by May 1 and Spring admissions started October 1. The admissions committee composed of Higher Education and Community College Leadership faculty will review all applications then will make admission decisions.

Curriculum Requirements

CCL 824	Community College Finance, Fundraising, and Resource Management	3
CCL 826	Community College Curriculum, Program Development, and Quality Assurance	3
CCL 868	Internship in Community College Leadership	3
Total Credit Hours		15

Additional Requirements

Continuance

Students must meet all department, college, and university policy requirements for continuation in their academic program. See department policy above.

Exit

In order to graduate from the program, students must successfully complete all coursework.

Continuance Policy and Procedures for the Educational Leadership Program

The following policy has been established for continuance in *Educational Leadership Program*.

At the end of each semester – fall, spring, and summer – the graduate program directors (GPD) will review student records. As per university policy, students who do not maintain an overall GPA of at least 3.0 in their

ELS program will be placed on probation. Students placed on probation have one semester to bring their overall GPA back to a minimum of 3.0. A student may be placed on probation only one time in their EFL program and will not be eligible for a second probationary period. Should a student's GPA fall below 3.0 twice, he/she will be dismissed from the program.

Students who receive a grade of F in any ELS required or elective program course or who receive a final grade of lower than B- in more than one class in their program will be dismissed from their program by the Graduate Program Director and Department Chair. A failing grade in dissertation credits for one semester places the student in warning status and does not automatically dismiss the student from the program. However, two failing grades in dissertation credits will result in dismissal from the program. Students may follow the Grade Appeal Procedure in the ODU Graduate Catalog. In the event a grade is appealed such that the student comes into compliance with the EFL Continuance Policy, he/she will be reinstated.

In accord with University policy, ODU email is considered official communication.

Master of Science in Education Educational Leadership with a Concentration in Administration and Supervision (K-12 Licensure) (MSEd)

757-683-4305

<http://www.odu.edu/efl> (<http://www.odu.edu/efl/>)

Karen Sanzo, Graduate Program Director

The purpose of graduate programs in educational leadership is to prepare individuals to assume leadership responsibilities in education, training, and other human service organizations. Educational leadership offers the MSEd and the EdS degrees for candidates seeking PK-12 administration and supervision licensure. The programs prepare leaders who are visionary, who have depth of knowledge, and who can be effective and responsive organizational leaders. The programs develop graduates who can apply research-based knowledge, skills, and dispositions that translate into effective practice through innovative program instruction and authentic field-based experiences. The concentration area in educational administration and supervision is approved by the state of Virginia and is fully accredited by the Council for the Accreditation of Educator Preparation. Students complete 30 semester hours of coursework to lead to licensure as an administrator. The program is offered online only.

Admission

To gain admission, applicants must:

1. meet all University admissions requirements;
2. have an undergraduate grade point average of 2.80 overall and 3.00 in the major;
3. provide two letters of recommendation, including one from a school administrator; and,
4. write a one page essay that explains the applicant's professional experiences and personal goals, specific ways the applicant hopes to improve public education as an educational leader, and how this degree will help the applicant address her/his professional goals.
5. write a one page, single-spaced statement about a contemporary and critical issue facing educational leaders. Address the following:
 - What is the contemporary issue and why is it critical?
 - Why is this issue relevant to school and/or division leaders?
 - What role should school and/or division leaders play in addressing this issue and how?

In addition, all students who wish to enter the administration and supervision program with Commonwealth of Virginia accreditation must satisfactorily complete an administrative skills portfolio assessment process. ELS 700 must be the first course in which students enroll. *The M.S.Ed.*

in Educational Leadership with a concentration in Administration & Supervision is offered online only.

Curriculum Requirements

Program Requirements

For the Master of Science in Education with a concentration in administration and supervision, a student must have completed an approved 30-hour minimum graduate program including two internships and a culminating written comprehensive examination. Approved internship experiences are required by the Commonwealth of Virginia.

Administration and Supervision (K-12 Licensure) Concentration

Requirements for this concentration area are as follows.

Prerequisite/Corequisite

ELS 700	Strategic Leadership and Management for School Improvement	3

Curriculum

ELS 701	Accountability and Organizational Improvement	3
ELS 702	Educational Politics and Policymaking	3
ELS 710	Strategic Communication and External Relations	3
ELS 727	Learning Theories and Professional Development	3
ELS 728	Instructional Leadership and Supervision	3
ELS 753	Educational Finance and Budgeting	3
ELS 757	Educational Law and Ethics	3

Clinical Experience

ELS 668	Internship in Educational Leadership	3
ELS 669	Instructional Internship	3

Total Credit Hours **30**

* This course must be taken first and include the start of an Administration Portfolio Skills Assessment.

Additional Requirements

Continuance

Students must meet all department, college, and university policy requirements for continuation in their academic program. See department policy below.

Continuance Policy and Procedures for the Educational Leadership Program

Education Specialist Educational Leadership with a Concentration in Administration and Supervision (Non-Licensure) (EdS)

4100 Education Building
757-683-4305
<http://www.odu.edu/efl> (<http://www.odu.edu/efl/>)

Karen Sanzo, Graduate Program Director

The Education Specialist (EdS) with a concentration in Educational Leadership program is designed to provide further opportunities for holders of master's degrees to develop expertise at a higher professional level. Emphasis is on continued development for leadership in policy formulation, planning, and executive action related to educational and training institutions and human service organizations. Individuals who aspire to advance in educational leadership will find in this program a meaningful base for building toward their professional objectives. The EdS program in educational leadership includes emphasis areas in administration and supervision and in higher education.

Admission

Students must:

1. meet all University requirements;
2. provide two letters of recommendation;
3. hold a master's degree from an accredited institution (minimum 3.25 graduate grade point average on a 4.00 scale); and,
4. provide a one-page essay explaining why he/she should be admitted into the program.
5. Applicants whose admission credentials are slightly below the required minimum will be considered for provisional admission. Performance in classes as a non-degree student will not be taken into consideration in the admission process.

Curriculum Requirements

Program Requirements

The EdS requires the completion of a minimum of 30 approved semester credit hours consisting of at least 18 hours at the 800 level.

Curriculum

ELS 835	Organizational Theory and Behavior in Education	3
ELS 853	Educational Finance and Budgeting	3
ELS 871	Educational Systems Planning and Futures	3
ELS 876	Leadership for Social Justice	3
ELS 878	Leadership for Teaching and Learning	3

ELS 879	Field Research in School Administration and Supervision	3
FOUN 722	Introduction to Applied Statistics and Data Analysis	3
Select three Electives from the following:		9
ELS 811	Leadership Theory for Educational Improvement	
ELS 880	Multicultural Curriculum Leadership and Globalization	
ELS 883	Contemporary Issues in Education	
Total Credit Hours		30

Additional Requirements

Continuance

In accord with University policy, ODU email is considered official communication.

Exit

Students must successfully complete:

1. a written comprehensive examination;
2. the required course of study; and,
3. have a 3.00 grade point average or above.

Doctor of Philosophy Education with a Concentration in Educational Leadership (PhD)

Web Site: <http://www.odu.edu/efl> (<http://www.odu.edu/efl/>)

Steve Myran, Graduate Program Director

Program Requirements

The Ph.D. Program in Education with an Educational Leadership Concentration consists of a minimum of 48 academic credit hours beyond the master's degree and a minimum of 12 credits for the dissertation. The curriculum includes 18 hours of ELS content area credit, 15 hours of research methods and design credit, 12 hours of elective credit, and 3 hours

of dissertation seminar credit. Students entering the program may also need to complete one or more introductory statistics courses if they have not had such coursework or cannot demonstrate competency at a satisfactory level. Students who come into the Ph.D. program with a master's degree in an academic field that is unrelated to educational leadership and/or who have not completed courses to develop competency in specified areas may need to complete other courses in lieu of electives. *This program is available online.*

Admission

To gain admission, applicants must:

- 1. meet all University admissions requirements;
- 2. have a graduate grade point average of 3.00 overall;
- 3. provide three letters of recommendation;
- 4. write a one page, single-spaced essay that explains the applicant's qualifications, professional and career goals, and reasons for seeking the Ph.D.;
- 5. write a one page, single-spaced statement about a contemporary and critical issue facing educational leaders; and
- 6. write a one page, single-spaced statement about an instructional and/or learning issue facing your organization and the implication for school leaders and/or policy.

Curriculum Requirements

Prerequisites

FOUN 722	Introduction to Applied Statistics and Data Analysis	

Research Core

ELS 831	Accountability Systems in Public Education	3
FOUN 822	Applied Linear Models in Educational Research	3
or FOUN 823	Analysis of Variance Applied to Educational Research	
FOUN 812	Research Design and Analysis	3
TLCI 814	Qualitative Research Design in Education	3
FOUN 813	Program Evaluation in Education	3

Educational Leadership and Services Concentration Courses

ELS 811	Leadership Theory for Educational Improvement	3
ELS 815	Leadership for Equity and Inclusive Education	3
ELS 821	Policy and Politics in Educational Leadership	3
ELS 835	Organizational Theory and Behavior in Education	3
ELS 876	Leadership for Social Justice	3
ELS 878	Leadership for Teaching and Learning	3
Select four Electives from the following (other electives may be substituted with advisor approval):*		12

ELS 871	Educational Systems Planning and Futures	
ELS 874	Advanced School Finance, and Operations	
ELS 880	Multicultural Curriculum Leadership and Globalization	
ELS 883	Contemporary Issues in Education	

Capstone Course

FOUN 881	Dissertation Seminar	3

Dissertation (minimum 12 hours)

ELS 899	Dissertation	12

Total Credit Hours		60

* With advisor approval, two of these courses may be substituted with courses outside of the educational

leadership program to allow students to form cognate areas.

Additional Requirements

Continuance

Students must meet all department, college, and university policy requirements for continuance in their academic program. See department policy above.

Exit

In order to graduate from the program, students must successfully complete all degree requirements including all coursework, candidacy requirements, and the dissertation.

Continuance Policy and Procedures for the Educational Leadership Program

The following policy has been established for continuance in *Educational Leadership Program*.

At the end of each semester – fall, spring, and summer – the graduate program directors (GPD) will review student records. As per university policy, students who do not maintain an overall GPA of at least 3.0 in their ELS program will be placed on probation. Students placed on probation have one semester to bring their overall GPA back to a minimum of 3.0. A student may be placed on probation only one time in their EFL program and will not be eligible for a second probationary period. Should a student's GPA fall below 3.0 twice, he/she will be dismissed from the program.

Students who receive a grade of F in any ELS required or elective program course or who receive a final grade of lower than B- in more than one class in their program will be dismissed from their program by the Graduate Program Director and Department Chair. A failing grade in dissertation credits for one semester places the student in warning status and does not automatically dismiss the student from the program. However, two failing grades in dissertation credits will result in dismissal from the program. Students may follow the Grade Appeal Procedure in the ODU Graduate Catalog. In the event a grade is appealed such that the student comes into compliance with the EFL Continuance Policy, he/she will be reinstated.

In accord with University policy, ODU email is considered official communication.

Advancement to Candidacy Policy for all EFL Programs

In the Department of Educational Foundations and Leadership, advancement to candidacy is a formal step that occurs after the student 1) completes formal coursework, 2) passes the PhD written and oral candidacy examinations, and 3) has an approved dissertation topic.

Master of Science in Education Educational Leadership with a Concentration in Higher Education (MSEd)

4101 Education Building
757-683-4305

Kim Bullington, Graduate Program Director

The Higher Education program offers professional graduate degrees for careers in advanced leadership positions in colleges, universities, non-profit organizations, or educational associations. The program has specialized curricular tracks in student affairs administration, international higher education leadership, and leadership and administration.

Students gain professional experience through internships with a wide variety of colleges, universities, agencies, and associations in the U.S. and

abroad. A capstone experience engages students in real-life research projects that are commissioned by university and community leaders.

The program meets the requirements for graduate programs of the American College Personnel Association (ACPA), the National Association of Student Personnel Administrators (NASPA), and the Association for the Study of Higher Education (ASHE). The program meets standards established by the Council for the Advancement of Standards in Higher Education (CAS).

Admission

Prospective students seeking admission to the Master's degree program in Higher Education must:

1. Meet all University admission requirements as listed in the Old Dominion University Catalog;
2. Submit transcripts of all undergraduate work with an undergraduate GPA of 2.8 overall and 3.0 in the major (students with a GPA lower than 3.0 in the major may be admitted provisionally);
3. Provide two (2) letters of recommendation. At least one letter must come from a professor or an individual who describes the applicant's academic performance and writing ability. Letters from senior-level leaders that endorse the applicant's leadership potential are encouraged;
4. Provide a 1-page single-spaced essay that addresses the questions: What are your professional goals? Why do you wish to obtain the specific degree for which you are applying?
5. Provide a writing sample from undergraduate coursework;
6. Provide a resume that describes the applicant's academic and professional background;
7. Applicants whose native language is not English must submit a current score for the Test of English as a Foreign Language (TOEFL) iBT of at least 80.

Applicants whose admission credentials are slightly below the required minimum will be considered for provisional admission.

HIED 795	Topics in Higher Education Administration	1-6

Additional Requirements

Continuance

Students must meet all department, college, and university policy requirements for continuance in their academic program. See department policy below.

Continuance Policy and Procedures for the Educational Leadership Program

The following policy has been established for continuance in *Educational Leadership Program*.

At the end of each semester – fall, spring, and summer – the graduate program directors (GPD) will review student records. As per university policy, students who do not maintain an overall GPA of at least 3.0 in their ELS program will be placed on probation. Students placed on probation have one semester to bring their overall GPA back to a minimum of 3.0. A student may be placed on probation only one time in their EFL program and will not be eligible for a second probationary period. Should a student's GPA fall below 3.0 twice, he/she will be dismissed from the program.

Students who receive a grade of F in any ELS required or elective program course or who receive a final grade of lower than B- in more than one class in their program will be dismissed from their program by the Graduate Program Director and Department Chair. A failing grade in dissertation credits for one semester places the student in warning status and does not automatically dismiss the student from the program. However, two failing grades in dissertation credits will result in dismissal from the program. Students may follow the Grade Appeal Procedure in the ODU Graduate Catalog. In the event a grade is appealed such that the student comes into compliance with the EFL Continuance Policy, he/she will be reinstated.

In accord with University policy, ODU email is considered official communication.

Exit

In order to graduate from the program, students must successfully complete:

1. the required course of study for a total of at least 36 credit hours of coursework; and
2. pass a written comprehensive examination.

Non-Degree

Non-degree students are limited to a maximum of 2 courses prior to admission unless they receive permission from the GPD. Students must receive academic advising from a program faculty member prior to enrollment in any course as a non-degree student. Taking courses as a non-degree student does not guarantee admission into the program.

Education Specialist Educational Leadership with a Concentration in Higher Education (EdS)

Kim Bullington, Graduate Program Director

Working professionals who aspire to advance in higher education administration will find the Ed.S. program a meaningful base for building toward their professional objectives. Students who enter the Ed.S. program have diverse backgrounds, experiences, and goals. For this reason, they have the ability, through consultation with their advisor, to tailor the cognate chosen to fulfill their degree obligations towards these goals.

Admission

Prospective students seeking admission to the Ed.S. program with a Concentration in Higher Education must:

1. Meet all University admission requirements as listed in the Old Dominion University Catalog;

2. Have a completed Master's degree in an appropriate discipline from a regionally accredited university, and submit transcripts of all undergraduate and graduate work with a minimum GPA of 3.5. Degrees that are equivalent to a Master's degree such as LLB, JD, and DDS are also acceptable;
3. Provide two (2) letters of recommendation. At least one letter must come from a professor or an individual who describes the applicant's academic performance and writing ability. Letters from senior-level leaders that endorse the applicant's leadership potential are encouraged;
4. Provide a 1-page single-spaced essay that addresses the questions: What are your professional goals? Why do you wish to obtain the specific degree for which you are applying?
5. Provide an original 2-page single-spaced academic writing sample. Pick one current issue facing higher education of interest to you. What is the issue? Why is the issue important to the field of higher education research and practice?
6. Provide a CV or resume that describes the applicant's academic and professional background;
7. Applicants whose native language is not English must submit a current score for the Test of English as a Foreign Language (TOEFL) iBT of at least 80.

Applicants whose admission credentials are slightly below the required minimum will be considered for provisional admission.

Non-degree students are limited to a maximum of two HIED, CCL, and/or FOUN courses prior to admission unless they receive permission from the GPD. Non-degree students must receive academic advising by a Higher Education program faculty member prior to enrollment in any course as a non-degree student. Performance in classes as a non-degree student will not guarantee admission into the program.

Curriculum Requirements

The Education Specialist in Higher Education Concentration requires the completion of a minimum of 30 credit hours beyond the master's degree. Due to the wide variation of backgrounds among students seeking this degree, the curricular requirements will be determined based upon the applicant's background.

Required Courses *

Students, with the assistance of their advisor, will choose six courses from the following that do not repeat courses taken for the Master's degree: 18

HIED 808	Foundations of Higher Education
HIED 810	Student Affairs Administration
HIED 812	Strategic Planning
HIED 820	The Private College and University
HIED 825	Higher Education Politics and Policy
HIED 833	Professional Helping Skills in Higher Education
HIED 843	Campus Internationalization
HIED 844	Global Higher Education Systems: A Comparative Approach
HIED 845	Today's College Student
HIED 852	The Law of Higher Education
HIED 856	Institutional Finance and Resource Management
HIED 857	Learning Environment Design and Assessment
HIED 858	Higher Education Leadership
HIED 862	Institutional Advancement
HIED 863	Topical Issues in Higher Education
HIED 864	College and the University Presidency
HIED 865	Adult and Continuing Education
HIED 870	External and Internal Relations for Higher Education

HIED 871	Global and Intercultural Perspectives in Higher Education	
HIED 893	History of Higher Education	
HIED 894	Governance, Organization, and Administration of Higher Education	
CCL 820	Community College Leadership	
CCL 824	Community College Finance, Fundraising, and Resource Management	
CCL 826	Community College Curriculum, Program Development, and Quality Assurance	
CCL 830	Community College Politics, Policy, and Advocacy	
CCL 866	Seminar on the Modern Community College: Foundations, Philosophy, and Vision	
COUN 807	Adult and College Student Development	
Research Courses		
FOUN 722	Introduction to Applied Statistics and Data Analysis	3
FOUN 813	Program Evaluation in Education	3
FOUN 812	Research Design and Analysis	3
Field Experience		
HIED 868	Internship in Higher Education Administration	3
or HIED 844	Global Higher Education Systems: A Comparative Approach	
Total Credit Hours		30

* Required courses must include the following if they have not already been taken at the 700 level within a Master's degree program

HIED 808	Foundations of Higher Education	3
HIED 856	Institutional Finance and Resource Management	3
HIED 857	Learning Environment Design and Assessment	3
HIED 893	History of Higher Education	3
HIED 894	Governance, Organization, and Administration of Higher Education	3
Total Credit Hours		15

Special Courses

These courses may be used for a variety of specialized topical seminars and may fulfill requirements in one or more of the cognate areas noted above.

HIED 895	Topics in Higher Education Administration	1-6

Additional Requirements

Continuance

Students must meet all department, college, and university policy requirements for continuance in their academic program. See department policy below.

Continuance Policy and Procedures for the Educational Leadership Program

The following policy has been established for continuance in **Educational Leadership Program**.

At the end of each semester – fall, spring, and summer – the graduate program directors (GPD) will review student records. As per university policy, students who do not maintain an overall GPA of at least 3.0 in their ELS program will be placed on probation. Students placed on probation have one semester to bring their overall GPA back to a minimum of 3.0. A student may be placed on probation only one time in their EFL program

and will not be eligible for a second probationary period. Should a student's GPA fall below 3.0 twice, he/she will be dismissed from the program.

Students who receive a grade of F in any ELS required or elective program course or who receive a final grade of lower than B- in more than one class in their program will be dismissed from their program by the Graduate Program Director and Department Chair. A failing grade in dissertation credits for one semester places the student in warning status and does not automatically dismiss the student from the program. However, two failing grades in dissertation credits will result in dismissal from the program. Students may follow the Grade Appeal Procedure in the ODU Graduate Catalog. In the event a grade is appealed such that the student comes into compliance with the EFL Continuance Policy, he/she will be reinstated.

In accord with University policy, ODU email is considered official communication.

Exit

In order to graduate from the program, students must successfully complete:

1. the required course of study for a total of at least 30 credit hours of coursework; and
2. pass a written comprehensive examination.

Non-Degree

Non-degree students are limited to a maximum of 2 courses prior to admission unless they receive permission from the GPD. Students must receive academic advising from a program faculty member prior to enrollment in any course as a non-degree student. Taking courses as a non-degree student does not guarantee admission into the program.

Doctor of Philosophy Education with a Concentration in Higher Education (PhD)

Kim Bullington, Graduate Program Director

The Ph.D. Program in Education with a Higher Education Concentration is designed for those who aspire to senior administrative and faculty roles in institutions of higher education. Possession of this degree also provides those who have earned it with entry into business, government, research, and other leadership positions. The Higher Education Concentration is intended to prepare individuals for administrative and faculty positions and to provide these students with the skills to carry out scholarly research, lead organizations, and create new knowledge. The curriculum includes four parts: core courses, research courses, electives, and dissertation.

Admission

Prospective students seeking admission to the Ph.D. Program in Education - Higher Education Concentration must:

1. Meet all University admission requirements as listed in the Old Dominion University Catalog;
2. Have a completed Master's degree in an appropriate discipline from a regionally accredited university, and submit transcripts of all undergraduate and graduate work with a minimum GPA of 3.5 overall for the Master's degree. Degrees that are equivalent to a Master's degree such as L.L.B., J.D., and D.D.S. are also acceptable;
3. Provide three (3) letters of recommendation. At least one letter must come from a professor or an individual who describes the applicant's academic performance and writing ability. Letters from senior-level leaders that endorse the applicant's leadership potential are encouraged;
4. Provide a 1-page single-spaced essay that addresses the questions: What are your professional goals? Why do you wish to obtain the specific degree for which you are applying?
5. Provide an original 2-page single-spaced academic writing sample. Pick one current issue facing higher education of interest to you. What is the issue? Why is the issue important to the field of higher education research and practice?

6. Provide a CV or resume that describes the applicant's academic and professional background;
7. Applicants whose native language is not English must submit a current score for the Test of English as a Foreign Language (TOEFL) iBT of at least 80.

Applicants must submit completed application materials by February

1. The admissions committee composed of Higher Education faculty will review all applications then will select applicants for an interview with the committee or committee member(s). Interviews will be used to determine final admissions decisions.

Admitted students typically begin in the summer semester of the same year. First- and second-year students are expected to attend the Summer Institute, a series of intensive courses offered on Old Dominion University's main campus each summer. The dissertation requires a minimum of twelve credit hours depending on the length of time necessary for completion.

Curriculum Requirements

Core Courses*

HIED 805	Contemporary Issues in Higher Education	3
HIED 825	Higher Education Politics and Policy	3
HIED 852	The Law of Higher Education	3
HIED 893	History of Higher Education	3
HIED 894	Governance, Organization, and Administration of Higher Education	3

Cognate (15 credits minimum) **

Students work with advisor to select 5 courses that reflect their research interests.	15

Research***

FOUN 812	Research Design and Analysis	3
FOUN 822	Applied Linear Models in Educational Research	3
or FOUN 823	Analysis of Variance Applied to Educational Research	
TLCI 814	Qualitative Research Design in Education	3
Students work with advisor to select at least two (2) additional advanced FOUN courses.		6

Dissertation

HIED 809	Proseminar in Doctoral Studies	1-3
FOUN 881	Dissertation Seminar	3
HIED 899	Dissertation (12 credits minimum suggested)	12

Total Credit Hours	61-63

*

**

Some courses may be waived based on previous study. Students who enter the Ph.D. program have diverse backgrounds, experiences, and goals. For this reason they have the ability, through consultation with their advisor, to tailor the cognate chosen to fulfill their degree obligations towards these goals. Cognate courses may be taken in the following departments: Community College Leadership, Foundations, Higher Education, International Studies, and Sports Management. The GPD may allow other cognate areas to be developed and implemented by students and advisors upon request if a particular justification is made in writing. HIED 868 Internship in Higher Education (3-6 credits) is required for all doctoral students who have not served in a full-time administrative position for at least three years prior to admission. Prerequisites: Doctoral students with no prior coursework in statistics must enroll in FOUN 722. Doctoral students with no prior coursework in educational research must enroll in FOUN 611.

Special Courses

These courses may be used for a variety of specialized topical seminars and may fulfill requirements in one or more of the cognate areas noted above.

HIED 895 Topics in Higher Education Administration 1-6

Additional Requirements

Continuance

Students must meet all department, college, and university policy requirements for continuation in their academic program. See department policy above.

Exit

In order to graduate from the program, students must successfully complete all degree requirements including all coursework, candidacy requirements, and the dissertation.

Non-Degree

Non-degree students are limited to a maximum of 2 courses prior to admission unless they receive permission from the GPD. Students must receive academic advising from a program faculty member prior to enrollment in any course as a non-degree student. Taking courses as a non-degree student does not guarantee admission into the program.

Continuance Policy and Procedures for the Educational Leadership Program

The following policy has been established for continuance in *Educational Leadership Program*.

At the end of each semester – fall, spring, and summer – the graduate program directors (GPD) will review student records. As per university policy, students who do not maintain an overall GPA of at least 3.0 in their ELS program will be placed on probation. Students placed on probation have one semester to bring their overall GPA back to a minimum of 3.0. A student may be placed on probation only one time in their EFL program and will not be eligible for a second probationary period. Should a student's GPA fall below 3.0 twice, he/she will be dismissed from the program.

Students who receive a grade of F in any ELS required or elective program course or who receive a final grade of lower than B- in more than one class in their program will be dismissed from their program by the Graduate Program Director and Department Chair. A failing grade in dissertation credits for one semester places the student in warning status and does not automatically dismiss the student from the program. However, two failing grades in dissertation credits will result in dismissal from the program. Students may follow the Grade Appeal Procedure in the ODU Graduate Catalog. In the event a grade is appealed such that the student comes into compliance with the EFL Continuance Policy, he/she will be reinstated.

In accord with University policy, ODU email is considered official communication.

Advancement to Candidacy Policy for all EFL Programs

In the Department of Educational Foundations and Leadership, advancement to candidacy is a formal step that occurs after the student 1) completes formal coursework, 2) passes the PhD written and oral candidacy examinations, and 3) has an approved dissertation topic.

Education Specialist Educational Leadership with a Concentration in Occupational and Technical Studies (EdS)

Mickey Koslowski, Graduate Program Director

The Department of STEM Education and Professional Studies jointly offers the education specialist (EdS) with the Department of Educational Foundations and Leadership. The program offers a cohesive sequence of academic studies designed to help graduates deal effectively with administrative problems encountered in urban schools and agencies. This program does not lead to K-12 school leadership licensure.

Admission

To be admitted to the EdS program, an applicant must:

1. Hold a master's degree in career and technical education or related field;
2. Have a successful experience as an administrator or teacher;
3. Hold a teaching license or equivalent; and

Students seeking this degree need to apply through the EdS program in the Department of Educational Leadership and Counseling.

Entrance

Students must:

1. meet all University requirements,
2. provide two letters of recommendation;
3. hold a master's degree from an accredited institution (minimum 3.25 graduate grade point average),
4. provide a one-page essay explaining why he/she should be admitted to the program; and
5. have an acceptable score on the GRE or Miller Analogies Test.

Curriculum Requirements

Requirements for the EdS with a specialty in occupational and technical studies include 30 semester hours (18 hours must be completed in 800-level courses in ELS), as follows:

Educational Leadership

ELS 753	Educational Finance and Budgeting	3
ELS 871	Educational Systems Planning and Futures	3
ELS 876	Leadership for Social Justice	3
ELS 878	Leadership for Teaching and Learning	3
ELS 879	Field Research in School Administration and Supervision	3

Occupational & Technical Studies

SEPS 860	Trends and Issues in Occupational Education	3
SEPS 862	Administration and Management of Education and Training Programs	3
SEPS 885	Curriculum Development in Occupational Education and Training	3
SEPS 888	Instructional Strategies for Innovation in Training and Occupational Education	3
SEPS 889	Instructional Technology in Education and Training **	3

Total Credit Hours **30**

** And/or other courses approved by the candidate's advisor.

Additional Requirements

Continuance

Students must meet all University requirements and maintain a 3.00 or higher grade point average.

Exit

Students must successfully complete:

1. a written comprehensive examination,
2. the required course of study,

3. have a 3.00 grade point average or above, and
4. complete a university graduate student assessment.

Doctor of Philosophy Education with a Concentration in Workforce and Organizational Development (PhD)

Mickey Kosloski, Graduate Program Director

The PhD in Education, Workforce and Organizational Development concentration has three area of focus:

- career and technical education
- human resources training
- technology education.

The PhD is delivered on campus and through ODUGlobal. All students must be on the Norfolk campus for two, two-week summer Institute sessions. The focus of the degree is to prepare post-secondary workforce development faculty, directors/supervisors of career and technical education, and directors of training departments in business, industry, and government.

The curriculum associated with Old Dominion University's PhD in Education, occupational and technical studies concentration is intended to accomplish the following learning outcomes:

- Individuals will apply knowledge, skills, behaviors, and dispositions in today's complex educational and business environments.
- Every individual who completes this doctoral program will develop competencies for understanding and using research methods and statistics to make data-based driven decisions.
- The Workforce and Organizational Development concentration offers courses that enable graduates to know and apply their knowledge in today's complex educational, business, or industry environments and emerge as leaders in their chosen careers.

Note for students concerning the Doctor of Philosophy in Education - Workforce and Organizational Development concentration: This program is not intended to lead to teacher certification or school leadership licensure. This program is available on-campus and online.

Admission

Entrance

All applicants to the Doctor of Philosophy degree, Workforce and Organizational Development concentration, must meet University, college and department requirements. In addition, all applicants must:

1. hold a master's degree or equivalent related to this field;
2. complete the graduate application with necessary fee;
3. submit an essay statement of academic and professional goals with an emphasis on how the PhD in Education concentration in occupational and technical studies will contribute to the achievement of career goals;
4. submit three letters of reference from sources capable of commenting on readiness for advanced graduate study;
5. submit a resume that shows your educational and professional background;
6. submit academic transcripts from all undergraduate and graduate institutions previously attended or currently being attended;
7. if the applicant's primary language is not English, submit a current score for the Test of English as a Foreign Language (TOEFL) that meets the University's current standard.

Applications for admission are on a rolling basis. Graduate assistantships are awarded in February annually.

Students may enroll in this program full- or part-time. The program faculty reviews all applicants as their application packages are completed. The following criteria are used for admittance:

1. graduate grade point average;
2. undergraduate grade point average;
3. essay, 1500 word, describing how the PhD in OTS aligns with your professional goals; and
4. goodness of fit with program goals, faculty expertise, and supporting references.

Graduate assistantships and fellowships may be available. Contact the graduate program director for information.

Curriculum Requirements

Prerequisites

A master's degree in an appropriate field related to this concentration is required for admission to the PhD program. Students who do not have equivalent coursework or appropriate educational experiences must complete the following prerequisite courses:

FOUN 722	Introduction to Applied Statistics and Data Analysis	3
Total Credit Hours		3

Curriculum (60 credits minimum)

Students in the Workforce and Organizational Development concentration complete courses in research, the Workforce and Organizational Development concentration, and electives. Students select their elective credits in consultation with their advisor.

Research Core

SEPS 835	Research Design for Occupational and Technical Studies *	3
FOUN 812	Research Design and Analysis	3
FOUN 822	Applied Linear Models in Educational Research	3
or FOUN 823	Analysis of Variance Applied to Educational Research	
TLCI 814	Qualitative Research Design in Education	3

Concentration Core

Must be taken with one emphasis area-Technology Education, Career and Technical Education, or Human Resources-Training

SEPS 840	Readings in Occupational and Technical Studies	3
SEPS 860	Trends and Issues in Occupational Education	3
SEPS 862	Administration and Management of Education and Training Programs	3
SEPS 865	Trends and Issues of Economic and Workforce Development	3
SEPS 885	Curriculum Development in Occupational Education and Training	3
SEPS 888	Instructional Strategies for Innovation in Training and Occupational Education	3
SEPS 889	Instructional Technology in Education and Training	3

Select one of the following Emphasis Areas: 12

<i>Technology Education Emphasis</i>		
STEM 820	STEM Educational Foundations	
STEM 830	Introduction to Technology	
<i>Career and Technical Education Emphasis</i>		
SEPS 868	Internship	
SEPS 887	Career and Technical Education Curriculum	
<i>Human Resources - Training Emphasis</i>		
SEPS 861	Foundations of Adult Education and Training	

Electives		
Electives are selected in consultation with the advisor. They should be planned and included in the student's program of study.		9-12
Capstone Courses		
Select 12-15 credits of the following:		12-15
FOUN 881	Dissertation Seminar (if needed)	
SEPS 899	Dissertation in Occupational Education	
Total Credit Hours		66-72

Additional Requirements

Continuance

Students must:

1. have their PhD program approved;
2. successfully complete annual progress reviews;
3. meet faculty and University program expectations;
4. meet professional development and career preparation expectations.

Exit

Students must:

1. complete a minimum of 60 credit hours beyond the master's degree;
2. complete all competencies listed on course syllabi;
3. achieve an overall grade point average of 3.00 with no course having a grade less than a B-;
4. pass the written and oral comprehensive examination;
5. select a dissertation committee;
6. prepare and defend a dissertation prospectus;
7. successfully complete a dissertation with an oral defense; and
8. complete the graduate student University assessment.

Post-Baccalaureate Endorsement Marketing Education Post-Baccalaureate Endorsement

Michael F. Kosloski, Program Coordinator

The post-baccalaureate endorsement in marketing education is designed to prepare a person who has a baccalaureate degree to be a marketing education teacher-coordinator. Participants who successfully complete this program will qualify to apply for a Virginia teaching license to teach marketing education.

Admission

For those students seeking licensure only, they must first apply to ODU as non-degree seeking. Students subsequently complete undergraduate or graduate level courses that meet Virginia licensure requirements. For students simultaneously seeking a graduate degree, they should apply for the graduate program and may take up to 12 credit hours that may be used toward both the MS and post-baccalaureate programs. Students should schedule an interview with the program coordinator for program admissions as well as to discuss course evaluation and options.

Curriculum Requirements

Complete the following courses:

SEPS 297	Observation and Participation	1
SEPS 400/500	Instructional Systems Development	3
SEPS 401/501	Foundations of Career and Technical Education	3
SEPS 402/502	Instructional Methods in Occupational Studies	3
SEPS 408/508	Advanced Classroom Issues and Practices in Career and Technical Education	3

SEPS 450/550	Assessment, Evaluation and Improvement	3
SEPS 485	Student Teaching	12
READ 680	Literacy Across the Curriculum	3
or SPED 313	Fundamentals of Human Growth and Development: Birth through Adolescence	
Total Credit Hours		31

Additional Requirements

Continuation and Exit

Students must:

1. earn a 2.75 cumulative grade point average if licensure is at the undergraduate level and a 3.00 cumulative grade point average if licensure is at the graduate level;
2. document at least 4000 clock hours of marketing-related work experience completed within the past five years or complete a directed field experience (SEPS 405);
3. earn credit in any marketing- related content courses required by the Virginia Department of Education that have not yet been met. Such courses are identified in a transcript evaluation of all prior college-level work. Students with an undergraduate degree in marketing is considered to have met all content requirements. Experiential credit may be considered for individual courses on a case-by-case basis.
4. complete a university graduate student assessment if enrolled in the M.S. degree program.
5. obtain certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training. These must be on file with the Office of Clinical Experiences.

Twelve hours of 500/600 level courses may be applied toward the Master of Science in occupational and technical studies, career and technical education teaching concentration.

Post-Baccalaureate Endorsement Technology Education Post-Baccalaureate Endorsement

Mickey Kosloski, Graduate Program Director

The post-baccalaureate endorsement in technology education is designed to prepare a person who has a baccalaureate degree to be a technology education teacher. Participants who successfully complete this program will qualify to apply for a Virginia teaching license to teach technology education.

Admission

For those students seeking licensure only, they must first apply to ODU as non-degree seeking. Students subsequently complete undergraduate or graduate level courses that meet Virginia licensure requirements. For students simultaneously seeking a graduate degree, they should apply for the graduate program and may take up to 12 credit hours that may be used toward both the M.S. and post-baccalaureate programs. Students should schedule an interview with the program coordinator for program admissions as well as to discuss course evaluation and options.

Curriculum Requirements

Complete the following courses:

FOUN 612	Applied Research Methods in Education	3
READ 680	Literacy Across the Curriculum	3
SEPS 586	Middle School Student Teaching for Technical Education	6
SEPS 596	Topics in Career and Technical Education	1-3

SEPS 636	Problems in Occupational and Technical Studies	3
SEPS 788	Instructional Strategies for Innovation in Training and Occupational Education	3
SEPS 789	Instructional Technology in Education and Training	3
TLED 608	Foundations of Education and Instructional Assessment	3
SPED 613	Human Growth and Development	3
STEM 231	Materials and Processes Technology	3
STEM 320	Manufacturing and Construction Technology	3
STEM 350	Communication Technology Processes	3
STEM 351	Communication Technology	3
STEM 730	Introduction to Technology	3
Total Credit Hours		43-45

Additional Requirements

Continuance and Exit

Students must:

1. earn a 2.75 cumulative grade point average on undergraduate level courses and a 3.00 cumulative grade point average at the graduate level,
2. complete the graduate student University assessment.
3. Obtain certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training. These must be on file with the Office of Clinical Experiences.

Complete this licensure program and other departmental requirements will allow the candidate to earn the Master of Science in occupational and technical studies, career and technical education teaching concentration.

Department of Human Movement Studies and Special Education

2006 Student Recreation Center
757 683-4995 (phone)
757 683-4270 (fax)

Xihe Zhu, Chair

The Department of Human Movement Studies and Special Education offers graduate programs leading to Master's degrees in three disciplines, which includes Health and Physical Education, Special Education, and Sport Management. Within Physical Education, there are concentrations in Adapted Physical Education, Curriculum & Instruction, Coaching Education, and Initial Virginia Teaching Licensure in Health & Physical Education. Within Special Education, there are concentrations in Early Childhood Special Education, K-12 General Curriculum, and K-12 Adapted Curriculum. Additionally, students can earn a graduate certificate in Adapted Physical Education, Applied Behavior Analysis, and Autism. We also offer a Doctoral degree (PhD in Education - Human Movement Sciences, and Special Education concentrations) with emphasis areas in Health & Sport Pedagogy, and Sport & Recreation Management.

Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in the catalog. Students should obtain current program information from their advisors and the Darden College of Education and Professional Studies website at <http://www.odu.edu/education>. (<http://education.odu.edu/>)

Doctor of Philosophy Education with a Concentration in Human Movement Sciences - Applied Kinesiology (PhD)

Justin Haegele, Ph.D.
2009 Student Recreation Center
757-683-5338
jhaegele@odu.edu

The goal of our doctoral program is to prepare professionals with research knowledge, critical thinking skills and problem solving abilities required to be successful leaders, scholars, and educators. The program provides a

solid theoretical foundation, advanced methodological training, one-on-one mentorship, and opportunities to teach undergraduate courses.

We offer a PhD in Education with a concentration in Human Movement Sciences. There are three emphasis areas within the HMS concentration. These include:

Applied Kinesiology Emphasis – this area focuses on Exercise Physiology and Biomechanics and prepares graduates for positions as post-doctoral research fellows, university faculty, and/or governmental research officials.

Sport & Recreation Management Emphasis – this area focuses on issues related to the administration of sport and recreation organizations. Graduates are prepared for careers as faculty or administrators in higher education, private organizations, public agencies, and/or other research-based institutions.

Health & Sport Pedagogy Emphasis – this area focuses on research, scholarship, and leadership opportunities in health and sport pedagogy. This program prepares individuals for academic positions in departments of physical education/ kinesiology at universities and colleges.

Admission

Admission and Entrance Requirements

Admission to the Human Movement Sciences concentration of the Ph.D. in Education is competitive and meeting the minimum requirements does not ensure admission to the program. The admissions committee reviews applications and considers a number of criteria, including a goodness of fit between student and faculty.

The deadline for applying is January 15. Applicants may be contacted to set up an interview as part of the final selection process.

Individuals interested in applying for the doctoral program with a concentration in Human Movement Sciences must submit the following:

- An application to the University. Contact the Office of Graduate Admissions for applications. Applications for graduate study can be completed online or submitted to the Office of Graduate Admissions (<http://www.odu.edu/admission/graduate/>) (757-683-3685). Apply for the Ph.D. Human Movement Sciences Concentration.
- Official transcripts of all undergraduate and graduate courses and degrees completed. To be considered for the program, applicants must have completed a Bachelor's and a Master's degree from regionally accredited colleges/universities. At least one degree should be in a related discipline to the emphasis area. A minimum GPA of 3.5 (on a 4.0 scale) for the Master's degree is required.
- Two writing samples. The first writing sample should be a research-based document that includes citations and a list of references. This could be a submitted manuscript or published article, a summary of your thesis, or a research paper from a graduate course. The second writing sample should be a personal statement that explains your qualifications, professional and career goals, and reasons for seeking the Ph.D. In this second essay, you must also identify the potential professor(s) at ODU with whom you share common research interests.
- A current copy of your résumé or Curriculum Vitae.
- Three letters of recommendation from professional sources qualified to assess your suitability for study at the doctoral level. One letter of recommendation should be from a graduate advisor or faculty member and one should be from a current or former supervisor.
- Official GRE scores taken within the last 5 years that indicate a total score of at least 297 (1000 by former scoring standard) for both the verbal reasoning and quantitative reasoning sections and a minimum of 4.5 on the analytical writing component. While these scores are recommended, other portions of the total application package will be considered. The Sport and Recreation Management emphasis area will also accept GMAT scores of 470 or higher.
- Applicants whose native language is not English must also submit current scores for the Test of English as a Foreign Language (TOEFL) of at least 550.

After successful advancement to candidacy, all doctoral students are required to be registered for at least one graduate credit hour each term (fall, spring, and summer) until the degree is completed, including the semester in which they graduate. Failure to comply with this requirement will result in charges to the student's account for one graduate credit hour plus required fees for each semester after passing the candidacy examination. Students are not eligible for graduation until all charges are paid.

Curriculum

Patrick Wilson, Ph.D.
2003A Student Recreation Center
757-683-4783

Requirements for the emphasis are as follows (minimum of 60 credits):

Prerequisite Courses

Prerequisite Coursework *

FOUN 612	Applied Research Methods in Education
FOUN 722	Introduction to Applied Statistics and Data Analysis

Research Core

FOUN 812	Research Design and Analysis	3
TLCI 814	Qualitative Research Design in Education	3
FOUN 822	Applied Linear Models in Educational Research	3
FOUN 823	Analysis of Variance Applied to Educational Research	3

Professional Preparation

Select two of the following:	6
HMS 890	Doctoral Studies Seminar
FOUN 881	Dissertation Seminar
TLCI 803	Theoretical Perspectives in Curriculum and Instruction
TLCI 804	Instruction Theories and Models

Applied Kinesiology Emphasis

EXSC 827	Advanced Biomechanics	3
EXSC 830	Advanced Cardiovascular Exercise Physiology	3
EXSC 838	Exercise Endocrinology	3
EXSC 840	Ergogenic Aids in Sport and Human Performance	3
HMS 897	Independent Study in Human Movement Sciences	3

Electives **

Select three of the following:	9
BME 821	Mathematical Modeling in Physiology
BIOL 816	Endocrinology
BIOL 824	Neuromuscular Physiology
BIOL 889	Gross Anatomy

Dissertation Capstone Courses

HMS 899	Dissertation	12

Total Credit Hours	54

- + A master's degree in an appropriate field related to this concentration is required for regular admission to the Ph.D. in human movement science.
- * Students who do not have equivalent coursework or appropriate educational experiences must complete these prerequisite courses.
- ** Substitute other courses by permission of advisor.

Additional Requirements

Continuance and Exit Requirements

Students completing the program of study must:

- Have an overall grade point average of 3.0 or higher
- Satisfy all course competencies
- Pass comprehensive examinations
- Complete a dissertation
- Have an exit interview with the program director
- File the necessary paperwork for graduation

Doctor of Philosophy Education with a Concentration in Human Movement Sciences - Health and Sport Pedagogy (PhD)

Justin Haegele, Ph.D.
2009 Student Recreation Center
757-683-5338
jhaegele@odu.edu

The goal of our doctoral program is to prepare professionals with research knowledge, critical thinking skills and problem solving abilities required to be successful leaders, scholars, and educators. The program provides a solid theoretical foundation, advanced methodological training, one-on-one mentorship, and opportunities to teach undergraduate courses.

We offer a PhD in Education with a concentration in Human Movement Sciences. There are two emphasis areas within the HMS concentration. These include:

Sport & Recreation Management Emphasis – this area focuses on issues related to the administration of sport and recreation organizations. Graduates are prepared for careers as faculty or administrators in higher education, private organizations, public agencies, and/or other research-based institutions.

Health & Sport Pedagogy Emphasis – this area focuses on research, scholarship, and leadership opportunities in health and sport pedagogy. This program prepares individuals for academic positions in departments of physical education/ kinesiology at universities and colleges.

Admission

Admission and Entrance Requirements

Admission to the Human Movement Sciences concentration of the PhD in Education is competitive and meeting the minimum requirements does not ensure admission to the program. The admissions committee reviews applications and considers a number of criteria, including a goodness of fit between student and faculty.

The deadline for applying is January 15. Applicants may be contacted to set up an interview as part of the final selection process.

Individuals interested in applying for the doctoral program with a concentration in Human Movement Sciences must submit the following:

- An application to the University. Contact the Office of Graduate Admissions for applications. Applications for graduate study can be completed online or submitted to the Office of Graduate Admissions (<http://www.odu.edu/admission/graduate/>) (757-683-3685). Apply for the PhD Human Movement Sciences Concentration.
- Official transcripts of all undergraduate and graduate courses and degrees completed. To be considered for the program, applicants must have completed a Bachelor's and a Master's degree from regionally accredited colleges/universities. At least one degree should be in a related discipline to the emphasis area. A minimum GPA of 3.5 (on a 4.0 scale) for the Master's degree is required.

- Two writing samples. The first writing sample should be a research-based document that includes citations and a list of references. This could be a submitted manuscript or published article, a summary of your thesis, or a research paper from a graduate course. The second writing sample should be a personal statement that explains your qualifications, professional and career goals, and reasons for seeking the PhD. In this second essay, you must also identify the potential professor(s) at ODU with whom you share common research interests.
- A current copy of your résumé or Curriculum Vitae.
- Three letters of recommendation from professional sources qualified to assess your suitability for study at the doctoral level. One letter of recommendation should be from a graduate advisor or faculty member and one should be from a current or former supervisor.
- Official GRE scores taken within the last 5 years that indicate a total score of at least 297 (1000 by former scoring standard) for both the verbal reasoning and quantitative reasoning sections and a minimum of 4.5 on the analytical writing component. While these scores are recommended, other portions of the total application package will be considered. The Sport and Recreation Management emphasis area will also accept GMAT scores of 470 or higher.
- Applicants whose native language is not English must also submit current scores for the Test of English as a Foreign Language (TOEFL) of at least 550, or other equivalent scores.

After successful advancement to candidacy, all doctoral students are required to be registered for at least one graduate credit hour each term (fall, spring, and summer) until the degree is completed, including the semester in which they graduate. Failure to comply with this requirement will result in charges to the student's account for one graduate credit hour plus required fees for each semester after passing the candidacy examination. Students are not eligible for graduation until all charges are paid.

Curriculum

Justin Haegele, Ph.D., Graduate Program Director
2009 Student Recreation Center
757-683-5338

Requirements for the emphasis are as follows (minimum of 60 credits):

Research Core (12 credits minimum, required*)

FOUN 812	Research Design and Analysis *	3
TLCI 814	Qualitative Research Design in Education	3
FOUN 822	Applied Linear Models in Educational Research *	3
FOUN 823	Analysis of Variance Applied to Educational Research *	3
FOUN 825	Applied Multilevel Modeling in Educational Research	3
FOUN 826	Applied Structural Equation Modeling in Educational Research	3
PSYC 847	Multivariate Methods for the Social/ Behavioral Sciences	3

Health & Sport Pedagogy Emphasis

HPE 718	Applied Learning and Coaching Theory	3
HPE 721	Motivational Issues in Sports	3
HPE 804	Advanced Studies in Adapted Physical Education	3
HPE 819	Planning and Administration in PE and Sport Programs	3
HPE 820	Curriculum Development in Physical Education	3
HPE 840	Motor Learning and Development	3
HPE 845	Assessment/Evaluation and Technology in Sport/PE	3

Professional Preparation (9 credits minimum, required*)

FOUN 881	Dissertation Seminar *	

HMS 890	Doctoral Studies Seminar
PSYC 833	Grant and Manuscript Writing
or TLCI 804	Instruction Theories and Models

Advisor Approved Electives

Select a minimum of 6 credits from the following. Other electives may be approved. Consult with your advisor. 6

PSYC 845	Applied Psychometrics
HIED 857	Learning Environment Design and Assessment
PSYC 835	Health Psychology
SPED 801	Historical and Contemporary Research in Special Education
FOUN 816	Single Subject Research Designs
PRTS 880	Youth Development in Recreation

Dissertation Capstone Course (12 credits, required*)

HMS 899	Dissertation *	12
Total Credit Hours		60

Additional Requirements

Continuance and Exit Requirements

Students completing the program of study must:

- Have an overall grade point average of 3.0 or higher
- Satisfy all course competencies
- Pass comprehensive examinations
- Complete a dissertation
- Have an exit interview with the program director
- File the necessary paperwork for graduation

Doctor of Philosophy Education with a Concentration in Human Movement Sciences - Sport and Recreation Management (PhD)

Justin Haegele, Ph.D.
2009 Student Recreation Center
757-683-5338
jhaegele@odu.edu

The goal of our doctoral program is to prepare professionals with research knowledge, critical thinking skills and problem solving abilities required to be successful leaders, scholars, and educators. The program provides a solid theoretical foundation, advanced methodological training, one-on-one mentorship, and opportunities to teach undergraduate courses.

We offer a PhD in Education with a concentration in Human Movement Sciences. There are two emphasis areas within the HMS concentration. These include:

Sport & Recreation Management Emphasis – this area focuses on issues related to the administration of sport and recreation organizations. Graduates are prepared for careers as faculty or administrators in higher education, private organizations, public agencies, and/or other research-based institutions.

Health & Sport Pedagogy Emphasis – this area focuses on research, scholarship, and leadership opportunities in health and sport pedagogy. This program prepares individuals for academic positions in departments of physical education/ kinesiology at universities and colleges.

Admission

Admission and Entrance Requirements

Admission to the Human Movement Sciences concentration of the PhD in Education is competitive and meeting the minimum requirements does

not ensure admission to the program. The admissions committee reviews applications and considers a number of criteria, including a goodness of fit between student and faculty.

The deadline for applying is January 15. Applicants may be contacted to set up an interview as part of the final selection process.

Individuals interested in applying for the doctoral program with a concentration in Human Movement Sciences must submit the following:

- An application to the University. Contact the Office of Graduate Admissions for applications. Applications for graduate study can be completed online or submitted to the Office of Graduate Admissions (<http://www.odu.edu/admission/graduate/>) (757-683-3685). Apply for the PhD Human Movement Sciences Concentration.
- Official transcripts of all undergraduate and graduate courses and degrees completed. To be considered for the program, applicants must have completed a Bachelor's and a Master's degree from regionally accredited colleges/universities. At least one degree should be in a related discipline to the emphasis area. A minimum GPA of 3.5 (on a 4.0 scale) for the Master's degree is required.
- Two writing samples. The first writing sample should be a research-based document that includes citations and a list of references. This could be a submitted manuscript or published article, a summary of your thesis, or a research paper from a graduate course. The second writing sample should be a personal statement that explains your qualifications, professional and career goals, and reasons for seeking the PhD. In this second essay, you must also identify the potential professor(s) at ODU with whom you share common research interests.
- A current copy of your résumé or Curriculum Vitae.
- Three letters of recommendation from professional sources qualified to assess your suitability for study at the doctoral level. One letter of recommendation should be from a graduate advisor or faculty member and one should be from a current or former supervisor.
- Official GRE scores taken within the last 5 years that indicate a total score of at least 297 (1000 by former scoring standard) for both the verbal reasoning and quantitative reasoning sections and a minimum of 4.5 on the analytical writing component. While these scores are recommended, other portions of the total application package will be considered. The Sport and Recreation Management emphasis area will also accept GMAT scores of 470 or higher.
- Applicants whose native language is not English must also submit current scores for the Test of English as a Foreign Language (TOEFL) of at least 550, or equivalent score.

After successful advancement to candidacy, all doctoral students are required to be registered for at least one graduate credit hour each term (fall, spring, and summer) until the degree is completed, including the semester in which they graduate. Failure to comply with this requirement will result in charges to the student's account for one graduate credit hour plus required fees for each semester after passing the candidacy examination. Students are not eligible for graduation until all charges are paid.

Curriculum

Requirements for the emphasis are as follows (minimum of 60 credits):

Prerequisite Courses

FOUN 612	Applied Research Methods in Education
FOUN 722	Introduction to Applied Statistics and Data Analysis

Research Core

Select a minimum of 12 credits from the following: 12

FOUN 812	Research Design and Analysis
FOUN 813	Program Evaluation in Education
TLCI 814	Qualitative Research Design in Education
FOUN 818	Analysis with Large Datasets
FOUN 822	Applied Linear Models in Educational Research

FOUN 823	Analysis of Variance Applied to Educational Research	
FOUN 825	Applied Multilevel Modeling in Educational Research	
FOUN 826	Applied Structural Equation Modeling in Educational Research	
FOUN 840	Educational Measurement and Assessment	
FOUN 870	Formative Assessment of Student Learning	
Professional Preparation		
Select a minimum of 9 credits from the following:		9
HMS 890	Doctoral Studies Seminar	
FOUN 830	Theories of Learning and Instruction	
FOUN 835	Motivation in Education	
FOUN 881	Dissertation Seminar	
TLCI 731	Instructional Technology Trends in Curriculum and Instruction	
TLCI 803	Theoretical Perspectives in Curriculum and Instruction	
TLCI 804	Instruction Theories and Models	
Sport Management Emphasis		
Select a minimum of 18 credits from the following:		18
SMGT 785	Sport Entrepreneurship	
SMGT 838	Sport Finance	
SMGT 846	Strategic Marketing in Sport	
SMGT 850	Ethics in Sport Management	
SMGT 855	Social Issues in Sport	
SMGT 860	Sport Law	
SMGT 875	Management and Leadership in Sport	
SMGT 890	Applied Sport Analytics	
Electives*		
Select a minimum of 9 credits from the following:		9
MGMT 835	Organization Theory	
MGMT 838	Strategic Entrepreneurship Seminar	
MKTG 802	Seminar in Marketing Concepts and Issues	
MKTG 803	Seminar in Consumer Behavior	
PADM 801	Policy Theory	
PADM 845	Managing Development and Change in Organizations	
Dissertation Capstone Courses		
HMS 899	Dissertation	12
Total Credit Hours		60

* List of electives is not comprehensive. Prior approval from graduate advisor is required for other possible electives.

Additional Requirements

Continuance and Exit Requirements

Students completing the program of study must:

- Have an overall grade point average of 3.0 or higher
- Satisfy all course competencies
- Pass comprehensive examinations
- Complete a dissertation
- Have an exit interview with the program director
- File the necessary paperwork for graduation

Master of Science in Education Physical Education with a Concentration in Adapted Physical Education (MSEd)

Student Recreation Center
757-683-3351

Within each concentration, there are thesis and non-thesis options.

Justin Haegle, Ph.D., Graduate Program Director
2009 Student Recreation Center
757-683-5338

Linked Program Information

There is a linked program available to qualified students under existing university policy to link the Bachelor of Science (Physical Education with a Major in PreK-12 Health and Physical Education) (<http://catalog.odu.edu/undergraduate/education/human-movement-studies-special-education/physical-education-prek-12-health-bs/>) undergraduate program with the Master of Science in Education (Physical Education with a Concentration in Adapted Physical Education) (p. 165) graduate program. See program director for additional details.

Admission

Admission and Entrance Requirements

Applicants for the MSEd in Physical Education are required to submit credentials for consideration through the Office of Graduate Admissions at Old Dominion University. Students applying for admission with regular status must have:

- A completed online application via www.odu.edu/admission/graduate (<http://www.odu.edu/admission/graduate/>)
- A baccalaureate degree from a regionally-accredited institution or an equivalent degree from a foreign institution
- 2.8 cumulative GPA or higher (on a 4.0 scale) *
- 3.0 GPA or higher in the undergraduate major *
- A combined GRE score of 291 or higher (verbal and quantitative sections) *
- Personal essay (no more than two pages) addressing motivations to apply to program, career interests, and ability to complete graduate level work
- Three letters of recommendation (from former professors or employers)
- Current copy of résumé
- Transcripts from all prior postsecondary institutions
- Test of English as a Foreign Language (TOEFL) score of 550 on the paper-based test (or 79-80 on the iBT) for non-native English speakers

* Students who have a low GPA or a low GRE score may be considered for admission with provisional status.

* The program admissions committee will consider GRE waiver requests for high potential candidates by considering application elements that demonstrate the ability to take on the rigor of graduate level studies. A request for a waiver does not guarantee that a waiver will be granted.

Curriculum

Research Core

FOUN 611	Introduction to Research Methods in Education	3
or FOUN 612	Applied Research Methods in Education	
FOUN 722	Introduction to Applied Statistics and Data Analysis (Research Core)	3

Core Courses

HPE 504	Adapted Physical Education	3

HPE 704	Advanced Studies in Adapted Physical Education	3
HPE 719	Planning and Administration in PE and Sport Programs	3
HPE 740	Motor Learning and Development	3
HPE 745	Assessment/Evaluation and Technology in Sport/PE	3
Electives		
Select one of the following:		3
SPED 625	Characteristics of Students with Autism Spectrum Disorders *	
SPED 621	Effective Interventions for Children and Youth with Challenging Behavior **	
HPE 718	Applied Learning and Coaching Theory	
HPE 720	Curriculum Development in Physical Education	
Thesis		
HMS 698	Thesis	3
HMS 699	Thesis	3
Research Project Option ***		
HPE 636	Research Problems in Health & Physical Education	3
Total Credit Hours		33

- * One SPED course is strongly recommended to meet CAPE certification requirements.
- ** List is not comprehensive. Prior approval from graduate advisor is required for other possible electives
- *** An additional Requirement of comprehensive exam based on core course requirements

Additional Requirements

Continuance and Exit Requirements

Students must meet all requirements for continuance as outlined in the graduate continuance policy for the University. Students completing the program of study must:

- Have an overall grade point average of 3.0 or higher
- Have a grade point average of 3.0 or higher in the major
- Demonstrate writing proficiency
- Satisfy all course competencies
- Complete a research problem or thesis
- If doing a research problem, also pass a comprehensive examination
- File the necessary paperwork for graduation

Master of Science in Education Physical Education with a Concentration in Coaching (MSEd)

Student Recreation Center
757-683-3351

Within each concentration, there are thesis and non-thesis options.

This emphasis will offer additional theories and knowledge in the coaching profession providing advanced skills to those individuals pursuing a coaching career. The courses selected for the Coaching Education emphasis area will meet accreditation standards, certify students as athletic coaches, and provide valuable knowledge and skills.

Justin Haegele, PhD, Graduate Program Director
2009 Student Recreation Center
757-683-5338

Linked Program Information

* Students who have a low GPA or a low GRE score may be considered for admission with provisional status.

* The program admissions committee will consider GRE waiver requests for high potential candidates by considering application elements that demonstrate the ability to take on the rigor of graduate level studies. A request for a waiver does not guarantee that a waiver will be granted.

Curriculum

Prerequisites

BIOL 250 or BIOL 240	Human Anatomy and Physiology I Fundamentals of Anatomy and Physiology I
EXSC 322	Anatomical Kinesiology
HPE 409	Physiology of Exercise

Note: Students who do not have equivalent coursework or appropriate educational experiences must complete these prerequisite courses.

Research Core

FOUN 611 or FOUN 612	Introduction to Research Methods in Education Applied Research Methods in Education	3
FOUN 722	Introduction to Applied Statistics and Data Analysis	3

Core Courses

HPE 718	Applied Learning and Coaching Theory	3
HPE 719	Planning and Administration in PE and Sport Programs	3
HPE 721	Motivational Issues in Sports	3
HPE 740	Motor Learning and Development	3

HPE 745	Assessment/Evaluation and Technology in Sport/PE	3

Capstone Experience

Select one of the following:	6

Internship Option (3-6 Credits): *

HPE 668	Internship in Health & Physical Education

Electives (3-6 credits)

Thesis Option: (3-6 Credits)	

HPE 698	Thesis

HPE 699	Thesis

Electives (3-6 credits)

Electives **	

Select one of the following:	3

EXSC 508	Nutrition for Fitness and Sport (pre-req EXSC 409 Ex Phys)

HPE 509	Exercise Physiology (recommended if you have not taken HPE 409 or equivalent as a prerequisite)

HPE 720	Curriculum Development in Physical Education

SMGT 760	Sport Law

Total Credit Hours	30

* The hours for the internship and electives are variable depending on the student's interest for elective options and availability of internship opportunities. Passing the comprehensive exams is required for the internship option

** List of electives is not comprehensive. Prior approval from graduate advisor is required for other possible electives.

Additional Requirements

Continuance and Exit Requirements

Students must meet all requirements for continuance as outlined in the graduate continuance policy for the University. Students completing the program of study must:

- Have an overall grade point average of 3.0 or higher
- Have a grade point average of 3.0 or higher in the major
- Demonstrate writing proficiency
- Satisfy all course competencies
- Complete an internship, research problem, or thesis
- If doing an internship or research problem, also pass a comprehensive examination
- Have an exit interview with the program director
- File the necessary paperwork for graduation

Master of Science in Education Physical Education with a Concentration in Curriculum & Instruction (MSEd)

Student Recreation Center
757-683-3351

This program is designed to prepare students and practitioners for advanced study in the concepts, theories, research, and management of health and physical education programs. Course work (30 credit hours) is designed to develop students' abilities to understand, analyze, and conduct research in the field, and apply empirical data to improve practice and program

management. Within each concentration, there are thesis and non-thesis options.

or HPE 721	Motivational Issues in Sports	
Total Credit Hours		39

Additional Requirements

Continuance and Exit Requirements

Students must meet all requirements for continuance as outlined in the graduate continuance policy for the University. Students completing the program of study must:

- Have an overall grade point average of 3.0 or higher
- Have a grade point average of 3.0 or higher in the major
- Demonstrate writing proficiency
- Satisfy all course competencies
- Complete a teaching internship.
- Students in the licensure path must pass the Praxis exam and complete the teaching internship as their culminating experience/comprehensive examination
- File the necessary paperwork for graduation

Additional Information and Requirements

- Passing score on PRAXIS II Test of Content Knowledge must be on file in the Office of Clinical Experiences before the teacher candidate internship can begin.
- With approval from the graduate advisor, the licensure requirements may be fulfilled by equivalent undergraduate courses where applicable.
- Certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training must be on file with the Office of Clinical Experiences.

** Background check clearance required for teaching licensure admission: <https://www.odu.edu/success/academic/teacher-education/placement/background-checks> (<https://www.odu.edu/success/academic/teacher-education/placement/background-checks/>).

Master of Science in Education Special Education with a Concentration in Early Childhood Special Education (MSEd)

Master of Science in Education, Special Education

Anne M. Perrotti, PhD, CCC-SLP, Graduate Program Director

122 Child Study Center

The Master of Science in Education, major in Special Education, has three endorsement specific concentrations for those who seek both an advanced degree in special education and either initial teacher licensure or endorsement in special education. The special education graduate program is guided by a philosophy of service and education as a catalyst to promote awareness, understanding, and acceptance of individuals with disabilities. The course work focuses on improving the quality and scope of educational and related services available to individuals with disabilities from infancy to adulthood. *The Master of Science in Education, Special Education, Initial Licensure is offered on-line only.* For more information regarding the other programs listed below, please contact the department.

Note to students in Washington State from the Student Achievement Council (SAC) concerning the Master of Science in Education-Special Education: Eligibility for initial educator certification in Washington is based on completion of a state approved educator preparation program. This

program is approved in Virginia and is authorized for field placements in Washington by the Professional Educators Standards Board. Even though you may be residing in Washington while in this program, your application for educator certification in Washington will be processed as an out-of-state application. Go to <http://pathway.pesb.wa.gov/archive/outofstate> (<http://pathway.pesb.wa.gov/archive/outofstate/>) for more information. Teachers are advised to contact their individual school districts as to whether or not this program may qualify for teacher advancement.

Master of Science in Education, Special Education - General Curriculum K-12, Adapted Curriculum K-12, or Early Childhood Special Education Concentrations

The master's degree program with special education licensure prepares teachers and agency personnel to design and implement programs for individuals with disabilities in a variety of settings. This program can be completed in approximately two years and enrolled students will specify a special education concentration in General Curriculum K-12, Adapted Curriculum K-12, or Early Childhood Special Education (Birth to 5). In addition to meeting the Master of Science in Education degree requirements, this program targets the coursework required to satisfy the Virginia Department of Education (VDOE) special educator licensure endorsement competencies. Due to changing national accreditation standards and state licensure regulations (i.e. assessments, certifications), the programs in teacher education, including special education, are under constant revision. Any student pursuing Virginia licensure should speak with their Graduate Program Director regarding requirements.

Graduates are prepared to work effectively with children, adolescents, and adults who require special education services. Classroom instruction is supplemented by field experiences with children, adolescents, and adults in a variety of settings. Teacher interns have been placed in children's hospitals, special education classes in public and private facilities, regional education programs, residential psychiatric hospitals, mental health centers, and community agencies.

Graduates in special education serve as key members of child study teams and are prepared to address educational, emotional, and physical disabilities. They also find employment as educational therapists, psycho-educational diagnosticians, and special education teachers and staff members in public and private schools.

Linked Program Information

There is a linked program available to qualified students under existing university policy to link the Bachelor of Science (Special Education with a Major in Special Education Adapted Curriculum K-12) (<http://catalog.odu.edu/undergraduate/education/human-movement-studies-special-education/special-education-adapted-curriculum-k12-bs/>) or Bachelor of Science (Special Education with a Major in Special Education General Curriculum K-12) (<http://catalog.odu.edu/undergraduate/education/human-movement-studies-special-education/special-education-general-curriculum-k12-bs/>) undergraduate program with the Master of Science in Education (Special Education with a Concentration in Early Childhood Special Education (p. 169)) graduate program. See program director for additional details.

Admission

Admission to the graduate program in special education is granted by the department's graduate program director in conjunction with special education faculty. The following requirements are necessary for admission to the master's degree program.

Regular Admittance Requirements

1. a baccalaureate degree from a regionally accredited institution;
2. an undergraduate grade point average of 2.80 or better in an academic content area; and

3. a 400-500 word goal statement indicating why the student wishes to enroll in the special education program.

Provisional Admittance Requirements

Provisional admittance may be offered to students with marginal grades. In this case, provisional admittance requires:

1. a baccalaureate degree from a regionally accredited institution;
2. an undergraduate grade point average of 2.70 or better in an academic content area; and
3. a 400-500 word goal statement indicating why the student wishes to enroll in the special education program.

Curriculum Requirements

Special Education, Licensure - Early Childhood Special Education Endorsement

The early childhood special education program is designed to prepare students to teach children from birth to age five who manifest disabilities or who are at risk of later school failure. Students endorsed in the area of early childhood special education will be eligible to teach in infant and preschool programs in both public and private settings. The program combines course work, supervised practica and internship to facilitate the integration of theory and practice in the development of evidence-based interventions applicable for infants and young children. Program practica and internship allow students opportunities to apply management, instructional and problem-solving skills in one-to-one and group settings. Students following the early childhood special education endorsement will take the prerequisite, core, and early childhood special education course blocks and teacher candidate internship.

Curriculum

Prerequisite Courses (or Undergraduate Minor or BS in special education)

SPED 313	Fundamentals of Human Growth and Development: Birth through Adolescence

Required Graduate Courses: Special Education Core

SPED 620	Advanced Foundations of Special Education: Legal Aspects and Characteristics	3
SPED 615	Advanced Classroom and Behavior Management Techniques for Students with Diverse Needs	3
SPED 623	Adv Instructional Design II: Curriculum Procedures and Individualized Education Planning	3
SPED 622	Advanced Collaboration and Transitions	3
SPED 626	Advanced Procedures in Reading and Writing for Students with Diverse Learning Needs	3

Early Childhood Special Education Core:

SPED 504	Characteristics and Medical Aspects of Disabling Conditions	3
SPED 541	Teaching Students with Severe Physical and Sensorimotor Disabilities *	3
SPED 569	Communication/Language Development/ Intervention for Students with Significant Disabilities	3
SPED 560	Teaching Preschoolers With Diverse Abilities *	3
SPED 561	Developmental Assessment of Young Children with Diverse Abilities *	3
SPED 567	Family-Centered Practices in Early Childhood Intervention *	3

Teacher Candidate Internship ***		3
SPED 686	Teacher Candidate Internship for Special Endorsement	

or SPED 669 Directed Field Internship Special Education, PreK-12

Total Credit Hours **36**

- * Requires a 45-hour practicum
- ** Requires valid provisional, or renewable VDOE-issued teaching license
- *** Please talk with your Graduate Program Director regarding your internship requirements to complete the degree.

Additional Requirements

Fast Track Teacher Preparation Admission Policy

Please refer to the appropriate section in the undergraduate catalog.

Continuance

Students must:

1. complete the Pre-Task Rating Form at time of admission;
2. complete the CITI Responsible Conduct of Research, Social and Behavioral Research training modules. See the Responsible Conduct of Research site (<https://www.odu.edu/impact/responsible-conduct-of-training/>) for more information;
3. maintain a grade point average of 3.00;
4. achieve a grade of B or better in all field experience practicum coursework and a grade of B- or better in all additional course work; and
5. successfully complete all competencies relative to their area(s) of emphasis.

Exit

Program exit entails successful completion of both master's degree requirements and teacher licensure competencies. Students must:

1. maintain a grade point average of 3.00, achieve a grade of B or better in all field experience practicum coursework, and achieve a grade of B- or better in all additional course work;
2. obtain passing scores on the PRAXIS Special Education Core Knowledge and Applications assessment (Test Code 5354)**
3. successfully complete either SPED 686: Teacher Candidate Internship or SPED 669: Directed Field Internship in Special Education*
4. obtain passing scores on the Praxis Teaching Reading: Elementary assessment (Test Code 5205) (Special Education General Curriculum K-12 only)**
5. obtain certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.**
6. complete a Graduate Student Assessment;
7. complete the Post Task Rating Form

*Student must hold a valid provisional, or renewable teaching license in special education from the Virginia Department of Education (VDOE) to be eligible for SPED 669.

**Due to changing national accreditation standards and VDOE licensure regulations, the special education program requirements are frequently revised. Any changes resulting from these factors supersede the program requirements described in the catalog. Students should verify current program exit requirements with the appropriate Graduate Program Director and/or program coordinator/academic advisor.

Program Requirements

Successful completion of the master's degree requires a minimum of 30 to 33 semester hours of graduate study in special education. For all

students who have successfully (C-grade or better) completed undergraduate coursework in special education, the graduate program director will review course content to determine if Virginia Department of Education teacher endorsement competencies were satisfied by previous course completion. Course(s) in special education taken at the undergraduate level that satisfy Virginia Department of Education competencies for licensure may be substituted for coursework required in the master's degree program; however, the undergraduate credit does not count as transfer graduate credit. Students enrolled in a teacher preparation program are expected to demonstrate dedication to special education students through the effective use of differentiated strategies for assessment and planning and application of evidence-based practices. Furthermore, student are expected to demonstrate behaviors indicative of effective, professional educators and reflected in the program's technical standards and professional dispositions policy.

Master of Science in Education Special Education with a Concentration in K-12 Licensure - Adapted Curriculum - K-12 (MSEd)

Master of Science in Education, Special Education

Anne M. Perrotti, PhD, CCC-SLP, Graduate Program Director

See program director for additional details.

Admission

Admission to the graduate program in special education is granted by the department's graduate program director in conjunction with special education faculty. The following requirements are necessary for admission to the master's degree program.

Regular Admittance Requirements

1. a baccalaureate degree from a regionally accredited institution;
2. an undergraduate grade point average of 2.80 or better in an academic content area; and
3. a 400-500 word goal statement indicating why the student wishes to enroll in the special education program.

Provisional Admittance Requirements

Provisional admittance may be offered to students with marginal grades. In this case, provisional admittance requires:

1. a baccalaureate degree from a regionally accredited institution;
2. an undergraduate grade point average of 2.70 or better in an academic content area; and
3. a 400-500 word goal statement indicating why the student wishes to enroll in the special education program.

Curriculum Requirements

Special Education, Licensure - Adapted Curriculum K - 12 Endorsement

The adapted curriculum program is designed to prepare teachers to instruct individuals traditionally labeled with multiple, moderate, severe, or profound disabilities who are accessing an alternative academic curriculum. Individuals accessing the adapted curriculum may have disabling conditions such as cerebral palsy, autism, or a sensory impairment. The program

combines course work, supervised practica and internship to facilitate the integration of theory and practice in the development of evidence-based interventions applicable for individuals with special needs from preschool through adult in both public and private facilities. Program competencies prepare students to work in school-based programs in a variety of settings, including residential and hospitals settings. Program practica and internship allow students opportunities to apply management, instructional and problem-solving skills in one-to-one and group settings. Students wishing to be endorsed in special education: adapted curriculum will take the prerequisite, core, and adapted curriculum course blocks and teacher candidate internship.

Furthermore, student are expected to demonstrate behaviors indicative of effective, professional educators and reflected in the program's technical standards and professional dispositions policy.

Doctor of Philosophy Education with a Concentration in Special Education (PhD)

Laura Chezan, PhD Program Coordinator

The Doctor of Philosophy is the degree most often desired for those who wish to become faculty in colleges and universities and those who aspire to senior administrative roles in institutions and agencies. The PhD in

education with a concentration in special education is intended to prepare individuals for administrative and faculty positions and to provide students with the skills to carry out scholarly research, lead organizations, and create new research.

The PhD in education with a concentration in special education is designed to address the acute shortage of doctoral level special education personnel in the Commonwealth and across the nation. Program graduates will be prepared as content experts in pre-referral intervention and early intervention to assume positions of leadership as special education faculty at the university and college level. Additionally, graduates of the special education program will have the professional research skills to work with school systems to address the diverse learning needs and behavior challenges associated with the education of students with special needs and those students at risk. Program graduates will attain a degree of proficiency in research and writing that will prepare them to make contributions to the professional literature of special education and related disciplines.

The curriculum described below contains elements that will provide research expertise, administrative skills and experience, and the ability to serve the nation's colleges, universities, and agencies providing special education services.

Admissions

Entrance Criteria

In order to be considered for admission into the Old Dominion University PhD in Education: Special Education Concentration program (special education PhD program) a candidate must include the following information in the application:

1. Proof of a completed master's degree in special education or an equivalent degree in a related discipline from a program that is accredited by an appropriate specialized accrediting agency or from a regionally accredited institution of higher education. Transcripts from universities outside the United States must be accompanied by a global credit evaluation from an accredited agency. A minimum grade point average (GPA) of 3.60 (on a 4.0 scale) overall for the master's degree and in the major area of study in the master's degree is expected;
2. Acceptable scores on the Graduate Record Examination (GRE): 156 [550] on the verbal portion and no less than a 4.5 on the writing sample. Applicants whose first language is not English must submit a current score for the Test of English as a Foreign Language (TOEFL) according to the standards established by Old Dominion University;
3. A minimum of three years teaching experience in a pre-K – 12 setting with students with disabilities;
4. A 500-800-word statement of academic and professional goals. This statement must describe the applicant's research agenda to meet his/her academic and professional goals;
5. A professional curriculum vitae;
6. Three letters of reference from individuals capable of commenting on the applicant's readiness for advanced graduate study. At least two of these letters must be from academic sources. If a non-academic letter of reference is necessary, it should be from a professional source; and
7. Evidence of prior course work in statistics and in theories of learning. If this requirement is not met, a student may be admitted, and additional course work will be added to the candidate's program of study.

Admissions Process

Admission to the special education PhD program occurs during the spring semester to ensure a fall semester start. Admission to the program is competitive, with the number of applications expected to exceed the number of available openings. In order to enhance the experience of the students and to increase the efficiency by which courses are offered, a cohort of 10 students will be admitted each year. This limited number of students is necessary to ensure that there is an adequate number of full-time faculty to serve the students through advising and other duties, particularly when the cohorts reach the dissertation stage of the program. Applicants must submit

the application package, including the online graduate student application and all related materials no later than February 1 of the admission cycle year.

Once the application deadline has passed, complete application packages will be initially reviewed by the special education PhD program admissions committee. Following the preliminary review of complete applications, the admissions committee will invite eligible applicants to participate in a two-part interview, including a formal interview with the special education PhD program faculty and a one-hour, proctored spontaneous writing session during which applicants will compose a spontaneous response to a question regarding special education policy and procedure in the United States.

Curriculum Requirements

Program Requirements

The PhD in education with a concentration in special education is comprised of courses totaling a minimum of 60 academic credit hours beyond the master's degree. The curriculum includes a content concentration totaling 24 credit hours, an introductory core of nine hours, a research component including 15 credit hours, and the dissertation, which will include a minimum of 12 hours. The dissertation will often include more than 12 credit hours depending on the length of time necessary for completion. Students entering the program may also need to complete one introductory statistics course if they have not had such a course or cannot demonstrate competency at a satisfactory level. Students who enter the PhD program with a master's degree in an academic field that is unrelated to special education and/or who have not completed courses to develop competency in specified areas may need to complete additional prerequisite course work.

Prerequisite Course work		3
FOUN 722	Introduction to Applied Statistics and Data Analysis	
Speciality Core		15
SPED 803	Scholarly Writing for Doctoral Students

Oral Candidacy Examination		
Dissertation		
SPED 899	Dissertation	12
Total Credit Hours		63

- * Students must take 6 credit hours as electives with approval of the Graduate Program Director or PhD Coordinator. The electives must be graduate courses at the 700 or 800 level. Electives may be taken in other areas in the College of Education (e.g., educational leadership, higher education, instructional design and technology) or in other colleges with the approval of the appropriate college official.

Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in the catalog. Students are encouraged to obtain current program information from their advisors and the Darden College of Education and Professional Studies website at <http://www.odu.edu/education> (<http://www.odu.edu/education/>).

Additional Requirements

Continuance

Students must:

1. maintain a grade point average of 3.00 overall;
2. complete the CITI Responsible Conduct of Research training modules. See <https://www.odu.edu/impact/responsible-conduct-of-training> (<https://www.odu.edu/impact/responsible-conduct-of-training/>).
3. complete an annual continuance review;
4. complete a one-time written continuance evaluation; and
5. successfully complete all competencies relative to their program of study.

Exit

In order to complete the program, students must fully complete the curriculum below and all requirements noted elsewhere in the University catalog for graduate students and within the PhD in Education Handbook. It is the responsibility of the student to obtain these materials and comply with all requirements.

Practicum Experiences Policy

A student may participate in a course with a practicum experience if he/she has been admitted into an approved teacher education program. In addition, candidates must meet the GPA for their individual programs, professional education courses, and minimum grade requirements, along with any other course prerequisites.

Master of Science Sport Management (MS)

Lynn Ridinger, Ph.D., Graduate Program Director
2010 Student Recreation Center
757-683-4353

This program is designed to prepare students for leadership roles within the sport industry. Students are provided with theoretical and practical knowledge and skills to face opportunities and challenges associated with sport business careers. The curriculum is consistent with current principles and practices of academic and sport marketplace standards. This program is available on-campus and online.

Admission

Admission and Entrance Requirements

Applicants for the M.S. in Sport Management are required to submit credentials for consideration through the Office of Graduate Admissions at Old Dominion University. We have rolling admissions, but applicants who submit materials prior to March 1st for Fall admissions and prior to November 1st for Spring admissions will receive first

consideration. Students applying for admission with regular status must have:

- A completed online application submitted to the Office of Graduate Admissions or International Admissions.
 - Domestic students submit at: <https://www.odu.edu/admission/graduate> (<https://www.odu.edu/admission/graduate/>)
 - International students submit at: <https://www.odu.edu/admission/international> (<https://www.odu.edu/admission/international/>)
- A baccalaureate degree from a regionally-accredited institution or an equivalent degree from a foreign institution.
- 2.8 cumulative GPA or higher (on a 4.0 scale)*
- 3.0 GPA or higher in the undergraduate major*
- Personal essay (no more than two pages) addressing motivations to apply to program, career interests, and ability to complete graduate level work.
- Two letters of recommendation from former professors or employers.
- Current copy of resume.
- Transcripts from all prior post-secondary institutions.
- Test of English as a Foreign Language (TOEFL) score of at least 550 on the paper-based test (79 on the iBT) or 6.5 overall on the IELTS for non-native English speakers.
- A standardized test score (GRE, GMAT, or MAT) is optional, but may help demonstrate the ability to take on the rigor of graduate level studies. It is recommended if an applicant has an overall GPA lower than 3.0.

* Students who have a low GPA may be considered for admission with provisional status.

Curriculum

Sport Management Core Courses ⁺

SMGT 738	Sport Finance	3

Total Credit Hours		33

- + Required courses.
- ++ Denotes an additional requirement of comprehensive exam based on core course requirements.
- * List of electives is not comprehensive. Prior approval from graduate advisor is required for other possible electives.
- ** The Sport Analytics concentration is optional. It includes one required course (SMGT 580) and two of three electives.

Additional Requirements

Continuance and Exit Requirements

Students must meet all requirements for continuance as outlined in the graduate continuance policy for the University. Students completing the program must:

- Have an overall grade point average of 3.0 or higher.
- Have a grade point average of 3.0 or higher in the major.
- Demonstrate writing proficiency.
- Satisfy all course competencies.
- Complete an internship or research problem or thesis.
- If doing an internship or research problem, also pass a comprehensive examination.
- Complete exit survey.
- File the necessary paperwork for graduation.

Certificate Applied Behavior Analysis Certificate

Old Dominion University is pleased to offer the 5th Edition Verified Course Sequence (VCS) approved by the Association for Behavior Analysis International (ABAI). The 5th Edition VCS consists of 315 hours of coursework (21 graduate-level credits or 7 courses) for students taking the Board Certified Behavior Analyst (BCBA®) examination. Applicants will need to meet additional degree and experience requirements before they can be deemed eligible to take the examination.

The program's primary goal is to provide teachers and related-service providers with instruction in applied behavior analysis that will broaden the range of empirically-supported instructional methodologies used to meet the academic, social, and behavioral needs of a diverse student or client population. The program's secondary goal is to provide teachers and related-service providers with the educational and supervised fieldwork experience needed to sit for the national BCBA® examination.

In this program, the seven courses are offered in a combined distance learning and online format on a pre-determined schedule. An applicant must (a) have a master's degree from an accredited university or the equivalent from a foreign institution OR (b) be accepted into and currently pursuing a master's degree offered by an accredited university.

Successful completion of the ODU ABA certificate program, in addition to a supervised internship that meets the Behavior Analyst Certification Board (BACB) guidelines®, will allow the participant to apply for the national BCBA® examination. A student who successfully completes the 21-credit course sequence and does not complete the internship requirement may earn the ODU ABA Certificate, but is not eligible to sit for the national BCBA® examination.

Curriculum Requirements

Courses required to complete the ODU Applied Behavior Analysis Certificate Program include the following courses:

Required Courses

SPED 740	Concepts and Principles in Behavior Analysis	3
SPED 741	Research Methods in Behavior Analysis	3
SPED 742	Ethics in Behavior Analysis	3
SPED 743	Assessments and Interventions I: Positive Behavior Support	3
SPED 744	Theory and Philosophy in Behavior Analysis	3
SPED 745	Assessments and Interventions II: Verbal Behavior	3
SPED 746	Organizational Behavior Management	3

Optional Internship Hours

SPED 769	Supervised Fieldwork in Applied Behavior Analysis (Optional Internship Hours)	3

Total Credit Hours **24**

Certificate Adapted Physical Education Certificate

The Graduate Certificate in adapted physical education is designed for individuals who are practicing or planning to teach in school-based physical education settings. This certificate aims to meet the professional advancement needs of at least three populations:

- Existing student populations at ODU interested in acquiring requisite knowledge and skills to effectively teach children with disabilities in physical education. These are expected to include graduate students in each concentration area (i.e., coaching, curriculum & instruction, initial licensure, adapted physical education) of physical education, as well as others in different education-related areas. Graduate degree seeking students will be able to obtain the Certificate and degree simultaneously using the available four elective courses in their degree program.
- Currently practicing physical education teachers looking to further enhance their knowledge and skills in teaching students with disabilities in their classes.
- Non-degree seeking students seeking to enhance their employability in the physical education/ adapted physical education job acquisition search.

Admission

Degree seeking graduate-level students admitted to the certificate program must meet ODU requirements for graduate admission: an earned baccalaureate degree from a regionally-accredited institution or an equivalent degree from a foreign institution. Those whose native language is not English must submit a minimum score of 230 on the computer-based TOEFL or 80 on the TOEFL iBT.

Individuals not seeking graduate-level degrees admitted to the certificate program must have a completed baccalaureate degree (or equivalent).

Curriculum Requirements

The certificate requires four (4) three-hour courses for a total of twelve (12) credits. This includes three core courses and one elective course, as follows

Core Courses

HPE 504	Adapted Physical Education	3
HPE 704	Advanced Studies in Adapted Physical Education	3
HPE 740	Motor Learning and Development	3

Elective Courses

HPE 720	Curriculum Development in Physical Education	3
or HPE 745	Assessment/Evaluation and Technology in Sport/PE	

Total Credit Hours 12

Certificate

Autism Certificate

Old Dominion University is pleased to offer a 12-credit hour certificate program designed to prepare teachers and related service providers to effectively work and provide support for students with autism spectrum disorder (ASD). This coursework can be completed separately from, or integrated into, the Master's Degree in Special Education.

Curriculum Requirements

SPED 625	Characteristics of Students with Autism Spectrum Disorders	3
SPED 627	Instructional Strategies for Students with Autism Spectrum Disorders *	3
SPED 569	Communication/Language Development/ Intervention for Students with Significant Disabilities	3
SPED 621	Effective Interventions for Children and Youth with Challenging Behavior *	3

Total Credit Hours 12

* Requires practicum of 45 hours

Post-Baccalaureate Endorsement Early Childhood Special Education Post-Baccalaureate Endorsement Special Education Post-Baccalaureate Endorsement Program

TBA, Graduate Program Director
122 Child Study Center

Many students who already possess an undergraduate degree enter Old Dominion University for the sole purpose of meeting the Virginia Department of Education teaching licensure standards. The special education post-baccalaureate endorsement option is available for those students who wish to complete the coursework required for licensure in special education, but have no desire to complete a master's degree program or who do not meet the master's degree admission requirements. Individuals pursuing a post-baccalaureate endorsement program must first apply for admission to Old Dominion University as a non-degree seeking graduate student; however, admission to Old Dominion University does not guarantee admission into post-baccalaureate endorsement or teacher preparation programs in the Darden College of Education and Professional Studies. Once admitted to the University, individuals must also apply for admission into a post-baccalaureate endorsement program and must meet the college's policy for admitting students into an approved teacher education program.

The college offers four post-baccalaureate endorsement programs in special education: general curriculum K-12, adapted curriculum K-12, early childhood special education, and visual impairments prek-12.

The Post-Baccalaureate Endorsement Program offers the coursework required to satisfy the Virginia Department of Education (VDOE) special educator licensure endorsement competencies. Due to changing national accreditation standards and state licensure regulations (i.e. assessments, certifications), the programs in teacher education are under constant revision. Students are encouraged to obtain current program information from the Special Education Program website at: <http://www.odu.edu/cdse/academics/sped/grad> (<http://www.odu.edu/cdse/academics/sped/grad/>). Program completers find employment as special education teachers within the

continuum of services provided for children with special needs and may also serve as key members of child study teams; they are prepared to address the educational, emotional, and physical needs of students with disabilities.

Admission

Regular Admittance Requirements

1. completion of an undergraduate degree in the arts and sciences (or equivalent);
2. admission to Old Dominion University as a non-degree seeking graduate student;
3. cumulative GPA of 2.80 for all college credit courses taken in the baccalaureate degree program from an accredited college/university; and,
4. submission of an application for admittance into the Darden College of Education and Professional Studies Teacher Post-Baccalaureate Endorsement Program.

Provisional Admittance Requirements

1. completion of an undergraduate degree in the arts and sciences (or equivalent);
2. admission to Old Dominion University as a non-degree seeking graduate student;
3. cumulative GPA of 2.50-2.74 for all college credit courses taken in the baccalaureate degree program from an accredited college/university; and,
4. submission of an application for admittance into the Darden College of Education and Professional Studies Teacher Post-Baccalaureate Endorsement Program.

Curriculum Requirements

Core Requirements

- obtaining certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.**
- completion of the Post Task Rating Form

*Student must hold a valid, provisional or renewable teaching license in special education from the Virginia Department of Education (VDOE) to be eligible for SPED 669.

**Due to changing national accreditation standards and VDOE licensure regulations, the special education program requirements are frequently revised. Any changes resulting from these factors supersede the program requirements described in the catalog. Students should verify current program exit requirements with the appropriate Graduate Program Director and/or program coordinator/academic advisor.

Post-Baccalaureate Endorsement Special Education - Visual Impairments, PreK-12 Post- Baccalaureate Endorsement Special Education Post-Baccalaureate Endorsement Program

Anne M. Perrotti, PhD, CCC-SLP, Graduate Program Director
122 Child Study Center

Many students who already possess an undergraduate degree enter Old Dominion University for the sole purpose of meeting the Virginia Department of Education teaching licensure standards. The special education post-baccalaureate endorsement option is available for those students who wish to complete the coursework required for licensure in special education, but have no desire to complete a master's degree program or who do not meet the master's degree admission requirements. Individuals pursuing a post-baccalaureate endorsement program must first apply for admission to Old Dominion University as a non-degree seeking graduate student; however, admission to Old Dominion University does not guarantee admission into post-baccalaureate endorsement or teacher preparation programs in the Darden College of Education and Professional Studies. Once admitted to the University, individuals must also apply for admission into a post-baccalaureate endorsement program and must meet the college's policy for admitting students into an approved teacher education program.

The college offers four post-baccalaureate endorsement programs in special education: general curriculum K-12, adapted curriculum K-12, early childhood special education, and visual impairments preK-12.

The Post-Baccalaureate Endorsement Program offers the coursework required to satisfy the Virginia Department of Education (VDOE) special educator licensure endorsement competencies. Due to changing national accreditation standards and state licensure regulations (i.e. assessments, certifications), the programs in teacher education are under constant revision. Students are encouraged to obtain current program information from the Special Education Program website at: [http://www.odu.edu/cdse/academics/sped/grad/](http://www.odu.edu/cdse/academics/sped/grad). Program completers find employment as special education teachers within the continuum of services provided for children with special needs and may also

serve as key members of child study teams; they are prepared to address the educational, emotional, and physical needs of students with disabilities.

Admission

Regular Admittance Requirements

1. completion of an undergraduate degree in the arts and sciences (or equivalent);
2. admission to Old Dominion University as a non-degree seeking graduate student;
3. cumulative GPA of 2.80 for all college credit courses taken in the baccalaureate degree program from an accredited college/university; and,
4. submission of an application for admittance into the Darden College of Education and Professional Studies Teacher Post-Baccalaureate Endorsement Program.

Provisional Admittance Requirements

1. completion of an undergraduate degree in the arts and sciences (or equivalent);
2. admission to Old Dominion University as a non-degree seeking graduate student;
3. cumulative GPA of 2.50-2.74 for all college credit courses taken in the baccalaureate degree program from an accredited college/university; and,
4. submission of an application for admittance into the Darden College of Education and Professional Studies Teacher Post-Baccalaureate Endorsement Program.

Curriculum Requirements

† READ 680 is recommended

Due to changing national accreditation standards and state licensure regulations (i.e. assessments, certifications), teacher preparation programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in the catalog. Students are encouraged to obtain current program information from their advisors and the Darden College of Education and Professional Studies website at <http://www.odu.edu/education> (<http://www.odu.edu/education/>).

Additional Requirements

Continuance Requirements

1. completion of the Pre-Task Rating Form upon acceptance;
2. complete the CITI Responsible Conduct of Research, Social and Behavioral Research training modules. See <https://www.odu.edu/impact/responsible-conduct-of-training/>;
3. successful completion of all courses required for licensure in an endorsement area(s);
4. maintenance of a GPA of 3.0 with a B or better in all practicum coursework, and a B- or better in all additional course work; and

Exit Requirements

1. completion of all requirements for the program;
2. passing scores on the Special Education Exit Exam.
3. maintenance of a GPA of 3.0 with a B or better in all practicum coursework, and a B- or better in all additional course work
4. successful completion of either SPED 586: Teacher Candidate Internship or SPED 669: Directed Field Internship in Special Education*
5. passing scores on the Praxis Teaching Reading: Elementary assessment (Test code 5205) (Special Education General Curriculum K-12 only)**
6. obtaining certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.**
7. completion of the Post Task Rating Form

*Student must hold a valid, provisional or renewable teaching license in special education from the Virginia Department of Education (VDOE) to be eligible for SPED 669.

**Due to changing national accreditation standards and VDOE licensure regulations, the special education program requirements are frequently revised. Any changes resulting from these factors supersede the program requirements described in the catalog. Students should verify current program exit requirements with the appropriate Graduate Program Director and/or program coordinator/academic advisor.

Post-Baccalaureate Endorsement Teacher Preparation in Special Education Adapted Curriculum Post-Baccalaureate Endorsement

The Virginia Consortium for Teacher Preparation in Special Education Adapted Curriculum: Supporting Students with Severe Disabilities and Autism (ACSD)

The Virginia Consortium for Teacher Preparation in Special Education Adapted Curriculum: Supporting Students with Severe Disabilities and Autism (ACSD Consortium) is comprised of six state-approved teacher preparation programs in *special education: adapted curriculum* K-12. Participating universities are George Mason University; Norfolk State University; Radford University; James Madison University; Virginia Commonwealth University and Old Dominion University. The consortium's primary goal is to prepare teachers across the commonwealth to be highly skilled and effective in teaching learners with severe and multiple disabilities. The program is designed to accelerate the training for teachers with newly-issued provisional licenses and to increase the number of fully endorsed teachers by providing training to full-time pre-service personnel. ACSD Consortium courses will be delivered via online formats using videoconferencing and web modalities. Faculty experts in severe disabilities from the six universities will teach the required classes. Applicants must have bachelor's degrees from regionally accredited universities and passing Praxis Core Academic Skills for Educators Test scores.

Department of STEM Education & Professional Studies

Web Site: <http://www.odu.edu/stemps> (<http://www.odu.edu/stemps/>)

Dr. Shana Pribesh, Department Chair

2300 A Education Building
757-683-6684

The Department of Science, Technology, Engineering and Mathematics (STEM) Education and Professional Studies (STEMPS) is an academic leader in graduate studies related to education specialists, including, instructional design and technology, library science, and educational psychology and program evaluation. It offers the M.L.I.S., M.S.Ed, and the Ph.D. in Education as well as multiple certificate programs. The department also offers licensure and teaching endorsement programs. Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in the catalog. Students should obtain current program information from their advisors and the Darden College of Education and Professional Studies website at <http://education.odu.edu/>.

Instructional Design and Technology Programs

- Master of Science in Education - Elementary Education – Instructional Design and Technology
- Master of Science in Education - Secondary Education – Instructional Design and Technology
- Doctor of Philosophy, Education - Instructional Design and Technology Concentration
- Graduate Certificate in Education and Training in Modeling and Simulation
- Graduate Certificate in Human Performance Technology
- Graduate Certificate in K-12 Online Teaching

Library and Information Studies Programs

- Master of Science in Library and Information Studies
- Master of Science in Library and Information Studies with Concentration in School Librarianship
- Graduate Certificate in School Library Practice (for those with an MLIS)

Educational Psychology and Program Evaluation

- Doctor of Philosophy, Education - Educational Psychology and Program Evaluation concentration

<https://www.odu.edu/stemps> (<https://www.odu.edu/stemps/>)

Tony Perez, Graduate Program Director

Doctoral students pursuing the Ph.D. in Education with a Concentration in Educational Psychology and Program Evaluation (EPPE) at Old Dominion University will develop a strong foundation in theories of learning, human development, cognition, motivation, self-regulation, and formative assessment as well as training in applied quantitative and qualitative research methods. Educational psychologists study learning across the lifespan and apply psychological principles to formal and informal educational settings in order to promote the success of students in these learning environments. Program evaluators collect and analyze quantitative and qualitative data in order to examine the effectiveness of programs and policies. Our program is designed for students who are interested in teaching, research, and program evaluation-oriented careers. For example, students may be interested in careers as university faculty, researchers in non-profit research organizations, or program evaluators in university research and evaluation centers.

We include two specialized emphasis areas: educational psychology and program evaluation. Students will complete core coursework in research methods and learning theories. Then, students will specialize in coursework and experiences tailored for positions in educational psychology or program evaluation. Along the way, students may take electives that could prepare them for work in PK-12, Higher Education or Instructional Design.

Options for Admission

There are two paths for admission into the EPPE Program: entrance with a Masters' degree and entrance with a Bachelor's degree. Applications are accepted and students may start the program year-round. That is, we have rolling admissions.

Option 1 with earned Master's:

Applicants should have earned a Master's degree in psychology, education, statistics, higher education or other related field from a regionally accredited institution. Submitted transcripts for your Master's degree must show that the degree was conferred and a date of completion. We will consider an applicant for provisional admission who is completing a related Master's degree.

Option 2 with earned Bachelor's:

For the second option, applicants should have earned a Bachelor's degree in a related field from a regionally accepted institution. The submitted transcripts should show that the degree was conferred and the date of completion. We will consider an applicant for provisional admission who is completing a related Master's degree. An additional 18 credit hours will be required for students who pursue this option.

Admission Requirements

Prospective students seeking admission to the Ph.D. in Education with a Concentration in Educational Psychology and Program Evaluation should submit an application that meets the following guidelines:

1. Submit transcripts from all colleges and universities previously attended. (See information above).
2. GRE scores are optional. We are interested in your verbal, quantitative and analytical skills. GRE scores are just one means of demonstrating your aptitude in these areas. If you do not submit your GRE scores, we will look for evidence of these aptitudes in your transcripts, statement

of purpose, letters of recommendation, writing samples and interview responses (see below for descriptions).

3. Complete a Statement of Purpose essay that shows evidence of motivation, competence, and potential as a graduate student/scholar. Address why you think you fit this program, which faculty you would like to work with and why, as well as how you intend to use this degree. We are interested in your verbal, quantitative, and analytical skills critical to your success in the program.
4. Submit three letters of recommendation from professional sources capable of commenting on your readiness for advanced graduate study. These letters are very important in the selection process so you may consider sharing your Statement of Purpose with your references so they can candidly comment on your preparation and purpose for attending this program. Please ask your references to address your verbal, quantitative, and analytical skills as well as your dispositions as they relate to collegiality, ethics, and a commitment to social justice and equity.
5. Submit a scholarly writing sample that showcases your verbal and analytical skills. It may also demonstrate your quantitative skills. Examples include a course paper, technical report, conference paper, journal article, or a Master's thesis. If you do not have a scholarly paper to submit or think that you could submit a higher quality original writing sample, we can provide you with a prompt for you can respond to as the writing sample.
6. We encourage applicants whose native language is not English to apply. Applicants whose native language is not English must submit a current score for the Test of English as a Foreign Language (TOEFL).
7. Selected applications will be asked to participate in a 30-minute phone interview with program faculty to discuss your goals, qualifications, and interest in the program.
8. Prior course work is assumed in statistics and research methods for Master's degree students. If that coursework has not been completed, then additional coursework will be added to the candidate's graduate program of study. For students admitted directly from a Bachelor's program your initial coursework will include Master's level research methods and statistics.
9. Complete and submit an online application. There is a non-refundable application fee for application to any ODU graduate program.
10. Up to four courses may be transferred from another regionally accredited university at the discretion of the Instructor of Record and the Graduate Program Director. They cannot have been used in conferral for another degree unless they undergo an additional review through the Prior Learning Assessment process. Courses that were part of an ODU certificate program can be considered for acceptance.
11. EPPE is committed to social justice and equity. We encourage submissions from diverse applicants. That is, we encourage diversity in terms of race, ethnicity, gender, sexuality, class, disability, and age, among others.

Applications are accepted and students may start the program year-round.

Curriculum Requirements

Program Requirements

Option 1 - With Earned Master's Degree

Students entering the program with an earned master's degree will complete a minimum of 18 research course credits, 18 core content area course credits, and 12 elective course credits. Lastly, students will complete a minimum of 12 credits of dissertation research. The total hours of this option is 60 hours and the courses are listed below.

Option 2 - With Earned Bachelor's Degree

Students entering the program with an earned bachelor's degree (but without a master's degree) will take an additional 18 credit hours in research and elective courses at the 600, 700, or 800 levels **in addition to** the requirements for entry with an earned Master's degree (see option 1). These electives will be selected in consultation with an advisor and approved by the graduate program director. For example, the courses may be in introductory statistics,

research methods, psychology, educational leadership, higher education, teaching and learning, or instructional design and technology. The total hours of this option is 78 hours.

Prerequisite Coursework*

FOUN 611	Introduction to Research Methods in Education	3
or FOUN 612	Applied Research Methods in Education	
FOUN 722	Introduction to Applied Statistics and Data Analysis	3

* Students who do not have equivalent coursework or appropriate educational experiences must complete the prerequisite courses as listed above or equivalent as approved by the Graduate Program Director.

Research Core Courses (18 Credits)

FOUN 812	Research Design and Analysis	3
TLCI 814	Qualitative Research Design in Education	3
FOUN 822	Applied Linear Models in Educational Research	3
FOUN 823	Analysis of Variance Applied to Educational Research	3
FOUN 840	Educational Measurement and Assessment	3
FOUN 813	Program Evaluation in Education	3

Professional Preparation Courses (6 credits)

FOUN 830	Theories of Learning and Instruction	3
FOUN 850	Sociological and Philosophical Foundations of Education	3

Emphasis Areas

Select one of the following:	12
<i>Educational Psychology (12 credits):</i>	
FOUN 831	Human Development in Education
FOUN 835	Motivation in Education
FOUN 870	Formative Assessment of Student Learning
FOUN 836	Metacognition and Self-Regulated Learning
<i>Program Evaluation (12 Credits)</i>	
FOUN 818	Analysis with Large Datasets
TLCI 895	Topics in Education (Grant Writing)
TLCI 815	Advanced Qualitative Research
FOUN 870	Formative Assessment of Student Learning
Elective Courses Chosen with Advisor (12 Credits)	12
Dissertation Research Project (12 Credits)	12
FOUN 899	Dissertation

Total Credit Hours 60

Additional Requirements

Continuance

Students must meet all department, college, and university policy requirements for continuation in their academic program. See department policy above.

Exit

In order to complete the program, students must fully comply with the curriculum below and with all requirements noted elsewhere in the University Catalog for graduate students. It is the responsibility of the student to obtain these materials and comply with required portions.

Continuance Policy and Procedures for the Educational Leadership Program

The following policy has been established for continuance in *Educational Leadership Program*.

At the end of each semester – fall, spring, and summer – the graduate program directors (GPD) will review student records. As per university policy, students who do not maintain an overall GPA of at least 3.0 in their ELS program will be placed on probation. Students placed on probation have one semester to bring their overall GPA back to a minimum of 3.0. A student may be placed on probation only one time in their EFL program and will not be eligible for a second probationary period. Should a student’s GPA fall below 3.0 twice, he/she will be dismissed from the program.

Students who receive a grade of F in any ELS required or elective program course or who receive a final grade of lower than B- in more than one class in their program will be dismissed from their program by the Graduate Program Director and Department Chair. A failing grade in dissertation credits for one semester places the student in warning status and does not automatically dismiss the student from the program. However, two failing grades in dissertation credits will result in dismissal from the program. Students may follow the Grade Appeal Procedure in the ODU Graduate Catalog. In the event a grade is appealed such that the student comes into compliance with the EFL Continuance Policy, he/she will be reinstated.

In accord with University policy, ODU email is considered official communication.

Advancement to Candidacy Policy for all EFL Programs

In the Department of Educational Foundations and Leadership, advancement to candidacy is a formal step that occurs after the student 1) completes formal coursework, 2) passes the PhD written and oral candidacy examinations, and 3) has an approved dissertation topic.

Doctor of Philosophy Education with a Concentration in Instructional Design and Technology (PhD)

Tian Luo, Graduate Program Director

The Doctor of Philosophy in Education Instructional Design and Technology (ID&T) concentration prepares individuals to conduct research and assume leadership roles in the field of instructional technology. Students will master a number of instructional design skills, ranging from instructional problem identification, task and audience analysis, strategy design, assessment, evaluation, and implementation that they can use in a variety of settings including traditional classrooms, distance education, business, health care, military, K-12 and higher education, and government. Courses explore theories and research that provide a foundation for the field. Students are also expected to participate in and conduct research studies as part of their program. Completing the PhD in ID&T will prepare students to take jobs as instructional design and human performance practitioners in business, military, government, health care, and educational settings. They are also prepared to take positions as faculty members in higher education and as researchers for private organizations. *The PhD in Education Instructional Design Technology (ID&T) concentration is offered on-campus and online.*

Admission

For admission to this program, individuals should have completed master’s degree in an appropriate discipline from a regionally accredited university. Degrees that are equivalent to a master’s degree such as LLB, JD, and DDS are also acceptable. Prospective students should also have prior course work in statistics and instructional technology. If this requirement is not met, then additional course work may be added to the candidate’s graduate program of

study at the discretion of the advisor and graduate program director. Please see prerequisites on the curriculum description for specifics.

Admission to the instructional design and technology PhD program is competitive. A number of criteria are considered including graduate and undergraduate GPAs, GRE scores, writing ability, a personal interview, and the match between student interests and faculty expertise. Meeting the minimum requirements established by the department does not ensure admission to the program. A minimum undergraduate GPA of 2.8 and a minimum graduate GPA of 3.25 are recommended.

Application Requirements

Application requirements for the PhD in instructional design and technology are as follows:

1. a completed application which is available online or from the Office of Graduate Admissions.
2. Official transcripts of all undergraduate and graduate courses and degrees completed.
3. Official report scores from the Graduate Record Examination (verbal, quantitative, and analytical) taken within the last five years. GRE scores expire after five years; however, candidates who have completed the exam prior to five years before the application deadline may submit those scores for consideration if they are provided from an official source such as a transcript or form provided by the Educational Testing Service. Old Dominion University reserves the right to determine what is an “official source.”
4. Applicants whose native language is not English (or who do not have a BS or MS degree from an accredited institution in a country where English is the native language) must submit a current score for the Test of English as a Foreign Language (TOEFL) of at least 600 (written) or 250 (computer based).
5. Applicants must submit a 500 word statement of their academic and professional goals with an emphasis on how the PhD degree in instructional design and technology will contribute to the achievement of the stated goals.
6. Three letters of reference from sources capable of commenting on the applicant’s readiness for advanced graduate study. It is recommended that at least two of the letters come from university faculty members. Other letters may come from work supervisors or managers.
7. An interview with the instructional design and technology program faculty. This committee will also review applications for admission.

Under normal circumstances, admissions will be offered at least three times a year for the fall, spring, and summer semesters. Acceptance is competitive to assure that there is an adequate number of full-time faculty to serve the students through advising, mentoring, and other duties, particularly when individuals reach the dissertation stage of the program.

Students interested in attending full-time and applying for financial aid should submit their applications by February 1 prior to the fall semester they wish to start.

Admission Application Deadlines

Applicants must submit completed applications and all related material no later than the following dates:

- May 1st for the Fall Semester
- November 1st for the Spring Semester
- March 1st for the Summer Semester

Curriculum Requirements

Program Requirements

The Ph.D. program in Education with a concentration in instructional design and technology is comprised of courses totaling a minimum of 60 academic credit hours beyond the master’s degree. The curriculum includes an program core of 21 credit hours, 9 credit hours in the instructional design concentration, and a research core of 15 credit hours, the three credit dissertation seminar and the dissertation, which will include a minimum of 12 credit hours. The dissertation will often include more than 12 credit

hours depending on the length of time necessary for completion. Students entering the program may also need to complete introductory statistics courses and an instructional technology foundations course if they have not had equivalent courses or cannot demonstrate competency at a satisfactory level. Students who enter the Ph.D. program with a master’s degree in an academic field that is unrelated to instructional design and technology and/or who have not completed courses to develop competency in specified areas may need to complete these courses in addition to the required courses. All courses are offered online. All students must complete the research residency project (IDT 879 and IDT 898) that results in a submission for publication or presentation to a nationally refereed journal or conference prior to taking comprehensive exams. The residency project must be completed within two years of the start of IDT 879. If not, the student must repeat IDT 879 without credit.

All IDT students are expected to have regular and reliable access to a multimedia computer (headphones, microphone, and web cam) and a high speed internet connection.

Prerequisites: All students admitted into the Ph.D. in instructional design and technology must complete the following prerequisite courses unless they have previously completed equivalent graduate level coursework or have appropriate educational experience.

Prerequisites *

FOUN 722	Introduction to Applied Statistics and Data Analysis
IDT 617	Foundations of Instructional Technology

ID&T Core Courses

IDT 730/830	Principles and Practices of Human Performance Technology	3
IDT 751/851	Computer-Based Multi-Media Design	3
IDT 760/860	Cognition and Instructional Design	3
IDT 773/873	Advanced Instructional Design Techniques	3
IDT 801	Instructional Design and Technology Seminar	3
IDT 810	Trends and Issues in Instructional Design and Technology	3
IDT 849	Instructional Systems Design	3

Research Core

FOUN 812	Research Design and Analysis	3
TLCI 814	Qualitative Research Design in Education	3
FOUN 823	Analysis of Variance Applied to Educational Research	3
IDT 725/825	Human Performance Assessment	3
IDT 879	Research Residency in Instructional Design and Technology	3

Instructional Design Concentration 9

Choose courses from the following:

Design & Theory

IDT 746/846	Foundations of Distance Education
IDT 761/861	Applied Instructional Design Tools
IDT 763/863	Instructional Design Theory
IDT 764/864	Instructional Message Design
IDT 898	Research Residency II

Technology

IDT 752/852	Diffusion and Adoption of Instructional Technology Innovations
IDT 755/855	Theory and Design of Instructional Simulation
IDT 756/856	Instructional Gaming: Theories and Practice
IDT 775/875	Designing Online Instruction
TLCI 735/835	Participatory Research: Theory and Methods

Human Performance Technology

IDT 735/835	Noninstructional Interventions

IDT 737/837	Consulting Skills for Instructional Designers	
IDT 739/839	Needs Analysis and Assessment	
Electives **		
Complete electives		
Capstone Courses		
FOUN 881	Dissertation Seminar ***	3
SEPS 899	Dissertation in Occupational Education	12
Total Credit Hours		60

*	All students admitted into the Ph.D. program in instructional design and technology must complete the prerequisite courses unless they have previously completed equivalent graduate level coursework or have appropriate educational experience.
**	Electives are chosen from the list above, or from related areas, e.g., modeling & simulation, psychology, engineering, speech-communications, business, I/O psychology.
***	If seminar is waived by the doctoral committee, the credits are added to the content.

Additional courses or substitutions may be used as approved by student's advisory committee.

Additional Requirements

Program Continuance

After completing 12 hours in ID&T course work, students must maintain a 3.25 GPA in ID&T courses. Failure to do so will result in one year probation. If the student's GPA in ID&T courses is less than 3.25 at the end of the probation period, the student will be suspended. Students who earn a grade of C+ or lower (including U) in a graduate course in their program of study are considered to be making unsatisfactory progress. Students earning one or more grades of C+ or lower must meet with the program director prior to enrolling in courses in future semesters. Students must provide a plan for making satisfactory progress or they will be suspended. If a student earns three or more grades of C+ or lower, they will be suspended from the program. Students wishing to be considered for reinstatement must follow the procedures set forth in the ODU Graduate Catalog.

In addition, the ODU Graduate Catalog states students who have less than a 3.0 GPA on courses at ODU will be placed on probation and may be suspended if conditions prescribed in the catalog are not met.

Continuous Enrollment and Exams

Doctoral students who do not meet the conditions for continuous enrollment and who do not have an approved leave of absence will be suspended from the degree program. Doctoral students who fail the comprehensive exam (either oral or written) or the doctoral final examination (e.g., dissertation defense) twice will be suspended from the degree program.

Satisfactory Progress

Doctoral students who do not complete at least 12 hours of course credits towards their degree each year with a grade of B- or higher prior to candidacy will be evaluated for continuation in the program. If the program faculty do not feel the student is making adequate progress, the student will be placed on program probation for one year. If the student has not completed 12 hours of course credits toward the degree with a grade of B- or higher, they will be suspended.

Research and Dissertation

Doctoral students will be evaluated annually for their progress in completing their research or dissertation. Students who have not made progress towards the completion as demonstrated evidence of a finished proposal, data collection, data analysis, or drafts of the manuscript/dissertation will be evaluated by faculty for continuance in the program. If faculty feel the student has not made adequate progress, the student will be placed on probation for one year. If the student has not made adequate progress after

one year of probation, faculty may recommend dismissal from the program for failing to make adequate progress towards completion of the degree.

Plagiarism

Any student found guilty of plagiarism will be suspended immediately from the program.

Program Completion and Exit

To complete the program students must fully comply with the curriculum below and all requirements noted elsewhere in the University catalog for graduate students and within the Ph.D. in Education Handbook. It is the responsibility of the student to obtain these materials and complete required portions.

Master of Science in Education Elementary Education with a Concentration in Instructional Design and Technology (MSEd)

John Baaki, Graduate Program Director

In the Master of Science in Education – Elementary-- instructional design and technology concentration, the core and support courses are combined, with students selecting 24 to 30 credits in instructional design and technology along with the problem paper or seminar research option. Working with an assigned advisor, students may take courses in the areas of distance education/telecommunications, instructional design and development, educational applications of instructional technology, and administration of instructional technology. *The MSEd - Elementary -- instructional design and technology concentration is offered online only.*

Admission

Students must:

1. hold a bachelor's degree from a regionally accredited college/university;
2. have a cumulative undergraduate grade point average of 2.80;
3. take and receive satisfactory scores on either the Graduate Record Examination (score of 290 combined on verbal and quantitative with a minimum of 140 verbal for regular admission) or Miller Analogies Test (minimum score of 45 or 399 for regular admission); and
4. have an interview with the graduate program director or his/her designee.

Performance in classes taken as a non-degree graduate student will not be taken into consideration in the admission process. No courses in the undergraduate academic major or professional education in which the student has made below a C- will be accepted for licensure in the Darden College of Education and Professional Studies.

Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for elementary/middle education.

Curriculum Requirements

Program Requirements

All courses in the core and elective blocks are offered via synchronous and asynchronous format.

Paper Option: Area I (24 credits); Area II (6 credits); 30 credits total.
Seminar Option: Area I (30 credits); Area II (6 credits); 36 credits total.

Core Courses *

Select 24-30 credits of the following:		24-30
FOUN 840	Educational Measurement and Assessment	
IDT 618	Digital Age Teaching and Learning	
IDT 746	Foundations of Distance Education	

IDT 749	Instructional Systems Design
IDT 761	Applied Instructional Design Tools
IDT 775	Designing Online Instruction
TLCI 731	Instructional Technology Trends in Curriculum and Instruction

Support Courses

Graduate electives approved by the Graduate Program Director may be substituted for technology courses when those courses complement personal and professional goals.

Research Courses

Select 6-12 of the following: 6-12

Problem Paper Option (6 credits; 30 credits required for graduation)

FOUN 612	Applied Research Methods in Education
SEPS 636	Problems in Occupational and Technical Studies

Seminar Option (13 credits; 37 credits required for graduation)

FOUN 612	Applied Research Methods in Education
IDT 773	Advanced Instructional Design Techniques

Electives

Complete electives

Total Credit Hours 30-42

Additional Requirements

Continuance

Students must:

1. maintain a grade point average of 3.00;
2. maintain a grade point average of 3.00 in the major.

All ID&T students are expected to have regular and reliable access to a multimedia computer (headphones, microphone, and web cam) and a high speed internet connection.

Exit

Students must:

1. have a 3.00 grade point average;
2. pass a written comprehensive examination;
3. have an exit interview;
4. have completed all course requirements; and
5. submit an application for graduation.

Master of Library and Information Studies Library and Information Studies (MLIS)

Library Science and Information Studies

4101 Educational Building
Hampton Boulevard
Department of STEM and Professional Studies
757-683-4305

Elizabeth A. Burns, Graduate Program Director

General Description of the Library and Information Studies Program

The purpose of the Master of Library and Information Studies is to prepare students with the theoretical knowledge and practical skills that will enable them to become highly proficient librarians, media specialists, and information authorities. This includes, but is not limited to, professional positions in academic libraries, public libraries, school libraries, and

special libraries such as health sciences, law, or business libraries as well as positions for information specialists in health environments, museums, businesses, government and other agencies.

Graduates of the program will be prepared to manage libraries, select and organize library collections, and interact with library patrons to determine and fulfill information and media needs. Further, librarianship has become a technology-based career and the proposed program reflects this focus. Through specific skills taught in the courses contained in the program of study, individuals will engage in the collection, organization, retrieval, preservation, management, and dissemination of information resources to enrich cultures within society. Thus, MLIS graduates will also be trained to perform tasks such as analyzing patron information requests, assisting in finding information sources including print, audio-video, and virtual information, and teaching information literacy skills.

We offer a concentration in school librarianship leading to endorsement for licensed teachers. Other students are advised through a plan of study completed with an advisor and filed with the program director in the semester when their 12th credit hour is completed. Coursework may focus on a type of library: academic, public, or special or area of library and information work such as youth services or evaluation & assessment.

Coursework for the MLIS is offered asynchronously and online. Coursework is project-based and students are expected to spend time in a library or other information setting for most courses. All students complete an internship. This program is available online.

The Master of Library and Information Studies Program at Old Dominion University is accredited by the American Library Association Committee on Accreditation, with the status of Initial accreditation. The next comprehensive review visit is scheduled for Fall 2028.

Admission

Students must:

1. Hold a bachelor's degree in any field from a regionally accredited college/university;
2. Have an undergraduate grade point average of at least 3.0;
3. Apply for admission to the graduate school;
4. Submit a current resume;
5. Submit a writing sample addressing a prompt supplied by Admissions

Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis.

Deadlines

New students may apply and are admitted for the fall, spring, or summer semesters.

Deadline for priority Summer admissions is March 1.

Deadline for priority Fall admissions is April 1.

Deadline for priority Spring admissions is Nov. 1.

Curriculum Requirements

Required Courses (15 credits)

LIBS 608	Foundations of Libraries and Information	3
LIBS 674	Library Management and Leadership	3
LIBS 658	Knowledge Resources: Planning, Selecting & Managing Collections	3
LIBS 677	Knowledge Organization and Access	3
LIBS 668	Internship in Libraries and Information Workplaces *	3

Additional Coursework

Select 15 credits from the following: 15

LIBS 601	STEM Education and Maker Spaces in Libraries

LIBS 602	Production of Instructional Materials	
LIBS 603	Online Resources for Teaching	
LIBS 609	History of Books and Libraries	
LIBS 610	Preservation Management in Libraries and Archives	
LIBS 611	Community Archiving	
LIBS 612	Research Methods in Library and Information Studies	
LIBS 614	Information Ethics	
LIBS 615	Action Research for School Librarians	
LIBS 642	Children’s Literature PREK-8	
LIBS 644	Literature and Media for Young Adults	
LIBS 647	Reading and Literature for Adults	
LIBS 648	Reading, Evaluating, and Selecting Graphic Novels	
LIBS 649	Storytelling	
LIBS 653	User Centered Design in Library and Information	
LIBS 654	Information Literacy Instruction	
LIBS 655	Methods and Strategies for the School Library	
LIBS 656	User Services and Programming	
LIBS 657	LGBTQIA+ Issues in Public Libraries	
LIBS 676	Library Media Services and the Curriculum	
LIBS 680	Culturally Responsive Librarianship	
LIBS 681	Assessment and Evaluation in Library and Information Science	
LIBS 684	Advanced Library Management	
LIBS 687	Cataloging and Classification	
LIBS 690	Seminar in Academic Libraries	
LIBS 691	Seminar in Public Libraries	
LIBS 693	Seminar in Archives and Special Collections	
LIBS 694	Seminar in Social Justice in Library and Information Work	
Total Credit Hours		30

* LIBS 668 may be completed after Core Coursework: LIBS 608, LIBS 658, LIBS 674, & LIBS 677

Additional Requirements

Program Requirements

Internship

All students will be expected to complete an internship (LIBS 668) in a library or information setting as a capstone course where they will have the opportunity to apply, develop, and demonstrate the competencies acquired in core courses and electives.

Electronic Portfolio

Submission of an electronic portfolio (E-portfolio) will serve as the comprehensive exam in the program. Students are expected to develop an E-portfolio that represents their mastery of standards, examples of projects completed in the program, and a focus on their individual strengths and beliefs about the profession including a resume and statement of philosophy.

Students will begin work on the E-portfolio in their first course, with coaching and peer-review throughout the program; they will be expected to successfully present the portfolio before graduation. Students who do not successfully present the E-portfolio will be provided detailed feedback and expected to re-submit.

Continuance

Students must:

1. Maintain a grade point average of 3.00;
2. Complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training> (<https://www.odu.edu/impact/responsible-conduct-of-training/>); and
3. Any courses in which the student has made below a "B-" must be repeated or, if applicable, substituted.

Exit

Students must:

1. have a 3.00 grade point average;
2. No courses in which the student has made below a "B-" will be accepted for the degree.
3. have completed all course and credit hour requirements;
4. submit an application for graduation; and
5. have successfully completed a portfolio review.

Master of Library and Information Studies

Library and Information Studies with a Concentration in School Librarianship (MLIS)

Library Science and Information Studies School Librarianship (for Licensed Teachers) Concentration

4101 Educational Building
Hampton Boulevard
Department of STEM and Professional Studies
757-683-4305

Elizabeth Burns, Graduate Program Director

This degree and concentration are intended for licensed teachers seeking to add a School Library Endorsement to their Teaching License. Students interested in school librarianship who do not have a teaching license will be advised through the Master of Library and Information Studies degree and may have additional coursework and requirements.

The purpose of the Master of Library and Information Studies is to prepare students with the theoretical knowledge and practical skills that will enable them to become highly proficient librarians, media specialists, and information authorities. This includes, but is not limited to, professional positions in academic libraries, public libraries, school libraries, and special libraries such as health sciences, law, or business libraries as well as positions for information specialists in health environments, museums, businesses, government and other agencies.

Graduates of the program will be prepared to manage libraries, select and organize library collections, and interact with library patrons to determine and fulfill information and media needs. Further, librarianship has become a technology-based career and the proposed program reflects this focus. Through specific skills taught in the courses contained in the program of study, individuals will engage in the collection, organization, retrieval, preservation, management, and dissemination of information resources to enrich cultures within society. Thus, MLIS graduates will also be trained to perform tasks such as analyzing patron information requests, assisting in finding information sources including print, audio-video, and virtual information, and teaching information literacy skills.

Coursework for the MLIS is offered asynchronously and online. Coursework is project-based and students are expected to spend time in a library or other information setting for most courses. All students complete an internship. This program is available online.

The Master of Library and Information Studies Program at Old Dominion University is accredited by the American Library Association Committee on Accreditation, with the status of Initial accreditation. The next comprehensive review visit is scheduled for Fall 2028.

Admission

Master of Library and Information Studies

School Librarianship (for Licensed Teachers*) Concentration

Students must:

1. Hold a bachelor's degree in any field from a regionally accredited college/university;
2. Have an undergraduate grade point average of at least 3.0;
3. Apply for admission to the Office of Graduate Admissions;
4. Submit a current resume;
5. Submit a writing sample addressing a prompt supplied by admissions.

Hold the Virginia Collegiate Professional License or an equivalent license from another state. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis.

* Students interested in school librarianship who do not have a Virginia Collegiate Professional License or an equivalent license from another state should apply to the Master of Library and Information Studies (without the concentration). They will be advised through the Master of Library and Information Studies degree and may have additional coursework and requirements.

Deadlines

New students may apply and are admitted for the fall, spring, or summer semester.

Deadline for priority Summer admissions is March 1.

Deadline for priority Fall admissions is April 1.

Deadline for priority Spring admissions is Nov. 1.

LIBS 693	Seminar in Archives and Special Collections

* LIBS 669 is taken after completion of all Library Science courses.

Additional Requirements

Master of Library and Information Studies

School Librarianship (for Licensed Teachers) Concentration

Continuance

Students must:

1. maintain a grade point average of 3.00;
2. have a criminal background check completed prior to placement in any field experience. For more information please review the policy in the Teacher Education Services website: <https://www.odu.edu/clinical-experiences> (<https://www.odu.edu/clinical-experiences/>).
3. complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training>, (<https://www.odu.edu/impact/responsible-conduct-of-training/>)
4. earn at least a "B-" in courses; any courses in which the student has made below a "B-" must be repeated or, if applicable, substituted.

Exit

Students must:

1. have a 3.00 grade point average;
2. earn at least a B- in courses. No courses in which the student has made below a "B-" will be accepted for the degree.
3. complete all course and credit hour requirements;
4. submit an application for graduation; and

- Submission of an electronic portfolio (E-portfolio) will serve as the comprehensive exam in the program. Students are expected to develop an E-portfolio that represents their mastery of standards, examples of projects completed in the program, and a focus on their individual strengths and beliefs about the profession including a resume and statement of philosophy.

No courses in the academic major or professional education in which the student has made below a "B-" will be accepted for licensure requirements in the Darden College of Education.

Master of Science Occupational and Technical Studies (MS)

Mickey Kosloski, Graduate Program Director

This program has been recommended for closure to the State Council for Higher Education of Virginia. Pending their approval and SACSCOC approval, all degrees for the program must be earned by August 2025. Students will not be able to select the program as their major after August 28, 2020.

This is an advanced master's degree and requires prior academic work associated with workforce development or a related area. The degree is designed to help workforce educators and trainers upgrade their knowledge and skills and prepare for leadership roles in adult and career and technical education, training, and/or the Navy's Education and Training Subspecialty (ETMS). The program is delivered at the Norfolk campus and through ODUGlobal.

Master of Science in Education Secondary Education with a Concentration in Instructional Design and Technology (MSEd)

John Baaki, Graduate Program Director

The Master of Science in Education – Secondary - instructional design and technology concentration is designed to meet the needs of professionals interested or involved in the design, development, and delivery of instruction. The courses are appropriate for a variety of venues, including preK-12, higher education, military, and business. In this specialization, student's select 24 to 30 credits in instructional design and technology plus the problems paper or seminar research option. Working with an advisor, students select courses that complement their backgrounds and professional goals. *The MSEd - Secondary -- instructional design and technology concentration is offered on-campus and online.*

Admission

Students must:

- hold a bachelor's degree from a regionally accredited college/university;
- have a cumulative undergraduate grade point average of 2.80;
- take and receive satisfactory scores on either the Graduate Record Examination (score of 290 combined on verbal and quantitative with a minimum of 140 verbal for regular admission) or Miller Analogies Test (minimum score of 45 or 399 for regular admission); and
- have an interview with the graduate program director or his/her designee.

Performance in classes taken as a non-degree graduate student will not be taken into consideration in the admission process.

Curriculum Requirements

Area I: Emphasis Courses

Introductory Courses

IDT 617	Foundations of Instructional Technology (*)	3
IDT 749	Instructional Systems Design	3

Elective Courses *

Complete elective courses	18-24

Theory:

Select at least one of the following:

IDT 746	Foundations of Distance Education
IDT 760	Cognition and Instructional Design
IDT 763	Instructional Design Theory
IDT 764	Instructional Message Design

Design:

IDT 725	Human Performance Assessment
IDT 761	Applied Instructional Design Tools
IDT 773	Advanced Instructional Design Techniques

Technology:

Select at least one of the following:

IDT 735	Noninstructional Interventions
IDT 751	Computer-Based Multi-Media Design
IDT 752	Diffusion and Adoption of Instructional Technology Innovations
IDT 755	Theory and Design of Instructional Simulation
IDT 756	Instructional Gaming: Theories and Practice
IDT 775	Designing Online Instruction

Human Performance Technology:

Select at least one of the following:

IDT 730	Principles and Practices of Human Performance Technology
IDT 737	Consulting Skills for Instructional Designers
IDT 739	Needs Analysis and Assessment

Electives: From above, or from related areas (e.g., Modeling & Simulation, Psychology, Engineering, Speech-communications, Business, I/O Psychology) with approval of advisor and GPD

Area II: Research Core Courses Required

Problem Paper Option

FOUN 612	Applied Research Methods in Education	3
SEPS 636	Problems in Occupational and Technical Studies	3

Total Credit Hours	30-36

Additional Requirements

Continuance

Students must:

- maintain a grade point average of 3.00;
- maintain a grade point average of 3.00 in the major.

All ID&T students are expected to have regular and reliable access to a multimedia computer (headphones, microphone, and web cam) and a high speed internet connection.

Exit

Students must:

- have a 3.00 grade point average;
- pass a written comprehensive examination;
- have an exit interview;
- have completed all course requirements; and
- submit an application for graduation.

Program Requirements

All courses in the core and elective blocks are offered via synchronous and asynchronous format.

Certificate

Human Performance Technology Certificate

Human performance technology involves systematic and systemic approaches to identifying how work performance improvement can be measured, and most critically applied in real environments to solve actual problems. The certificate provides the student with a fundamental understanding of human technology coupled with targeted coursework in the design and implementation of instructional and non-instructional performance interventions to contribute to performance improvement, strategic planning, and organizational change initiatives. This certificate represents a synthesis in instructional design and technology with business education that benefits performance in a variety of organizations.

Graduate of the program will have the knowledge and skills to contribute to large scale projects that impact multiple facets of an organization. They will also be able to work on performance improvement initiatives.

Admission

Degree-seeking students may enroll in certificate courses with advisor's approval.

Non-degree seeking students seeking admission into the certificate program must:

- Submit a non-degree seeking-certificate/life learner application.
- Have an earned undergraduate degree from a regionally-accredited institution, or an equivalent degree from a foreign institution, with a GPA of 3.0 or higher.
- For those whose native language is not English, submit TOEFL scores with a minimum of 230 on the computer-based TOEFL or 80 on the TOEFL iBT.

Certificate

Online Teaching for K-12 Teachers Certificate

Dr. Xinyue Ren - Certificate Program Coordinator

This certificate provides K-12 teachers with a fundamental understanding of online learning pedagogies, strategies, management, designs, and resources to better prepare them to teach in an exclusively online environment. This certificate combines the Instructional Design & Technology, Library Science, and Teaching and Learning department faculty. Courses focus on the unique pedagogical structures of online learning environments, methods for selecting, evaluating, and integrating available instructional resources and tools for online learning and approaches to management and assessment in online learning environments.

Admission and Continuance

Students seeking admission to the certificate program must meet and maintain program requirements

- Submission an application and application fee
- Submission of an undergraduate degree transcript demonstrating an earned degree from a regionally-accredited institution, or an equivalent degree from a foreign institution.
- For those whose native language is not English, submit TOEFL scores with a minimum of 230 on the computer-based TOEFL or 80 on the TOEFL iBT.

Curriculum Requirements

Curriculum

IDT 647	Online Learning	3
IDT 764	Instructional Message Design	3
LIBS 603	Online Resources for Teaching	3
TLCI 731	Instructional Technology Trends in Curriculum and Instruction	3

Total Credit Hours 12

Additional Requirements

Courses are all taught asynchronously or synchronously online

**This certificate equips students with knowledge and skills to teach online. This is not a state-approved endorsement program.*

Certificate

School Library Practice Certificate

Dr. Elizabeth Burns - School Library Program Director

The Library and Information Studies Program offers a School Library Practice Certificate assists those individuals already holding an MLIS degree (or equivalent) and interested in school librarianship to meet licensure requirements.

The School Library Practice Certificate consists of four courses, 12 semester hours, that address the competencies required for school library media licensure. Students who complete the certificate coursework will have the knowledge and skills to fulfill the roles and responsibilities of teacher, instructional partner, information specialist, program manager, and leader in a school setting.

Admission and Continuance

Students seeking admission to the certificate program must meet and maintain program requirements

- Submission of a graduate transcript demonstrating earned a MLIS degree (or equivalent) with minimum 3.0 GPA
- Submission of written essay with application
- Students must maintain a minimum grade of B- in all LIBS coursework

Curriculum Requirements

Curriculum

LIBS 602	Production of Instructional Materials	3
LIBS 642 or LIBS 644	Children's Literature PREK-8 Literature and Media for Young Adults	3
LIBS 655	Methods and Strategies for the School Library	3
LIBS 676	Library Media Services and the Curriculum	3

Total Credit Hours 12

Additional Requirements

Courses are all taught asynchronously online

**This certificate facilitates the transition to working in a school library setting. This is not a state-approved endorsement program. Individuals will be responsible for submitting transcripts/proof of certificate to state department of education for licensure. Licensure requirements vary from state to state.*

Post-Baccalaureate Endorsement Industrial Cooperative Training Post-Baccalaureate Endorsement

The endorsement program in industrial cooperative training is designed to prepare a licensed teacher to be endorsed to teach industrial cooperative training in the public schools.

Admission

Students may enroll in this teaching endorsement program as a non-degree student. If an MS degree is sought, some graduate level courses may be applied toward professional technical studies in this component of the degree. Admission should be sought into the M.S. program in occupational and technical studies with a concentration in career and technical education teaching. Graduate students can complete up to 12 graduate hours with a non-degree application. Students should contact the program coordinator to discuss admissions options. Prior to entering this program, students must have or qualify for a Virginia Collegiate Professional or Postgraduate Professional License. Secondly, they must be interviewed and accepted by the program coordinator.

Curriculum Requirements

Complete the following courses:

SEPS 401/501	Foundations of Career and Technical Education	3
SEPS 788	Instructional Strategies for Innovation in Training and Occupational Education	3
SEPS 408/508	Advanced Classroom Issues and Practices in Career and Technical Education	3
SEPS 450/550	Assessment, Evaluation and Improvement	3
SEPS 400	Instructional Systems Development	3
SEPS 503	Methods in Career and Technical Education	3
Total Credit Hours		18

Additional Requirements

Continuance and Exit

Students must:

1. earn a 2.75 cumulative grade point average, if licensure is at the undergraduate level, and a 3.00 cumulative grade point average, if licensure is at the graduate level; and
2. document at least 4000 clock hours of acceptable employment in a trade, technical, or industrial education subject area completed within the past five years.

Twelve hours of 500/600 level courses may be applied toward the Master of Science in occupational and technical studies, career and technical education teaching concentration.

Post-Baccalaureate Endorsement Teacher Education Post-Baccalaureate Endorsement

The Post-Baccalaureate Endorsement program is an approved teacher education program for individuals who have completed a bachelor's degree from a regionally accredited institution and wish to qualify for a Virginia teaching license. Students applying for admission into this approved teacher education program are considered graduate non-degree status and must

meet the college's requirements for admitting students into an approved teacher education program. Admission to Old Dominion University does not guarantee admission into degree and/or teacher preparation programs in the Darden College of Education and Professional Studies. Program sheets for the Post-Baccalaureate Endorsement programs are available in the Office of Clinical Experiences.

Admission

Students seeking admission into the post-baccalaureate endorsement program must:

1. apply for admission to Old Dominion University as graduate non-degree seeking student;
2. have achieved an overall GPA of 2.75 in the baccalaureate degree official transcript for post-baccalaureate programs offered at the undergraduate level and 2.80 for post-baccalaureate programs offered at the graduate level;
3. have earned a grade of C or C- (as determined by the specific academic department);
4. interview with and receive recommendation for admittance from a department representative, Career and Advising Resource Center advisor, or distance learning representative;
5. submit the Post-Baccalaureate Endorsement Program Application (<http://www.odu.edu/content/dam/odu/col-dept/teacher-education-services/docs/post-baccalaureate-endorsement-program-application.pdf>);
6. be aware that only 12 hours of professional education courses from another institution may transfer into a post-baccalaureate endorsement program and that practicum and/or student teaching courses are not eligible for transfer;
7. complete the professional dispositions self-survey;
8. attach the completed authorization for the release of any disciplinary action on file with the Office of Student Conduct and Academic Integrity.

Students who do not meet regular admission requirements may meet provisional admission into the post-baccalaureate endorsement program. For provisional status, a student must:

1. apply for admission to Old Dominion University as a graduate non-degree seeking student;
2. have achieved an overall GPA of 2.5-2.74 in the baccalaureate degree official transcript;
3. have earned a grade of C or C- (as determined by the specific academic department);
4. interview with and receive recommendation for admittance from a department representative, Career and Advising Resource Center advisor, or distance learning representative;
5. submit the Post-Baccalaureate Endorsement Program Application (<http://www.odu.edu/content/dam/odu/col-dept/teacher-education-services/docs/post-baccalaureate-endorsement-program-application.pdf>);
6. be aware that only 12 hours of professional education courses from another institution may transfer into a post-baccalaureate endorsement program and that practicum and/or student teaching courses are not eligible for transfer;
7. complete the professional dispositions self-survey;
8. attach the completed authorization for the release of any disciplinary action on file with the Office of Student Conduct and Academic Integrity.

Students who wish to apply to a graduate program while in the post-baccalaureate endorsement program must meet all graduate program entry requirements. Only 12 credit hours of professional education course work from a post-baccalaureate endorsement program will transfer into a graduate program.

In order to student teach, all approved teacher education program requirements must be completed, to include all content and professional education course work with the appropriate grade and GPA as outlined in the respective curriculum and passing scores on Praxis Subject Area

Assessment, the Virginia Communication and Literacy Assessment (VCLA), and the Virginia Reading Assessment (if required by the program).

Additional Requirements

Continuance

To continue in the respective post-baccalaureate teacher education program, the student must:

1. For undergraduate post-baccalaureate teacher education programs, maintain a 2.75 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
2. For graduate post-baccalaureate teacher education programs, maintain a 3.0 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
3. Continue to earn at least a grade of C or C- (depending on the program) in all courses specified in the major curriculum to include content and professional education core courses for continuance in the teacher education program;
4. Have taken ACT, SAT, Praxis Core, or equivalent math test scores prescribed by the Virginia Board of Education assessment for admission to an approved teacher education program; and
5. Have achieved passing scores in the prescribed Virginia Board of Education professional assessments for licensure described in this section of the catalog, prior to the start of the teacher candidate internship orientation.
6. Have obtained certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training. These must be on file with the Office of Clinical Experiences.

Score reports for all examinations must be on file in the Teacher Education Services & Advising Office in room 2345 of the Education Building. These score reports are to be provided by the candidate and will not be returned. For the most current information on prescribed Virginia Board of Education professional assessments for each individual passing score, visit the Teacher Education Services & Advising Office (<http://education.odu.edu/tes/>) website and review the *required assessments*.

Prior to placement in early field experiences, practica and/or internships, students are required to have a completed Clearance Background Check search, which consists of: *National Criminal Background Check for Employee or Volunteer Providing Care to Children, the Elderly and Disabled* (SP-24 Form), the Child Protective Service's *Central Registry Release of Information* (032-02-1515-11-eng, 02/14), a fingerprint check using the APPLICANT FD258 (REV 3-1-10) 1110-0046 fingerprinting card, and the National Sex Offender Registry and/or the Virginia State Police: Sex Offender Registry search. Students are liable for all costs incurred.

Exit

Students must have:

1. For undergraduate post-baccalaureate teacher education programs, maintain a 2.75 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
2. For graduate post-baccalaureate teacher education programs, maintain a 3.0 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
3. Achieved grades of C or C- (as determined by the specific academic department) in all courses specified in the major curriculum to include content and professional education core courses; and
4. Earned a passing grade in student teaching.

For more information review the initial licensure required assessments on the Clinical Experiences Office (<http://www.odu.edu/success/academic/teacher-education/val/#tab74=2>) website or visit the office in the Education Building Room 1107.

The Virginia Department of Education requires all initially licensed teachers, school counselors, administrators, and other school personnel to receive training in the area of technology. This training is received through specific courses in the approved professional education programs.

Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students should obtain current program information from their advisors and the Darden College of Education and Professional Studies' website at <http://www.odu.edu/eps>.

For more information on requirements in specific programs, students should refer to the individual program listings in this Catalog or contact the Office of Teacher Education Services & Advising or the appropriate academic department in the College of Arts and Letters (<http://catalog.odu.edu/undergraduate/collegeofartsletters/>), the College of Sciences (<http://www.odu.edu/sci/prospective.html>), or the Darden College of Education (<http://www.odu.edu/education/departments/>) and Professional Studies.

Clearance Background Check Process For All Licensure Programs

Old Dominion University requires a background clearance check of candidates interested in professional education programs. Professional education programs have several field experiences that are required for continuance and graduation from the program. The clearance background check (<http://www.odu.edu/success/academic/teacher-education/placement/background-checks/>) must be successfully completed prior to a field experience placement. Students will be provided a field experience placement when the background check process is completed with resolution of any issues. *Candidates interested in the professional education programs are advised to complete this clearance background check process immediately upon entering a program. This clearance process takes a minimum of eight weeks to complete.*

This clearance background check process (<http://www.odu.edu/success/academic/teacher-education/placement/background-checks/>) includes:

- Fingerprinting
- A social service/child protective service check
- A review of each candidate's name through the National Sex Offender Registry and/or Virginia State Police: Sex Offender Registry

Candidates are liable for all fees incurred when completing the clearance background check process (<http://www.odu.edu/success/academic/teacher-education/placement/background-checks/>). ALL clearance search results must be received and reviewed by Old Dominion University, Teacher Education Services & Advising Office to determine successful completion of the clearance process and approval for placement in a school. The completed clearance check will be posted to the student's Leo Online secure page under Test Scores. *A score of 1 means the student is cleared for placement*

Early Field Experiences

The college is committed to developing candidates skilled in teaching students of all cultural and socioeconomic backgrounds and with diverse learning needs in a fair and equitable manner. Thus, candidates must complete their early field experiences in a public or private school accredited by the Virginia Department of Education. Teacher candidates may request specific schools and districts. However, these requests are informal and ARE NOT guaranteed. Candidates may not contact school district personnel in order to request or obtain placement. Candidates may not complete their field experience at a school where an immediate relative is attending or working. Candidates are required to disclose this information on the on-line placement request.

Prior to placement, students are required to have a completed Clearance Background Check search, which consists of: the Virginia State Police Criminal History Check (State Police Form 230), the Child Protective Service Central Registry Release of Information (032-02-1515/1), a fingerprint check, and the National Sex Offender Registry and/or the Virginia State Police: Sex Offender Registry. Students are liable for all costs incurred.

A candidate may participate in a course with a field experience through one of two tracks:

Option A

A candidate may be eligible to participate in the early field experience course if s/he has been admitted into an approved teacher education program. This requires that candidates achieve the Prescribed Virginia Board of Education Assessment for Admission to an Approved Teacher Education Program. In addition, candidates must meet the GPA for their individual programs, professional education courses, and minimum grade requirements, along with any other course prerequisites.

Option B

A provisionally licensed teacher may participate in a course if s/he is currently employed with a school division, has a letter from the Virginia Department of Education listing the course as a needed requirement, and has passing Virginia Communication and Literacy Assessment (VCLA) scores. The provisionally licensed teacher will have to meet all the requirements of the course as stated in the syllabus.

Prescribed Virginia Board of Education Professional Assessments for Licensure

Old Dominion University teacher candidates seeking initial licensure through the completion of an approved teacher education program must successfully pass the Prescribed Virginia Board of Education Professional Assessments for Licensure prior to the start of the teacher candidate internship. The following assessments must be completed with a passing score:

1. Virginia Communication and Literacy Assessment (VCLA) passing composite score of 470;
2. Praxis Subject Area Assessment exam passing score approved by the Virginia Board of Education; and
3. Praxis Teaching Reading: Elementary. The passing score required for prek-3, prek-6, and k-12 special education general curriculum endorsement is 157. The required passing score for Reading Specialist is 162.

For the most current information on the prescribed Virginia Board of Education professional assessments for each individual passing score, visit the Office of Clinical Experience website, and review the Required Assessments.

Department of Teaching & Learning

3101 Education Building
757-683-3283, 757 683-3284

Angela Eckhoff, Chair

The Department of Teaching and Learning offers programs leading to the Master of Science in Education Degree with majors in Early Childhood Education, Elementary Education, Reading, and Secondary Education; and the Doctor of Philosophy in Education Degree with a concentration in Curriculum and Instruction that includes a variety of curriculum areas. Programs leading to the Master of Science in Education Degree include the 5-year undergraduate/graduate program leading to the Bachelor of Science in Interdisciplinary Studies through the College of Arts and Letters with continuation into the Master of Science in Education Degree with initial teacher licensure in Elementary Education. State-approved teacher preparation programs at the graduate level are also available for individuals with non-teaching bachelor degrees interested in licensure at the Elementary,

Middle, or Secondary school grade levels. Additionally, the Department of Teaching & Learning offers advanced programs such as Reading Specialist and Mathematics Specialist.

Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in the catalog. Students are encouraged to obtain current program information from their advisors and the Darden College of Education and Professional Studies website at <https://www.odu.edu/eps> (<https://www.odu.edu/eps/>).

Master of Science in Education Early Childhood Education with a Concentration in Initial Licensure - Pre-K-3 (MSEd)

3101 Education Building
757-683-3284

Angela Eckhoff, Graduate Program Director

This program is designed for prospective teachers who have completed the undergraduate program in teacher education primary/elementary offered by the Department of Interdisciplinary Studies in the College of Arts and Letters at Old Dominion University.

Admission

All students must apply for and be admitted into the approved M.S.Ed. with initial licensure program for Early Childhood Education (grades PreK-3). The following admission criteria must be met:

1. The Bachelor of Science Degree in Interdisciplinary Studies with a concentration in teacher education, primary/elementary from the College of Arts and Letters at Old Dominion University is required.
2. Students must meet the criteria for admission by passing the Virginia Board of Education prescribed assessments and earning the minimum required grade point averages (GPA). To review more information on the Virginia Board of Education prescribed assessments, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).
3. A cumulative undergraduate GPA of 2.80 is required for admission.
4. No courses in the academic major in which the student has made below a C will be accepted for admission in the Darden College of Education and Professional Studies.
5. Satisfactory scores must be submitted on either the Graduate Record Examination or Miller Analogies Test. A combined verbal and quantitative score of 290 is required on the GRE, with at least a minimum score of 146 on the verbal section. A minimum score of 399 is required on the MAT.
6. An application for graduate studies and official transcripts must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for early childhood, PreK-3, education.

Please note: admissions is on hold for program review.

Curriculum Requirements

Prerequisite *

TLED 474/574	Foundations and Contemporary Issues in Early Childhood Education (if not completed in BS program)	3

Required Courses

READ 683	Diagnostic Teaching of Reading in the Classroom	3
SPED 500	Foundations of Special Education: Legal Aspects and Characteristics	3
FOUN 641	Assessment and Evaluation of Student Learning	3
TLED 677	Learning and Development Across Historical and Contemporary Educational Environments	3

TLED 690	The Child and the Family	3
TLED 679	Advanced Classroom Management and Practicum in PreK-6	3
TLED 583	Seminar in Teacher Education	1
TLED 668	Internship/Student Teaching and Seminar	9
Total Credit Hours		31

* If not completed in the BS IDS Teacher Preparation Concentration program.

Due to changing University requirements, national standards, and the Virginia Board of Education licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students are encouraged to obtain current program information from their advisors and from the Teacher Education Services website: <http://www.odu.edu/tes> (<http://www.odu.edu/oce/>).

Additional Requirements

Continuance

1. Students must maintain a cumulative GPA of 3.00 and a minimum of 3.00 GPA in the major.
2. A grade of "B" or higher is required in all practicum coursework.
3. Complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training>. (<https://www.odu.edu/impact/responsible-conduct-of-training/>)
4. Students must take and pass all Virginia Board of Education prescribed assessments including the Praxis Teaching Reading: Elementary (Test 5205) and the Praxis Elementary: Multiple Subjects (Test code 5001) computer delivered, prior to or while enrolled in the Seminar in Teacher Education (TLED 583) course.
5. All course work in the program must be completed with at least a 3.00 graduate GPA, a grade of B in the advanced graduate practicum, and all assessments must be passed prior to attending the Teacher Candidate Internship Orientation session.
6. A grade of B- or higher is required in all professional education courses in the master's degree.
7. A clearance background check process must be completed prior to placement in a field experience required for practicum courses and for the teacher candidate internship. For more information, please review the policy in the Office of Clinical Experiences website <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).
8. Certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

To review more information on the Virginia Board of Education prescribed assessments visit the Teacher Education Services website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).

Exit

Requirements for graduation include:

1. Passage of the written comprehensive exam;
2. Completion of the Graduate Assessment;
3. A minimum cumulative 3.00 GPA, successful completion of the Teacher Candidate Internship, an completion of an exit interview, and submission of an application for graduation. No courses in the academic major in which the student earned below a C and no courses in professional education in which the student earned below a B- will

Doctor of Philosophy Education with a Concentration in Curriculum and Instruction (PhD)

3101 Education Building
757-683-3284

Angela Eckhoff, Graduate Program Director

The Doctor of Philosophy, Education, Curriculum and Instruction Concentration, with a concentration in Curriculum and Instruction prepares scholarly leaders to identify and examine the problems and possibilities associated with curriculum and instruction in schools and other institutions within a multicultural democratic society. The program focuses on curricular issues as a field of inquiry and develops students' abilities to address the questions that influence curriculum theory, design, development, delivery, assessment, and evaluation.

Program graduates go on to become leaders in our nation's schools, colleges, universities, and related agencies such as business, government, and research institutions. Our curriculum is solidly grounded in interpreting and producing research and scholarship, with particular attention paid to the philosophical, theoretical, historical, socio-cultural, ethical and political constructs and issues that affect curriculum and instruction.

We welcome students with interests in all institutional settings serving students across their lifespan (early childhood through adulthood). As part of their study, students in curriculum and instruction may pursue an area of specialization in:

- childhood studies;
- curriculum studies;
- elementary education;
- history and social studies education;
- instructional technology;
- literacy, language, and culture;
- mathematics education;
- multicultural education;
- science education;
- STEM education; or
- secondary education.

Admission

Admission to the Ph.D. programs in the Department of Teaching & Learning is competitive. Applicants should have a completed master's degree in an appropriate discipline from a regionally accredited university. Degrees that are equivalent to a master's degree such as L.L.B., J.D., and D.D.S., will be considered. A number of criteria are considered including graduate and undergraduate GPAs, GRE scores, writing ability, a personal interview, and the match between student interests and faculty expertise. Meeting the minimum requirements established by the department does not ensure admission to the program. A minimum undergraduate GPA of 2.8 and a minimum graduate GPA of 3.25 are recommended.

Application requirements for the Ph.D. - Education - Curriculum and Instruction Concentration are as follows:

1. A completed online application from the Office of Graduate Admissions (<http://www.odu.edu/admission/graduate/>);
2. A completed master's degree in an appropriate discipline from a regionally accredited university;
3. Three letters of reference from sources including employment supervisors and/or university faculty members capable of commenting on the applicant's current readiness for advanced graduate study;

4. Statement of intent for study in the PhD program in Curriculum and Instruction (limit 1,000 words). In this statement, address the following questions:
 - a. Describe your understanding of and your interest in the Curriculum and Instruction program.
 - b. How will the Curriculum and Instruction program help you achieve your long-term professional goals?
5. Submission of a professional curriculum vitae. Three years of teaching experience are preferred;
6. Official transcripts of all undergraduate and graduate courses and degrees completed;
7. Academic writing sample - Choose and submit one of the following options:
 - a. Previous academic writing sample (e.g., thesis, major paper, culminating project from previous graduate work), or
 - b. Develop a brief (four double-spaced pages response to the following prompt using a minimum of three academic sources): Identify and analyze an issue related to education in your local context.
8. Applicants whose native language is not English must submit a current score for the Test of English as a Foreign Language (TOEFL) of at least 600 (written) or 250 (computer based).

Applications must be complete and submitted to the ODU Office of Graduate Admissions by October 15 for spring admissions, and March 1 for Summer and Fall admissions (dates subject to change). Note: If you wish to apply for Financial Aid, deadlines for application are as much as six months earlier. Contact the Financial Aid office at 757-683-3683. Financial aid is awarded only to regularly admitted graduate students.

Completed applications will be reviewed by the Ph.D. Curriculum and Instruction Admissions and Continuance Committee. Selected applicants will be invited to campus to participate in various activities including an on-campus interview, writing sample, and a class visit.

Curriculum Requirements

Prerequisite Coursework *

Students must have taken ONE of the following research courses or equivalent:

ELS 660	Program Evaluation, Research and Planning
FOUN 611	Introduction to Research Methods in Education
FOUN 612	Applied Research Methods in Education

Students must also have the following or equivalent:

FOUN 722	Introduction to Applied Statistics and Data Analysis

Research Core (required) **

FOUN 812	Research Design and Analysis	3
TLCI 814	Qualitative Research Design in Education	3
Choose one course from EACH of the following bound pairs		9

FOUN 822	Applied Linear Models in Educational Research
or FOUN 823	Analysis of Variance Applied to Educational Research
FOUN 840	Educational Measurement and Assessment
or FOUN 870	Formative Assessment of Student Learning
TLCI 815	Advanced Qualitative Research
or FOUN 813	Program Evaluation in Education

Note: A research cognate can be earned by taking an additional four courses beyond the required 15 hours.

Common Core (Required by all C&I Concentrations) **

TLCI 802	Historical and Contemporary Perspectives on Education	3
TLCI 803	Theoretical Perspectives in Curriculum and Instruction	3
TLCI 888	Seminar in the Multicultural Environment	3

TLCI 805	Critical Issues in Curriculum Research	3
Curriculum and Instruction Concentration		
C&I Approved Course 1		3
C&I Approved Course 2		3
C&I Approved Course 3		3
C&I Approved Course 4		3
C&I Approved Course 5		3
C&I Approved Course 6		3
C&I Approved Course 7		3
Dissertation		12
TLCI 899	Dissertation	
Total Credit Hours		60

- * All students admitted into the Ph.D. program in curriculum and instruction must complete these prerequisite courses unless they have previously completed equivalent graduate level coursework or have appropriate educational experience.
- ** Course substitutions must be approved by advisor.

Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in the catalog. Students are encouraged to obtain current program information from their advisors and the Darden College of Education and Professional Studies website: <https://www.odu.edu/eps> (<https://www.odu.edu/eps/>).

Additional Requirements

Prerequisite Coursework

Prospective students should also have prior course work in statistics, and curriculum and instruction. If this requirement is not met, then additional course work will be added to the student's graduate program of study.

All students admitted into the Ph.D. program must complete the following prerequisite courses unless they have previously completed equivalent graduate level coursework or expertise.

- Introduction to Research in Education (FOUN 611) or Applied Research Methods in Education (FOUN 612) or equivalent; FOUN 611 is recommended.
- Statistics Applied to Research in Education (FOUN 722 or equivalent).

Degree Requirements

The Ph.D. in Education, Curriculum and Instruction Concentration is comprised of courses totaling a minimum of 60 academic credit hours beyond the master's degree. The curriculum includes a 15-hour research/foundations block, a 12 hour "common core" taken by all Ph.D. students in Curriculum and Instruction regardless of interest area, a 21-hour concentration core consisting of courses that reflect the student's interest area, and a 12-hour dissertation block. The dissertation will often require more than 12 credit hours depending on the length of time necessary for completion. Students entering the program may also need to complete introductory research methods statistics courses (FOUN 611 [recommended], FOUN 612 or equivalent), and Statistics Applied to Research in Education (FOUN 722 or equivalent), if they have not had such courses or cannot demonstrate competency at a satisfactory level. Students who come into the Ph.D. program with a master's degree in an academic field that is unrelated to curriculum and instruction and/or who have not completed courses to develop competency in specified areas may need to complete these courses in addition to the required courses. Students must complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/>

responsible-conduct-of-training. (<https://www.odu.edu/impact/responsible-conduct-of-training/>)

Program Continuance, Completion and Exit

It is the expectation that Curriculum and Instruction faculty will prepare Ph.D. candidates to become competent professionals with the knowledge, skills, and dispositions necessary to assume positions as researchers, teacher leaders, advocates, and scholars. On an annual basis, the Curriculum & Instruction Ph.D. Admissions and Continuance Committee and each student's advisor will formally convene to discuss the continuance of each student in the doctoral degree program.

To complete the program, students must fully comply with the curriculum below, and all requirements noted elsewhere in the University catalog for graduate students and within the Ph.D. in Education Handbook. It is the responsibility of the student to obtain these materials and adhere to program requirements.

Master of Science in Education Elementary Education with a Concentration in Elementary Education Pre-K-6 (MSEd)

General Description of Elementary Education

Elementary programs include the Master of Science in Education degree program and four post-baccalaureate licensure programs. Within the Master of Science in elementary education degree program there are a number of concentrations and emphasis area choices for both licensed teachers as well as those seeking initial licensure or endorsement. For those seeking initial licensure there are the following concentration areas: PreK-6 and middle school 6-8. For licensed teachers seeking additional education there are the following concentration areas: math specialist PK-8 and elementary generalist. Post-baccalaureate endorsement programs are designed for individuals with a non-teaching B.S. or B.A. degree who want to obtain licensure or for those with a teaching license who want to be licensed in an additional teaching area. The three endorsement programs offered in elementary education are PreK-6, Middle School 6-8, and Mathematics Specialist PreK-8.

Master of Science in Education, Elementary Education, Pre-K-6, Initial Licensure

3101 Education Building
757-683-3284

Judith Dunkerly-Bean, Graduate Program Director

The master's program in elementary school education (PreK-6) is designed for individuals with a non-teaching B.S. or B.A. degree who want to obtain licensure as a teacher in preschool through grade six and earn a master's degree at the same time. The Pre-K-6 initial licensure concentration offers two different emphasis areas: Interdisciplinary Studies (those getting a B.S. degree in Interdisciplinary Studies from ODU) or Non-Interdisciplinary Studies (those with other non-teaching undergraduate degrees).

Note to students in Washington State from the Student Achievement Council (SAC) concerning the Master of Science in Education, Elementary Education, PreK-6: Eligibility for initial educator certification in Washington is based on completion of a state approved educator preparation program. This program is approved in Virginia by the Virginia Department of Education and is authorized for field placements in Washington by the Professional Educators Standards Board. Even though you may be residing in Washington while in this program, your application for educator certification in Washington will be processed as an out-of-state application. Go to <http://pathway.pesb.wa.gov/archive/outofstate> (<http://pathway.pesb.wa.gov/archive/outofstate/>) for more information. Teachers are advised to contact their individual school districts as to whether or not

this program may qualify for teacher advancement. This program is available on-campus and online.

Non-Interdisciplinary Studies Emphasis Area

This curriculum is designed for individuals with a non-teaching BS or BA degree who want to obtain the Virginia teaching license to become a teacher in pre-k-6 grades and earn the master's degree at the same time.

Admission

All students must apply for and be admitted into the approved M.S. Ed with initial licensure program for Elementary Education (grades Pre-K-6). Admission criteria include the following

1. A Bachelor of Science from a regionally accredited college/university is required.
2. A minimum cumulative GPA of 2.80 in the bachelor's degree.
3. Students must meet the Virginia Board of Education prescribed assessments passing scores as outlined in the Office of Clinical Experiences section of this catalog. *For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>) and review the Teacher Education Handbook.*
4. No courses in the academic major in which the student has earned a grade below "C" will be accepted for admission in the Darden College of Education and Professional Studies.
5. No course in professional education in which the student has earned a grade below a "B-" will be accepted in the Darden College of Education and Professional Studies.
6. An application for graduate studies, and official transcripts must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the elementary education graduate program director.

Total Credit Hours		37

Due to changing University requirements, national standards, and the Virginia Board of Education licensure regulations, the teacher education programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students are encouraged to obtain current program information from their advisors and from the Teacher Education Services website: <http://www.odu.edu/tes> (<http://www.odu.edu/oce/>).

Additional Requirements

Continuance

1. A clearance background check process must be completed when registering for a course that requires a field experience. The clearance background check search results must be on file prior to placement in the field experience. For more information, please review the policy in the Office of Clinical Experiences website: <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).
2. Students must maintain GOOD ACADEMIC standing as noted on the academic transcript.
3. A grade of B- or higher is required in all graduate professional education coursework (excluding graduate practicum coursework).
4. A grade of "B" or higher is required in all graduate practicum coursework.
5. Students must complete the Responsible Conduct of Research (RCR) Social and Behavioral modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training>. (<https://www.odu.edu/impact/responsible-conduct-of-training/>)
6. Students must take and pass all Virginia Board of Education prescribed assessments for licensure including the Virginia Communication and Literacy Assessment (VCLA), the Praxis Teaching Reading: Elementary (Test Code 5205), and the Praxis Elementary Education: Multiple Subjects (Test code 5001), prior to or while enrolled in TLED 583-Seminar in Teacher Education.
7. Submit the Teacher Candidate Internship application for placement by the established deadline.
8. All course work, content knowledge and professional education, must be completed with appropriate grades prior to the Teacher Candidate Internship Orientation.
9. All assessments must be passed prior to the Teacher Candidate Internship Orientation. For more information on the Virginia Board of Education prescribed professional assessments, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).
10. Certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

Exit

Requirements for graduation include:

1. Submit an application for graduation;
2. Passage of the teaching portfolio comprehensive exam;
3. Completion of the Graduate Assessment;
4. A minimum cumulative 3.00 graduate GPA;
5. Successful completion of the Teacher Candidate Internship;
6. Completion of an exit interview;
7. Completion of all course requirements; and

8. No courses in the professional education area with a grade below "B-" will be accepted toward licensure requirements in the Darden College of Education and Professional Studies.

Program Requirements

Students seeking a master's degree in elementary education (grades Pre-K-6) with initial licensure must meet the academic content requirements with a minimum grade of "C" in addition to the professional education course work listed below. Transcripts will be evaluated by the teacher education advisor to determine whether academic content requirements have been met by previous course work. Subject area specific course work that was not met with previous course work must be completed prior to the Teacher Candidate Internship (student teaching) orientation session.

Master of Science in Education Elementary Education with a Concentration in Elementary Education Pre-K-6 - IDS (Initial Licensure) (MSEd)

General Description of Elementary Education

Elementary programs include the Master of Science in Education degree program and four post-baccalaureate licensure programs. Within the Master of Science in elementary education degree program there are a number of concentrations and emphasis area choices for both licensed teachers as well as those seeking initial licensure or endorsement. For those seeking initial licensure there are the following concentration areas: PreK-6 and middle school 6-8. For licensed teachers seeking additional education there are the following concentration areas: math specialist PK-8. Post-baccalaureate endorsement programs are designed for individuals with a non-teaching B.S. or B.A. degree who want to obtain licensure or for those with a teaching license who want to be licensed in an additional teaching area. The three endorsement programs offered in elementary education are PreK-6, Middle School 6-8, and Mathematics Specialist PreK-8.

Master of Science in Education, Elementary Education, Pre-K-6 (Initial Licensure)

3101 Education Building
757-683-3284

Judith Dunkerly, Graduate Program Director

The master's program in elementary school education (PreK-6) is designed for individuals with a non-teaching BS or BA degree who want to obtain licensure as a teacher in preschool through grade six and earn a master's degree at the same time. The Pre-K-6 initial licensure concentration offers three different emphasis areas: Interdisciplinary Studies (those getting a B.S. degree in Interdisciplinary Studies from ODU) or Non-Interdisciplinary Studies (those with other non-teaching undergraduate degrees). Please note that this is not an appropriate program for those holding a provisional teaching license.

Note to students in Washington State from the Student Achievement Council (SAC) concerning the Master of Science in Education, Elementary Education, PreK-6: Eligibility for initial educator certification in Washington is based on completion of a state-approved educator preparation program. This program is approved in Virginia by the Virginia Department of Education and is authorized for field placements in Washington by the Professional Educators Standards Board. Even though you may be residing in Washington while in this program, your application for educator certification in Washington will be processed as an out-of-state application. Go to <http://pathway.pesb.wa.gov/archive/outofstate> (<http://pathway.pesb.wa.gov/archive/outofstate/>) for more information. Teachers are advised to contact their individual school districts as to whether or not

this program may qualify for teacher advancement. This program is available on-campus and online.

Interdisciplinary Studies Teacher Preparation Emphasis Area

This program is designed for prospective who have earned a Bachelor of Science in Interdisciplinary Studies Teacher Preparation with a concentration in primary/elementary education offered by the Department of Interdisciplinary Studies Teacher Preparation in the College of Arts and Letters at Old Dominion University. Students must meet the required criteria for admission outlined below by passing the Virginia Board of Education prescribed assessments and earning the minimum required grade point averages (GPA).

Admission

All students must apply for and be admitted into the approved MSEd with initial licensure program for Elementary Education (grades Pre-K-6). Admission criteria include the following:

1. The Bachelor of Science in Interdisciplinary Studies Teacher Preparation with a concentration in primary/elementary education offered by the Department of Interdisciplinary Studies Teacher Preparation in the College of Arts and Letters at Old Dominion University is required.
2. A minimum cumulative GPA of 2.80 in the bachelor's degree.
3. Students must meet the Virginia Board of Education prescribed assessments passing scores as outlined in the Office of Clinical Experiences section of this catalog. *For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>) and review the Teacher Education Handbook.*
4. No courses in the academic major in which the student has earned a grade below "C" will be accepted for admission in the Darden College of Education and Professional Studies.
5. No course in professional education in which the student has earned a grade below a "B-" will be accepted in the Darden College of Education and Professional Studies.
6. An application for graduate studies, and official transcripts must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the elementary education graduate program director.
7. Applicants may not hold a provisional license in Elementary Education (not a substitute teaching license) prior to, or during this program.

Program Requirements

Students seeking initial licensure plus a master's degree in elementary education (grades Pre-K-6) must meet the academic content requirements with a minimum grade of "C". Transcripts will be evaluated by the education advisor to determine whether these academic requirements have been met by previous course work. Subject area specific course work that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session.

Curriculum

Graduate Professional Education Courses

SPED 620	Advanced Foundations of Special Education: Legal Aspects and Characteristics	3
TLED 690	The Child and the Family	3

TLED 679	Advanced Classroom Management and Practicum in PreK-6	3
TLED 583	Seminar in Teacher Education	1
TLED 668	Internship/Student Teaching and Seminar	9
Total Credit Hours		31

Additional Requirements

Continuance

1. A clearance background check process must be completed when registering for a course that requires a field experience. The clearance background check search results must be on file prior to placement in the field experience. For more information, please review the policy in the Office of Clinical Experiences website: <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).
2. Students must maintain GOOD ACADEMIC standing as noted on the academic transcript.
3. A grade of B- or higher is required in all graduate professional education coursework (excluding graduate practicum coursework).
4. A grade of "B" or higher is required in all graduate practicum coursework.
5. Students must complete the Responsible Conduct of Research (RCR) Social and Behavioral modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training>. (<https://www.odu.edu/impact/responsible-conduct-of-training/>)
6. Students must take and pass all Virginia Board of Education prescribed assessments including the Virginia Communication and Literacy Assessment (VCLA), the Praxis Teaching Reading: Elementary (Test Code 5205), and the Praxis Elementary Education: Multiple Subjects (Test code 5001), prior to or while enrolled in TLED 583-Seminar in Teacher Education.
7. Submit the Teacher Candidate Internship application for placement by the established deadline.
8. All assessments must be passed prior to the Teacher Candidate Internship Orientation. For more information on the Virginia Board of Education prescribed professional assessments, visit the Office of Clinical Experiences website: <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).
9. Students must obtain certificates of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

Exit

Requirements for graduation include:

1. Submit an application for graduation;
2. Passage of the teaching portfolio comprehensive exam;
3. Completion of the Graduate Assessment;
4. A minimum cumulative 3.00 graduate GPA;
5. Successful completion of the Teacher Candidate Internship;
6. Completion of an exit interview;
7. Completion of all course requirements; and
8. No courses in the professional education area with a grade below "B-" will be accepted toward licensure requirements in the Darden College of Education and Professional Studies.

Master of Science in Education Elementary Education with a Concentration in Licensed Teachers (MSEd)

General Description of Elementary Education

Elementary programs include the Master of Science in Education degree program and four post-baccalaureate licensure programs. Within the Master of Science in elementary education degree program there are a number of concentrations and emphasis area choices for both licensed teachers as well as those seeking initial licensure or endorsement. For those seeking initial licensure there are the following concentration areas: PreK-6, middle school 6-8, and library science K-12 (Note: the library science concentration may also be done through Master of Science in Education, Secondary Education). For licensed teachers seeking additional education there are the following concentration areas: math specialist PK-8, library science K-12 (Note: the library science concentration may also be done through Master of Science in Education, Secondary Education), and elementary generalist. Post-baccalaureate endorsement programs are designed for individuals with a non-teaching BS or BA degree who want to obtain licensure or for those with a teaching license who want to be licensed in an additional teaching area. The four endorsement programs offered in elementary education are PreK-6, Middle School 6-8, Library Science K-12, and Mathematics Specialist PreK-8.

Master of Science in Education, Elementary Education, for Licensed Teachers

3101 Education Building
757-683-3284

Brandon Butler, Graduate Program Director

The Master of Science in Education, Elementary Education program for licensed teachers is designed for those who wish to improve and update their professional competency in teaching and enrich their teaching expertise for becoming master teachers. Licensed teachers completing the program enhance their ability to teach effectively and to participate in educational research in their schools. Completion of the program requirements leads to the upgrade of the teaching license to the Postgraduate Professional level. The program of study consists of 30-credit hours, 18 credit hours taught in a cohort model with shared courses for students from the early childhood, elementary and secondary advanced master's degree programs. An additional three credit hours are completed as independent research/internship. The remaining nine credit hours focus explicitly on teaching and learning in the elementary grades. *The MSEd - Elementary Education program for licensed teachers is offered online only.*

The graduate program associated with this major is intended to meet the needs of the individual student. Program options are designed to accomplish three primary goals:

1. to enhance classroom instruction by enriching the knowledge and skills of practicing teachers;
2. to train and encourage classroom teachers to conduct in-school research so that significant findings in the learning-teaching process can be applied to the classroom situation; and
3. to permit teachers to upgrade their teaching credentials to the Postgraduate Professional License level.

Curricula for the program include specific courses that emphasize the interdisciplinary nature of teaching in diverse settings. Topics addressed in courses include curricular and pedagogical principles, assessment, English language learners, teaching in the digital age, and culturally responsive teaching. Students also learn to engage in reflective inquiry and how to conduct practitioner inquiry that directly transforms instructional practice and beliefs about teaching. The program has four component areas:

1. General core;
2. Research core;
3. Elementary emphasis area; and
4. Capstone experience.

Students must choose one of two capstone options – a research thesis and associated 3-credit hour thesis course (Thesis Option); or an internship experience and associated 3-credit hour internship course (Internship Option). The thesis option requires a successful defense of the thesis prospectus. The non-thesis internship option requires successful completion of a comprehensive examination covering program coursework.

Admission

Students must:

1. hold a bachelor's degree from a regionally accredited college/university;
2. hold the Virginia Collegiate Professional License or an equivalent from another state for elementary or middle school education;
3. have a general undergraduate grade point average of at least 2.80;
4. submit an application letter of interest;
5. submit official copies of all transcripts;
6. submit a written essay on career goals (two pages) that demonstrates academic writing proficiency;
7. submit two letters of professional reference for this program of study; and
8. have an interview with the graduate program director.

Program Requirements

Students enrolled in the Advanced Master's Degree program are expected to be dedicated to the goal of becoming master classroom teachers who can address dynamic issues in the profession through an in-depth understanding of research and practice. Students must successfully complete all elements of the 30 credit hour program of study. After admission to provisional or regular degree status, the student must meet with the graduate program director who will assist in the identification of a permanent advisor from the graduate faculty of the Darden College of Education and Professional Studies. It is the responsibility of the student to confer with the assigned advisor for the purpose of determining a thesis/internship committee, and preparing and defending the thesis/internship as a requisite for graduation.

Total Credit Hours **30**

Licensed Teachers Concentration

The Master of Science in Education, Elementary Education program for licensed teachers is designed for those who wish to improve and update their professional competency in teaching and enrich their teaching expertise for becoming master teachers. Licensed teachers completing the program enhance their ability to teach effectively and to participate in educational research in their schools. Completion of the program requirements leads to the upgrade of the teaching license to the Postgraduate Professional level.

Students seeking this degree need to apply through the Department of Teaching and Learning.

Additional Requirements

Continuance

Students must:

1. complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University;
2. maintain a grade point average of 3.00

Exit

Students must:

1. have a 3.00 grade point average;
2. pass an oral thesis proposal defense (thesis option only);
3. pass a comprehensive examination (internship option only);
4. successfully complete the thesis/internship requirement;
5. have an exit interview (online);
6. have completed all course requirements;
7. submit an application for graduation.

Master of Science in Education Elementary Education with a Concentration in Mathematics Specialist PK-8 (MSEd)

General Description of Elementary Education

Elementary programs include the Master of Science in Education degree program and four post-baccalaureate licensure programs. Within the Master of Science in elementary education degree program there are a number of concentrations and emphasis area choices for both licensed teachers as well as those seeking initial licensure or endorsement. For those seeking initial licensure there are the following concentration areas: PreK-6, middle school 6-8, and library science K-12 (Note: the library science concentration may also be done through Master of Science in Education, Secondary Education). For licensed teachers seeking additional education there are the following concentration areas: math specialist PK-8, library science K-12 (Note: the library science concentration may also be done through Master of Science in Education, Secondary Education), and elementary generalist. Post-baccalaureate endorsement programs are designed for individuals with a non-teaching BS or BA degree who want to obtain licensure or for those with a teaching license who want to be licensed in an additional teaching area. The four endorsement programs offered in elementary education are PreK-6, Middle School 6-8, Library Science K-12, and Mathematics Specialist PreK-8.

Master of Science in Education - Elementary Education - with Mathematics Specialist Endorsement (PK-8)

3101 Education Building
757-683-3284

Melva Grant, Program Director

This graduate program leads to a Master's of Science in Education degree. Elementary major, with the Mathematics Specialist (PK-8) endorsement. This program is offered in partnership with the Department of Mathematics and Statistics in the College of Sciences. *The MSED - Elementary, Mathematics Specialist (PK-8) endorsement is offered online only.*

Admission

Candidates must:

- Have 3 years of successful classroom experience in teaching mathematics;
- Hold a bachelor's degree from a regionally accredited college/university;
- Hold the Virginia Collegiate Professional License or an equivalent license from another state.
- Have an undergraduate grade point average of 2.80 and an average of 3.00 in the major; and
- Submit an application for graduate studies.

Performance in classes taken as a non-degree student will not be taken into consideration in the admission process. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate director for the program.

Curriculum

Education Content

TLED 650	Mathematics Specialists as Teacher Leaders	3
TLED 651	Teaching Mathematics for All Using Culturally Responsive Approaches	3
TLED 653	Participatory Action Research for Mathematics Specialists	3
TLED 654	Practicum for Mathematics Specialists	3
TLED 658	Mathematical Assessment for Data Driven Decisions	3

Mathematics Content

MAPD 601	Number and Operations for PK-8 Mathematics Specialists	3
MAPD 602	Geometry and Measurement for PK-8 Mathematics Specialists	3
MAPD 603	Rational Numbers and Proportional Reasoning for PK-8 Mathematics Specialists	3
MAPD 604	Probability and Statistics for PK-8 Mathematics Specialists	3
MAPD 605	Algebra and Functions for PK-8 Mathematics Specialists	3

Additional Requirements

Continuance

Candidates must maintain a grade point average of 3.00.

Exit

Candidates must:

- Have a 3.00 grade point average;
- Have completed all course requirements;
- Have completed a professional learning portfolio; and
- Submit an application for graduation.

Master of Arts in Teaching Master of Arts in Teaching - Elementary Education (MAT)

Overview

The Master of Arts in Teaching for Elementary Education is a 37-credit hour non-thesis degree program that includes a 9-credit hour student teaching experience in elementary education that will prepare students for licensure from the Virginia Department of Education. The program will prepare highly qualified professionals to teach in schools through a systematic approach to teacher preparation highlighting the intersections between contemporary research based teaching practices and learning, alongside supportive field experiences. This program focuses on teacher preparation for PreK-6 classrooms, which requires foundational knowledge in history, mathematics, English, and science.

Admission Criteria

Applicants for the Master of Arts in Teaching in Elementary Education are required to submit credentials to ODU for consideration. The documentation/criteria for acceptance include:

- A bachelor's degree from a regionally accredited college/university or equivalent institution in the United States;
- A minimum undergraduate GPA of 2.8 on a 4.0 scale;
- Official copies of transcripts from all regionally accredited institutions attended or equivalent institutions outside of the U.S.;
- Three academic and/or professional reference letters for the program of study; and

Non-native English speakers will also be required to provide current scores for the Test of English as a Foreign Language (TOEFL) of at least 550 (or 79 on the TOEFL iBT).

Program Requirements

Core Courses (12 Credit Hours)

READ 680	Literacy Across the Curriculum	3
SPED 620	Advanced Foundations of Special Education: Legal Aspects and Characteristics	3
TLED 618	Assessment and Evaluation in PK-12 Schools	3
TLED 677	Learning and Development Across Historical and Contemporary Educational Environments	3

Elementary Education (15 Credit Hours)

TLED 568	Language Acquisition and Reading for Students with Diverse Learning Needs	3
TLED 672	Integrating Children's Lit, Language Arts & Social Studies Across Early Child Curriculum	3
TLED 673	Integrating Science and Mathematics Across the Early Childhood and Elementary Curriculum	3

TLED 679	Advanced Classroom Management and Practicum in PreK-6	3
TLED 681	Critical Pedagogy in Early Childhood	3

Student Teaching (10 Credit Hours)

TLED 583	Seminar in Teacher Education	3
TLED 668	Internship/Student Teaching and Seminar	3

Total Credit Hours **37**

Continuance

1. A clearance background check process must be completed when registering for a course that requires a field experience. The clearance background check search results must be on file prior to placement in the field experience. For more information, please review the policy in the Office of Clinical Experiences website: <http://www.odu.edu/oce>.
2. Students must maintain GOOD ACADEMIC standing as noted on the academic transcript.
3. A grade of B- or higher is required in all graduate professional education coursework.
4. Students must complete the Responsible Conduct of Research (RCR) Social and Behavioral modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training>.
5. Students must take and pass all Virginia Board of Education prescribed assessments for licensure, prior to or while enrolled in TLED 583-Seminar in Teacher Education.
6. Submit the Teacher Candidate Internship application for placement by the established deadline.
7. All course work, content knowledge and professional education, must be completed with appropriate grades prior to the Teacher Candidate Internship Orientation.
8. All assessments must be passed prior to the Teacher Candidate Internship Orientation. For more information on the Virginia Board of Education prescribed professional assessments, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce>.
9. Certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

Exit

Requirements for graduation include:

1. Submit an application for graduation;
2. Passage of the teaching portfolio comprehensive exam;
3. Completion of the Graduate Assessment;
4. A minimum cumulative 3.00 graduate GPA;
5. Successful completion of the Teacher Candidate Internship;

6. Completion of all course requirements; and

7. No courses in the professional education area with a grade below "B-" will be

accepted toward licensure requirements in the Darden College of Education and

Professional Studies.

Program Requirements

Students seeking a master's degree in elementary education (grades Pre-K-6) with initial

licensure must meet the academic content requirements with a minimum grade of "C" in

addition to the professional education course work listed below. Transcripts will be

evaluated by the teacher education advisor to determine whether academic content

requirements have been met by previous course work. Subject area specific course work

that was not met with previous course work must be completed prior to the Teacher

Candidate Internship (student teaching) orientation session

Master of Arts in Teaching Master of Arts in Teaching - Secondary Education (MAT)

Overview

This program focuses on teacher preparation for grades 6-12, spanning the pre-adolescent and the adolescent learner. Students seeking the secondary education concentration must have an understanding of the content, skills, and practices of the content area, equivalent to an undergraduate degree. Transcripts will be evaluated by the education advisor to determine whether the academic requirements have been met by previous coursework. Subject area specific course work (content) that was not met in previous coursework must be completed prior to Teacher Candidate Internship (student teaching) orientation session. Experiential learning credit may be available for some non-academic work.

Admissions

Applicants for the Master of Arts in Teaching in Secondary Education are required to submit credentials to ODU for consideration. The documentation/criteria for acceptance include:

- A bachelor's degree from a regionally-accredited college/university or equivalent institution outside of the United States;
- A minimum undergraduate GPA of 2.80 on a 4.0 scale;
- Official copies of transcripts from all regionally-accredited institutions attended or equivalent institutions outside the U.S.;
- Three academic and/or professional reference letters for the program of study; and non-native English speakers will also be required to provide current scores for the Test of English as a Foreign Language (TOEFL) of at least 550 (or 79 on the iBT).

Students with previously completed graduate-level work at a regionally-accredited institution may submit a request for a maximum of 12 credit hours to be transferred. Such transfer hours would go through the admissions committee and Graduate School for approval and, if accepted, added to the transcripts. They may be used for core classes or as concentration or restricted elective courses if content is deemed equivalent to content in the proposed courses.

Program Requirements

Core Courses (12 Credit Hours)

TLED 677	Learning and Development Across Historical and Contemporary Educational Environments	3
READ 680	Literacy Across the Curriculum (Core Courses)	3
TLED 618	Assessment and Evaluation in PK-12 Schools	3
SPED 620	Advanced Foundations of Special Education: Legal Aspects and Characteristics	3

Secondary Education (15 Credit Hours)

TLED 552	Developing Instructional Strategies for Teaching in Middle/High School: Math and Science	

Student Teaching (10 Credit Hours) 10

TLED 583	Seminar in Teacher Education	
TLED 668	Internship/Student Teaching and Seminar	

Total Credit Hours 37

Continuance

- Students must complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University.
- Students must maintain a cumulative GPA of 3.00 with a minimum grade requirement of B or higher required in all practicum coursework and a minimum B grade in the remaining graduate professional education courses.
- Students must take and pass the Praxis Subject Assessment (formerly Praxis II) examination for the appropriate specialty area prior to or while enrolled in the instructional strategies course and the seminar in teacher education (TLED 583).
- A clearance background check must be completed prior to placement in a field experience required for observation and practicum courses and for the teacher candidate internship. For more information on the criminal background check process please review the information on the Office of Clinical Experiences website.
- All assessments must be passed prior to the start of the Teacher Candidate Internship Orientation session. For more information please review the information on the Office of Clinical Experiences website.

- Students must obtain certificates of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.
- To review more information on the Virginia Board of Education prescribed professional assessments visit the Office of Clinical Experiences website.

Exit

- Requirements for graduation include the following:
1. Passage of the teaching portfolio comprehensive exam,
 2. completion of the Graduate Assessment,
 3. a minimum cumulative 3.00 GPA, with a minimum grade requirement of B or higher required in all practicum coursework and a grade of B-or higher in the remaining graduate professional education courses.
 4. successful completion of the Teacher Candidate Internship,
 5. completion of all course requirements, and
 6. submission of an application for graduation.

Only courses that meet the grade required for the academic major or professional education will be accepted toward licensure requirements in the Darden College of Education and Professional Studies.

Program Requirements

Students seeking initial licensure plus a master’s degree in secondary education (grades 6-12) must meet the grade required for the academic major and professional education in order to complete the master's degree. Transcripts will be evaluated by the education advisor to determine whether the academic requirements have been met by previous course work. Subject area specific course work (content) that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session. Experiential learning credit may be available for some non-academic work.

Master of Science in Education Reading (MSEd)

Master of Science in Education, Reading (Non-Licensure, Online Master's Only)

3101 Education Building
757-683-3284

For program information, please contact reading@odu.edu

The program is designed for those candidates who do not necessarily have a teaching license but want to get a master's degree in reading. The master's only program is designed to provide professional training in literacy for administrators, literacy coaches, elementary and secondary-level teachers in private schools that do not require a teaching license, and policy makers. The non-licensure track is for students who are not interested in obtaining reading specialist endorsement. This track is designed for those students who seek to work in schools, institutions and agencies that do not require state licensure or certification. As many literacy specialists work outside of the traditional K-12 public school classroom. Program study may include an intensive search of the professional literature on literacy or selected field experiences in public, private or governmental reading program that provide literacy services to clients. In addition, candidates tutor struggling readers and aid in the diagnosis and remediation of reading problems. The program is offered online only. This degree does not provide a Reading Specialist Endorsement.

The MSED - Reading (Master's only) is offered online.

Admission

Students must:

1. Hold a bachelor's degree or higher from an accredited college/university;
2. Have an undergraduate grade point average of 2.80 and an average of 3.00 in the major, preferably education;
3. Have two letters of recommendation from former professors or principals;
4. Submit an essay;
5. Have an interview with the graduate program director;
6. Have official copies of all transcripts of undergraduate and graduate coursework and degrees sent to Graduate Admissions; and
7. Submit an online application (<https://www.odu.edu/admission/graduate>) (<https://www.odu.edu/admission/graduate/>), which includes an essay and recommendations, an official transcripts to the MSED in Reading Education program.

Performance in classes taken as a non-degree student will not be taken into consideration in the admission process. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for reading education.

Curriculum

Course requirements for completion of the degree program are listed below.

READ 612	Action Research in Reading	3
READ 614	Foundations of Literacy Learning	3
READ 619	Word Study, Phonics, and Linguistics	3
READ 622	Culturally Responsive Literacy for All Learners	3
READ 628	New Literacies, Digital Technologies, and Learning	3
READ 683	Diagnostic Teaching of Reading in the Classroom	3
READ 685	Organizing and Supervising Reading Program Development	3
READ 686	Advanced Language Development and Reading	3
READ 693	Practicum in Reading	3
TLED 775	English Language Learners in the PK-12 Classroom	3

Total Credit Hours **30**

Additional Requirements

Continuance

Students must

1. complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training>; (<https://www.odu.edu/impact/responsible-conduct-of-training/>)
2. maintain a grade point average of 3.00 overall.

Exit

Students must

1. have a 3.00 grade point average;
2. submit and pass cumulative Literacy Professional Portfolio (e-Portfolio)
3. complete an exit survey;
4. have completed all course requirements;
5. submit an application for graduation.

Program Requirements

A minimum of 30 semester credits is required for the Master's Degree in Reading Education.

Master of Science in Education Reading with a Reading Specialist Endorsement (MSEd)

Master of Science in Education, Reading with Reading Specialist Endorsement (for licensed teachers)

3101 Education Building
757-683-3284

Abha Gupta, Program Director

The program is designed to provide professional training for prospective reading specialists, literacy coaches, and elementary- and secondary-level reading teachers or a general master's degree in reading.

Extensive course offerings permit the graduate student to pursue an area of interest, such as elementary school reading, secondary school reading, college reading, literacy coaching, and reading in clinical settings. As a culminating experience, each student investigates a problem area and prepares a formal research paper or project on a topic of interest.

Candidate study may include an intensive search of the professional literature on reading or selected field experiences in public, private, or governmental reading programs that provide reading services to clients. In addition, candidates tutor children and aid in the diagnosis and remediation of reading problems. Candidates who have three years of satisfactory experience in teaching reading, completed the entire degree program, and satisfactorily completed the Reading for Virginia Educators: Reading Specialists-coded 5304 may obtain the reading specialist endorsement. *The MSED - Reading with Reading Specialist endorsement is offered online only.*

Admission

Students must:

1. Hold a bachelor's degree from a regionally accredited college/university;
2. Have an teaching license prior to beginning this program. In Virginia this is called a Collegiate Professional License or a Post-Graduate Professional License. You must send a copy of your teaching license to Graduate Admissions as part of your admissions packet; or you may hold and submit a copy of the Virginia Collegiate Professional License or an equivalent license from another state;

3. Have an undergraduate grade point average of 2.80 and an average of 3.00 in the major;
4. Have two letters of recommendation from former professors or principals;
5. Submit an essay;
6. Have an interview with the graduate program director;
7. Have official copies of all transcripts of undergraduate and graduate coursework and degrees sent to Graduate Admissions; and
8. Submit an online application (<https://www.odu.edu/admission/graduate>), which includes an essay and recommendations, an official transcripts to the MSED in Reading Education program.

Performance in classes taken as a non-degree student will not be taken into consideration in the admission process. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for reading education.

READ 612	Action Research in Reading	3
READ 614	Foundations of Literacy Learning	3
READ 619	Word Study, Phonics, and Linguistics	3

READ 693	Practicum in Reading	3
Total Credit Hours		30

Additional Requirements

Continuance

Students must

1. complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training>; (<https://www.odu.edu/impact/responsible-conduct-of-training/>)
2. maintain a grade point average of 3.00 overall; and
3. maintain a grade point average of 3.00 in the major.

Exit

Students must

1. have a 3.00 grade point average;
2. have a 3.00 grade point average in the major;
3. complete an exit survey;
4. have completed all course requirements;
5. submit an application for graduation; and
6. The degree candidates in the Reading Specialist program must successfully pass the Virginia Reading Specialist Licensure Exam (RVE-5304). Candidates receiving the master's degree only without the Reading Specialist endorsement are not required to take the Reading for Virginia Educators exam.

Program Requirements

A minimum of 30 semester credits is required for the Master's Degree in Reading Education. The Reading Specialist degree candidate must successfully pass the Virginia Reading Specialist Licensure examination

(RVE-5304), usually taken in the last semester of the program. Candidates receiving the master's degree only without the Reading Specialist endorsement are not required to take the Reading for Virginia Educators exam.

Course requirements for completion of the degree program are listed below.

Master of Science in Education Secondary Education for Licensed Teachers (MSEd)

3101 Education Building
757-683-3284

General Description of Secondary Education

Secondary programs include the Master of Science in Education degree program and three Post-baccalaureate licensure programs. Within the Master of Science in secondary education degree program there are a number of concentrations and content area choices for both licensed teachers as well as those seeking initial licensure or endorsement.

For those seeking initial licensure there are the following content areas: 6-12 (content areas: biology, chemistry, earth science, English, mathematics, physics, social studies), library science K-12 (Note: the library science concentration may also be done through Master of Science in Education, Elementary Education), and Teachers of English to Speakers of Other Languages K-12 (TESOL).

For licensed teachers seeking additional education there are the following concentration areas: 6-12 and library science K-12 (Note: the library science concentration may also be done through Master of Science in Education - Elementary). Post-baccalaureate endorsement programs are designed for individuals with a non-teaching BS or BA degree who want to obtain licensure, or for those with a teaching license who want to be licensed in an additional teaching area. The three endorsement programs offered in secondary education are 6-12, Library Science K-12, and Teachers of English to Speakers of Other Languages K-12 (TESOL).

Please note that there are secondary education programs for earning a bachelor's degree with initial licensure in grades 6-12 described in the ODU Undergraduate Catalog.

Master of Science in Education, Secondary Education, for Licensed Teachers

3101 Education Building
757-683-3284

Brandon Butler, Graduate Program Director

The Master of Science in Education, Secondary Education program for licensed teachers is designed for those who wish to improve and update their professional competency in teaching and enrich their teaching expertise for becoming master teachers. Licensed teachers completing the program enhance their ability to teach effectively and to conduct powerful educational research that has a direct impact upon their individual practice and school settings. Completion of the program requirements leads to the upgrade of the teaching license to the Postgraduate Professional level. The program of study consists of 30-credit hours, with 18 credit hours taught in a cohort model with shared courses for students from the early childhood, elementary and secondary advanced master's degree programs. An additional three credit hours are completed as independent research/internship. The remaining nine credit hours focus explicitly on teaching and learning in the secondary grades. *The MSEd - Secondary Education program for licensed teachers is offered online only.*

The graduate program associated with this major is intended to meet the needs of the individual student. Program options are designed to accomplish three primary goals:

1. to enhance classroom instruction by enriching the knowledge and skills of practicing teachers;
2. to train and encourage classroom teachers to conduct in-school research so that significant findings in the learning-teaching process can be applied to the classroom situation; and
3. to permit teachers to upgrade their teaching credentials to the Postgraduate Professional License level.

Curricula for the program include specific courses that emphasize the interdisciplinary nature of teaching in diverse settings. Topics addressed in courses include curricular and pedagogical principles, assessment, English language learners, teaching in the digital age, and culturally responsive teaching. Students also learn to engage in reflective inquiry and how to conduct practitioner inquiry that directly transforms instructional practice and beliefs about teaching. The program has four component areas:

1. General core;
2. Research core;
3. Elementary emphasis area; and
4. Capstone experience.

Students must choose one of two capstone options – a research thesis and associated 3-credit hour thesis course (Thesis Option); or an internship experience and associated 3-credit hour internship course (Internship Option). The thesis option requires a successful defense of the thesis prospectus. The non-thesis internship option requires successful completion of a comprehensive examination covering program coursework.

Admission

Students must:

1. hold a bachelor's degree from a regionally accredited college/university;
2. hold the Virginia Collegiate Professional License or an equivalent from another state for middle school or secondary education;
3. have a general undergraduate grade point average of at least 2.80;
4. submit an application letter of interest;
5. submit official copies of all transcripts;
6. submit a written essay on career goals (two pages) that demonstrates academic writing proficiency;
7. submit two letters of professional reference for this program of study; and
8. have an interview with the graduate program director.

Curriculum

Common Core

TLCI 731	Instructional Technology Trends in Curriculum and Instruction	3
TLED 618	Assessment and Evaluation in PK-12 Schools	3
TLED 775	English Language Learners in the PK-12 Classroom	3
TLED 701	Teacher as Leader	3

TLED 638	Researching Teaching in Elementary and Secondary Grades	3
TLED 671	Practitioner Inquiry in Elementary and Secondary Grades	3

Electives

TLED 745	Diversity and Equity in Secondary Education	3
TLED 702	Coaching and Mentoring	3
TLED 703	Curriculum Leadership	3

Capstone Experience - Choose 1 of 2 Options

<i>Thesis Option</i>		
TLED 699	Thesis	
<i>Internship Option</i>		

Additional Requirements

Continuance

Students must:

1. complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University;
2. maintain a grade point average of 3.00

Exit

Students must:

1. have a 3.00 grade point average;
2. pass an oral thesis proposal defense (thesis option only);
3. pass a comprehensive examination (internship option only);
4. successfully complete the thesis/internship requirement;
5. have an exit interview (online);
6. have completed all course requirements; and
7. submit an application for graduation.

Program Requirements

Students enrolled in the Advanced Master's Degree program are expected to be dedicated to the goal of becoming master classroom teachers who can address dynamic issues in the profession through an in-depth understanding of research and practice. Students must successfully complete all elements of the 30 credit hour program of study. After admission to provisional or regular degree status, the student must meet with the graduate program director who will assist in the identification of a permanent advisor from the graduate faculty of the Darden College of Education and Professional Studies. It is the responsibility of the student to confer with the assigned advisor for the purpose of determining a thesis/internship committee, and preparing and defending the thesis/internship as a requisite for graduation.

Master of Science in Education Secondary Education for Licensed Teachers, 6-12 - Science (MSEd)

Master of Science in Education, Secondary Education

3101 Education Building
757-683-3284

Secondary programs include the Master of Science in Education degree program and three Post-baccalaureate licensure programs. Within the Master of Science in secondary education degree program there are a number of concentrations and content area choices for both licensed teachers as well as those seeking initial licensure or endorsement.

For those seeking initial licensure there are the following content areas: 6-12 (content areas: biology, chemistry, earth science, English, mathematics, physics, social studies), library science K-12 (Note: the library science concentration may also be done through Master of Science in Education, Elementary Education), and Teachers of English to Speakers of Other Languages K-12 (TESOL).

For licensed teachers seeking additional education there are the following concentration areas: 6-12 and library science K-12 (Note: the library science concentration may also be done through Master of Science in Education - Elementary). Post-baccalaureate endorsement programs are designed for individuals with a non-teaching BS or BA degree who want to obtain licensure, or for those with a teaching license who want to be licensed in an additional teaching area. The three endorsement programs offered in secondary education are 6-12, Library Science K-12, and Teachers of English to Speakers of Other Languages K-12 (TESOL).

Please note that there are secondary education programs for earning a bachelor's degree with initial licensure in grades 6-12 described in the ODU Undergraduate Catalog.

Master of Science in Education for Licensed Teachers, 6-12 - Science

The Master of Science in Education, Secondary Education program for licensed teachers is designed for those who wish to improve and update their professional competency in teaching and enrich their teaching expertise for becoming master teachers. Licensed teachers completing the program enhance their ability to teach effectively and to conduct powerful educational research that has a direct impact upon their individual practice and school settings. Completion of the program requirements leads to the upgrade of the teaching license to the Postgraduate Professional level.

Students seeking this degree need to apply through the Department of Teaching and Learning.

Master of Science in Education Secondary Education with a Concentration in Initial Licensure 6-12 Mathematics (MSEd)

Master of Science in Education, Secondary Education

3101 Education Building
757-683-3284

Secondary programs include the Master of Science in Education degree program and three Post-baccalaureate licensure programs. Within the Master of Science in secondary education degree program there are a number of concentrations and content area choices for both licensed teachers as well as those seeking initial licensure or endorsement.

For those seeking initial licensure there are the following content areas: 6-12 (content areas: biology, chemistry, earth science, English, mathematics, physics, social studies), and Teachers of English to Speakers of Other Languages K-12 (TESOL).

Master of Science in Education, Secondary Education, for Licensed Teachers

3101 Education Building
757-683-3284

Tom Bean, Graduate Program Director

The Master of Science in Education, Secondary Education program for licensed teachers is designed for those who wish to improve and update their professional competency in teaching and enrich their teaching expertise for becoming master teachers. Licensed teachers completing the program enhance their ability to teach effectively and to conduct powerful educational research that has a direct impact upon their individual practice and school settings. Completion of the program requirements leads to the upgrade of the teaching license to the Postgraduate Professional level. The program of study consists of 30-credit hours, with 18 credit hours taught in a cohort model with shared courses for students from the early childhood, elementary and

secondary advanced master's degree programs. An additional three credit hours are completed as independent research/internship. The remaining nine credit hours focus explicitly on teaching and learning in the secondary grades. *The MSEd - Secondary Education program for licensed teachers is offered online only.*

The graduate program associated with this major is intended to meet the needs of the individual student. Program options are designed to accomplish three primary goals:

1. to enhance classroom instruction by enriching the knowledge and skills of practicing teachers;
2. to train and encourage classroom teachers to conduct in-school research so that significant findings in the learning-teaching process can be applied to the classroom situation; and
3. to permit teachers to upgrade their teaching credentials to the Postgraduate Professional License level.

Curricula for the program include specific courses that emphasize the interdisciplinary nature of teaching in diverse settings. Topics addressed in courses include curricular and pedagogical principles, assessment, English language learners, teaching in the digital age, and culturally responsive teaching. Students also learn to engage in reflective inquiry and how to conduct practitioner inquiry that directly transforms instructional practice and beliefs about teaching. The program has four component areas:

1. General core;
2. Research core;
3. Elementary emphasis area; and
4. Capstone experience.

Students must choose one of two capstone options – a research thesis and associated 3-credit hour thesis course (Thesis Option); or an internship experience and associated 3-credit hour internship course (Internship Option). The thesis option requires a successful defense of the thesis prospectus. The non-thesis internship option requires successful completion of a comprehensive examination covering program coursework.

Admission

All students must apply for and be admitted into the approved MSEd in Secondary Education, 6-12, with initial licensure program. For admission to the Campus-Based emphasis area, the following criteria must be met:

1. A bachelor's degree from a regionally accredited college/university is required in the liberal arts and sciences (or equivalent). The degree must include semester hours (which meet Virginia's stated coursework competencies) in one of the following content areas: English, mathematics, earth science, chemistry, biology, or physics, and history/social studies, which will be listed on the license.
2. Students must meet the required criteria for admission by passing the Virginia Board of Education prescribed assessments and earning the minimum required grade point averages (GPA). *For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>) and review the Teacher Education Handbook.*
3. A cumulative undergraduate GPA of 2.80 is required for admission.
4. Only courses that meet the grade required for the academic major or professional education will be accepted for admission in the Darden College of Education and Professional Studies.
5. An application for graduate studies and official transcripts must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for secondary education.

Curriculum

Initial Licensure 6-12 Mathematics Concentration

There are a number of individuals who have earned BS or BA degrees who now want to obtain a master's degree leading to licensure as a secondary school teacher. In the program, students complete (or have completed) a minimum of 32 credits of undergraduate courses in one endorsement area (mathematics) and an additional 31-34 credits of education courses at the graduate level.

Students seeking this degree need to apply through the Department of Teaching and Learning.

Additional Requirements

Continuance

1. Students must complete the Responsible Conduct of Research (<https://www.odu.edu/impact/responsible-conduct-of-training/>) (RCR) modules during the first twelve graduate credit hours at Old Dominion University.
2. Students must maintain a cumulative GPA of 3.00 with a minimum grade requirement of B or higher required in all practicum coursework and a minimum B- grade in the remaining graduate professional education courses.
3. Students must take and pass the Praxis Subject Assessment (formerly Praxis II) examination for the appropriate specialty area prior to or while enrolled in the instructional strategies course and the seminar in teacher education (TLED 583).
4. A clearance background check must be completed prior to placement in a field experience required for observation and practicum courses and for the teacher candidate internship. For more information on the criminal background check process please review the information on the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.
5. All assessments must be passed prior to the start of the Teacher Candidate Internship Orientation session. For more information please review the information on the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.
6. Students must obtain certificates of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

To review more information on the Virginia Board of Education prescribed professional assessments visit the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

Exit

Requirements for graduation include the following:

1. Passage of the teaching portfolio comprehensive exam,
2. completion of the Graduate Assessment,
3. a minimum cumulative 3.00 GPA, with a minimum grade requirement of B or higher required in all practicum coursework and a grade of B-or higher in the remaining graduate professional education courses.
4. successful completion of the Teacher Candidate Internship,
5. completion of an exit interview,
6. completion of all course requirements, and
7. submission of an application for graduation.

Only courses that meet the grade required for the academic major or professional education will be accepted toward licensure requirements in the Darden College of Education.

Program Requirements

Students seeking initial licensure plus a master's degree in secondary education (grades 6-12) must meet the grade required for the academic major

and professional education in order to complete the master's degree.

Transcripts will be evaluated by the education advisor to determine whether the academic requirements have been met by previous course work. Subject area specific course work (content) that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session. Experiential learning credit may be available for some non-academic work.

Master of Science in Education Secondary Education with a Concentration in Secondary Education - 6-12 (MSEd)

3101 Education Building
757-683-3284

Secondary programs include the Master of Science in Education degree program and three Post-baccalaureate licensure programs. Within the Master of Science in secondary education degree program there are a number of concentrations and content area choices for both licensed teachers as well as those seeking initial licensure or endorsement.

For those seeking initial licensure there are the following content areas: 6-12 (content areas: biology, chemistry, earth science, English, mathematics, physics, social studies) and Teachers of English to Speakers of Other Languages K-12 (TESOL).

For licensed teachers seeking additional education there are the following concentration areas: 6-12 . Post-baccalaureate endorsement programs are designed for individuals with a non-teaching BS or BA degree who want to obtain licensure, or for those with a teaching license who want to be licensed in an additional teaching area. The two endorsement programs offered in secondary education are 6-12 and Teachers of English to Speakers of Other Languages K-12 (TESOL).

Please note that there are secondary education programs for earning a bachelor's degree with initial licensure in grades 6-12 described in the ODU Undergraduate Catalog.

Master of Science in Education, Secondary Education, 6-12 with Initial Licensure

3101 Education Building
757-683-3284

Jori Beck, Graduate Program Director

This master's program in secondary education (grades 6-12) with initial licensure is designed for individuals with a non-teaching BS or BA degree who want to obtain licensure as a teacher in grades 6 through 12 and earn a master's degree at the same time. *This program is available on-campus and online.*

Note: This program is no longer accepting applications. Please refer to the Master of Arts in Teaching - Secondary Education page (<https://catalog.odu.edu/graduate/education/teaching-learning/teaching-secondary-mat/>) for degree information regarding initial licensure in secondary education at the graduate level.

Admission

All students must apply for and be admitted into the approved MSEd in Secondary Education, 6-12, with initial licensure program. For admission to the Campus-Based emphasis area, the following criteria must be met:

1. A bachelor's degree from a regionally accredited college/university is required in the liberal arts and sciences (or equivalent). The degree must include semester hours (which meet Virginia's stated coursework competencies) in one of the following content areas: English, mathematics, earth science, chemistry, biology, or physics, and history/social studies, which will be listed on the license.

- Students must meet the required criteria for admission by passing the Virginia Board of Education prescribed assessments and earning the minimum required grade point averages (GPA). *For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce/> and review the Teacher Education Handbook.*
- A cumulative undergraduate GPA of 2.80 is required for admission.
- Only courses that meet the grade required for the academic major or professional education will be accepted for admission in the Darden College of Education and Professional Studies.
- An application for graduate studies and official transcripts must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for secondary education.

- Students must obtain certificates of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

To review more information on the Virginia Board of Education prescribed professional assessments visit the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

Exit

Requirements for graduation include the following:

- Passage of the teaching portfolio comprehensive exam,
- completion of the Graduate Assessment,
- a minimum cumulative 3.00 GPA, with a minimum grade requirement of B or higher required in all practicum coursework and a grade of B-or higher in the remaining graduate professional education courses.
- successful completion of the Teacher Candidate Internship,
- completion of an exit interview,
- completion of all course requirements, and
- submission of an application for graduation.

Only courses that meet the grade required for the academic major or professional education will be accepted toward licensure requirements in the Darden College of Education.

Program Requirements

Students seeking initial licensure plus a master's degree in secondary education (grades 6-12) must meet the grade required for the academic major and professional education in order to complete the master's degree. Transcripts will be evaluated by the education advisor to determine whether the academic requirements have been met by previous course work. Subject area specific course work (content) that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session. Experiential learning credit may be available for some non-academic work.

Master of Science in Education Secondary Education with Initial Licensure 6-12 - Science (MSEd)

Master of Science in Education, Secondary Education

3101 Education Building
757-683-3284

The Department of Teaching and Learning has developed a new master's program in secondary school licensure: the Master of Arts in Teaching, Secondary Education, with concentrations in 6-12 Biology, Chemistry, Computer Science, Earth Science, English, History & Social Studies, Mathematics, and Physics. This state-approved program prepares individuals with the equivalent of an undergraduate degree in one of the content areas for VA licensure at the secondary level. For more information, please

see <https://catalog.odu.edu/graduate/education/teaching-learning/teaching-secondary-mat/#text>

Secondary programs include the Master of Science in Education degree program and three Post-baccalaureate licensure programs. Within the Master of Science in secondary education degree program there are a number of concentrations and content area choices for both licensed teachers as well as those seeking initial licensure or endorsement.

For those seeking initial licensure there are the following content areas: 6-12 (content areas: biology, chemistry, earth science, English, mathematics, physics, social studies) and Teachers of English to Speakers of Other Languages K-12 (TESOL).

For licensed teachers seeking additional education there are the following concentration areas: 6-12 . Post-baccalaureate endorsement programs are designed for individuals with a non-teaching BS or BA degree who want to obtain licensure, or for those with a teaching license who want to be licensed in an additional teaching area. The two endorsement programs offered in secondary education are 6-12 and Teachers of English to Speakers of Other Languages K-12 (TESOL).

Please note that there are secondary education programs for earning a bachelor's degree with initial licensure in grades 6-12 described in the ODU Undergraduate Catalog.

Master of Science in Education with Initial Licensure 6-12 - Science

There are a number of individuals who have earned BS or BA degrees who now want to obtain a master's degree leading to licensure as a secondary school teacher. In the program, students complete (or have completed) a minimum of 32 credits of undergraduate courses in one endorsement area (earth science, chemistry, biology, or physics) and an additional 31-34 credits of education courses at the graduate level.

Students seeking this degree need to apply through the Department of Teaching and Learning.

Certificate Literacy Coaching Certificate

3101 Education Building
757-683-3284

Jamie Colwell, Certificate Coordinator

The purpose of this certificate is to prepare literacy coaches in understanding literacy development among children using research-based theories in literacy methods and instructional design. Graduates of this program will be able to use such methods in coaching children who require enhanced instruction related to reading and writing. They will also be prepared to assess learning outcomes in literacy and to supervise classroom literacy programs. Three courses from this certificate may be counted toward the MSED in Reading.

Admission

Students must:

1. Hold a bachelor's degree from a regionally accredited college/university;
2. Have an initial teaching license prior to beginning this program. In Virginia this is called a Collegiate Professional License or a Post-Graduate Professional License. You must send a copy of your teaching license to Graduate Admissions as part of your admissions packet; or you may hold and submit a copy of the Virginia Collegiate Professional License or an equivalent license from another state;
3. Have an undergraduate grade point average of 2.80 and an average of 3.00 in the major;
4. Have official copies of all transcripts of undergraduate and graduate coursework and degrees sent to Graduate Admissions; and

5. Submit an online nondegree application (<https://www.odu.edu/admission/graduate> (<https://www.odu.edu/admission/graduate/>)).

Curriculum

This graduate certificate is comprised of four required courses that encompass the key areas of literacy coaching: foundations of literacy learning, assessment, new literacy forms, and supervision of literacy program. The four courses are:

READ 614	Foundations of Literacy Learning
READ 627	School-Wide Assessment and Professional Development
READ 628	New Literacies, Digital Technologies, and Learning
READ 685	Organizing and Supervising Reading Program Development

Total Hours 12

Certificate Secondary Education Professional Studies Certificate

Kelly Rippard, Coordinator

This certificate program is designed to support provisionally licensed teachers, who are employed by a school division in the Commonwealth, in meeting teacher licensure requirements. The certificate consists of four courses—12 semester hours—that move toward meeting the professional studies competency areas described by the Virginia Department of Education and required by all fully licensed teachers. It is not a state-approved endorsement education program.

Admission

1. Degree seeking graduate-level students admitted to the certificate program must have an earned baccalaureate degree from a regionally-accredited institution or an equivalent degree from a foreign institution.
2. Non-degree-seeking students may take a maximum of 12 credit hours prior to seeking admission.
3. Those whose native language is not English must submit a minimum score of 230 on the computer-based TOEFL or 80 on TOEFL iBT.

Curriculum Requirements

This certificate is designed to support provisionally licensed teachers, who are employed by school division in the Commonwealth of Virginia, in meeting teacher licensure requirements. The certificate consists of a four course sequence—12 semester hours—that moves toward meeting the professional studies competency areas described by the Virginia Department of Education and required by all fully licensed teachers. It is not a state-approved endorsement education program.

The professional studies certificate will be comprised of the following courses. All of these courses are currently taught at ODU as part of the MSED in Secondary Education.

**Required Courses (12 hours)*

READ 680	Literacy Across the Curriculum	3
SPED 613	Human Growth and Development	3
TLED 608	Foundations of Education and Instructional Assessment	3
TLED 640	The Management of Learning and Instruction	3
Total Credit Hours		12

**Additional course work might be necessary to fully meet teacher licensure requirements*

Additional Requirements

Course Delivery Format

The courses are all currently available in both traditional face-to-face and web-based formats. This certificate will be available in both formats.

Certificate

Teacher Leadership Certificate

Brandon Butler, Program Director

The purpose of this certificate is to prepare educators as teacher leaders in school settings. Graduates of this program will have training in how to mentor and coach teacher candidates, novice, and experienced teachers; operate as curriculum leaders at the school and division level; provide effective professional development and participate/lead professional learning communities; empower stakeholders and advocate for/participate in educational improvement.

Admission

Students must:

1. Hold a bachelor's degree from a regionally accredited college/university;
2. Hold a valid Virginia professional teaching license or an equivalent from another state;
3. Submit official copies of all transcripts of undergraduate and graduate coursework and degrees to Graduate Admissions;
4. Have successfully completed three years of teaching in private or public school settings;
5. Submit a reference letter from a school or division administrator noting support for enrollment in the certificate program;
6. Submit a written essay (approximately 500 words) describing their interest in teacher leadership and their recent experiences as a teacher leader; and
7. Submit an online non-degree application.

Curriculum Requirements

This graduate certificate is comprised of four required courses that provide a foundational knowledge of teacher leadership and encompass key areas of teacher leadership including coaching, mentoring, advocacy, curriculum leadership, and collaboration. The courses included here were designed based on a state-wide survey of teacher leadership needs as well as alignment with the Teacher Leader Model Standards (ETS, n. d.). The four courses are:

TLED 701	Teacher as Leader	3
TLED 702	Coaching and Mentoring	3
TLED 703	Curriculum Leadership	3
TLED 704	Collaboration and Advocacy	3
Total Credit Hours		12

Certificate

Teaching English to Speakers of other Languages (TESOL) Certificate

Abha Gupta, Coordinator

Lea Lee, Coordinator

This certificate would be of interest to students who want to teach English to speakers of other languages. There are two concentrations for this certificate. The first one is the Adult Learner concentration which can be used for teaching English to adult learners or for teaching English as an additional language abroad. The second concentration is designed for teachers in K-12 who may want to pursue an added endorsement in ESL.

Each concentration is a total of 15 credit hours, with the option of being completed online or traditionally.

Curriculum Requirements

Core Course

ENGL 679	First and Second Language Acquisition	3

Concentrations

Select one of the following:	12

Post-Baccalaureate K-12 Endorsement Concentration

READ 619	Word Study, Phonics, and Linguistics
READ 622	Culturally Responsive Literacy for All Learners
READ 686	Advanced Language Development and Reading
TLED 775	English Language Learners in the PK-12 Classroom

Adult Learner Concentration

ENGL 540	General Linguistics
or ENGL 672	Language Structure Analysis
ENGL 670	Methods and Materials in TESOL
or TLED 775	English Language Learners in the PK-12 Classroom
ENGL 675	Practicum in TESOL
or ENGL 722/822	Multilingualism and Writing Instruction
ENGL 677	Language and Communication Across Cultures
or ENGL 705/805	Discourse and Rhetoric Across Cultures

Total Credit Hours	15

The certificate may be taken independently of the degree, but students must be either admitted to the graduate program or as non-degree graduate certificate seeking students. A maximum of 6 semester hours of graduate credit may be transferred into the TESOL certificate program.

Post-Baccalaureate Endorsement Early Childhood Education, PreK-3 Post-Baccalaureate Endorsement

3101 Education Building
757-683-3284

Angela Eckhoff, Graduate Program Director

This program is available only to students who already possess an undergraduate degree from Old Dominion University in Interdisciplinary Studies (IDS) Teacher Preparation concentration and who want to obtain a Virginia teaching license with an endorsement in preschool through grade three.

Admission

All students must apply for and be admitted into the approved post-baccalaureate endorsement program for Early Childhood Education (grades PreK-3). The following admission criteria must be met:

1. A bachelor's degree from Old Dominion University in Interdisciplinary Studies (IDS) Teacher Preparation concentration is required to be considered for admission in this program.
2. Students must meet the required criteria for admission by passing the Virginia Board of Education prescribed assessments. Virginia Board of Education prescribed entry assessments are outlined in the Office of Clinical Experiences section of the catalog. ****For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://>**

www.odu.edu/oce (<http://www.odu.edu/oce/>) and review the *Teacher Education Handbook*.

3. A cumulative undergraduate GPA of 2.75 is required for admission.
4. No courses in the academic major or professional education in which the student has made below a C will be accepted for admission in the Darden College of Education and Professional Studies.
5. An application for non-degree admission must be submitted by the appropriate deadline for admission.

Curriculum Requirements

Prerequisite Courses

TLED 430W or IDT 618	PK-12 Instructional Technology Digital Age Teaching and Learning
TLED 301	Foundations and Introduction to Assessment of Education
SPED 313	Fundamentals of Human Growth and Development: Birth through Adolescence
TLED 468/568	Language Acquisition and Reading for Students with Diverse Learning Needs

Required Courses

SPED 406/506	Students with Diverse Learning Needs in the General Education Classroom	3
TLED 474/574	Foundations and Contemporary Issues in Early Childhood Education	3
TLED 690	The Child and the Family	3
TLED 679	Advanced Classroom Management and Practicum in PreK-6	3
READ 683	Diagnostic Teaching of Reading in the Classroom	3
TLED 583	Seminar in Teacher Education	1
TLED 669	Internship/Student Teaching and Seminar	6
Total Credit Hours		22

In order for a student to move from the post-baccalaureate endorsement program into the master's program in early childhood, graduate admission must be granted prior to completing 12 semester hours of graduate work. If accepted into the program, only up to 12 semester hours can be counted toward the graduate degree.

Due to changing University requirements, national standards, and the Virginia Board of Education licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students are encouraged to obtain current program information from their advisors and from the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

Additional Requirements

Continuance

1. Students must maintain GOOD ACADEMIC standing as noted on the academic transcript.
2. A grade of "B" or higher is required in all practicum coursework.
3. Students must complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training> (<https://www.odu.edu/impact/responsible-conduct-of-training/>).
4. Students must take and pass all Virginia Board of Education prescribed assessments including the Praxis Teaching Reading: Elementary (Test code 5205), the Virginia Communication and Literacy Assessment (VCLA), and the Praxis Elementary Multiple Subjects (Test code 5001), prior to or while enrolled in the Seminar in Teacher Education (TLED 583) course.

5. All assessments must be passed prior to the Teacher Candidate Internship Orientation session. A clearance background check process must be completed prior to placement in a field experience required for practicum courses and for the teacher candidate internship. For more information, please review the policy in the Office of Clinical Experiences website: <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>). To review more information on the Virginia Board of Education prescribed professional assessments, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).
6. Students must obtain certificates of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

Exit

Requirements for completion are:

1. GOOD ACADEMIC standing, successful completion of the Teacher Candidate Internship, completion of all course requirements, and submission of an application for Virginia licensure.
2. No courses in the academic major or professional education in which the student earned below a C will be accepted toward licensure requirements in the Darden College of Education and Professional Studies.

Program Requirements

Students seeking initial licensure for grades PreK-3 must meet the academic content knowledge requirements with a minimum grade of C. Transcripts will be evaluated by the teacher education advisor to determine whether these academic requirements have been met by previous course work at the undergraduate level. Subject area specific course work that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session.

Post-Baccalaureate Endorsement Elementary Education (PreK-6) Post-Baccalaureate Endorsement

3101 Education Building
757-683-3284

Judith Dunkerly-Bean, Graduate Program Director

Many students who already possess an undergraduate degree enter Old Dominion University for the sole purpose of meeting Virginia's teaching licensure standards. When these students apply for admission into an approved teacher education program, they are considered to be post-baccalaureate endorsement program candidates and must meet the college's policy for admitting students into an approved teacher education program. Admission to Old Dominion University does not guarantee admission into the post-baccalaureate endorsement teacher preparation programs in the Darden College of Education and Professional Studies. The Pre-K-6 post-baccalaureate endorsement option is available for those students who wish to pursue licensure and do not meet the master's degree admission requirements or who do not wish to pursue the master's degree.

This licensure program in elementary education (Pre-K-6) is designed for individuals with a non-teaching BS or BA degree, or for those with a teaching license in another teaching area, who want to obtain licensure to teach in grade Pre-K through grade six.

Admission

All students must apply for and be admitted into the approved post-baccalaureate endorsement program for Elementary Education (grades Pre-K-6). The following admission criteria must be met:

1. A bachelor's degree from a regionally accredited college/university is required in the liberal arts and sciences (or equivalent) including specific course work to meet Virginia's stated coursework competencies for elementary education (Pre-K-6) subject area preparation.
2. Students must meet the required criteria for admission by passing the Virginia Board of Education prescribed assessments and earning the minimum required grade point averages (GPA). Virginia Board of Education prescribed entry assessments are outlined in Office of Clinical Experiences section of the catalog. *For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>) and review the Teacher Education Handbook.*
3. Cumulative undergraduate GPA of 2.75 is required for admission.
4. No courses in the academic major or professional education in which the student has made below a "C" will be accepted in the Darden College of Education and Professional Studies.
5. An application for non-degree admission must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for elementary/middle education.

Program Requirements

Students seeking initial licensure for grades PreK-6 must meet the academic concentration requirements with a minimum grade of "C". Transcripts will be evaluated by the education advisor to determine whether these academic requirements have been met by previous course work. Subject area specific course work that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session.

Curriculum

Prerequisite Courses

TLED 568	Language Acquisition and Reading for Students with Diverse Learning Needs	
TLED 608	Foundations of Education and Instructional Assessment	
SPED 613	Human Growth and Development

TLED 535	Developing Instructional Strategies PreK-6: Social Studies	3
TLED 583	Seminar in Teacher Education	1
TLED 669	Internship/Student Teaching and Seminar	6
TLED 679	Advanced Classroom Management and Practicum in PreK-6	3

Total Credit Hours	31

Due to changing University requirements, national standards, and the Virginia Board of Education licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students are encouraged to obtain current program information from their advisors and from the Office of

Clinical Experiences website: <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).

Additional Requirements

Continuance

1. Students must maintain a cumulative graduate GPA of 3.00. A grade of "B" or higher is required in all practicum coursework.
2. A grade of "C" or higher is required in all undergraduate content knowledge and professional education courses.
3. A grade of "B" or higher is required in all graduate practicum courses.
4. A grade "B-" or higher is required in all graduate professional education courses (excluding graduate practicum coursework).
5. Students must complete the Responsible Conduct of Research (RCR) modules during the first twelve graduate credit hours at Old Dominion University. For more information review the instructions at: <https://www.odu.edu/impact/responsible-conduct-of-training> (<https://www.odu.edu/impact/responsible-conduct-of-training/>).
6. Students must take and pass all Virginia Board of Education prescribed assessments including the Virginia Communication and Literacy Assessment (VCLA), the Praxis Teaching Reading: Elementary (Test Code 5205), and the Praxis Elementary Education: Multiple Subjects code 5001, prior to or while enrolled in TLED 583-Seminar in Teacher Education.
7. All assessments must be passed prior to the start of the Teacher Candidate Internship Orientation session.
8. A clearance background check process must be completed prior to placement in a field experience required for practicum courses and for the teacher candidate internship. For more information please review the policy in the Office of Clinical Experiences website: <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).
9. Students must obtain certificates of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

To review more information on the Virginia Board of Education prescribed professional assessments visit the Office of Clinical Experiences website: <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>).

Exit

Requirements for completion are:

1. A minimum cumulative 3.00 graduate GPA
2. Successful completion of the Teacher Candidate Internship
3. Completion of all course requirements
4. Submission of an application for Virginia licensure.
5. No courses in the academic major or professional education in which the student earned below a "C" will be accepted toward licensure requirements in the Darden College of Education and Professional Studies.

Post-Baccalaureate Endorsement Mathematics Specialist (PK-8) Post-Baccalaureate Endorsement

Melva Grant, Program Director

This endorsement program leads to a Mathematics Specialist (PK-8) endorsement for individuals with a current Virginia license for teaching elementary or middle school mathematics. This program is offered in partnership with the Department of Mathematics and Statistics in the College of Sciences.

Admission

Candidates must:

- Have 3 years of successful classroom experience in teaching mathematics;
- Hold a bachelor's degree from a regionally accredited college/university;
- Hold the Virginia Collegiate Professional License or an equivalent license from another state.
- Have an undergraduate grade point average of 2.80 and an average of 3.00 in the major; and
- Submit an application for graduate studies.

Performance in classes taken as a non-degree student will not be taken into consideration in the admission process. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate director for the program.

Curriculum

A minimum of 21 semester credits are required. The courses for completion of the endorsement program are:

MAPD 601	Number and Operations for PK-8 Mathematics Specialists	3
MAPD 602	Geometry and Measurement for PK-8 Mathematics Specialists	3
MAPD 603	Rational Numbers and Proportional Reasoning for PK-8 Mathematics Specialists	3
MAPD 604	Probability and Statistics for PK-8 Mathematics Specialists	3
MAPD 605	Algebra and Functions for PK-8 Mathematics Specialists	3
TLED 650	Mathematics Specialists as Teacher Leaders	3
TLED 654	Practicum for Mathematics Specialists	3
Total Credit Hours		21

Additional Requirements

Continuance

Candidates must maintain a grade point average of 3.00.

Exit

Candidates must:

- Have a 3.00 grade point average;
- Have completed all course requirements;
- Have completed a professional learning portfolio; and
- Submit an application for graduation.

Post-Baccalaureate Endorsement Secondary Education, 6-12 Post-Baccalaureate Endorsement

3101 Education Building
757-683-3284

Secondary programs include the Master of Science in Education degree program and three Post-baccalaureate licensure programs. Within the Master of Science in secondary education degree program there are a number of concentrations and content area choices for both licensed teachers as well as those seeking initial licensure or endorsement.

For those seeking initial licensure there are the following content areas: 6-12 (content areas: biology, chemistry, earth science, English, mathematics, physics, social studies) and Teachers of English to Speakers of Other Languages K-12 (TESOL).

For licensed teachers seeking additional education there are the following concentration areas: 6-12. Post-baccalaureate endorsement programs are designed for individuals with a non-teaching BS or BA degree who want to obtain licensure, or for those with a teaching license who want to be licensed in an additional teaching area. The two endorsement programs offered in secondary education are 6-12 and Teachers of English to Speakers of Other Languages K-12 (TESOL).

Please note that there are secondary education programs for earning a bachelor's degree with initial licensure in grades 6-12 described in the ODU Undergraduate Catalog.

Secondary Education, 6-12, Post-Baccalaureate Endorsement

This Post-Baccalaureate endorsement program in secondary education (grades 6-12) is designed for individuals with a non-teaching BS or BA degree who want to obtain licensure as a teacher in grades 6 through 12 in the following content areas: English, mathematics, earth science, chemistry, biology or physics, and history/social studies, which will be listed on the license.

Admission

1. All students must apply for and be admitted into the approved post-baccalaureate endorsement program for Secondary Education (grades 6-12).
2. Students must meet the required criteria for admission by passing the Virginia Board of Education prescribed assessments and earning the minimum required Grade point averages (GPA). *For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>) and review the Teacher Education Handbook.*
3. A cumulative undergraduate GPA of 2.75 is required for admission.
4. Only courses that meet the grade required in the academic major or professional education will be accepted for admission in the Darden College of Education and Professional Studies.
5. An application for non-degree admission must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for secondary education.

Additional Requirements

Continuance

1. Students must complete the Responsible Conduct of Research (<https://www.odu.edu/impact/responsible-conduct-of-training/>) (RCR) modules during the first twelve graduate credit hours at Old Dominion University.
2. Students must maintain a cumulative GPA of 3.0 in the graduate professional education coursework.
3. A grade of "B" or higher is required in all practicum coursework and a grade of B- or higher required in the remaining graduate professional education courses.
4. Students must take and pass all Virginia Board of Education prescribed assessments including the Praxis Subject Assessment (formerly Praxis II) examination for the appropriate secondary endorsement prior to or while enrolled in the instructional strategies course and the Seminar in Teacher Education (TLED 583) course.
5. A clearance background check must be completed prior to placement in a field experience required for an observation or practicum courses and for the teacher candidate internship. For more information please review the clearance background clearance process on the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

- All assessments must be passed prior to the start of the Teacher Candidate Internship Orientation session.
- Students must obtain certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

To review more information on the Virginia Board of Education prescribed professional assessments visit the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

Exit

Requirements for completion are as follows:

- a minimum cumulative 3.0 GPA, with a minimum "B" grade for the practicum courses, and a minimum "B-" grade for the remaining graduate professional education courses required.
- successful completion of the Teacher Candidate Internship,
- completion all course requirements, and
- submission of an application for Virginia licensure.

Only courses that meet the grade required for the academic major or professional education will be accepted toward licensure requirements in the Darden College of Education and Professional Studies.

Program Requirements

Students seeking initial licensure for grades 6-12 must meet the grade required for the academic concentration and professional education courses. Transcripts will be evaluated by the education advisor to determine whether the academic requirements have been met by previous course work. Subject area specific course work that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session.

Post-Baccalaureate Endorsement Elementary Education, Middle School (Grades 6-8) Post-Baccalaureate Endorsement

3101 Education Building
757-683-3284

Judith Dunkerly-Bean, Graduate Program Director

This post-baccalaureate endorsement program in elementary education with a middle school concentration (grades 6-8) is designed for prospective teachers who want to obtain an initial middle school teaching license. Available to students who have a non-teaching BS or BA degree or to those having a teaching license in another area and are seeking an additional teaching license; the program requires students to take courses that meet the Commonwealth of Virginia's stated academic competency requirements and leads to two undergraduate endorsement areas selected from the following:

Mathematics *	23-29
English *	21
Science *	21
Social Studies *	21
Education Courses taken at the graduate level	38

* Minimum hours to satisfy requirement.

Please note: Advisors in the Career and Advising Resource Center will evaluate an individual's undergraduate transcript to determine which, if any, undergraduate academic content courses are needed to meet state requirements for licensure. No courses in the academic major classes in

which the student has made below a C will be accepted toward licensure in the Darden College of Education and Professional Studies.

Admission

All students must apply for and be admitted into the approved post-baccalaureate endorsement program for Elementary/Middle School Education (grades 6-8). The following criteria must be met:

- A bachelor's degree from a regionally accredited college/university is required in the liberal arts and sciences (or equivalent) to meet Virginia's stated coursework competencies for middle school education (6-8) subject areas, including a minimum of 21 semester hours (which meet Virginia's stated coursework competencies) in two content areas (English, mathematics, science, and history/social studies) which will be listed on the license.
- Students must meet the required criteria for admission by passing the Virginia Board of Education prescribed assessments and earning the minimum required Grade point averages (GPA). *For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce/> (<http://www.odu.edu/oce/>) and review the Teacher Education Handbook.*
- A cumulative undergraduate GPA of 2.75 is required for admission.
- No courses in the academic major in which the student has made below a C will be accepted for admission in the Darden College of Education and Professional Studies.
- An application for non-degree admission must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for elementary/middle education.

Program Requirements

Students seeking initial licensure for grades 6 - 8 must meet the academic concentration requirements in two of the following content areas with a minimum grade of "C". Transcripts will be evaluated by the education advisor to determine whether the academic requirements have been met by previous course work. Subject area specific course work that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session.

English: English content must include coursework in language (history, structure or grammar), literature, advanced composition, and interpersonal communication or speech; 21 credit hours.

Mathematics: Mathematics content must include coursework in college algebra, probability and statistics, pre-calculus I and II, calculus I, number systems & discrete math, geometry, linear algebra and computer programming to satisfy the requirements for the Algebra I endorsement; 23-29 credit hours

Science: Science content must include courses in each of the following: biology, chemistry, physics, and earth and space science (a laboratory course is required in two of the four science areas); 21 credit hours.

History/Social Science: History/social science content must include courses in American History, world history, economics, geography, international affairs, and current events; 21 credit hours.

All students, regardless of which two content areas selected, are required to take a Government/Civics course or complete the state and local civic education module.

Curriculum

TLED 555	Developing Instructional Strategies for Teaching in the Middle/High School: Social Studies	
TLED 552	Developing Instructional Strategies for Teaching in Middle/High School: Math and Science	
TLED 666	Internship/Student Teaching and Seminar	9
Total Credit Hours		26

Due to changing University requirements, national standards, and the Virginia Board of Education licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students are encouraged to obtain current program information from their advisors and from the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

Additional Requirements

Continuance

1. Students must maintain a cumulative GPA of 3.0 in the graduate professional education courses.
2. A grade of "B" or higher is required in all practicum coursework. A grade of "B-" is required for the remaining graduate professional education courses.
3. Students must complete the Responsible Conduct of Research (<https://www.odu.edu/impact/responsible-conduct-of-training/>) (RCR) modules during the first twelve graduate credit hours at Old Dominion University.
4. Students must take and pass the Virginia Communication and Literacy Assessment (VCLA) and the Praxis subject assessment examination for the appropriate Middle School content area prior to or while enrolled in the instructional strategies course.
5. All assessments must be passed prior to the start of the Teacher Candidate Internship Orientation session.
6. A clearance background check must be completed prior to placement in a field experience required for practicum courses and for the teacher candidate internship. For more information please review the policy on the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.
7. Students must obtain certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

Virginia Board of Education prescribed professional assessments:

- Virginia Communication and Literacy Assessment (VCLA) – a passing composite score of 470 is required on this reading and writing assessment
- Praxis Subject Assessment (formerly Praxis II) Middle School English/Language Arts
- Praxis Subject Assessment (formerly Praxis II) Middle School Mathematics
- Praxis Subject Assessment (formerly Praxis II) Middle School Science

- Praxis Subject Assessment (formerly Praxis II) Middle School Social Studies

To review more information on the Virginia Board of Education prescribed assessments visit the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

Exit

Requirements for completion are as follows:

1. a minimum cumulative 3.0 GPA
2. a grade of "B" or higher is required in all practicum coursework,
3. a grade of "B-" is required for the remaining graduate professional education courses,
4. a minimum grade of "C" in all academic major courses to be accepted toward licensure requirements in the Darden College of Education and Professional Studies,
5. successful completion of the Teacher Candidate Internship,
6. completion of all course requirements, and
7. submission of an application for Virginia licensure.

Post-Baccalaureate Endorsement Secondary Education, Teachers of English to Speakers of Other Languages (TESOL), K-12 Post- Baccalaureate Endorsement

3101 Education Building
757-683-3284

Secondary programs include the Master of Science in Education degree program and three Post-baccalaureate licensure programs. Within the Master of Science in secondary education degree program there are a number of concentrations and content area choices for both licensed teachers as well as those seeking initial licensure or endorsement.

For those seeking initial licensure there are the following content areas: 6-12 (content areas: biology, chemistry, earth science, English, mathematics, physics, social studies) and Teachers of English to Speakers of Other Languages K-12 (TESOL).

For licensed teachers seeking additional education there are the following concentration areas: 6-12. Post-baccalaureate endorsement programs are designed for individuals with a non-teaching BS or BA degree who want to obtain licensure, or for those with a teaching license who want to be licensed in an additional teaching area. The two endorsement programs offered in secondary education are 6-12 and Teachers of English to Speakers of Other Languages K-12 (TESOL).

Please note that there are secondary education programs for earning a bachelor's degree with initial licensure in grades 6-12 described in the ODU Undergraduate Catalog.

Secondary Education, Teachers of English to Speakers of Other Languages (TESOL), K-12, Post-Baccalaureate Endorsement

3101 Education Building
757-683-3284

Jori Beck, Graduate Program Director

This Post-Baccalaureate endorsement program in Teaching English as a Second Language (K-12) is designed for individuals with a non-teaching BS or BA degree who want to obtain licensure as a teacher in TESOL.

Admission

1. All students must apply for and be admitted into the approved post-baccalaureate endorsement program for TESOL (K-12).
2. Students must meet the required criteria for admission by passing the Virginia Board of Education prescribed assessments and earning the minimum required Grade point averages (GPA). *For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<https://www.odu.edu/oce/>) and review the Teacher Education Handbook.*
3. A cumulative undergraduate GPA of 2.75 is required for admission.
4. Only courses that meet the grade required for the academic major or professional education will be accepted for admission in the Darden College of Education and Professional Studies.
5. An application for non-degree admission must be submitted by the appropriate deadline for admission. Under certain circumstances, applicants who do not fully meet the requirements for regular admission to the program may be admitted on a provisional basis subject to conditions specified by the graduate program director for TESOL education.

Total Credit Hours 45

Due to changing University requirements, national standards, and the Virginia Board of Education licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students are encouraged to obtain current program information from their advisors and from the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

Additional Requirements

Continuance

1. Students must complete the Responsible Conduct of Research (<https://www.odu.edu/impact/responsible-conduct-of-training/>) (RCR) modules during the first twelve graduate credit hours at Old Dominion University.
2. Students must maintain a cumulative graduate GPA of 3.00.
3. A grade of "B" or higher is required in all practicum coursework. A minimum grade of "B-" is required for the remaining graduate professional education courses.
4. Students must take and pass all Virginia Board of Education prescribed assessments including the Praxis Subject Assessment (formerly Praxis II) English as a second language (TESOL) test code #5362, passing score of 149.
5. A clearance background check must be completed prior to placement in a field experience required for observation and practicum courses and for the teacher candidate internship. For more information on the clearance background check please review the policy in the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.
6. All assessments must be passed prior to the start of the Teacher Candidate Internship Orientation session. For more information please review the policy on the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.
7. Students must obtain certificates of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

To review more information on the Virginia Board of Education prescribed professional assessments visit the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website.

Exit

Requirements for completion are as follows:

1. a minimum cumulative 3.00 graduate GPA,
2. successful completion of the Teacher Candidate Internship,
3. completion of all course requirements with a grade of "B" or higher required in all practicum coursework and a minimum grade of "B-" required for the remaining graduate professional education courses.
4. submission of an application for Virginia licensure.

Only courses that meet the grade required for the academic major or professional education will be accepted toward licensure requirements in the Darden College of Education and Professional Studies.

Program Requirements

Students seeking initial licensure for TESOL K-12 grades must meet the grade required for the academic concentration and professional education courses. Transcripts will be evaluated by the education advisor to determine whether the academic requirements have been met by previous course work. Subject area specific course work that was not met in previous course work must be completed prior to Teacher Candidate Internship (student teaching) orientation session.

Post-Baccalaureate Endorsement Teacher Education Post-Baccalaureate Endorsement Teacher Education Programs

The Post-Baccalaureate Endorsement program is an approved teacher education program for individuals who have completed a bachelor's degree from a regionally accredited institution and wish to qualify for a Virginia

teaching license. Students applying for admission into this approved teacher education program are considered graduate non-degree status and must meet the college's requirements for admitting students into an approved teacher education program. Admission to Old Dominion University does not guarantee admission into degree and/or teacher preparation programs in the Darden College of Education and Professional Studies. Program sheets for the Post-Baccalaureate Endorsement programs are available in the Office of Clinical Experiences.

Admission

Students seeking admission into the post-baccalaureate endorsement program must:

1. apply for admission to Old Dominion University as graduate non-degree seeking student;
2. have achieved an overall GPA of 2.75 in the baccalaureate degree official transcript for post-baccalaureate programs offered at the undergraduate level and 2.80 for post-baccalaureate programs offered at the graduate level;
3. have earned a grade of C or C- (as determined by the specific academic department);
4. interview with and receive recommendation for admittance from a department representative, advisor, or distance learning representative;
5. submit the Post-Baccalaureate Endorsement Program Application (<http://www.odu.edu/content/dam/odu/col-dept/teacher-education-services/docs/post-baccalaureate-endorsement-program-application.pdf>);
6. be aware that only 12 hours of professional education courses from another institution may transfer into a post-baccalaureate endorsement program and that practicum and/or student teaching courses are not eligible for transfer;
7. complete the professional dispositions self-survey;
8. attach the completed authorization for the release of any disciplinary action on file with the Office of Student Conduct and Academic Integrity.

Students who do not meet regular admission requirements may meet provisional admission into the post-baccalaureate endorsement program. For provisional status, a student must:

1. apply for admission to Old Dominion University as a graduate non-degree seeking student;
2. have achieved an overall GPA of 2.5-2.74 in the baccalaureate degree official transcript;
3. have earned a grade of C or C- (as determined by the specific academic department);
4. interview with and receive recommendation for admittance from a department representative, Teacher Education Services advisor, or distance learning representative;
5. submit the Post-Baccalaureate Endorsement Program Application (<http://www.odu.edu/content/dam/odu/col-dept/teacher-education-services/docs/post-baccalaureate-endorsement-program-application.pdf>);
6. be aware that only 12 hours of professional education courses from another institution may transfer into a post-baccalaureate endorsement program and that practicum and/or student teaching courses are not eligible for transfer;
7. complete the professional dispositions self-survey;
8. attach the completed authorization for the release of any disciplinary action on file with the Office of Student Conduct and Academic Integrity.

Students who wish to apply to a graduate program while in the post-baccalaureate endorsement program must meet all graduate program entry requirements. Only 12 credit hours of professional education course work from a post-baccalaureate endorsement program will transfer into a graduate program.

In order to student teach, all approved teacher education program requirements must be completed, to include all content and professional education course work with the appropriate grade and GPA as outlined in

the respective curriculum and passing scores on Praxis II and the Virginia Reading Assessment (if required by the program).

Additional Requirements

Continuance

To continue in the respective post-baccalaureate teacher education program, the student must:

1. For post-baccalaureate teacher education programs, maintain a 2.75 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
2. For graduate post-baccalaureate teacher education programs, maintain a 3.0 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
3. Continue to earn at least a grade of C or C- (depending on the program) in all courses specified in the major curriculum to include content and professional education core courses for continuance in the teacher education program;
4. Have achieved passing scores in the prescribed Virginia Board of Education professional assessments for licensure described in this section of the catalog, prior to the start of the teacher candidate internship orientation.
5. Students must obtain certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training.

Score reports for all examinations must be on file in the Office of Clinical Experiences in room 1107 in the Education Building. These score reports are to be provided by the candidate and will not be returned. For the most current information on prescribed Virginia Board of Education professional assessments for each individual passing score, visit the Office of Clinical Experiences (<http://www.odu.edu/oce/>) website and review the *required assessments*.

Prior to placement in early field experiences, practica and/or internships, students are required to have a completed Clearance Background Check search, which consists of: *National Criminal Background Check for Employee or Volunteer Providing Care to Children, the Elderly and Disabled* (SP-24 Form), the Child Protective Service's *Central Registry Release of Information* (032-02-1515-11-eng, 02/14), a fingerprint check using the APPLICANT FD258 (REV 3-1-10) 1110-0046 fingerprinting card, and the National Sex Offender Registry and/or the Virginia State Police: Sex Offender Registry search. Students are liable for all costs incurred.

Exit

Students must have:

1. For post-baccalaureate teacher education programs, maintain a 2.75 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
2. For graduate post-baccalaureate teacher education programs, maintain a 3.0 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
3. Achieved grades of C or C- (as determined by the specific academic department) in all courses specified in the major curriculum to include content and professional education core courses; and
4. Earned a passing grade in student teaching.

The Virginia Department of Education requires all initially licensed teachers, school counselors, administrators, and other school personnel to receive training in the area of technology. This training is received through specific courses in the approved professional education programs.

Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students should obtain current program information from their advisors and the Darden College of Education and Professional Studies website at <https://www.odu.edu/eps> (<https://www.odu.edu/eps/>).

For more information on requirements in specific programs, students should refer to the individual program listings in this Catalog or contact the Office of Clinical Experiences or the appropriate academic department in the College of Arts and Letters (<http://catalog.odu.edu/undergraduate/collegeofartsletters/>), the College of Sciences (<http://www.odu.edu/sci/>), or the Darden College of Education and Professional Studies (<http://www.odu.edu/education/departments/>).

Clearance Background Check Process For All Licensure Programs

Old Dominion University requires a background clearance check of candidates interested in professional education programs. Professional education programs have several field experiences that are required for continuance and graduation from the program. The clearance background check (<http://www.odu.edu/success/academic/teacher-education/placement/background-checks/>) must be successfully completed prior to a field experience placement. Students will be provided a field experience placement when the background check process is completed with resolution of any issues. *Candidates interested in the professional education programs are advised to complete this clearance background check process immediately upon entering a program. This clearance process takes a minimum of eight weeks to complete.*

This clearance background check process (<http://www.odu.edu/success/academic/teacher-education/placement/background-checks/>) includes:

- Fingerprinting
- A social service/child protective service check
- A review of each candidate's name through the National Sex Offender Registry and/or Virginia State Police: Sex Offender Registry

Candidates are liable for all fees incurred when completing the clearance background check process (<http://www.odu.edu/success/academic/teacher-education/placement/background-checks/>). ALL clearance search results must be received and reviewed by Old Dominion University, Teacher Education Services & Advising Office to determine successful completion of the clearance process and approval for placement in a school. The completed clearance check will be posted to the student's Leo Online secure page under Test Scores. *A score of 1 means the student is cleared for placement*

Early Field Experiences

The college is committed to developing candidates skilled in teaching students of all cultural and socioeconomic backgrounds and with diverse learning needs in a fair and equitable manner. Thus, candidates must complete their early field experiences in a public or private school accredited by the Virginia Department of Education. Teacher candidates may request specific schools and districts. However, these requests are informal and ARE NOT guaranteed. Candidates may not contact school district personnel in order to request or obtain placement. Candidates may not complete their field experience at a school where an immediate relative is attending or working. Candidates are required to disclose this information on the on-line placement request.

Prior to placement, students are required to have a completed Clearance Background Check search, which consists of: the Virginia State Police Criminal History Check (State Police Form 230), the Child Protective Service Central Registry Release of Information (032-02-1515/1), a fingerprint check, and the National Sex Offender Registry and/or the Virginia State Police: Sex Offender Registry. Students are liable for all costs incurred.

A candidate may participate in a course with a field experience through one of two tracks:

Option A

A candidate may be eligible to participate in the early field experience course if s/he has been admitted into an approved teacher education program. This requires that candidates achieve a passing Praxis Core score or the Prescribed Virginia Board of Education Assessment for Admission to an Approved Teacher Education Program. In addition, candidates must meet the GPA for their individual programs, professional education courses, and minimum grade requirements, along with any other course prerequisites.

Option B

A provisionally licensed teacher may participate in a course if s/he is currently employed with a school division, has a letter from the Virginia Department of Education listing the course as a needed requirement, and has passing Virginia Communication and Literacy Assessment (VCLA) scores. The provisionally licensed teacher will have to meet all the requirements of the course as stated in the syllabus.

Prescribed Virginia Board of Education Professional Assessments for Licensure

Old Dominion University teacher candidates seeking initial licensure through the completion of an approved teacher education program must successfully pass the Prescribed Virginia Board of Education Professional Assessments for Licensure prior to the start of the teacher candidate internship.

For the most current information on the prescribed Virginia Board of Education admission assessment, visit the Office of Clinical Experiences website, <http://www.odu.edu/oce> (<http://www.odu.edu/oce/>) and review the Teacher Education Handbook.

Teacher Education Educator Preparation

The major purpose in its teacher education programs is to prepare teachers who have knowledge of their teaching disciplines, abilities to practice state-of-the-art instruction to students of various cultural and socioeconomic backgrounds, and demonstrate dispositions that reflect commitment to teaching and learning as well as lifelong professional growth and development. The Darden College of Education and Professional Studies offers post-baccalaureate and master's programs that lead to licensure in the following areas:

- Early Childhood Education PreK-3
- Elementary Education PreK-6
- Middle Level Education (6-8)
- Special Education:
 - Adapted Curriculum
 - Early Childhood
 - General Curriculum
- Secondary Education
 - Biology
 - Career & Technical Education: Marketing Education
 - Career & Technical Education: Technology Education
 - Chemistry
 - Earth Science
 - English
 - History & Social Studies
 - Mathematics
 - Physics
- PreK-12 Endorsements:
 - English as a Second Language
 - Health and Physical Education
 - Library Media

- Art Education
- World Languages (French, German, Spanish)
- Administration and Supervision & Personnel Support:
 - Educational Leadership
 - Math Specialist
 - Reading Specialist
 - School Counseling

All licensure programs require school-based field experiences. For additional information about the clearance background check process and other requirements, contact the Office of Clinical Experiences (<https://www.odu.edu/oce> (<https://www.odu.edu/oce/>)), which facilitates field experiences and licensure processes for all students who want to become teachers.

Professional Studies Certificate

<https://www.odu.edu/teaching/academics/professional-studies-certificate> (<https://www.odu.edu/teaching/academics/professional-studies-certificate/>)

This certificate is designed to support provisionally licensed teachers, who are employed by a school division in the Commonwealth, in meeting teacher licensure requirements.

Master's Degree Teacher Education Programs

The master's degree licensure programs are for individuals who have a bachelor's degree but have not earned a Virginia teaching license. Students applying for admission into master's with licensure programs must meet the college's requirements for admitting students into an approved teacher education program. Admission to Old Dominion University does not guarantee admission into degree and/or teacher preparation programs in the Darden College of Education and Professional Studies. Refer to the admissions, continuance, and exit requirements for each licensure area specified in the catalog sections of the appropriate departmental offices in the Darden College of Education and Professional Studies (links provided at the top of the page).

Programs

Post-Baccalaureate Endorsement Program

- Teacher Education Post-Baccalaureate Endorsement (p. 222)

Post-Baccalaureate Endorsement Teacher Education Post-Baccalaureate Endorsement Post-Baccalaureate Teacher Education Programs

The Post-Baccalaureate Endorsement program is an approved teacher education program for individuals who have completed a bachelor's degree from a regionally accredited institution and wish to qualify for a Virginia teaching license. Students applying for admission into this approved teacher education program are considered graduate non-degree status and must meet the college's requirements for admitting students into an approved teacher education program. Admission to Old Dominion University does not guarantee admission into degree and/or teacher preparation programs in the Darden College of Education and Professional Studies. Program sheets for the Post-Baccalaureate Endorsement programs are available in the Office of Clinical Experiences.

Admission

Students seeking admission into the post-baccalaureate endorsement program must:

1. apply for admission to Old Dominion University as graduate non-degree seeking student

2. have achieved an overall GPA of 2.75-2.80 (as outlined in the specific curriculum);
3. have earned a grade of C or C- (as determined by the specific academic department);
4. interview with and receive recommendation for admittance from a department representative, graduate program director, or ODUGlobal representative;
5. submit the Post-Baccalaureate Endorsement Program Application (<http://www.odu.edu/content/dam/odu/col-dept/teacher-education-services/docs/post-baccalaureate-endorsement-program-application.pdf>);
6. be aware that only 12 hours of professional education courses from another institution may transfer into a post-baccalaureate endorsement program and that practicum and/or student teaching courses are not eligible for transfer;
7. complete the professional dispositions self-survey;
8. attach the completed authorization for the release of any disciplinary action on file with the Office of Student Conduct and Academic Integrity.

Students who do not meet regular admission requirements may meet provisional admission into the post-baccalaureate endorsement program. For provisional status, a student must:

1. apply for admission to Old Dominion University as a graduate non-degree seeking student;
2. have achieved an overall GPA of 2.5-2.74 in the baccalaureate degree official transcript;
3. have earned a grade of C or C- (as determined by the specific academic department);
4. interview with and receive recommendation for admittance from a department representative, or distance learning representative;
5. submit the Post-Baccalaureate Endorsement Program Application (<http://www.odu.edu/content/dam/odu/col-dept/teacher-education-services/docs/post-baccalaureate-endorsement-program-application.pdf>);
6. be aware that only 12 hours of professional education courses from another institution may transfer into a post-baccalaureate endorsement program and that practicum and/or student teaching courses are not eligible for transfer;
7. complete the professional dispositions self-survey;
8. attach the completed authorization for the release of any disciplinary action on file with the Office of Student Conduct and Academic Integrity.

Students who wish to apply to a graduate program while in the post-baccalaureate endorsement program must meet all graduate program entry requirements. Only 12 credit hours of professional education course work from a post-baccalaureate endorsement program will transfer into a graduate program.

In order to student teach, all approved teacher education program requirements must be completed, to include all content and professional education course work with the appropriate grade and GPA as outlined in the respective curriculum and passing scores on Praxis II, the Virginia Communication and Literacy Assessment (VCLA), and the Virginia Reading Assessment (if required by the program).

Additional Requirements

Continuance

To continue in the respective post-baccalaureate teacher education program, the student must:

1. Maintain a 2.75-2.80 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
2. Maintain a 3.0 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;

3. Continue to earn at least a grade of C or C- (depending on the program) in all courses specified in the major curriculum to include content and professional education core courses for continuance in the teacher education program;
4. Have achieved passing scores in the prescribed Virginia Board of Education professional assessments for licensure described in this section of the catalog, prior to the start of the teacher candidate internship orientation.
5. Have obtained certificate of completion in First Aid/AED/CPR, Dyslexia Awareness Training, Child Abuse and Neglect Recognition and Intervention Training, Regulations Governing the Use of Restraint and Seclusion in Elementary and Secondary Schools, and Cultural Competence Training. These must be on file with the Office of Clinical Experiences.

Score reports for all examinations must be on file in the Career and Academic Resource Center and Office of Clinical Experiences. These score reports are to be provided by the candidate and will not be returned. For the most current information on prescribed Virginia Board of Education professional assessments for each individual passing score, visit the Office of Clinical Experiences (<https://www.odu.edu/oce/>) website and review the *required assessments*.

Prior to placement in early field experiences, practica and/or internships, students are required to have a completed Clearance Background Check search, which consists of: *National Criminal Background Check for Employee or Volunteer Providing Care to Children, the Elderly and Disabled* (SP-24 Form), the Child Protective Service's *Central Registry Release of Information* (032-02-1515-11-eng, 02/14), a fingerprint check using the APPLICANT FD258 (REV 3-1-10) 1110-0046 fingerprinting card, and the National Sex Offender Registry and/or the Virginia State Police: Sex Offender Registry search. Students are liable for all costs incurred.

Exit

Students must have:

1. For undergraduate post-baccalaureate teacher education programs, maintain a 2.75 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
2. Maintain a 3.0 minimum grade point average overall (or as outlined in the specific curriculum), in the major and in the content and professional education core courses;
3. Achieved grades of C or C- (as determined by the specific academic department) in all courses specified in the major curriculum to include content and professional education core courses; and
4. Earned a passing grade in student teaching.

Due to changing University requirements, national accreditation standards, and Commonwealth licensure regulations, the programs in the Darden College of Education and Professional Studies are under constant revision. Any changes resulting from these factors supersede the program requirements described in this Catalog. Students should obtain current program information from their advisors and the Darden College of Education and Professional Studies website at www.education.odu.edu (<https://www.odu.edu/education/>).

For more information on requirements in specific programs, students should refer to the individual program listings in this catalog or contact the Office of Clinical Experiences or the appropriate academic department in the Darden College of Education and Professional Studies (<http://www.odu.edu/education/departments/>).

Teacher Candidate Dispositions

All teacher candidates are expected to demonstrate behaviors that are indicative of the following dispositions characteristic of effective educators. All candidates will be assessed a minimum of three times throughout their program, including entry. Any teacher candidate who is not displaying these dispositions will be subject to the disposition policy found at Office

of Clinical Experiences website (<https://www.odu.edu/oce/>). Demonstrated professional dispositions are expected for continuance in the program.

Prescribed Virginia Board of Education Professional Assessments for Licensure

Old Dominion University teacher candidates seeking initial licensure through the completion of an approved teacher education program must successfully pass the Prescribed Virginia Board of Education Professional Assessments for Licensure prior to the start of the teacher candidate internship. The following assessments must be completed with a passing score:

1. Virginia Communication and Literacy Assessment (VCLA) passing composite score of 470;
2. Praxis subject assessment passing score approved by the Virginia Board of Education; and
3. Praxis Teaching Reading: Elementary. The passing score required for prek-3, prek-6, and k-12 special education general curriculum endorsement is 159.

For the most current information on the prescribed Virginia Board of Education professional assessments for each individual passing score, visit the Office of Clinical Experiences website, and review the Required Assessments.

Mission Statement

In accordance with the mission of Old Dominion University, the Frank Batten College of Engineering and Technology promotes the advancement of engineering knowledge, both by its creation and dissemination and by providing successful graduates and a continuously improving learning environment to its constituents, while maintaining ethical, multicultural and global standards.

Overview

The Frank Batten College of Engineering and Technology at Old Dominion University offers degrees in engineering and engineering technology.

The graduate engineering programs at Old Dominion University are specifically designed to take advantage of and enhance unique assets in the Hampton Roads area, a complex of seven major cities. These assets include: 1) a strong military presence with multiple high technology facilities, particularly as it relates to modeling and simulation; 2) the NASA Langley Research Center with its focus on aeronautics and space exploration; 3) the Jefferson Laboratories, a major center of nuclear physics and home of a major Free Electron Laser; 4) one of the major international deep-water ports on the east coast of the United States; 5) a major ship building and ship repair industry, including Newport News Shipbuilding, the only builder of nuclear aircraft carriers in the U.S.; 6) a major high technology industry base; and 7) a variety of commercial enterprises. These assets have enabled the development of distinctive engineering curricula.

Master's Programs

The Batten College of Engineering and Technology grants the following master's degrees: Master of Science in Engineering, Master of Engineering, Master of Science in Engineering Management, and Master of Engineering Management. For program options, admission information and degree requirements, interested students should refer to the list available on the Programs tab as well as the individual program descriptions in this catalog.

Doctoral Programs

The Batten College of Engineering and Technology grants degrees of Doctor of Philosophy in Engineering and Doctor of Engineering. For program options, admission information and degree requirements, interested students should refer to the below list of programs as well as the individual program descriptions in this catalog.

Linked Bachelor's/Master's Degree Programs

Linked Bachelor's/Master's programs are designed to allow qualified students to secure a space in a master's program available in the Frank Batten College of Engineering and Technology while they are still pursuing their undergraduate degrees. An eligible student can choose a master's program in the same discipline as his/her bachelor's program or in a complementary discipline. Subject to the approval of the undergraduate and graduate program directors, a student enrolled in a linked program can count up to six credit hours of course work towards both the undergraduate and the graduate degrees. Full-time students may be able to complete the requirements for the bachelor's degree in four years and the master's degree in one additional

year. Students in linked programs must earn a minimum of 150 credit hours (120 discrete credit hours for the undergraduate degree and 30 discrete credit hours for the graduate degree).

Students who are matriculated in an undergraduate major in the Frank Batten College of Engineering and Technology with a GPA of at least 3.00 overall and 3.00 in the major are eligible to apply for admission to a Linked Bachelor's/Master's program. Transfer students who desire to be admitted to a linked program at the time they join an undergraduate major at Old Dominion University are eligible to apply if their overall GPA at their previous institution is 3.25 or higher. Prerequisite courses may be required for engineering technology majors to pursue a master's degree in engineering.

Continuance in a Linked Bachelor's/Master's program requires maintenance of a GPA of 3.00 or higher overall and in the major.

Linked Bachelor-to-PhD Programs

For a select number of exceptionally well-qualified students, the college has established a linked doctoral program that enables students to be admitted directly into the PhD program upon completion of the baccalaureate degree. A select number of exceptionally well-qualified students can be admitted to the Bachelor/PhD program in their junior year while they are pursuing one of the undergraduate programs at Old Dominion University. This program encourages admitted students to work closely with faculty members and pursue a research experience. Just as in the Linked Bachelor/Masters program, six credit hours of graduate course work may again be counted towards the undergraduate degree and doctoral course work mentioned above for the Bachelor/PhD program. For linked bachelor's to doctoral programs, students must earn a minimum of 198 credit hours (120 discrete credit hours for the undergraduate degree and 78 discrete credit hours for the graduate degree). Students in these programs must maintain a GPA of 3.50 or better throughout their bachelor's and doctoral studies.

The student may opt to obtain the master's degree along the way to the doctorate. To obtain the master's degree, the student must utilize the six graduate credits obtained as part of their undergraduate program, use 18 credits of the graduate course work that is part of the PhD, and work with the Graduate Program Director to plan the final 6 credits.

Interdisciplinary Graduate Certificate Programs

The college has established several certificate programs that enable students to specialize in technical areas of current interest to industry, government and academia. Both non-degree and degree-seeking students can enroll in the certificate programs. The programs provide the opportunity for practicing engineers to further their knowledge and become more competent in their profession.

Departments

- Department of Civil and Environmental Engineering (p. 230)

- Naval Architecture and Marine Engineering Certificate (p. 258)
- Project Management Certificate (p. 229)

Collaborative Programs

Cardinal Education

Stacie Ringleb, Associate Dean for Faculty Affairs and Student Engagement, ODU Cardinal Education Site Director

The Cardinal Education Program offers ODU engineering graduate students a selection of online graduate courses and programs to compliment the on-campus course offerings. It is a unique cooperative agreement that enables engineering students at ODU to enroll (and receive credit for) select online courses from six respected Virginia universities. The Cardinal Program (formerly CGEP) has a 35+ year record of leadership in distance learning.

Partnering engineering schools in the Commonwealth of Virginia include: Old Dominion University, Polytechnic Institute and State University, The University of Virginia, George Mason University, Virginia Virginia State University, and Virginia Commonwealth University. The program also serves the diverse continuing education needs of students working in industry and government.

Students seeking course registration via the Cardinal Education Program should contact the Cardinal Education Program Office in the Batten College of Engineering and Technology at Old Dominion University: <https://www.odu.edu/engineering/programs/cardinal-education> (<https://www.odu.edu/engineering/programs/cardinal-education/>)

Enterprise Centers

The Batten College of Engineering and Technology is a catalyst for the economic development of Hampton Roads. To this end, the college has established a number of centers to serve as engines for enterprise development. These centers utilize all University resources, including students and faculty.

Applied Research Center (ARC)

Hani Elsayed-Ali, Director

ARC is an advanced materials engineering and laser technology research center. Staffed with industry/university teams utilizing the Jefferson Lab technologies, ARC provides commercial product-related research in the areas of thin-film technology, laser and plasma processing of materials, materials analysis, and devices and sensor fabrication. For more information: www.odu.edu/engineering/applied-research-center (<https://www.odu.edu/engineering/applied-research-center/>).

Frank Reidy Research Center for Bioelectronics

Andrei Pakhomov, Executive Director

The mission of the Center is to increase scientific knowledge and understanding of the interaction of electromagnetic fields and ionized gases with biological cells and to apply this knowledge to the development of medical diagnostics, therapeutics, and environmental contamination. The objectives of the Center are to perform leading-edge interdisciplinary and multi-institutional research, recruit top faculty and exceptional graduate students, support regional, national, and international programs, and increase external funding and institutional visibility. For more information: www.odu.edu/bioelectronics (<https://www.odu.edu/frank-reidy-research-center-bioelectronics/>).

Affiliated Centers

Center for Secure and Intelligent Critical Systems

Sachin Shetty, Director

The Center for Secure and Intelligent Critical Systems (CSICS) conducts research on developing and integrating secure and intelligent technologies to ensure safe, reliable, and resilient infrastructure for the future. CSICS focuses on both theoretical and practical research in computational modeling, simulation, and analysis. For more information: <https://sics-c.org/>

Institute for Coastal Adaptation and Resilience

Jessica Whitehead, Director

ICAR's mission is to advance the practice of coastal resilience and adaptation by engaging with communities, organizations, and businesses to develop and deploy solutions based on integrated, innovative, and applied research. For more information: <https://oduadaptationandresilience.org/>.

Commonwealth Center for Recurrent Flooding

Carol Considine, ODU Contact

The Commonwealth Center for Recurrent Flooding Resiliency engages the expertise, resources, and intellectual vibrancy of William & Mary and Old Dominion University in support of building resilience to rising waters. The Center serves, advises, and supports Virginia by conducting interdisciplinary studies and providing training, technical and non-technical services, and policy guidance in the area of recurrent flooding resilience to the Commonwealth and its local governments, state agencies, industries, and citizens.. For more information: <https://www.floodingresiliency.org/>

Mission Engineering Center

Thomas Irwin, Director

The Center for Mission Engineering (CME) is an interdisciplinary applied research center focused on advancement in designing, analyzing, integrating, and improving the ability of systems to deliver desired mission outcomes. For more information: <https://oduinnovate.org/research-enterprise/center-for-mission-engineering/>

Virginia Digital Maritime Center

Mark Whitney, Executive Director

The Virginia Digital Maritime Center's mission is to support Virginia's maritime enterprise by leveraging applied research & cutting-edge technology to advance the maritime workforce, foster collaborative partnerships, and drive economic growth in Hampton Roads. For more information: <https://digitalmaritime.org/>

Virginia Institute for Spaceflight and Autonomy

Yiannis Papelis, Executive Director

The Virginia Institute for Spaceflight and Autonomy cultivates partnerships between governments, industry, and academia to grow the spaceflight and autonomy ecosystems on the Eastern Shore. For more information: <https://visaatodu.org/>

Virginia Modeling, Analysis, and Simulation Center

Eric Weisel, Associate Vice President for Applied Research and Executive Director, VMASC

The Virginia Modeling, Analysis, and Simulation Center (VMASC) is an enterprise center of Old Dominion University, supporting the University's research mission through innovation, workforce development, and industry ecosystem engagement programs that create and integrate digital technologies into everyday practice. The Center performs applied research leading to digital transformation. For more information: www.vmasc.org (<http://www.vmasc.org/>).

Virginia Beach Institute of Data Science

Khan Iftekharruddin, Director

The Virginia Beach Data Science Institute is at the forefront of education, research and collaboration for Hampton Roads region, state and globally. The Institute aims to be a driving force for building a vibrant academic community that will educate new generations of builders, thinkers, and leaders.

College Institutes

Institute for Autonomous and Connected Systems: The mission of IACS is to bring together faculty and students across campus from the Colleges of Engineering & Technology, Arts & Letters, and Sciences who have mutual interest in advancing the interdisciplinary research and development of autonomous and connected systems including un-crewed and autonomous

vehicles in air, land, space, and maritime applications. Interim Director: Thomas Alberts

Institute for Engineering in Medicine, Health, and Human

Performance: The Institute for Engineering in Medicine, Health, and Human Performance (EnMed) is the trans-disciplinary home for innovative biomedical research, founded on unique academic, industrial, and military footprints at ODU and in Hampton Roads, to improve patient and community health outcomes and advance human performance. Director: Lobat Tayebi

Departmental Centers and Institutes

Sustainable Development Institute promotes and provides engineering, ecological, environmental, and economic assistance to local, regional, and national governmental agencies, as well as international organizations and businesses. The institute actively participates in community service by conducting waste minimization and pollution prevention assistance to local businesses. Director: Mujde Erten-Unal.

Transportation Research Institute collaborates with centers and departments across the ODU campus to conduct innovation-based research in the core areas of transportation operations, transportation safety, transportation planning, freight transportation, and environment, energy, and sustainable transport. Director: Mecit Cetin.

Virginia Institute for Photovoltaics research spans from the Nanoscale (Fundamental Sciences and Engineering) through the Devices and balance of systems, to the deployment of Gigascale commercial power generation. The current focus is to research and develop the Science and Engineering of Photovoltaic Devices (or Solar cells) and bring them from the laboratory to the industry. Director: Sylvain Marsillac.

Virginia Institute for Image and Vision Analysis aims to leverage complimentary expertise of faculty in computer vision, signal/image processing and machine learning to become one of the leading institutes in the field. Research focuses on novel theory, state-of-art algorithms, architectures, real-time implementations for biomedical engineering, human and machine-centric recognition, environmental and geoscience applications and computer-aided medical diagnosis systems. Director: Khan Iftekharruddin.

Center for Bioelectronics: The mission of the Center is to lead the effort of advancing scientific frontiers, ensuring educational accessibility for underrepresented students in STEM, and securing research leadership in critical areas, such as smart health and biomedical research. The ODU Center for Bioelectronics is dedicated to the mission of diversity, equity, and inclusion in education and the workforce. Director: Gymama Slaughter.

Batten College of Engineering Dean's Office Programs

Certificate Programs

- Advanced Engineering with a Concentration in Biomedical Engineering Certificate (p. 227)
- Advanced Engineering with a Concentration in Cyber Systems Security Certificate (p. 227)
- Advanced Engineering with a Concentration in Energy Systems Certificate (p. 228)
- Coastal Engineering Certificate (p. 228)
- Engineering Management Certificate (p. 228)
- Entrepreneurship and Innovation for Engineers Certificate (p. 229)
- Mission Analysis and Engineering Certificate (p. 229)
- Project Management Certificate (p. 229)

Certificate

Advanced Engineering with a Concentration in Biomedical Engineering Certificate

The Graduate Certificate in Biomedical Engineering Program offers students and professionals the opportunity to further their knowledge with advanced study in the growing area of Biomedical Engineering. The program is designed to provide well-rounded instruction in several key facets of Biomedical Engineering. Those who complete the Program receive the Advanced Engineering Certificate in Biomedical Engineering from Old Dominion University and a letter of recognition from the Batten College of Engineering and Technology. Courses taken for the certificate program may later be applied to the Ph.D. degree in Biomedical Engineering.

Certificate Program Admission Requirements

- Bachelor of Science degree (or equivalent) in an engineering field or undergraduate degree in another relevant STEM field.
- Prerequisites for applicants from non-engineering fields include college-level mathematics, calculus-based physics, and chemistry or biology.

Certificate Program Curriculum Requirements

- Twelve credit hours of graduate course work
- A grade point average of 3.0 or better

BME Fundamentals

Complete the following Core Courses (9CH) 9

BME 711	Biological Mechanisms for Biomedical Engineers
BME 712	Engineering Fundamentals in Biomedicine
BME 740	Regenerative Medicine

BME Electives ¹

Complete a 3CH BME elective course selected from the following: 3

BME 530	Therapy and Function Models for Medical Simulation
BME 554	Introduction to Bioelectrics
BME 562	Introduction to Medical Image Analysis
BME 564	Biomedical Applications of Low Temperature Plasmas
BME 612	Digital Signal Processing I
BME 695	Topics in Biomedical Engineering
BME 700	Cardiovascular Physiology
BME 702	Biomedical Sciences Journal Club
BME 710	Advanced Cell Biology
BME 720	Modern Biomedical Instrumentation
BME 721	Mathematical Modeling in Physiology
BME 726	Biomaterials
BME 731	Finite Element Analysis
BME 741	Principles of Visualization
BME 751	Computational and Statistical Methods in Biomedical Engineering
BME 754	Advanced Bioelectrics
BME 755	Biomembranes and Ion Channels
BME 760	Autonomous and Robotic Systems Analysis and Control
BME 762	Applied Medical Image Analysis
BME 770	Advanced Study in Biology
BME 775	Grant Writing in Biology

BME 783	Digital Image Processing
BME 785	Advanced Manufacturing Technology
BME 792	Biomechanics
BME 794	Cellular Biomechanics
BME 795	Special Topics in Biomedical Engineering
BME 797	Independent Study

Total Credit Hours 12

¹ Appropriate course substitutions may be considered with permission of the Graduate Program Director.

Certificate

Advanced Engineering with a Concentration in Cyber Systems Security Certificate

The certificate program aims to provide a thorough understanding the cyber security threats faced by the stand-alone computer systems, networked systems, IT infrastructure, and cyber physical systems having embedded computer systems operated by individuals, small businesses and large enterprises along with the knowledge required to defend against these threats. The course will enable participants to learn state of the art techniques necessary for analyzing cyber security risks, preventing, detecting and recovering from cyber attacks through class room instructions and hands-on lab work. The program uniquely accommodates students from engineering, math and sciences as well as practicing engineers and managers. The course will make use of ODU's multidisciplinary strengths in the fields of Cyber Systems, Computer Engineering, Software Engineering and Modeling and Simulation. This program is designed both as a complement for students working on graduate degrees and for those personnel working on information and cyber systems used in industry, small businesses, healthcare, government, military and home land security. It is anticipated that students will complete the program in 2 semesters (full time enrollment) or 2 years (part-time enrollment or working to complement an existing graduate program).

Certificate Program Admission Requirements

All applicants admitted to the certificate program must have earned a baccalaureate degree in engineering, mathematics, science, or a related STEM field from a regionally-accredited institution or an equivalent degree from a foreign institution.

Certificate Program Curriculum Requirements

The Graduate Certificate in Cyber Security requires completion of 12 credit hours of graduate course work, consisting of two core courses and two elective courses from the course list below.

Required Core Courses

MSIM 570	Foundations of Cyber Security	3
MSIM/ENMA 670	Cyber Systems Engineering	3

Electives

Select two of the following: 6

ECE 516	Cyber Defense Fundamentals
ECE 519	Cyber Physical System Security
MSIM 673	Threat Modeling and Risk Analysis

Total Credit Hours 12

Certificate Advanced Engineering with a Concentration in Energy Systems Certificate

The Graduate Certificate in Energy Systems Engineering Program offers students and professionals the opportunity to further their knowledge with advanced study in the growing area of Energy Engineering. The program is aimed at providing understanding of energy engineering and the increasing role of energy engineers in addressing growing energy needs. The new skills and advanced understanding developed in class will prepare students for employment in rapidly growing energy industries.

Those who complete the Program receive the Advanced Engineering Certificate in Energy Systems Engineering from Old Dominion University and a letter of recognition from the Batten College of Engineering and Technology. Courses taken for the certificate program may also be applied to master’s level or doctoral graduate engineering programs at ODU, where they meet the program requirements.

Certificate Program Admission Requirements

- Baccalaureate degree in engineering—or a related field—from a regionally-accredited institution or an equivalent degree from a foreign institution.
- Those whose native language is not English must submit a minimum score of 230 on the computer-based TOEFL or 80 on the TOEFL iBT.

Certificate Program Curriculum Requirements

- Twelve credit hours of graduate course work
- A grade point average of 3.0 or better

Energy Engineering Core Courses		
CEE 759	Carbon-Free Clean Energy	3
or CEE 859	Carbon-Free Clean Energy	
Energy Engineering Electives *		
Select three of the following:		9
MAE 513	Energy Conversion	
CEE 559	Biofuels Engineering	
ENGN 697	Independent Study in Energy Engineering	
ECE 772	Fundamentals of Solar Cells	
ENGN 672	Energy Systems Management	
Total Credit Hours		12

* Appropriate course substitutions may be considered with permission of the Graduate Program Director.

Certificate Coastal Engineering Certificate

CECP provides for practicing engineers the opportunity to study Coastal Engineering at the graduate level to help them in the practice of their engineering profession. The Certificate demonstrates a basic level of the physical sciences, engineering, economics, the environment, and the institutional-political-social and aesthetic constraints that influence all coastal engineering design. The Certificate may also provide the necessary credentials for continuing education by state licensing boards and professional organizations.

Graduate Certificate Admission Requirements

An undergraduate degree from an accredited university in Engineering (Civil, Environmental Ocean, etc.) or the Oceanography Sciences (Oceanography, Geology, etc.) is preferred. Experienced professionals in the Coastal Engineering field may also apply.

Graduate Certificate Course Requirements

A series of four (4) graduate level courses in the specialty area of Coastal Engineering within Civil Engineering are offered. All are offered online over the internet, in synchronous (Visual Streaming) mode, over a two year period (spring, fall semesters). The Certificate is earned after successful completion of the four courses listed below. The Cumulative Grade Point Average (GPA) of the four courses must be a minimum of a B average (3.0) to earn the Certificate. All are regularly scheduled graduate courses in the Master and Ph.D. programs at ODU.

CEE 582	Introduction to Coastal Engineering	3
CEE 787	Dredging and Beach Engineering	3
CEE 788	Coastal Hydrodynamics and Sediment Processes	3
CEE 782	Design of Coastal Structures	3
Total Credit Hours		12

An overall grade point average of 3.0 or better is required to earn the certificate.

Certificate Engineering Management Certificate

This program provides the opportunity for practicing engineers to further their knowledge and become more competent in managing socio-technical systems. The certificate program is open to both degree-seeking and non-degree-seeking graduate students. Certain courses taken for the certificate program may later be applied to the master’s degree in Engineering Management for students that get formally admitted to the master in engineering management program. The Engineering Management Certificate Program consists of 12 credit hours of graduate level course work. The four courses comprising the certificate program are offered on a regular basis to enable the completion of the program in two years.

Graduate Certificate Admission Requirements

Admission to the program requires a Bachelor of Science degree in engineering (or equivalent). The certificate consists of four pre-approved graduate level courses contributing to an emphasis area that can be interdisciplinary.

For more information please contact:

Graduate Program Director for Master's Programs
Old Dominion University
2101 Engineering Systems Building
Norfolk, VA 23529

Graduate Certificate Course Requirements

The Graduate Certificate in Engineering Management requires the completion of 12 credit hours at the graduate level. The courses are offered via ODUGlobal.

Select 4 of the following: *		12
ENMA 600	Cost Estimating and Financial Analysis	
ENMA 601	Analysis of Organizational Systems	
ENMA 602	Systems Engineering Management	
ENMA 603	Operations Research	

ENMA 604	Project Management	
ENMA 614	Quality Systems Design	
Total Credit Hours		12

* Appropriate course substitutions may be considered with permission of the Graduate Program Director.

A grade point average of 3.0 or better is required to earn the certificate.

Certificate Entrepreneurship and Innovation for Engineers Certificate

Entrepreneurship and innovation are expected to be primary forces in the creation of new business ventures that drive growth and progress in the worldwide economy. Experienced engineering professionals pursuing this certificate may seek to implement their ideas in a multitude of organizational structures. Many may seek outlets outside their current work environments where they can bring their ideas to fruition.

This certificate program provides an integrated approach to teaching, mentoring and encouraging engineering professionals. It introduces engineering students and students from other disciplines with an engineering background to a wide range of entrepreneurial approaches. The certificate's content addresses the formation of start-up ventures, the growth of existing ventures, and the continued viability of mature, technical enterprises.

Graduate Certificate Admission Requirements

All applicants admitted to the certificate program must have earned a baccalaureate degree from a regionally-accredited institution or an equivalent degree from a foreign institution. Those whose native language is not English must submit a minimum score of 230 on the computer-based TOEFL or 80 on the TOEFL iBT.

Curriculum Requirements

The Graduate Certificate in Entrepreneurship and Innovation in Engineering requires the completion of the courses listed below totaling 12 credit hours at the graduate level.

ENGN 620	The Entrepreneurial Engineer	2
ENGN 623	Leadership and Human Dynamics for the Entrepreneurial Engineer	2
ENGN 625	Business Planning for Entrepreneurial Engineers	2
Marketing and Sales Management for Entrepreneurs *		2
Operations and Supply Chain Management for Entrepreneurs *		2
Financial Management for Entrepreneurs *		2
Total Credit Hours		12

* New Strome College of Business courses.

An overall grade point average of 3.0 or better is required to earn the certificate.

Certificate Mission Analysis and Engineering Certificate

The graduate certificate in Mission Analysis and Engineering provides students and professionals with the necessary understanding to manage engineering and systems engineering activities such that mission supporting capabilities are achieved in even the most complex conditions. The program is designed to elevate understanding of the difficulties that are endemic to

working with complex, socio-technical systems, or system of systems, in extremely transient and uncertain situations. It provides the student with the opportunity to hone planning, decision-making, and/or execution skills necessary to work transformational environments. It is recommended that students intending to take the certificate contact the certificate director to develop a plan of study that will most benefit the student's goals.

Transferability of courses: The certificate is listed as a graduate certificate by the State Council for a higher Education in Virginia. The program offers "for-credit", graduate-level, courses listed in the Old Dominion University Graduate Catalog. Courses taken for the certificate may be used towards graduate studies with approval of the student's Advisor or Graduate Program Director. Non-degree seeking students completing the certificate may later apply the credit hours earned towards graduate degrees in engineering and other disciplines with approval of the Graduate Program Director of the program to which the student has been admitted or is seeking admission.

Admission Requirements

All degree-seeking applicants admitted to the certificate program must meet ODU requirements for graduate admission: an earned baccalaureate degree from a regionally accredited institution or an equivalent degree from a foreign institution in engineering or engineering technology is required. Those whose native language is not English must submit a minimum score of 230 on the computer based TOEFL or 80 on the TOEFL iBT. Non-degree seeking students are required to have these same credentials, though documentation is not required. Ultimately, students must apply to the certificate program in order to obtain the certificate.

Curriculum Requirements

Required Courses		6
ENMA 756	Mission Analysis and Engineering	3
ENMA 750	System of Systems Engineering	3
Elective Courses		6
ENMA 660	Systems Architectures	3
ENMA 715	Systems Analysis	3
ENMA 755	Human System Engineering	3
ENMA 777	Complex System Governance	3
Total Hours		12

Certificate Project Management Certificate

The project management graduate certificate program is designed to facilitate learning essential and contemporary concepts, tools, and processes to manage projects in modern organizations. Courses in the program cover a mix of technical and human topics that are needed for successful project management. Students looking to enroll in the certificate program must meet the admission requirements of Old Dominion University at the graduate level to obtain the Graduate Certificate in Project Management. Certain courses taken for the certificate program may later be applied to the master's degree in Engineering Management for students that get formally admitted to the master in engineering management program. The graduate certificate in Project Management consists of 12 credit hours of graduate level course work. The four courses comprising the certificate program are offered on a regular basis to enable the completion of the program in two years.

Graduate Certificate Admission Requirements

Admission to the program requires a Bachelor of Science degree in engineering (or equivalent). The certificate consists of four pre-approved graduate level courses contributing to an emphasis area that can be interdisciplinary. A grade point average of 3.0 or better is required to earn the certificate.

Graduate Certificate Course Requirements

The Graduate Certificate in Engineering Management requires the completion of 12 credit hours at the graduate level. The courses are offered via online format. The four required courses are listed below:

ENMA 604	Project Management	3
ENMA 780	Leadership for Engineering Managers	3
ENMA 410/510	Agile Project Management	3
ENMA 700/800	Economic Analysis of Capital Projects	3

Optional:

ENMA 601	Analysis of Organizational Systems	

Total Credit Hours	12

An overall GPA of 3.00 or better is required to earn the graduate certificate in project management.

Department of Civil and Environmental Engineering

135 Kaufman Hall
757-683-3753
<http://www.odu.edu/cee> (<http://eng.odu.edu/cee/>)

Sandeep Kumar, Chair
Mujde Erten-Unal, Graduate Program Director

Overview

The Civil and Environmental Engineering Department offers a variety of master's and doctoral degrees. The Department's graduate programs are structured to accommodate both the full-time and part-time students. Most of the graduate courses are offered in evenings, and many are offered as on-line courses. The available specialty areas include coastal, geotechnical, structural, transportation, and water resources engineering in Civil Engineering and a variety of sub-fields in Environmental Engineering.

List of Degrees and Certificates

- Master of Science, Engineering - Civil Engineering
- Master of Science, Engineering - Environmental Engineering (on-line or on-campus)
- Doctor of Philosophy, Engineering - Civil and Environmental Engineering
- Graduate Certificate in Coastal Engineering (on-line or on-campus)
- Advanced Engineering Certificate in Energy Systems

Programs

Doctor of Philosophy Program

- Engineering with a Concentration in Civil and Environmental Engineering (PhD) (p. 234)

Master of Science Programs

- Engineering with a Concentration in Civil Engineering (MS) (p. 230)
- Engineering with a Concentration in Environmental Engineering (MS) (p. 233)

Master of Science Engineering with a Concentration in Civil Engineering (MS)

Master's Degrees

In this rapidly changing technological world, graduate degrees are highly desirable and most often master's degrees are required to hold professional civil and environmental engineering positions in the industry, and in federal,

state and municipal government agencies. The department's graduate programs are designed to educate the technological leaders of the future in civil and environmental engineering, and are structured to accommodate both full-time and part-time students. The specialty areas include coastal, geotechnical, structural, transportation, and water resources engineering in civil engineering, and sub-fields in environmental engineering including water quality, water and wastewater treatment, hydrologic processes, water resources, environmental engineering microbiology, air quality, hazardous and solid waste, biofuels, nutrient cycling, and pollution prevention. [Online master's degree programs in Coastal Engineering and Environmental Engineering](#) are available with/without allowed transfer credits. For additional information, please request a departmental handbook from the graduate program director (CEGPD@odu.edu).

Admission Information

Civil and Environmental master's degree applicants must have a bachelor's degree, preferably, in civil or environmental engineering with a strong background in mathematics and physical sciences. Each applicant must submit an essay of 500 words or less describing personal and academic goals, professional objectives, preparation for graduate study, and how the chosen program will help the applicant achieve these goals and objectives. Two letters of recommendation must be submitted from former or current professors, or employment supervisors. Regular admission to a master's program generally requires an undergraduate GPA of 3.0 or higher on a 4.0 scale. Applicants with a lower undergraduate GPA may be considered for regular or provisional admission on the basis of successful engineering work experience or other credentials demonstrating potential for success in the graduate program. The submission of Graduate Record Examination (GRE) is required unless the applicant holds an ABET accredited engineering degree from an institution in the USA. TOEFL (or IELTS) is required for all applicants whose native language is not English unless their BS degrees are from USA institutions. Provisional admission may also be possible for applicants with a bachelor's degree in a field other than the applicant's intended graduate program. In such cases there will be prerequisite course requirements. Provisional admission may be given to those applicants who do not hold a bachelor's degree in civil or environmental engineering; however, these students will be required to complete undergraduate course work in addition to the graduate program requirements. Potential prerequisite courses are listed below.

Curriculum Requirements

Potential Prerequisite Courses for M.S. Engineering - Civil Engineering (other than Transportation Engr. Emphasis)

MATH 211	Calculus I	4
MATH 212	Calculus II	4
MATH 307	Ordinary Differential Equations	3
MATH 312	Calculus III	4
PHYS 231N	University Physics I	4
PHYS 232N	University Physics II	4
CEE 204	Statics	3

MATH 212	Calculus II	4
MATH 312	Calculus III	4
STAT 306	Introductory Statistics	3
PHYS 231N	University Physics I	4
PHYS 232N	University Physics II	4
CEE 305	Numerical Methods for Civil and Environmental Engineering	1

Civil Engineering and Environmental Engineering Graduate Course Requirements (except Transportation Engineering Emphasis)

The graduate courses applicable towards a master's degree in the Department of Civil and Environmental Engineering are grouped into various categories listed below. The required number of the credit hours from these categories for the Master of Science (M.S.) degree in Civil Engineering (except for the transportation engineering concentration) and the Master of Science (M.S.) degree in Environmental Engineering are summarized in Table CEE-1 and CEE-2, respectively. Note that the M.S. Thesis option students must pass an oral thesis defense examination and submit a thesis, M.S. Project option students must pass an oral project defense examination, and M.S. Course option students must pass an oral (for civil engineering) or written (for environmental engineering) comprehensive examination at the end of all course work.

Category A – Upper level master degree courses in Civil Engineering

CEE 710	Structural Dynamics	3
CEE 711	Finite Element Analysis	3
CEE 712	Advanced Reinforced Concrete	3
CEE 713	Prestressed Concrete	3
CEE 714	Advanced Structural Analysis	3
CEE 715	Engineering Optimization I *	3

M.S. Engineering - Civil Engineering Course Requirements (in Transportation Engineering Emphasis)

The department offers a Master of Science (M.S.) degree in Engineering with a concentration in Civil Engineering with emphasis in Transportation Engineering. Table CEE-3 summarizes the requirements for the Transportation Engineering emphasis. Note that the M.S. Thesis option students must pass an oral thesis defense examination and submit thesis, Project option students must pass an oral project defense examination, and Course option students must pass an oral comprehensive examination at the end of all course work.

Table CEE-3. Required Course Distributions for M.S. Engineering - Civil Engineering – Transportation Engineering Emphasis

M.S. - Thesis Option

Category	Credit Hours
Upper-level Transportation Courses	12
CEE 700 or a Graduate Statistic Course	3
Electives from Upper-level Transportation Courses and other approved electives	9
Thesis	6
Total	30*

M.S. - Project Option

Category	Credit Hours
Upper-level Transportation Courses	12
CEE 700 or a Graduate Statistic Course	3
Electives from Upper-level Transportation Courses and other approved electives	12
Project	3
Total	30*

M.S. - Course Option

Category	Credit Hours
Upper-level Transportation Courses	12
CEE 700 or a Graduate Statistic Course	3
Electives from Upper-level Transportation Courses and other approved electives	15
Comprehensive examination	
Total	30**

* Note: For Thesis and Project options, no more than 9 credit hours can be at the 500 level.

** For Course Option, no more than 12 credits can be at the 500 level.

Master's Level Courses in Transportation Engineering Emphasis

Upper-level Transportation Courses

CEE 770	Transportation Safety
CEE 771	Transportation Operations II
CEE 772	Intelligent Transportation Systems
CEE 773	Transportation Planning
CEE 774	Transportation Network Flow Models
CEE 775	Transportation Network Algorithms
CEE 776	Simulation in Transportation Networks
CEE 777	Econometric Modeling in Transportation

Required Statistics Course

CEE 700	Civil and Environmental Engineering Experimental Design
	or Graduate STAT Course

Other Approved Elective Courses

See Table Below

Thesis/Project

CEE 699	Thesis
CEE 698	Master's Project

Other Approved Electives in Transportation Engineering Emphasis

(Note: In addition to these electives, other graduate-level courses approved by your advisor may also count towards the elective requirements.)

CEE 571	Transportation Operations I	3
CEE 574	Transportation Data Analytics	3
CEE 575	Geometric Design of Highways	3
CEE 552	Air Quality	3
CEE 558	Sustainable Development	3
CEE 715	Engineering Optimization I	3
ENMA 600	Cost Estimating and Financial Analysis	3
ENMA 603	Operations Research	3
ENMA 717	Cost Engineering	3
ENMA 724	Risk Analysis	3
MSIM 601	Introduction to Modeling and Simulation	3
MSIM 751	Advanced Analysis for Modeling and Simulation	3
PADM 634	Regional Planning	3
PADM 721	Transportation Policy	3
PORT 611	International Maritime Transport	3
PORT 612	Port Operations and Management	3
PORT 614	Port Planning and Economics	3
PSYC 870	Human Factors Psychology	3
STAT 531	Theory of Statistics	3
STAT 532	Sampling Theory	3
STAT 535	Design and Analysis of Experiments	3
STAT 537	Applied Regression and Time Series Analysis	3
STAT 549	Nonparametric Statistics	3

Master of Science Engineering with a Concentration in Environmental Engineering (MS) Master's Degrees

In this rapidly changing technological world, graduate degrees are highly desirable and most often master's degrees are required to hold professional civil and environmental engineering positions in the industry, and in federal, state and municipal government agencies. The department's graduate programs are designed to educate the technological leaders of the future in civil and environmental engineering, and are structured to accommodate both full-time and part-time students. The specialty areas include coastal, geotechnical, structural, transportation, and water resources engineering in civil engineering, and sub-fields in environmental engineering including water quality, water and wastewater treatment, hydrologic processes, water resources, environmental engineering microbiology, air quality, hazardous and solid waste, biofuels, nutrient cycling, and pollution prevention. [Online master's degree programs in Coastal Engineering and Environmental Engineering](#) are available with/without allowed transfer credits. For additional information, please request a departmental handbook from the graduate program director (CEGPD@odu.edu).

Admission Information

Civil and Environmental master's degree applicants must have a bachelor's degree, preferably, in civil or environmental engineering with a strong background in mathematics and physical sciences. Each applicant must submit an essay of 500 words or less describing personal and academic goals, professional objectives, preparation for graduate study, and how the chosen program will help the applicant achieve these goals and objectives. Two letters of recommendation must be submitted from former or current professors, or employment supervisors. Regular admission to a master's program generally requires an undergraduate GPA of 3.0 or higher on a 4.0 scale. Applicants with a lower undergraduate GPA may be considered for regular or provisional admission on the basis of successful engineering work experience or other credentials demonstrating potential for success in the graduate program. The submission of Graduate Record Examination (GRE) is required unless the applicant holds an ABET accredited engineering degree from an institution in the USA. TOEFL (or IELTS) is required for all applicants whose native language is not English unless their BS degrees are from USA institutions. Provisional admission may also be possible for applicants with a bachelor's degree in a field other than the applicant's intended graduate program. In such cases there will be prerequisite course requirements. Provisional admission may be given to those applicants who do not hold a bachelor's degree in civil or environmental engineering; however, these students will be required to complete undergraduate course work in addition to the graduate program requirements. Potential prerequisite courses are listed below.

Curriculum Requirements

Potential Prerequisite Courses for M.S. Engineering - Environmental Engineering

MATH 211	Calculus I	4
MATH 212	Calculus II	4
MATH 307	Ordinary Differential Equations	3
MATH 312	Calculus III	4
PHYS 231N	University Physics I	4
PHYS 232N	University Physics II	4
CHEM 121N	Foundations of Chemistry I Lecture	3
CHEM 122N	Foundations of Chemistry I Laboratory	1
CHEM 123N	Foundations of Chemistry II Lecture	3
CEE 204	Statics	3
CEE 305	Numerical Methods for Civil and Environmental Engineering	1

CEE 330	Hydromechanics	3
CEE 340	Hydraulics and Water Resources	3
CEE 350	Environmental Pollution and Control	3

Civil Engineering and Environmental Engineering Graduate Course Requirements (except Transportation Engineering Emphasis)

The graduate courses applicable towards a master's degree in the Department of Civil and Environmental Engineering are grouped into various categories listed below. The required number of the credit hours from these categories for the Master of Science (M.S.) degree in Civil Engineering (except for the transportation engineering concentration) and the Master of Science (M.S.) degree in Environmental Engineering are summarized in Table CEE-1 and CEE-2, respectively. Note that the M.S. Thesis option students must pass an oral thesis defense examination and submit a thesis, M.S. Project option students must pass an oral project defense examination, and M.S. Course option students must pass an oral (for civil engineering) or written (for environmental engineering) comprehensive examination at the end of all course work.

Category B – Upper level master degree courses in Environmental Engineering

CEE 715	Engineering Optimization I *	3
CEE 741	Open Channel Flow *	3
CEE 747	Groundwater Flow *	3
CEE 751	Physicochemical Treatment Processes (Env. Engr. Core Course)	3
CEE 752	Biological Wastewater Treatment (Env. Engr. Core Course)	3
CEE 753	Advanced Processes for Water and Wastewater Treatment	3
CEE 754	Environmental Engineering Microbiology	3
CEE 755	Water Quality Management (Env. Engr. Core Course)	3
CEE 756	Water Quality Modeling (Env. Engr. Core Course)	3
CEE 759	Carbon-Free Clean Energy	3
CEE 760	Managing Phosphorous in Circular Economy	3
CEE 761	Water Resources Processes and Analysis Methods *	3
CEE 762	Aquatic Chemistry in Environmental Engineering (Env. Engr. Core Course)	3
CEE 788	Coastal Hydrodynamics and Sediment Processes *	3

Category C – Lower level courses in Civil & Environmental Engineering

CEE 514	Masonry Structures Design	3
CEE 515	Steel Structures Design	3
CEE 516	Wood Structures Design	3
CEE 530	Foundation Engineering	3
CEE 531	Slope Stability and Earth Structures Design	3
CEE 532	Introduction to Earthquake Engineering	3
CEE 533	Geomaterials Stabilization	3
CEE 540	Hydraulic Engineering	3
CEE 546	Urban Stormwater Hydrology	3
CEE 547	Groundwater Hydraulics	3
CEE 550	Water Distribution and Wastewater Collection System Design	3
CEE 552	Air Quality	3
CEE 554	Hazardous Waste Treatment	3
CEE 555	Pollution Prevention and Green Engineering	3
CEE 558	Sustainable Development	3
CEE 571	Transportation Operations I	3

CEE 574	Transportation Data Analytics	3
CEE 575	Geometric Design of Highways	3
CEE 582	Introduction to Coastal Engineering	3

Category D – Other graduate courses

Graduate level courses offered from other departments. These courses must be related to the program of study and must be approved by the student's academic advisor.

MATH or STAT Category

CEE 700 Civil and Environmental Engineering Experimental Design

CEE 701 Applied Mathematics for Civil and Environmental Engineering

or a graduate level MATH or STAT course.

* Double listings in A and B categories.

Table CEE-2. Required Course Distributions for M.S. Engineering - Environmental Engineering

M.S. - Thesis Option

Category	Credit Hours
Env. Engr. Core Courses (choose 4 from 5 listed courses)	12
A,B,C, or D	9
MATH/STAT	3
Thesis	6
Total	30*

M.S. - Project Option

Category	Credit Hours
Env. Engr. Core Courses (choose 4 from 5 listed courses)	12
B	3
A,B, C, or D	9
MATH/STAT	3

Env. Engr. Core Courses (choose 4 from 5 listed courses)	12
B	6
A,B, C, or D	9
MATH/STAT	3
Total	30**

* For Thesis & Project options, no more than 9 credit hours can be at the 500 level.

** For Course option, no more than 12 credit hours can be at the 500 level.

Doctor of Philosophy Engineering with a Concentration in Civil and Environmental Engineering (PhD)

Doctoral degrees in engineering that focus on civil engineering and environmental engineering are required for college-level teaching and employment in research institutions. Many leading industries and agencies also seek well-trained doctoral graduates. The specialty areas include

coastal, geotechnical, structural, transportation, and water resources engineering in civil engineering and a variety of sub-fields in environmental engineering including water quality, water and wastewater treatment, hydrologic processes, water resources, environmental engineering microbiology, air quality, hazardous and solid waste, biofuels, nutrient cycling, and pollution prevention.

Admission Requirements

A master's degree or equivalent in engineering or a related field is required for admission to the Ph.D. program; however, exceptionally well qualified students can be admitted to Ph.D. program directly without a master's degree. Each applicant must submit an essay of 500 words or less describing personal and academic goals, professional objectives, preparation for graduate study, and how the chosen program will help the applicant achieve these goals and objectives. Two letters of recommendation are required. At least one of these must be submitted from former or current professors, and one could be from employment supervisor. Regular admission to a Ph.D. program generally requires a GPA of 3.5 or higher on a 4.0 scale in their master program. Applicants with a lower GPA may be considered for regular or provisional admission on the basis of successful engineering work experience or other credentials demonstrating potential for success in the Ph.D. program. Submission of GRE scores is required except for applicants who hold an ABET accredited engineering degree from an institution in the USA or a graduate engineering degree from an institution of which the undergraduate degree is ABET accredited in the USA. TOEFL (or IELTS) are required for all applicants whose native language is not English unless their master (or BS) degrees are from USA institutions.

Curriculum Requirements

Degree Requirements

Ph.D. program requires minimum 24 credits of coursework and 24 credit hours of dissertation research work. Three fifths (3/5) of these courses (15 credit hours) shall be from 800-level courses as required by the University.

Department of Electrical and Computer Engineering

231 Kaufman Hall
757-683-3741

<http://www.odu.edu/ece/> (<http://odu.edu/ece/>)

Oscar González, Chair

Yuzhong Shen, Associate Chair

Chung-Hao Chen, Graduate Program Director, Electrical & Computer Engineering

Michel Audette, Graduate Program Director, Biomedical Engineering

Hong Yang, Graduate Program Director, Modeling and Simulation

Chung-Hao Chen, Graduate Program Director, Doctor of Engineering, Cybersecurity

Overview

The Department of Electrical and Computer Engineering strives to provide the highest quality engineering education at the undergraduate and graduate levels, to engage in scholarly research at the forefront of electrical, computer, and biomedical engineering, and to serve the professions of electrical, computer, modeling and simulation, and biomedical engineering. The department has strong graduate and research programs providing a high quality and broad-based education that prepares graduates for successful professional careers and a lifetime of learning. The Electrical & Computer Engineering Department also offers a Doctor of Engineering Degree in Cybersecurity. This program is available on-campus and online.

Electrical and Computer Engineering graduate studies encompass six broad areas:

1. systems
2. signal and image processing
3. physical electronics

4. computer engineering
5. cybersecurity engineering
6. modeling and simulation engineering

List of Degrees and Certificates

The department offers the following Electrical and Computer Engineering graduate degrees:

- Master of Science, Engineering - Electrical and Computer Engineering (Traditional and Online Formats)
- Doctor of Philosophy, Engineering - Electrical and Computer Engineering
- Doctor of Engineering, Electrical and Computer Engineering
- Doctor of Engineering, Cybersecurity

and

- Master of Science, Engineering - Modeling and Simulation
- Doctor of Philosophy, Engineering - Modeling and Simulation
- Doctor of Engineering - Modeling and Simulation
- Graduate Certificate in Modeling and Simulation Engineering

The department also administers the following Biomedical Engineering graduate degrees and a certificate.

- Master of Engineering - Biomedical Engineering
- Master of Science, Engineering - Biomedical Engineering
- Doctor of Philosophy, Engineering - Biomedical Engineering
- Advanced Engineering Certificate - Biomedical Engineering

Programs

Doctor of Engineering Programs

- Engineering with a Concentration in Cybersecurity (DEng) (p. 239)
- Engineering with a Concentration in Electrical and Computer Engineering (DEng) (p. 241)
- Engineering with a Concentration in Modeling and Simulation (DEng) (p. 244)

Doctor of Philosophy Programs

- Engineering with a Concentration in Biomedical Engineering (PhD) (p. 238)
- Engineering with a Concentration in Electrical and Computer Engineering (PhD) (p. 242)
- Engineering with a Concentration in Modeling and Simulation Engineering (PhD) (p. 245)

Master of Engineering Program

- Engineering with a Concentration in Biomedical Engineering (ME) (p. 235)

Master of Science Programs

- Engineering with a Concentration in Biomedical Engineering (MS) (p. 236)
- Engineering with a Concentration in Electrical and Computer Engineering (MS) (p. 240)
- Engineering with a Concentration in Modeling and Simulation (MS) (p. 243)

Certificate Program

- Modeling and Simulation - Engineering Certificate (p. 246)

Centers and Institutes

The research laboratories and institutes directly associated with the department include:

- Bioelectrics and Pulsed Power
- Biomedical Devices and Biomanufacturing Lab
- Collaborative Autonomous Systems Laboratory
- Cybersecurity, Communications & Networking Innovation (CCNI) Laboratory
- Machine Intelligence and HF Communications Lab
- Medical Simulations Laboratory
- Plasma Engineering Lab
- Systems Research Laboratory
- Virginia Institute for Photovoltaics (VIPV)
- Vision Lab
- Virginia Institute for Vision Analysis (VIVA)

In addition, the department has faculty with research labs at the Applied Research Center (ARC) at the Thomas Jefferson National Accelerator Facility. The ARC facilities include thin film fabrication equipment for applications in photovoltaics, thermoelectrics, superconductors, and semiconductors. ARC houses extensive materials analysis capabilities. These research facilities position the department for national leadership in several areas and as a leading research and higher education institution in the southeastern United States. In addition, the faculty have strong ties to the Thomas Jefferson National Accelerator Facility, Frank Reidy Center for Bioelectrics, the Center of Bioelectronics, and the Virginia Modeling, Analysis, and Simulation Center (VMASC).

Master of Engineering Engineering with a Concentration in Biomedical Engineering (ME) Biomedical Engineering Program

Michel Audette, Graduate Program Director

2123F Engineering Systems Building
757-683-6940
www.odu.edu/eng/programs/biomedical/

The Biomedical Engineering graduate degree programs are available to full-time and part-time students seeking to improve their research and professional skills in biomedical engineering. The programs strive to provide the highest quality engineering education at the graduate level, to engage in scholarly research at the forefront of biomedical engineering, and to serve the biomedical engineering profession. While the biomedical engineering program is administered by the Department of Electrical & Computer Engineering, the program is highly interdisciplinary, and students are admitted from broad areas of engineering, science, and healthcare. Cutting-edge research opportunities and instruction are offered in:

- Bioelectrics and Pulsed Power
- Cellular & Molecular Bioengineering
- Cardiovascular Engineering
- Musculoskeletal Biomechanics
- Plasma Medicine
- Systems Biology & Computational Bioengineering

Facilities: The Biomachina Laboratory; the Biomechanics Laboratory; Biomedical Devices and Biomanufacturing Lab; the Cellular Mechanobiology Laboratory; the Machine Intelligence & HR Communications Lab; the Gene Therapy and Regenerative Medicine Laboratory; the Medical Simulations Laboratory; the Medical Simulations Lab; and the Virginia Institute for Imaging and Vision Analysis (VIIVA).

The program also has strong ties to several other on- and off-campus laboratories, including the Applied Research Center at the Jefferson National Laboratory, the Center for Brain Research and Rehabilitation, the Frank Reidy Research Center for Bioelectrics, the Center for Bioelectronics, and the Virginia Modeling, Analysis and Simulation Center (VMASC). Regional, national, and international clinical collaborators support the program. These unique resources position the biomedical engineering

program as a leader in education and research in the Southeast and nationally.

Master of Engineering Admission Requirements

Admission to the Master of Engineering program in biomedical engineering is in accordance with Old Dominion University and Frank Batten College of Engineering and Technology requirements for master's programs as specified in this catalog. Specific additional requirements include the following:

1. Completion of a bachelor's degree in Engineering, Science or Mathematics from an accredited institution, although students from other educational backgrounds may apply with appropriate leveling courses. Accepted students from disciplines other than Biomedical Engineering will be required to complete a number of leveling courses to meet the prerequisites of the program; the Graduate Program Director will work with the admitted students to create the list of leveling courses, including calculus and differential equations.
2. A minimum GPA of 3.00 (out of 4.0) is required of most students. A student with a lower GPA meeting ODU's graduate admission requirements and with evidence of a high level of professional capability may be eligible for admission to the program upon submission of a petition to the graduate program director.
3. Recent scores, typically, not more than five years old, on the Graduate Record Examination's (GRE) verbal, quantitative, and analytical writing sections must be submitted by all applicants.
4. Two letters of recommendation (typically from faculty in the highest degree program completed when the application is within five years of graduation from that degree program) are encouraged but not required.
5. The applicant must submit a resume and a statement of purpose and goals.
6. Foundation knowledge in physics, basic chemistry, physiology, computer programming, and mathematics (including differential equations and statistics) is expected. Some leveling courses may be required to complement the student's expertise, namely in physiology, statistics, and differential equations.
7. The linked Bachelor's/Master's degree program in the Frank Batten College of Engineering and Technology at Old Dominion University is designed to provide an opportunity for exceptionally qualified engineering undergraduate students to obtain both a bachelors and a master's degree in Biomedical Engineering. Typically, undergraduate students apply at the end of their junior year for admission to the linked programs.

Curriculum Requirements

The Master of Engineering program requires completion of 30 course credits, including 15 core: 9 CH Common Core course credits, a 3 credit Core Project BME 698, and one 3 credit Methods Core course (BME 720 for Computer-Assisted Medicine specialization path) OR BME 792 (for Biomechanics path) OR BME 726 (for Diagnostics and Therapies path). In addition, there is a requirement of 15 credits of technical elective course credits, which entail 9 credits of BME technical electives and 6 credits of approved technical electives. The ME program culminates in a comprehensive exam, with written and oral components, the contents of which are based on the student's Core Project.

BME Core		15
<i>Complete the following Common Core courses (9 credits):</i>		
BME 711	Biological Mechanisms for Biomedical Engineers	
BME 712	Engineering Fundamentals in Biomedicine	
BME 740	Regenerative Medicine	
<i>Complete a 3 credit Core ME Project</i>		
BME 698	Master's Project	
<i>Complete one Methods Core Course (3 credits) from the following:</i>		
BME 720	Modern Biomedical Instrumentation	

BME 726	Biomaterials	
BME 792	Biomechanics	
BME Technical Electives ¹		9
Complete 9 credits of coursework from the following BME options:		
BME 530	Therapy and Function Models for Medical Simulation	
BME 554	Introduction to Bioelectronics	
BME 562	Introduction to Medical Image Analysis	
BME 564	Biomedical Applications of Low Temperature Plasmas	
BME 612	Digital Signal Processing I	
BME 695	Topics in Biomedical Engineering	
BME 698	Master's Project	
BME 700	Cardiovascular Physiology	
BME 702	Biomedical Sciences Journal Club	
BME 710	Advanced Cell Biology	
BME 714	Biomedical Sciences Laboratory	
BME 721	Mathematical Modeling in Physiology	
BME 730	Predoctoral Fellowship Grant Writing	
BME 731	Finite Element Analysis	
BME 741	Principles of Visualization	
BME 747	Responsible Conduct of Research	
BME 751	Computational and Statistical Methods in Biomedical Engineering	
BME 754	Advanced Bioelectronics	
BME 755	Biomembranes and Ion Channels	
BME 760	Autonomous and Robotic Systems Analysis and Control	
BME 762	Applied Medical Image Analysis	
BME 770	Advanced Study in Biology	
BME 775	Grant Writing in Biology	
BME 783	Digital Image Processing	
BME 785	Advanced Manufacturing Technology	
BME 794	Cellular Biomechanics	
BME 795	Special Topics in Biomedical Engineering	
BME 797	Independent Study	
Approved Technical Electives ¹		6
Complete 6 credits of coursework from electives not necessarily listed above.		
Total Credit Hours		30

¹ A total of 15 credits of technical elective courses can be selected from the biomedical engineering technical electives (9 credits) or a wide variety of appropriate graduate courses (6 credits) in engineering, biology, chemistry, psychology, computer science, modeling and simulation, mathematics, statistics, or other programs. Technical electives without the BME prefix must be approved by the graduate program director.

Master of Science Engineering with a Concentration in Biomedical Engineering (MS) Biomedical Engineering Program

Michel Audette, Graduate Program Director

2123F Engineering Systems Building
757-683-6940

The Biomedical Engineering graduate degree programs are available to full-time and part-time students seeking to improve their research and professional skills in biomedical engineering. The programs strive to provide the highest quality engineering education at the graduate level, to engage in scholarly research at the forefront of biomedical engineering, and to serve the biomedical engineering profession. While the biomedical engineering program is administered by the Department of Electrical & Computer Engineering, the program is highly interdisciplinary, and students are admitted from broad areas of engineering, science, and healthcare. 4. Two letters of recommendation (typically from faculty in the highest degree program completed when the application is within five years of graduation from that degree program) are encouraged but not required.
5. The applicant must submit a resume and a statement of purpose and goals.
6. Foundation knowledge in physics, basic chemistry, physiology, computer programming, and mathematics (including differential equations and statistics) is expected. Some leveling courses may be required to complement the student's expertise, namely in physiology, statistics, and differential equations.

7. The linked Bachelor's/Master's degree program in the Frank Batten College of Engineering and Technology at Old Dominion University is designed to provide an opportunity for exceptionally qualified engineering undergraduate students to obtain both a bachelors and a master's degree in Biomedical Engineering. Typically, undergraduate students apply at the end of their junior year for admission to the linked programs.

Curriculum Requirements

The Master of Science program requires completion of 24 course credits, including 12 CH Core Course credits and 12 elective course credits, including 6 credits of BME technical electives and 6 credits of approved technical electives, in addition to 6 thesis research credits. The 12 credits of technical electives should be chosen to meet the student's research and career objectives.

BME Common Core 12

Complete the following Core Courses (12 credits):

BME 711	Biological Mechanisms for Biomedical Engineers ¹
BME 712	Engineering Fundamentals in Biomedicine ¹
BME 740	Regenerative Medicine
BME 747	Responsible Conduct of Research

BME Technical Electives ¹ 6

Complete 6 credits of coursework from the following:

BME 530	Therapy and Function Models for Medical Simulation
BME 554	Introduction to Bioelectrics
BME 562	Introduction to Medical Image Analysis
BME 564	Biomedical Applications of Low Temperature Plasmas
BME 612	Digital Signal Processing I
BME 695	Topics in Biomedical Engineering
BME 698	Master's Project
BME 700	Cardiovascular Physiology
BME 702	Biomedical Sciences Journal Club
BME 710	Advanced Cell Biology
BME 714	Biomedical Sciences Laboratory
BME 720	Modern Biomedical Instrumentation
BME 721	Mathematical Modeling in Physiology
BME 726	Biomaterials
BME 730	Predoctoral Fellowship Grant Writing
BME 731	Finite Element Analysis
BME 741	Principles of Visualization
BME 751	Computational and Statistical Methods in Biomedical Engineering
BME 754	Advanced Bioelectrics
BME 755	Biomembranes and Ion Channels
BME 760	Autonomous and Robotic Systems Analysis and Control
BME 762	Applied Medical Image Analysis
BME 770	Advanced Study in Biology
BME 775	Grant Writing in Biology
BME 783	Digital Image Processing
BME 785	Advanced Manufacturing Technology
BME 792	Biomechanics
BME 794	Cellular Biomechanics
BME 795	Special Topics in Biomedical Engineering
BME 797	Independent Study

Approved Technical Electives ¹ 6

Complete 6 credits of coursework from electives not necessarily listed above.

BME 699	Master's Thesis
Total Credit Hours	30

- ¹ The 12 credits of technical elective courses can be selected from the biomedical engineering technical electives (6 credits) or a wide variety of appropriate graduate courses (6 credits) in engineering, biology, chemistry, psychology, computer science, modeling and simulation, mathematics, statistics, or other programs. Technical electives without the BME prefix must be approved by the graduate program director. To earn a master's degree, a student needs to take at least five courses at the 600 or higher level, and no more than three courses at the 500 level.

Doctor of Philosophy Engineering with a Concentration in Biomedical Engineering (PhD)

Web Site: <https://www.odu.edu/biomedical-engineering> (<https://www.odu.edu/biomedical-engineering/>)

Biomedical Engineering Program

Michel Audette, Graduate Program Director

2123F Engineering Systems Building
757-683-6940
www.odu.edu/eng/programs/biomedical/

The Biomedical Engineering graduate degree programs are available to full-time and part-time students seeking to improve their research and professional skills in biomedical engineering. The programs strive to provide the highest quality engineering education at the graduate level, to engage in scholarly research at the forefront of biomedical engineering, and to serve the profession of biomedical engineering. While the biomedical engineering program is administered by the Department of Electrical & Computer Engineering, the program is highly interdisciplinary and students are admitted from broad areas of engineering, science, and healthcare. Cutting-edge research opportunities and instruction are offered in:

- Bioelectrics and Pulsed Power
- Cellular & Molecular Bioengineering

Doctor of Philosophy Admission Requirements

Admission to the Ph.D. program in biomedical engineering is in accordance with Old Dominion University and Frank Batten College of Engineering and

Technology requirements for doctoral programs as specified in this catalog. Specific additional requirements include the following:

1. Completion of a master's degree in a closely related field is expected. Accepted students from disciplines other than Biomedical Engineering will be required to complete a number of leveling courses to meet the prerequisites of the program; the Graduate Program Director will work with the admitted students to create the list of leveling courses, including calculus and differential equations.
2. A minimum GPA of 3.50 (out of 4.0) is required of most students. A student with a lower GPA meeting ODU's graduate admission requirements and with evidence of a high level of professional capability may be eligible for admission to the program upon submission of a petition to the graduate program director.
3. Recent scores, typically, not more than five years old, on the Graduate Record Examination's (GRE) verbal, quantitative, and analytical writing sections must be submitted by all applicants.
4. Three letters of recommendation (typically at least two of which are from faculty in the highest degree program completed when the application is within five years of graduation from that degree program) are encouraged but not required.
5. The applicant must submit a resume and a statement of purpose and goals.
6. Foundation knowledge in physics, basic chemistry, physiology, computer programming, and mathematics (including differential equations and statistics) is expected. Some leveling courses may be required to complement the student's expertise, namely in physiology, statistics, and differential equations.
7. The Frank Batten College of Engineering and Technology at Old Dominion University has the Direct Bachelor-to-Ph.D. and linked Bachelor/Ph.D. programs that allow exceptionally well-qualified undergraduate students to apply for admission directly to a Ph.D. program. Typically, undergraduate students apply at the end of their junior year for admission to the linked programs.

Curriculum Requirements

The Ph.D. degree requires:

- 24 credit hours of graduate-level courses beyond the master's degree,
- 24 research credit hours (BME 899) beyond the master's degree,
- successful completion of a written diagnostic examination,
- successful completion of written and oral candidacy examinations,
- successful completion of a dissertation research proposal, and
- successful completion and public defense of a dissertation.
- Or, in the absence of a master's degree, 78 credit hours beyond the bachelor's degree are required.

The program of study will be developed with the approval of the graduate program director and the student's advisor. The 24-credit course program shall include a common core of 12 credits (four 3-credit courses) including : BME 811 Biological Mechanisms for Biomedical Engineers, BME 812 Engineering Fundamentals in Biomedicine, BME 840 Regenerative Medicine, and BME 847 Responsible Conduct of Research (now worth 3CH). 12 credits of elective coursework are also required and are described below.

For students without a master's degree, a total of 78 credit hours of graduate level coursework is required, consisting of 48 credit hours of graduate courses (the 24 course credits listed above for master's holders, plus 24 elective credits), as well as 30 research credit hours (BME 899). Three fifths of the required 48 course credit hours must be at the 800 level and need to comply with regular PhD program degree requirements.

Exceptions to the credit-hour distribution requirements at any level must be approved in writing by the graduate program director, the dean or his or her designee, and the provost or his or her designee. Additional course work or appropriate research background may be required to meet prerequisites for courses or in preparation for the diagnostic examination.

BME Common Core	12
<i>Complete the following Core courses (12 credits):</i>	
BME 811	Biological Mechanisms for Biomedical Engineers
BME 812	Engineering Fundamentals in Biomedicine
BME 840	Regenerative Medicine
BME 847	Responsible Conduct of Research
BME Technical Electives¹	6
<i>Complete 6 credits of coursework from the following:</i>	
BME 530	Therapy and Function Models for Medical Simulation
BME 554	Introduction to Bioelectrics
BME 562	Introduction to Medical Image Analysis
BME 564	Biomedical Applications of Low Temperature Plasmas
BME 612	Digital Signal Processing I
BME 800	Cardiovascular Physiology
BME 802	Biomedical Sciences Journal Club
BME 810	Advanced Cell Biology
BME 814	Biomedical Sciences Laboratory
BME 820	Modern Biomedical Instrumentation
BME 821	Mathematical Modeling in Physiology
BME 826	Biomaterials
BME 830	Predoctoral Fellowship Grant Writing
BME 831	Finite Element Analysis
BME 841	Principles of Visualization
BME 851	Computational and Statistical Methods in Biomedical Engineering
BME 854	Advanced Bioelectrics
BME 855	Biomembranes and Ion Channels
BME 860	Autonomous and Robotic Systems Analysis and Control
BME 862	Applied Medical Image Analysis
BME 870	Advanced Study in Biology
BME 875	Grant Writing in Biology
BME 883	Digital Image Processing
BME 885	Advanced Manufacturing Technology
BME 892	Biomechanics
BME 894	Cellular Biomechanics
BME 895	Special Topics in Biomedical Engineering
BME 897	Independent Study
BME 999	Doctoral Graduate Credit
Approved Technical Electives¹	6
Complete 6 credits of coursework from electives not necessarily listed above.	
Dissertation Research	24
BME 899	PHD Dissertation Research
Total Credit Hours	48

¹ The technical elective courses provide a basis for dissertation research and future career objectives. These courses can be selected from the biomedical engineering technical electives (6 credits) or a wide variety of appropriate graduate courses (6 credits) in engineering, biology, chemistry, psychology, computer science, modeling and simulation, mathematics, statistics, or other programs. At least 15 credits of non-dissertation course work must be at the 800-level. A minimum of 3 credits must be selected from the biomedical engineering technical electives list; the remaining credits can be selected from

this list or other graduate courses with approval of the student's advisor and the graduate program director.

Doctor of Philosophy Degree Requirements

The Ph.D. in biomedical engineering is offered in accordance with the general requirements for doctoral degrees as specified in the Requirements for Graduate Degree Section of this catalog. Specific program of study requirements include the following:

1. Completion of a minimum of 48 hours of graduate credits to include: a minimum of 24 credits of course work beyond the master's degree and a minimum of 24 credits of dissertation research. At least 15 credits of non-dissertation course work must be at the 800-level. The Graduate Program Director in concurrence with the Chair can approve exceptions to these requirements under special circumstances.
2. For students without a master's degree, a total of 78 credit hours of graduate level coursework is required, consisting of 48 credit hours of graduate courses (the 24 course credits listed above for master's holders, plus 24 elective credits), as well as 30 research credit hours (BME 899). Three fifths of the required 48 course credit hours must be at the 800 level and need to comply with regular PhD program degree requirements.
3. Successful completion of a written diagnostic examination before the end of the first academic year.
4. Successful completion of a written and oral qualifying examination near the completion of the coursework.
5. Successful presentation of a dissertation research proposal at the beginning of the dissertation research.
6. The successful completion and public defense of a dissertation representing independent, original research worthy of publication in a peer-reviewed scholarly journal. At least one published and one submitted manuscript as first author in peer-reviewed, indexed journals are expected.

Doctor of Engineering Engineering with a Concentration in Cybersecurity (DEng)

Chung-Hao Chen, Graduate Program Director, Doctor of Engineering, Cybersecurity
231 Kaufman Hall
757-683-4586
www.odu.edu/eng/

Doctor of Engineering, Cybersecurity

The Department offers a Doctor of Engineering (D.Eng.) degree with concentration in Cybersecurity in accordance with the admission criteria and degree requirements specified in the Frank Batten College of Engineering and Technology section in this catalog.

Doctor of Engineering Program

The College offers an interdisciplinary Doctor of Engineering (D.Eng.) program to provide the Commonwealth and the nation with exceptionally educated engineering practitioners. These individuals will have developed the highest possible capability to provide innovative solutions in specialized engineering endeavors. The graduates of the program will meet the highest standards for advanced level engineering and leadership positions in industry and government.

Admission Criteria

Consideration for admission to the Doctor of Engineering program with a concentration in Cybersecurity requires the following:

1. A master of science degree from an accredited university in the United States or an equivalent foreign institution;
2. Official copies of all transcripts

3. Coursework or a minimum of two years' work experience in cybersecurity and/or related areas;
4. Two letters of recommendation from individuals familiar with the applicant's professional and/or academic background;
5. A current resume;
6. A statement of professional goals;
7. GRE Scores, with a 50% or better attainment on quantitative reasoning;
8. English proficiency requirement if the applicant's native language is not English.

Curriculum Requirements

A minimum of 48 hours of graduate work beyond the master's degree is required including:

- 18 credit hours of core courses
- At least 18 credit hours of graduate coursework in the student's area of specialization as determined by the department
- At least 12 credit hours of applied doctoral project

At least three fifths of the course work must be at 800-level. Exceptions to the credit-hour distribution requirements at any level must be approved in writing by the graduate program director, the dean or his or her designee, and the provost or his or her designee.

Cybersecurity Concentration

The curriculum of this concentration consists of 18 credit hours of CYSE, ECE, MSIM, or ENMA 600 and 800 level courses as core courses, 18 credit hours of graduate coursework in the area of specialization and 12 credit hours of applied doctoral project. The courses need approval of the advisor and the graduate program director. Of the total 36 credit hours of coursework, 15 credit hours need to be completed at the 800 level, and no more than 15 credit hours can be taken from disciplines other than CYSE, ECE, MSIM, or ENMA.

Additional Requirements

Continuation and Graduation Requirements

The continuation requirements are the same as the continuation requirements for the Doctor of Philosophy programs. The graduation requirements for the Doctor of Engineering degree are as follows:

1. Satisfactory completion of a minimum of 48 credit hours of approved graduate work beyond the master's degree, including the doctoral project.
2. Satisfactory performance on a diagnostic examination at the completion of nine credit hours of coursework. The purpose of this examination is to determine if the student has adequate background to pursue a doctoral degree. The diagnostic examination may only be repeated once.
3. Satisfactory completion of a written and oral candidacy examination before the advisory committee. The student will take the candidacy examination when he/she is within six credit hours of completing all the required coursework. The candidacy examination may only be repeated once.
4. Prepare and successfully defend a project concept proposal in written and oral formats. The student will be required to prepare and present a concept proposal related to the work that will be undertaken for the doctoral project. The concept proposal will be defended before the doctoral project committee.
5. Submission of progress reports as deemed necessary by the doctoral project committee.
6. Written report of the project results. The doctoral project shall be documented in a manner consistent with advanced, professional work. The project report will follow the standard format for Old Dominion University dissertations and theses.
7. Comprehensive oral defense of the doctoral project before the student's doctoral project committee and a general audience.

Once a student has completed the coursework, passed the candidacy examinations, and gained approval for the project proposal, the student

advances to candidacy. The applied doctoral project must successfully demonstrate the student's mastery of the subject area and ability to apply advanced technical knowledge to identify, formulate, and solve novel and complex engineering problems. The project must address a complex but practical problem currently faced by the public, industry, or government, and it must provide a solution that satisfies all the technical, social, political, economic, safety, sustainability, and environmental requirements and/or constraints. The advisory and doctoral project committees need at least three members certified for graduate instruction; two faculty members must be from the ECE department. The committee chair must be an ECE faculty member or a faculty member with an ECE degree from the BCET college. A faculty member who is not in the BCET college but has expertise in Cybersecurity-related areas needs the graduate program director's approval to serve as a project advisor or the committee chair. The committee must also have at least one non-ECE faculty member who is knowledgeable about the project subject area.

Master of Science Engineering with a Concentration in Electrical and Computer Engineering (MS)

The Department offers a Master of Science (M.S.) in Engineering degree with a concentration in Electrical & Computer Engineering. It requires a minimum of 30 credit hours of graduate study. Full-time and part-time students may complete coursework through a combination of on-campus and online courses. Online courses are available synchronously at higher education centers and can be broadcast to any computer with a high-speed Internet connection. Full details on all requirements for graduating with a Master's degree are outlined in a separate section that follows the admission information.

Admission Information

Applicants are expected to hold a B.S. degree in electrical engineering (EE) or computer engineering (CpE) from an accredited institution. Applicants are also expected to have a minimum grade point average of 3.0 (on a 4.0 scale) in both the baccalaureate major area (EE or CpE) and overall. Applicants with a GPA below a 3.0 may be considered for provisional admission, which may require additional prerequisite courses in addition to the graduate degree requirements. The applications are submitted through the Office of Admissions of Old Dominion University. Together with the completed application form, two letters of recommendation from former instructors or employment supervisors, transcripts from all colleges and universities attended, GRE scores, a resume, and a personal statement of objectives are required. TOEFL scores are also required for international applicants. Applicants with academic degrees in areas other than electrical and computer engineering will be considered. Those with degrees in math, physics, computer science, or other engineering fields are encouraged to apply. The linked Bachelor's/Master's degree program in the Frank Batten College of Engineering and Technology at Old Dominion University is designed to provide an opportunity for exceptionally qualified engineering undergraduate students to obtain both a bachelor's and a master's degree in Electrical and Computer Engineering. Typically undergraduate students apply at the end of their junior year for admission to the linked programs.

Accepted students from disciplines other than EE or CpE are required to complete a number of leveling courses to meet prerequisites for graduate studies. All students are required to have one year of college chemistry and one year of calculus-based college physics in addition to Calculus III and Differential Equations courses. Students at Old Dominion University may complete the leveling requirement by earning a minor in electrical or computer engineering with a GPA of 3.0 or greater. Students that have not earned a minor need to meet with the graduate program director to prepare a course plan and determine which pre-requisite courses are needed. In general, three to four leveling courses are needed and they are chosen from the following lists.

List of Possible Courses to Meet the Leveling Requirement

ECE 202	Circuit Analysis II	3
ECE 241	Fundamentals of Computer Engineering	4
ECE 302	Linear System Analysis	3
ECE 303	Introduction to Electrical Power	3
ECE 304	Probability, Statistics, and Reliability	3
ECE 313	Electronic Circuits	4
ECE 323	Electromagnetics	3
ECE 332	Microelectronic Materials and Processes	3
ECE 341	Digital System Design	3
ECE 346	Microcontrollers	3
ECE 381	Introduction to Discrete-time Signal Processing	3

Students interested in taking computer engineering graduate courses may need to take additional leveling computer science courses as indicated below.

List of Possible Computer Science Courses to Meet the Leveling Requirements

CS 350	Introduction to Software Engineering	3
CS 361	Data Structures and Algorithms	3
CS 381	Introduction to Discrete Structures	3

Curriculum Requirements

The M.S. degree requires a minimum of 30 credit hours of graduate study.

The M.S. degree thesis option requires a minimum of 24 credit hours of courses (not including the Graduate Seminar) and 6 credit hours of thesis along with the oral thesis defense examination. Continuation in the M.S. program thesis option is contingent upon identifying a MS thesis advisor after completing 18 credit hours of coursework (which coincides approximately with the end of the second semester of study for full-time students). For the thesis committee, the chair has to be a full time ECE faculty member or a faculty member with an ECE degree in the Batten College of Engineering and Technology (BCET). A faculty member that is not in BCET can still be approved to serve as the advisor but cannot be the committee chair unless they have a joint appointment with ECE. Also, a minimum of 2 full time ECE faculty members and 1 outside ECE member are required on the committee.

The M.S. degree project option requires a minimum of 27 credit hours of courses (not including the Graduate Seminar) and 3 credit hours of Master's project course (ECE 698) that includes an oral defense examination.

The M.S. degree course option requires a minimum of 30 credit hours of courses (not including the Graduate Seminar) and a written comprehensive examination at the end of the course work. The examination is offered every fall and spring semester, and the student needs to pass the examination in no more than two attempts. The second attempt, if necessary, should be taken at the next offered examination.

The M.S. program is available to full-time and part-time students seeking to improve their professional skills in electrical and computer engineering. Students are required to complete at least one course that meets the department's mathematics requirement. The current list of courses that meet this requirement is given next.

ECE 601	Linear Systems	3
ECE 611	Numerical Methods in Engineering Analysis	3
ECE 623	Electromagnetism	3
ECE 651	Statistical Analysis and Simulation	3

The remaining courses are chosen to meet the student's career objectives. To earn a master's degree, a student needs to take at least five courses at the 600 or higher level, no more than 6 credit hours of Independent Study courses (ECE 797), and no more than three courses at the 500 level. Also, no more

than three graduate courses can be taken in other departments. The Graduate Program Director, in concurrence with the Chair, can approve exceptions to these requirements under special circumstances. All course selections must be reviewed by the graduate program director, and for the M.S. thesis option, students' course selections should be made in coordination with their research/thesis advisor. The graduate course descriptions are included in the graduate catalog and are also listed on the department's website. Additional graduate courses are offered through Cardinal Education (Home - Cardinal Education (<https://www.cardinaleducation.org/>)). All funded Master's students are required to attend Graduate Seminar.

Doctor of Engineering Engineering with a Concentration in Electrical and Computer Engineering (DEng)

The Department offers a Doctor of Engineering (D.Eng.) degree with concentration in Electrical and Computer Engineering in accordance with the admission criteria and degree requirements specified in the Frank Batten College of Engineering and Technology section in this catalog. The curriculum of this concentration consists of 18 credit hours of ECE 600 and 800 level courses as core courses, 18 credit hours of graduate coursework in the area of specialization and 12 credit hours of applied doctoral project. The courses need approval of the advisor and the graduate program director. Among the total 36 credit hours of coursework, no more than five graduate courses can be taken in other departments.

Doctor of Engineering Program

The College offers an interdisciplinary Doctor of Engineering (D.Eng.) program to provide the Commonwealth and the nation with exceptionally educated engineering practitioners. These individuals will have developed the highest possible capability to provide innovative solutions in specialized engineering endeavors. The graduates of the program will meet the highest standards for advanced level engineering and leadership positions in industry and government.

Admission Criteria

Consideration for admission to the Doctor of Engineering program requires the following:

1. A formal application;
2. Undergraduate and graduate transcripts;
3. Two letters of recommendation (One of the letters of recommendation should be from an agency point of contact if a sponsoring agency is involved. Sponsorship does not necessarily imply financial support, but it rather focuses on the provision of a project and access to data, information, and means to apply and test a solution.);
4. An essay describing the applicant's preparation for graduate work, personal and academic goals, and professional objectives.
5. A personal or telephone interview of the applicant with the graduate program director will be required;
6. Engineering experience of at least two years within the last five years;
7. Master's degree with a grade point average of 3.5 out of 4.0 in an appropriate STEM field from an accredited institution of higher education.

Curriculum Requirements

A minimum of 48 hours of graduate work beyond the master's degree is required including:

- 18 credit hours of ECE 600 and 800 level courses as core courses,
- At least 18 credit hours of graduate coursework in the student's area of specialization as determined by the department
- At least 12 credit hours of an applied doctoral project
- Not more than 9 credit hours of non-ECE courses.

At least three-fifths of the course work (15 credit hours) must be at 800-level. Exceptions to the credit-hour distribution requirements at any level must be approved in writing by the graduate program director, the dean or his or her designee, and the provost or his or her designee. No more than 9 credit hours of graduate courses can be taken outside ECE.

Additional Requirements

Continuation and Graduation Requirements

The continuation requirements are the same as the continuation requirements for the Doctor of Philosophy programs. The graduation requirements for the Doctor of Engineering degree are as follows:

1. Satisfactory completion of a minimum of 48 credit hours of approved graduate work beyond the master's degree, including the doctoral project.
2. Satisfactory performance on a diagnostic examination at the completion of nine credit hours of coursework. The purpose of this examination is to determine if the student has adequate background to pursue a doctoral degree. The diagnostic examination may only be repeated once.
3. Satisfactory completion of a written and oral candidacy examination before the advisory committee. The student will take the candidacy examination when he/she is within six credit hours of completing all the required coursework. The candidacy examination may only be repeated once.
4. Preparation and successful defense of a project concept proposal in both written and oral formats. The student will be required to prepare and present a concept proposal related to the work that will be undertaken for the doctoral project. The concept proposal will be defended before the doctoral project committee.
5. Submission of progress reports as deemed necessary by the doctoral project committee.
6. Written report of the project results. The doctoral project shall be documented in a manner consistent with advanced, professional work. The project report will follow the standard format for Old Dominion University dissertations and theses.
7. Comprehensive oral defense of the doctoral project before the student's doctoral committee and a general audience.

The applied doctoral project must successfully demonstrate the student's mastery of the subject area and his/her ability to apply advanced technical knowledge to identify, formulate, and solve novel and complex engineering problems. Once a student has completed the course work, passed the candidacy examinations, and has gained approval for the project proposal, the student advances to candidacy. It is a University requirement that students who have advanced to candidacy be enrolled for at least one credit hour every fall, spring, and summer until graduation. The project must address a complex but practical problem currently faced by the public, industry, or government, and it must provide a solution that satisfies all the technical, social, political, economic, safety, sustainability, and environmental requirements and/or constraints. Both advisory and doctoral project committees will have at least three members certified for graduate instruction; two faculty members must be from ECE department. The committee chair must be a full time ECE faculty or a faculty member with an ECE degree in the BCET college. A faculty that is not in the BCET college can still be approved to serve as an advisor but cannot be the committee chair unless they have a joint appointment with ECE. The committee must also have at least one non-ECE person with special knowledge of the project subject area.

Doctor of Philosophy Engineering with a Concentration in Electrical and Computer Engineering (PhD)

The Department offers a strong doctoral program leading to the Doctor of Philosophy (Ph.D.) in Engineering degree with a concentration in Electrical and Computer Engineering. The Ph.D. degree is awarded to candidates

who have displayed an in-depth understanding of the subject matter and demonstrated the ability to make an original contribution to knowledge in their chosen field of specialty. A very important component of the Ph.D. degree is the original research pursued by the student which culminates in a written dissertation, as well as an oral defense of this work. Ph.D. students usually publish the result of their research in highly reputable nationally and internationally refereed journals. In addition, the students are expected to present their work at national and international conferences.

Admission Requirements

Applicants to a doctoral degree in electrical and computer engineering are expected to have completed a master's degree in electrical engineering and/or computer engineering or a closely related technical field with a minimum grade point average of 3.5 (on a 4.0 scale) in graduate course work. The applications are submitted through the Office of Admissions of Old Dominion University. Together with the completed application form, three letters of recommendation, transcripts from all colleges and universities attended, GRE scores, a resume, and a personal statement of objectives are required. TOEFL scores are required for international applicants. At least two of the recommendation letters should be submitted by faculty or work supervisor familiar with the applicant's graduate work. The Frank Batten College of Engineering and Technology at Old Dominion University has the Direct Bachelor-to-Ph.D. and Integrated Bachelor/Ph.D. programs that allow exceptionally well-qualified undergraduate students to apply for admission directly to a Ph.D. program. The programs are described in the college section of the catalog.

Curriculum Requirements

The Ph.D. degree requires:

- 24 credit hours of graduate-level courses beyond the master's degree (not including Graduate Seminar),
- 24 research credit hours,
- successful completion of a written diagnostic examination,
- successful completion of written and oral candidacy examinations,
- successful completion of a dissertation research proposal, and
- successful completion and public defense of a dissertation.
- Or, in the absence of a master's degree, 78 credit hours (not including Graduate Seminar) beyond the bachelor's degree are required.

For students with a master's degree, the 24 credit hours of graduate-level coursework consist of 8 graduate level courses that are chosen by the student together with the research advisor and are approved by the Graduate Program Director. Of the 8 courses, 5 must be completed at the 800 level, no more than 6 credit hours Independent Study courses (ECE 897), and no more than 3 graduate courses can be taken in other departments. For students without a master's degree, the 78 credit hours of graduate level coursework consist of 48 credit hours of graduate courses and 30 research credit hours (ECE 899). Three fifths of the required 78 credit hours must be at the 800 level and need to comply with regular PhD program degree requirements. Exceptions to the credit-hour distribution requirements at any level must be approved in writing by the graduate program director, the dean or his or her designee, and the provost or his or her designee. Additional course work or appropriate research background may be required to meet prerequisites for courses or in preparation for the diagnostic examination. Furthermore, at least 1 credit hour of Graduate Seminar (ECE 831) is required, and all funded students are required to attend Graduate Seminar. The graduate course descriptions are included in the catalog and are also listed on the department's website. Additional graduate courses are offered through Cardinal Education (Home - Cardinal Education (<https://www.cardinaleducation.org/>)).

All Ph.D. students are required to take the department's Ph.D. Diagnostic Examination. For BS/PHD students, they are required to take the Diagnostic Exam for the first time before the end of their fourth semester or completing the 36 credit hours of graduate courses. For PHD students with MS, they are required to take the Diagnostic Exam for the first time before the end of their second semester or completing the 18 credit hours of graduate courses. The

examination is offered every fall and spring semester, and the student needs to pass the examination in no more than two attempts. The second attempt, if necessary, should be taken at the next offered examination. The topics for the examination and samples of previous examinations are posted in the department's website. The examination rules are given on the first page of each examination.

It is required that the written and oral candidacy examinations be taken in the semester before a student is completing the graduate course work or during the following semester. Once a student has completed the course work, passed the candidacy examinations, and has gained approval for the research proposal, the student advances to candidacy. It is an University requirement that students who have advanced to candidacy be enrolled for at least one credit hour every fall, spring, and summer until graduation. For both advisory and dissertation committees, the chair has to be a full time ECE faculty member or a faculty member with an ECE degree in the BCET college. A faculty member that is not in the BCET college can still be approved to serve as the advisor but cannot be the committee chair unless they have a joint appointment with ECE. Also, a minimum of 2 full time ECE faculty members and 1 outside ECE member are required in the committee.

Master of Science Engineering with a Concentration in Modeling and Simulation (MS)

The master's degree in modeling and simulation (M&S) emphasizes a strong, common subject core while providing the student with the flexibility to design a plan of study to meet each individual's study objectives and needs. The purpose of the program's subject core is to provide a common academic foundation for all simulation students. Thus, all students in this program will have grounding in the same methods, principles, and philosophy of simulation. This provides the mechanisms for the simulationist to work across disciplines and domains while maintaining a common frame of reference for communication, technical specialization, and advanced study and research. The Master of Science (MS) in Modeling and Simulation offers two options: Thesis Option and Course Option. The Thesis Option requires six hours of thesis credit and 24 hours of course credit and it is directed primarily at full-time students who are preparing for a career in advanced M&S research and/or academic positions. The Course Option requires 30 hours of course credit and it is focused on developing the practical skills and knowledge needed to solve problems requiring applications of modeling and simulation. The Course Option is further divided into two tracks: Development Track and Application Track. The Development Track is programming intensive and prepares students for advanced simulation development, while the Application Track focuses on the usage of existing advanced simulation tools.

The program's subject core consists of:

1. an overview of modeling and simulation;
2. an in-depth exploration of specific simulation methodological approaches;
3. simulation system modeling principles and techniques;
4. an introduction to computer visualization and visual simulation; and,
5. principles of stochastic analysis.

Most courses are offered in an online format. They are delivered to Old Dominion University's higher education centers and are available synchronously using video conferencing software.

Master of Science Admission Requirements

The Master's Degree in Modeling and Simulation is designed for students having bachelor's degrees in Engineering, Science or Mathematics, although students from other educational backgrounds may apply with appropriate leveling courses. Prerequisites for admission include: mathematics – two courses in differential and integral calculus and one course in calculus-based probability and statistics; and computer science – algorithmic problem

solving using a high-level object-oriented programming language such as C++.

A minimum GPA of 2.80 overall and a minimum GPA of 3.0 in the undergraduate major are required. Students with notable deficiencies may be considered for provisional admission and will be required to complete prerequisite course requirements in addition to the graduate degree requirements. Job experience and training may be considered in evaluating prerequisite requirements.

Applicants should plan to submit a completed application form, transcripts from all colleges and universities attended, GRE scores (verbal, quantitative, and analytical writing - required of MS applicants for the thesis option only), a resume and personal statement of objectives, two letters of recommendation from former university instructors or current employer (recommendation letters are required of MS applicants for the thesis option only), and TOEFL scores if an international applicant.

Potential prerequisite courses for the master's degrees in modeling and simulation include the following:

1. Introductory differential and integral calculus equivalent to MATH 211 (<https://catalog.odu.edu/search/?P=MATH%20211>) (Calculus I) and MATH 212 (<https://catalog.odu.edu/search/?P=MATH%20212>) (Calculus II).
2. Calculus-based probability and statistics; this material is available for graduate credit in PSYC 727 (<https://catalog.odu.edu/search/?P=PSYC%20727>). Undergraduate courses STAT 330 (<https://catalog.odu.edu/search/?P=STAT%20330>) or ENMA 420 (<https://catalog.odu.edu/search/?P=ENMA%20420>) will also meet the prerequisite requirement.
3. Computer science fundamentals including an object-oriented programming language such as C++, algorithmic problem solving, and data structures.

Curriculum Requirements

Master of Science Degree Requirements

The Master of Science program requires 12 hours of course credit in modeling and simulation foundation courses. These foundation courses include:

MSIM 741	Principles of Visualization	3
MSIM 551	Analysis for Modeling and Simulation	3
or MSIM 751	Advanced Analysis for Modeling and Simulation	
Advanced Modeling Course (See List Below)		3
Advanced Simulation Course (See List Below)		3

Advanced Modeling Course Examples (3 credits)

MSIM 607	Machine Learning I
MSIM 660	System Architecture and Modeling
MSIM 702	Systemic Decision Making
MSIM 730	Simulation Formalisms
MSIM 772	Modeling Global Events
MSIM 774	Transportation Network Flow Models

Other courses with Graduate Program Director's approval.

Advanced Simulation Course Examples (3 credits)

MSIM 711	Finite Element Analysis
MSIM 715	High Performance Computing Simulation and Data Analytics
MSIM 722	Cluster Parallel Computing
MSIM 725	Principles of Combat Modeling and Simulation
MSIM 742	Synthetic Environments
MSIM 776	Simulation Modeling in Transportation Networks

Other courses with Graduate Program Director's approval.

The remaining course credits (12 credits for the thesis option and 18 credits for the course option) are elective course credits. These courses are selected to achieve one or more program objectives or themes and must be approved by the student's advisor and/or graduate program director. Elective courses outside the ECE Department must be approved by the graduate program director. The thesis option concludes with 6 credit hours of thesis credit (MSIM 699 (<https://catalog.odu.edu/search/?P=MSIM%20699>)) and a thesis defense and the course option concludes with a comprehensive exam. Students must also complete the Responsible Conduct of Research for Engineers training online.

Certain students will need to take pre-requisite leveling courses that will count towards the 12 credit hour elective course requirement. These courses are: MSIM 510 (<https://catalog.odu.edu/search/?P=MSIM%20510>) Model Engineering; MSIM 541 (<https://catalog.odu.edu/search/?P=MSIM%20541>) Computer Graphics and Visualization; MSIM 602 (<https://catalog.odu.edu/search/?P=MSIM%20602>) Simulation Fundamentals; and, MSIM 603 (<https://catalog.odu.edu/search/?P=MSIM%20603>) Simulation Design. The Course Option Application Track only requires MSIM 510 (<https://catalog.odu.edu/search/?P=MSIM%20510>) Model Engineering and MSIM 602 (<https://catalog.odu.edu/search/?P=MSIM%20602>) Simulation Fundamentals as leveling courses.

The MS Course Option is also offered online via Canvas which provides online lectures, homework submissions, examinations, discussion boards, wikis, video/audio collaboration sessions, and grading. Students with reliable high-speed internet service can connect and participate in engaging discussions and distributed asynchronous learning with the instructor and other students. All course materials are distributed and collected electronically. Students located in the Hampton Roads region may utilize live courses to fulfill the elective course requirement with approval from the ECE graduate program director.

Doctor of Engineering Engineering with a Concentration in Modeling and Simulation (DEng)

The D. Eng. in Modeling and Simulation program focuses on developing the advanced skills and knowledge to enable the graduate to conduct and lead advanced technical M&S projects in an engineering environment. It affords engineering practitioners the opportunity to achieve advanced graduate education beyond the master's degree.

Admission Criteria

Consideration for admission to the Doctor of Engineering program requires the following:

1. A formal application;
2. Undergraduate and graduate transcripts;
3. Two letters of recommendation (One of the letters of recommendation should be from an agency point of contact if a sponsoring agency is involved. Sponsorship does not necessarily imply financial support, but it rather focuses on the provision of a project and access to data, information, and means to apply and test a solution.);
4. An essay describing the applicant's preparation for graduate work, personal and academic goals, and professional objectives.
5. A personal or telephone interview of the applicant with the graduate program director will be required;
6. Engineering experience of at least two years within the last five years;
7. Master's degree with a grade point average of 3.5 out of 4.0 in an appropriate STEM field from an accredited institution of higher education.

Curriculum Requirements

Doctor of Engineering Curriculum

A minimum of 48 credits of graduate work beyond the master's degree is required including:

- 18 credit hours of core courses
- At least 18 credit hours of graduate coursework in the student's area of specialization as determined by the department
- At least 12 credit hours of applied doctoral project
- At least three fifths of the course work must be at 800-level.

Modeling and Simulation Concentration

The program of study for the D.Eng. in M&S program is developed with the approval of the graduate program director and the student's advisor. The program shall include a minimum of 18 credits of professional course work (<http://catalog.odu.edu/graduate/frankbattencollegeofengineeringandtechnology/#doctorofengineeringprogram>). Some professional courses can be substituted by other courses approved by the Graduate Program Director if these professional courses are not available.

The D.Eng. also requires 18 credits of technical core course work beyond the master's degree distributed as follows:

Technical Core Courses

Select three Advanced Simulation Course from the list below	3
MSIM 830 Simulation Formalisms	3
MSIM 842 Synthetic Environments	3
MSIM 851 Advanced Analysis for Modeling and Simulation	3
Two approved technical elective courses	6
Total Credit Hours	18

Advanced Simulation Course Examples (3 credits)

MSIM 811 Finite Element Analysis	3
MSIM 815 High Performance Computing Simulation and Data Analytics	3
MSIM 822 Cluster Parallel Computing	3
MSIM 825 Principles of Combat Modeling and Simulation	3
MSIM 876 Simulation Modeling in Transportation Networks	3

Other courses with Graduate Program Director's approval.

No more than three credits from course work satisfying foundation knowledge requirements may be included in the program of study for technical elective credit. At least three-fifths of the non-project coursework must be at the 800-level.

Certain students entering the program will be required to complete additional pre-requisite leveling courses. These courses are: MSIM 510; MSIM 541; MSIM 602; and MSIM 603.

For graduation, students must complete the requirements for their final project and the Responsible Conduct of Research for Engineers training online.

Additional Requirements

Continuation and Graduation Requirements

The continuation requirements are the same as the continuation requirements for the Doctor of Philosophy programs. The graduation requirements for the Doctor of Engineering degree are as follows:

1. Satisfactory completion of a minimum of 48 credit hours of approved graduate work beyond the master's degree, including the doctoral project.
2. Satisfactory performance on a diagnostic examination at the completion of nine credit hours of coursework. The purpose of this examination is to determine if the student has adequate background to pursue a doctoral degree. The diagnostic examination may only be repeated once.
3. Satisfactory completion of a written and oral candidacy examination. The student will take the candidacy examination when he/she is

within six credit hours of completing all the required coursework. The candidacy examination may only be repeated once.

4. Preparation and successful defense of a project concept proposal. The student will be required to prepare and present a concept proposal related to the work that will be undertaken for the doctoral project. The concept proposal will be defended before the doctoral committee.
5. Submission of progress reports as deemed necessary by the doctoral committee.
6. Written report of the project results. The doctoral project shall be documented in a manner consistent with advanced, professional work. The project report will follow the standard format for Old Dominion University dissertations and theses.
7. Comprehensive oral defense of the doctoral project before the student's doctoral committee and a general audience.

The applied doctoral project must successfully demonstrate the student's mastery of the subject area and his/her ability to apply advanced technical knowledge to identify, formulate, and solve novel and complex engineering problems. The project must address a complex but practical problem currently faced by the public, industry, or government, and it must provide a solution that satisfies all the technical, social, political, economic, safety, sustainability, and environmental requirements and/or constraints. The doctoral project committee will have at least three Old Dominion University faculty members certified for graduate instruction; two faculty members must be from the major department. The committee must also have at least one non-University person with special knowledge of the project subject area.

Doctor of Philosophy Engineering with a Concentration in Modeling and Simulation Engineering (PhD)

The Ph.D. in Modeling and Simulation program focuses on developing the necessary skills and knowledge to enable the graduate to conduct and evaluate independent, original research in an area of modeling and simulation. The goal of the program is to prepare students for careers in teaching and research at academic institutions, as well as the conduct or leadership of research and development in public and private organizations.

Doctor of Philosophy Admission Requirements

Admission to the Ph.D. in M&S program is made in accordance with Old Dominion University and Batten College of Engineering and Technology requirements for doctoral programs as specified in this Catalog. Specific requirements for the modeling and simulation degree include the following:

1. Completion of a master's degree in an appropriate and closely related field is expected. However, students who have completed 24 credits of graduate courses in an appropriate field from an accredited institution may apply.
2. A minimum GPA in graduate course work of 3.50 (out of 4.0) is required of most students. A student with a GPA greater than 3.25 and with evidence of a high level of professional capability in the field of modeling and simulation may be eligible for admission to the program upon submission of a petition to the graduate program director.
3. Recent scores (typically, not more than five years old) on the Graduate Record Examination's (GRE) verbal, quantitative, and analytical writing sections must be submitted by all applicants.
4. Three letters of recommendation (typically at least two of which are from faculty in the highest degree program completed when the application is within five years of graduation from that degree program) are required.
5. The applicant must submit a statement of purpose, goals, and objectives related to the program and a resume.

Applicants are expected to have the following foundation knowledge:

1. Mathematics fundamentals including differential and integral calculus, ordinary differential equations, calculus-based probability and statistics, and linear algebra.
2. Computer science fundamentals including an object-oriented programming language such as C++, algorithmic problem solving, and data structures.
3. Knowledge of the content of the foundation courses required in the Modeling and Simulation Master's Program.

Curriculum Requirements

Doctor of Philosophy Degree Requirements

The Ph.D. in modeling and simulation is offered in accordance with the general requirements for doctoral degrees as specified in the Requirements for Graduate Degrees Section of this Catalog. Specific program of study requirements for the concentration in modeling and simulation include the following:

1. Completion of a minimum of 24 credits of course work beyond the master's degree; and a minimum of 24 credits of dissertation research.
2. Successful completion of a written diagnostic examination before completion of nine credits of advanced course work.
3. Successful completion of a written and oral qualifying (candidacy) examination near the completion of the course work.
4. Successful presentation of a dissertation research proposal at the beginning of the dissertation research.
5. The successful completion and public defense of a dissertation representing independent, original research worthy of publication in a peer-reviewed scholarly journal.

The program of study for the Ph.D. in M&S program is developed with the approval of the graduate program director and the student's advisor. The program shall include a minimum of 24 credit hours of course work beyond the master's degree distributed as follows.

Common Core

Advanced Simulation Course (see the list below)		3
MSIM 830	Simulation Formalisms	3
MSIM 842	Synthetic Environments	3
MSIM 851	Advanced Analysis for Modeling and Simulation	3

Total Credit Hours **12**

Advanced Simulation Course Examples (3 credits)

MSIM 811	Finite Element Analysis	3
MSIM 815	High Performance Computing Simulation and Data Analytics	3
MSIM 822	Cluster Parallel Computing	3
MSIM 825	Principles of Combat Modeling and Simulation	3
MSIM 876	Simulation Modeling in Transportation Networks	3

Other courses with graduate program director's approval.

Electives - Minimum of 12 credits of elective courses that provide a basis for dissertation research. No more than six credits from course work satisfying foundation knowledge requirements may be included in the program of study for elective credit. At least three-fifths (15 credits) of course work for fulfilling the degree requirement must be at the 800-level. Elective courses outside the ECE Department must be approved by the Graduate Program Director.

Certain students entering the program will be required to complete additional pre-requisite leveling courses. These courses are: MSIM 510 Model Engineering; MSIM 541 Computer

Graphics and Visualization; MSIM 602 Simulation Fundamentals; and MSIM 603 Simulation Design.

For graduation, students must successfully defend their dissertation and complete the Responsible Conduct of Research for Engineers training online.

Certificate Modeling and Simulation - Engineering Certificate

The Graduate Certificate in Modeling and Simulation Engineering is designed for those who meet the admission requirements of the modeling and simulation master's program and wish to broaden their knowledge of modeling and simulation related principles and practices without pursuing a graduate degree. This is a 12 credit hour non-degree program offered by the Department of Electrical & Computer Engineering. The certificate program is open to both degree-seeking and non-degree-seeking graduate students. Certain courses taken for the certificate program may later be applied to the master's degree in modeling and simulation.

Graduate Certificate Admission Requirements

Students should have either an undergraduate degree from a regionally accredited institution and should have a mathematical background through calculus, along with a calculus based probability and statistics course. Students should submit a graduate non-degree application through the Office of Admissions, and then submit a departmental application with copies of unofficial transcripts from all previous coursework to the ECE Department. More details on the program and application are available online: <https://www.odu.edu/academics/programs/certificate/modeling-simulation-engineering> (<https://www.odu.edu/academics/programs/certificate/modeling-simulation-engineering/>). For further questions, please contact:

Norfolk, VA 23529

Curriculum Requirements

Graduate Certificate Course Requirements

The Graduate Certificate in Modeling and Simulation Engineering requires the completion of 12 credit hours at the graduate level. The course requirements are:

Select three courses from the following:		9
MSIM 601	Introduction to Modeling and Simulation	
MSIM 602	Simulation Fundamentals	
MSIM 510	Model Engineering	
MSIM 603	Simulation Design	
MSIM 541	Computer Graphics and Visualization	
MSIM 551	Analysis for Modeling and Simulation	
MSIM Elective *		3
Total Credit Hours		12

* A graduate level elective approved by the Graduate Program Director. This elective may be an MSIM course or from another discipline outside of modeling and simulation. It is possible that this course may be outside of the discipline of modeling and simulation, but

approved because it complements the field of modeling and simulation and the student's interests.

An overall GPA of 3.0 or better is required to earn the graduate certificate in modeling and simulation engineering.

Department of Engineering Management and Systems Engineering

Web Site: <http://www.odu.edu/emse> (<http://www.odu.edu/emse/>)

Ertunga Cem Ozelkan, Chair
Resit Unal, Graduate Program Director, Master's Programs
Andrew Collins, Graduate Program Director, Doctoral Programs

Overview

The Engineering Management and Systems Engineering (EMSE) Department at Old Dominion University is dedicated to excellence in teaching and research in critical areas related to the management of complex, technology-intensive organizations and systems. Our award-winning programs are directed at working professionals and traditional full-time students with technical undergraduate degrees. The degrees are available on campus in a traditional classroom setting as well as online through synchronous web delivery. Courses are scheduled in the evenings and can be attended live on the Norfolk main campus, from the ODU's higher education centers, satellite campuses, and ODUGlobal.

The EMSE Department is the recipient of the American Society of Engineering Management's 1995, 2000, 2002, 2004, 2005, 2007, 2010, and 2014 awards for Excellence in Leadership in Graduate Programs. The Master of Engineering Management (MEM) program at Old Dominion University is also one of the first three programs certified by the American Society for Engineering Management. The program was initially certified in 2003 and has been re-certified in 2007, 2012, and 2018.

List of Degrees and Certificates

- Master of Engineering Management
- Master of Science in Engineering Management
- Master of Engineering, Engineering – Systems Engineering
- Doctor of Philosophy, Engineering – Engineering Management and Systems Engineering
- Doctor of Engineering – Engineering Management and Systems Engineering
- Graduate Certificates in
 - Advanced Engineering Cyber Systems Security
 - Engineering Management
 - Project Management
 - Homeland Security
 - Entrepreneurship and Innovation for Engineers
 - Mission Analysis and Engineering

Graduate Certificates

The Department of Engineering Management and Systems Engineering administers or participates in a variety of graduate certificates. These include graduate certificates or advanced engineering certificates with concentrations as follows:

- Advanced Engineering Cyber Systems Security
- Engineering Management
- Project Management
- Homeland Security

- Entrepreneurship and Innovation in Engineering
- Mission Analysis and Engineering

Please refer to Frank Batten College of Engineering and Technology (<http://catalog.odu.edu/graduate/frankbattencollegeofengineeringandtechnology/>) for more information.

Master of Engineering Management Engineering Management (MEM) Degree Description

The Master of Engineering Management (MEM) provides a foundation and the necessary skills, knowledge, and abilities required to design and manage the technology-based, project-driven enterprise. Fundamentally, the engineering management program focuses on problems, design, and management of projects and complex operations. The program is grounded in solid principles of systems science while exploiting the tools of management science and project management. The Master of Engineering Management emphasizes the concept of technological leadership. Technological leadership's vision looks to the creation of new products, processes, and services which, in turn, will create new markets or enable domination of existing ones. Core coursework in the Master of Engineering Management program concentrates on developing the knowledge and skills required by graduates to provide the project and program leadership and management necessary to develop and manage technology intensive organizational settings.

The degree is directed at working professionals and traditional full-time students with technical undergraduate degrees. The degree is available on campus in a live setting as well as online through synchronous web delivery. Courses are scheduled in the evenings and can be attended from off-campus sites, including the Peninsula Higher Education Center in Hampton and the Virginia Beach Higher Education Center. The complete M.E.M. program is available through ODUGlobal and through the Commonwealth Graduate Engineering Program. Both programs transmit courses to educational, industrial, and government locations throughout Virginia and via a web-based platform.

Admission Requirements

Admission to the master of Engineering Management program is in accordance with Old Dominion University and Frank Batten College of Engineering and Technology requirements for master's programs as specified in this catalog.

Admission requirements specific to this program include the following:

1. Official transcripts from all post-secondary institutions attended.
2. Undergraduate degree from a U.S. ABET-accredited program in engineering or engineering technology with a GPA of 3.00 (out of 4.00) or better. Students who hold bachelor's degrees in other disciplines or who do not meet the GPA requirement may be considered for admission based on transcript evidence of applicable physics and calculus courses, a résumé indicating relevant work experience in an engineering discipline, and/or satisfactory GRE quantitative scores.
3. Résumé detailing relevant work experience.
4. Personal Statement that outlines the rationale for applying to the program and how it aligns with the student's professional goals.
5. Students not meeting the above requirements may be admitted provisionally. The Graduate Program Director may request additional information, including GRE scores.
6. International students must meet University admission requirements; please refer to the website: <https://www.odu.edu/admissions/proficiency> (<https://www.odu.edu/admissions/proficiency/>).

Curriculum Requirements

General Requirements

The Master of Engineering Management is in accordance with the general requirements for master's degrees as specified in this Catalog. All students must have mathematics coursework through the level of integral calculus, matrix algebra or differential equations, and ENMA 420 or equivalent calculus-based probability and statistics. Students who have not had a calculus-based probability and statistics course will be required to include ENMA 420, or equivalent, as part of their plan of study *in addition to the required 31 credit hours*. All students are expected to communicate effectively both orally and in written documents, that are correct in grammar, style, and mechanics. Those deemed insufficient may be required to take remedial speech or writing courses. The engineering management curriculum has been designed around six core areas that develop the skill sets identified earlier and prepare graduates to assume positions within technology-based enterprises.

Curricular Requirements

The Master of Engineering Management (M.E.M.) program requires 31 credits of coursework (10 three-credit courses plus a one-credit capstone course). At least three-fifths (3/5) of coursework must be at the 600- or 700-level for the M.E.M. degree. Students must maintain a 3.00 GPA or better. Students must meet all University continuance requirements.

M.E.M. Courses

Prerequisite *

Complete prerequisite requirements

Core

ENMA 600	Cost Estimating and Financial Analysis	3
ENMA 601	Analysis of Organizational Systems	3
ENMA 603	Operations Research	3
ENMA 604	Project Management	3
ENMA 646	Information Science for Systems and Engineering Management	3

Select one of the following: 3

ENMA 614	Quality Systems Design	
ENMA 715	Systems Analysis	
ENMA 724	Risk Analysis	

Electives * 12

Capstone

ENMA 605	Program Capstone (required final semester)	1

Total Credit Hours 31

* Students must select twelve credit hours of elective coursework for the M.E.M. These electives may be selected from the available graduate-level ENMA courses.

Additional Requirements

Requirements for Graduation

In addition to completing all the required courses, all graduate students must complete the Collaborative Institutional Training Initiative (CITI) basic course, Responsible Conduct of Research for Engineers. The basic course includes the following modules: Misconduct (falsification, fabrication, and plagiarism); Data acquisition, management, sharing and ownership; Mentor/trainee relationships; Publication practice and responsible authorship; Peer review; Conflicts of interest; and Collaborative research. The RCR modules must be completed prior to completion of 12 semester hours. Students who fail to complete this requirement will have a registration hold placed on their records.

Master of Science

Engineering Management (MS)

Degree Description

The Master of Science in Engineering Management (MS) provides the foundation and the necessary skills, knowledge, and abilities required to design and manage the technology-based, project-driven enterprise. The Master of Science (M.S.) program requires thesis research, and the student is expected to identify an advisor and work with him/her starting from the first semester. Fundamentally, the engineering management program focuses on problems, design, and management of projects and complex operations. The program is grounded in solid principles of systems science while exploiting the tools of management science and project management. The coursework is designed to produce graduates capable of addressing issues related to the design, operation, analysis, and transformation of complex problems. Core coursework in the Master of Science in Engineering Management program concentrates on developing the knowledge and skills required by graduates to provide the project and program leadership and management necessary for an organization to develop and manage technologies.

The degree is directed at working professionals and traditional full-time students. The degree is available on campus in a live setting as well as online through synchronous web delivery. Courses are scheduled in the evenings and can be attended from off-campus sites, including the Peninsula Higher Education Center in Hampton and the Virginia Beach Higher Education Center. The complete MS in Engineering Management program is available through ODUGlobal and through the Commonwealth Graduate Engineering Program. Both programs transmit courses to educational, industrial, and government locations throughout Virginia and via a web-based platform.

Admission Requirements

Admission to the Master of Science in Engineering Management program is in accordance with Old Dominion University and Frank Batten College of Engineering and Technology requirements for master's programs as specified in this catalog.

Admission requirements specific to this program include the following:

1. Official transcripts from all post-secondary institutions attended.
2. Undergraduate degree from a U.S. ABET-accredited program in engineering or engineering technology with a GPA of 3.00 (out of 4.00) or better. Students who hold bachelor's degrees in other disciplines or who do not meet the GPA requirement may be considered for admission based on transcript evidence of applicable physics and calculus courses, a résumé indicating relevant work experience in an engineering discipline, and/or satisfactory GRE quantitative scores.
3. Résumé detailing relevant work experience.

4. Personal Statement that outlines the rationale for applying to the program and how it aligns with the student's professional goals.
5. Students not meeting the above requirements may be admitted provisionally. The Graduate Program Director may request additional information, including GRE scores.
6. International students must meet University admission requirements; please refer to the website: <https://www.odu.edu/admissions/proficiency> (<https://www.odu.edu/admissions/proficiency/>).

Curriculum Requirements

General Requirements

The Master of Science in Engineering Management (MSEM) is in accordance with the general requirements for master's degrees as specified in this Catalog. Students are required to identify an advisor as part of the program requirements. All students are expected to communicate effectively both orally and in written documents, that are correct in grammar, style, and mechanics. Those deemed insufficient may be required to take remedial speech or writing courses. All students must have mathematics coursework through the level of integral calculus, matrix algebra or differential equations, and ENMA 420 or equivalent calculus-based probability and statistics. Students who have not had a calculus-based probability and statistics course will be required to include ENMA 420, or equivalent, as part of their plan of study in addition to the required 30 credits.

Curricular Requirements

The Master of Science in Engineering Management requires 30-credit hours of coursework (8 three-credit courses plus 2 three-credit thesis research courses). At least three-fifths (3/5) of coursework must be at the 600- or 700-level. Students must identify an advisor within completion of 9 credit hours. Students must maintain a GPA of 3.00 or better. Students must meet all University continuance requirements.

The following table delineates the specific course requirements for this program.

M.S. Courses

Required *

ENMA 711	Engineering Research Methodology	3
ENMA 720	Multivariate Statistics for Engineering	3

Core

Select four of the following: 12

ENMA 600	Cost Estimating and Financial Analysis
ENMA 601	Analysis of Organizational Systems
ENMA 603	Operations Research
ENMA 604	Project Management
ENMA 614	Quality Systems Design
ENMA 715	Systems Analysis

Electives *

Select electives 6

Thesis Research **

Complete thesis research 6

Total Credit Hours 30

- * Students must select six credit hours of elective coursework for the M.S.E.M. These electives may be selected from the available graduate level ENMA courses.
- ** M.S. students take six credits of thesis research, ENMA 699, or project hours ENMA 698, which must be spread over a minimum of two semesters.

Additional Requirements

Requirements for Graduation

In addition to completing all the required courses, all graduate students must complete the Collaborative Institutional Training Initiative (CITI) basic

course, Responsible Conduct of Research for Engineers. The basic course includes the following modules: Misconduct (falsification, fabrication, and plagiarism); Data acquisition, management, sharing and ownership; Mentor/trainee relationships; Publication practice and responsible authorship; Peer review; Conflicts of interest; and Collaborative research. The RCR modules must be completed prior to completion of 12 semester hours. Students who fail to complete this requirement will have a registration hold placed on their records. Master of Science students must also pass a final examination in front of a thesis committee approved by the graduate program director.

Master of Engineering Engineering with a Concentration in Systems Engineering (ME)

Degree Description

The Master of Engineering, Engineering – Systems Engineering provides an interdisciplinary approach to support the realization, deployment, and maintenance of successful system solutions to complex problems. This program builds upon your technical background as an engineer. It is designed to provide in-depth, real-world practitioner expertise in engineering complex system solutions. In addition, this rigorous educational experience will help develop your skills in effectively addressing complex problems for both government and commercial organizations. Students in the program are introduced to core competencies for systems engineering, complex systems, modeling, systems analysis, complex problem solving needed for successful delivery of system solutions.

Admission Requirements

Admission to the MESE program is in accordance with Old Dominion University and Frank Batten College of Engineering and Technology requirements for masters programs as specified in this catalog.

Admission requirements specific to this program include the following:

1. Official transcripts from all post-secondary institutions attended.
2. Undergraduate degree from a U.S. ABET-accredited program in engineering or engineering technology with a GPA of 3.00 (out of 4.00) or better. Students who do not meet the requirements may be considered for admission based on transcript evidence of applicable physics and calculus courses, a résumé indicating relevant work experience in an engineering discipline, and/or satisfactory GRE quantitative scores.
3. Résumé detailing relevant work experience.
4. Personal Statement that outlines the rationale for applying to the program and how it aligns with the student's professional goals.
5. Students not meeting the above requirements may be admitted provisionally. The Graduate Program Director may request additional information, including GRE scores.
6. International students must meet University admission requirements; please refer to the website: <https://www.odu.edu/admissions/proficiency> (<https://www.odu.edu/admissions/proficiency/>).

Curriculum Requirements

General Requirements

The Master of Engineering - Engineering - Systems Engineering is in accordance with the general requirements for master's degrees as specified in this Catalog. In addition, all students must have mathematics coursework through the level of integral calculus, matrix algebra or differential equations, and ENMA 420 or equivalent calculus-based probability and statistics. Students who have not had a calculus-based probability and statistics course will be required to include ENMA 420, or equivalent, as part of their plan of study as an additional requirement to the 31 credit hours. All students are expected to communicate effectively both orally and in written documents, that are correct in grammar, style, and mechanics. Those deemed insufficient may be required to take remedial speech or writing courses.

Curricular Requirements

The Master of Engineering - Engineering - Systems Engineering requires 31 graduate credit hours of coursework (10 courses plus a one-credit capstone course) for the degree. At least three-fifths (3/5) of coursework work must be at the 600 or 700 level for the M.E. degrees. The capstone course should be taken within the last two semesters of study. The following table delineates the specific course requirements for this program.

Core

ENMA 515	Introduction to Systems Engineering	3
ENMA 656	Mathematical and Computational Modeling in Systems Engineering	3
ENMA 660	Systems Architectures	3
ENMA 661	Systems Engineering Design	3
ENMA 715	Systems Analysis	3
Select one of the following		3
ENMA 725	System Risk and Failure Analysis	
ENMA 743	Reliability and Maintainability	
ENMA 763	Robust Engineering Design	
ENMA 771	Risk and Vulnerability Management of Complex Interdependent Systems	

Electives **

Select electives	12

Capstone *

ENMA 690	Systems Engineering Capstone	1

Total Credit Hours	31

- * Required for the Master of Engineering in systems engineering, is to be taken near the final semester of study.
- ** Students must select twelve credit hours of elective coursework. These electives may be selected from the available graduate-level ENMA courses.

Additional Requirements

Requirements for Graduation

In addition to completing all the required courses, all graduate students must complete the Collaborative Institutional Training Initiative (CITI) basic course, Responsible Conduct for Engineers. The basic course includes the following modules: Misconduct (falsification, fabrication, and plagiarism); Data acquisition, management, sharing and ownership; Mentor/trainee relationships; Publication practice and responsible authorship; Peer review; Conflicts of interest; and Collaborative research. The RCR modules must be completed prior to completion of 12 semester hours. Students who fail to complete this requirement will have a registration hold placed on their records.

Doctor of Engineering Engineering with a Concentration in Engineering Management and Systems Engineering (DEng)

Degree Description

The Department offers a Doctor of Engineering (D.Eng.) program with a concentration in Engineering Management and Systems Engineering in accordance with the D.Eng. program requirements specified for the Batten College of Engineering and Technology in this catalog. Additional information on the admission procedure and criteria can be found at <https://www.odu.edu/academics/programs/doctoral/engineering-management> (<https://www.odu.edu/academics/programs/doctoral/engineering-management/>).

Doctor of Engineering Program

The College offers an interdisciplinary Doctor of Engineering (D.Eng.) program to provide the Commonwealth and the nation with exceptionally educated engineering practitioners. These individuals will have developed the highest possible capability to provide innovative solutions in specialized engineering endeavors. The graduates of the program will meet the highest standards for advanced level engineering and leadership positions in industry and government.

Admission Criteria

Consideration for admission to the Doctor of Engineering program with a concentration in Engineering Management and Systems Engineering requires the following:

1. A formal application;
2. Undergraduate and graduate transcripts;
3. Two letters of recommendation (One of the letters of recommendation should be from an agency point of contact if a sponsoring agency is involved. Sponsorship does not necessarily imply financial support, but it rather focuses on the provision of a project and access to data, information, and means to apply and test a solution.);
4. An essay describing the applicant's preparation for graduate work, personal and academic goals, and professional objectives.
5. A personal or telephone interview of the applicant with the graduate program director will be required;
6. Engineering experience of at least two years within the last five years;
7. Master's degree with a grade point average of 3.5 out of 4.0 in an appropriate field from an accredited institution of higher education.

Curriculum Requirements

A minimum of 48 hours of graduate work beyond the master's degree is required including:

- 18 credit hours of core courses
- At least 18 credit hours of graduate coursework in the student's area of specialization as determined by the department
- At least 12 credit hours of applied doctoral project

At least three fifths of the course work must be at 800-level.

Additional Requirements

Continuation and Graduation Requirements

The continuation requirements are the same as the continuation requirements for the Doctor of Philosophy programs. The graduation requirements for the Doctor of Engineering degree are as follows:

1. Satisfactory completion of a minimum of 48 credit hours of approved graduate work beyond the master's degree, including the doctoral project.
2. Satisfactory performance on a diagnostic examination at the completion of nine credit hours of coursework. The purpose of this examination is to determine if the student has adequate background to pursue a doctoral degree. The diagnostic examination may only be repeated once.
3. Satisfactory completion of a written and oral candidacy examination. The student will take the candidacy examination when he/she is within six credit hours of completing all the required coursework. The candidacy examination may only be repeated once.
4. Preparation and successful defense of a project concept proposal. The student will be required to prepare and present a concept proposal related to the work that will be undertaken for the doctoral project. The concept proposal will be defended before the doctoral committee.
5. Submission of progress reports as deemed necessary by the doctoral committee.
6. Written report of the project results. The doctoral project shall be documented in a manner consistent with advanced, professional work.

The project report will follow the standard format for Old Dominion University dissertations and theses.

7. Comprehensive oral defense of the doctoral project before the student's doctoral committee and a general audience.

The applied doctoral project must successfully demonstrate the student's mastery of the subject area and his/her ability to apply advanced technical knowledge to identify, formulate, and solve novel and complex engineering problems. The project must address a complex but practical problem currently faced by the public, industry, or government, and it must provide a solution that satisfies all the technical, social, political, economic, safety, sustainability, and environmental requirements and/or constraints. The doctoral project committee will have at least three Old Dominion University faculty members certified for graduate instruction; two faculty members must be from the major department. The committee must also have at least one non-University person with special knowledge of the project subject area.

Doctor of Philosophy Engineering with a Concentration in Engineering Management and Systems Engineering (PhD)

Degree Description

The Doctor of Philosophy (Ph.D.) focuses on developing the necessary skills to perform and evaluate rigorous research. Graduates are prepared for careers in teaching and research at academic institutions as well as in other public and private organizations characterized by innovation and technological leadership. The program blends highly theoretical with more applied or pragmatic research. The fields of research supported by the program are defined by the diverse specializations of the department faculty. Students in the Ph.D. program work closely with faculty to develop world-class expertise in their chosen fields of research. Advising faculty expect doctoral students to become collaborators, supporting the faculty's research agenda, and contributing towards their research goals. *This program is available on-campus and online.*

Admission Requirements

Admission to the Ph.D. program is competitive. The admission process is designed to select applicants that have a strong alignment between their own research interests and an area of specialization of one of the faculty. The best qualified applicant or applicants for an area of specialization are then selected. The number of students admitted into any faculty's area of specialization is dependent on the faculty's projected ability to advise additional doctoral students. The selected is based on the applicants' academic history, maturity in the development of research capabilities, and proficiency in specialized skills demanded by the research area.

In addition to general University admission requirements, which include English language proficiency for international students, applicants must have: (1) A master's degree or equivalent with a grade point average of 3.50 in an appropriate field from an accredited institution of higher education. (2) Undergraduate degree from an ABET-accredited program in engineering or engineering technology with a GPA of 3.00 (out of 4.00) or better. Students who hold bachelor's degrees in other disciplines or who do not meet the GPA requirement may be considered for admission based on transcript evidence of applicable physics and calculus courses, a resume indicating relevant work experience in an engineering discipline, and/or satisfactory GRE quantitative scores.

Each applicant is required to submit the following documentation when initially applying: (1) Transcripts from all institutions that the applicant has attended; (2) Graduate Record Examination general aptitude scores; (3) A curriculum vitae that highlights professional and research related activities; and (4) an essay of 500 words or less describing personal and academic goals, professional objectives, preparation for graduate study, and how the chosen program will help the applicant achieve these goals

and objectives. The essay should clearly state the specific area in which the applicant intends to specialize.

Applicants whose interests can be supported by a faculty's specialization and demonstrate adequate preparation to meet the demands of doctoral studies will be contacted by the Graduate Program Director. The GPD may request additional information that will assist in the selection process. Additional information may include but is not restricted to: publications, samples of research reports, and documents or materials that support proficiency claims of specialized skills. If warranted, the GPD will organize an interview of the applicant by faculty that have specializations in areas that may overlap with the applicant's intended area of research.

Admission is contingent on having the support of a faculty that is willing to commit to acting as an advisor should the applicant be admitted.

Students lacking adequate academic preparation may be required to complete coursework in addition to the graduate admission requirements. Students may be admitted to the Ph.D. program deficient in these leveling courses, but as part of their plan of study, the student must take and successfully complete these courses at the earliest possible opportunity. All students must have mathematics coursework through the level of integral calculus; matrix algebra or differential equations; and a course in calculus-based statistics (ENMA 420 (<http://catalog.odu.edu/search/?P=ENMA%20420>) or equivalent). As part of masters-level coursework, all students must have completed the following engineering management leveling courses or their equivalent: ENMA 600 (<http://catalog.odu.edu/search/?P=ENMA%20600>), ENMA 603 (<http://catalog.odu.edu/search/?P=ENMA%20603>), and ENMA 604 (<http://catalog.odu.edu/search/?P=ENMA%20604>).

Curriculum Requirements

General Requirements

The Ph.D. program is intended to develop scholarship and research capabilities in the student. Graduates will be experts in their chosen field, highly skilled researchers, critical thinkers, and competent communicators and debaters. Graduates will demonstrate this in a variety of ways that will include, but is not limited to, their performance in: coursework, written and oral examinations, closed and public debates and defenses, and contribution to their field's body of knowledge. The development and assessment of such expertise and scholarship take place under the guidance, advising, and mentorship of a faculty that is an expert in the field, and appropriate guidance, dissertation, and examination committees.

Curricular Requirements

Curriculum requirements in engineering management are in accordance with the general requirements for Ph.D. degrees as specified in the Requirements for Graduate Degrees section of this catalog. The Ph.D. program is governed by a Plan of Study that is established by the student in conjunction with his/her advisor and guidance committee within the first nine credit hours of coursework and will follow the established course requirements (below) unless a substitution to one or more courses is agreed upon between the advisor and student and approved by the Graduate Program Director. The plan of study is designed to prepare the student to undertake scholarly research in the particular field and specialization of their dissertation. The coursework selected will provide the student with (1) the requisite foundational knowledge of the selected field, and (2) the necessary research skills. A high degree of flexibility is provided to customize the plan of study, taking into account the diversity in the fields of study, the multidisciplinary nature and variety of research that is undertaken, as well as the different levels of preparation that individual students have.

At least three-fifths (3/5) of formal coursework must be at the 800 level for all doctoral programs.

Subject Area Specialization (Advisor-driven)

Complete the specialization	9

Subject Area Electives (Suggested courses)

Select a minimum of two of the following:	6
ENMA 661 Systems Engineering Design	

ENMA 815	Systems Analysis	
ENMA 824	Risk Analysis	
ENMA 843	Reliability and Maintainability	
ENMA 854	Big Data Fundamentals	
ENMA 863	Robust Engineering Design	
Research Skills (required)		
ENMA 811	Engineering Research Methodology	3
ENMA 820	Multivariate Statistics for Engineering	3
ENMA 821	Foundations of Research	3
Dissertation Research *		
Complete dissertation		24
Total Credit Hours		48

* Up to 6 dissertation research hours may be replaced by coursework with the approval of the advisor and GPD.

Additional Requirements

Requirements for Graduation

In addition to any University and College requirements presented in this catalog, the Ph.D. program in engineering management requires:

1. Satisfactory completion of a minimum of 48 credit hours of postmaster's degree credit or equivalent level of performance coursework. This shall include a minimum of 24 credit hours of coursework that complies with the student's plan of study, and a minimum of 18 credit hours of dissertation research hours.
2. Passing a written and oral candidacy examination at the completion of formal coursework.
3. The completion of research representing independent original research and its formal documentation as a dissertation.
4. The successful defense of a dissertation proposal.
5. The successful final public defense of the dissertation before an audience, which includes an appropriately selected committee of faculty knowledgeable in the field of the research.

Continuance Requirements

Students may be separated for failure to comply with any policies, procedures or requirements that pertain to this Ph.D. program or student behavior. In addition to the requirements for graduation, separation from the program may be warranted for the following reasons, among others:

Coursework:

1. All students admitted to Engineering Management and Systems Engineering programs must earn a grade of "C" or better in all courses required for the degree and in all Engineering Management prerequisite courses. A student may be separated from the program if he/she receives a grade lower than a "C". Additionally, a student may be separated from the program if he/she receives 2 (two) grades lower than a "B".

Adherence to programmatic expectations:

1. Students are expected to complete their coursework according to an agreed upon plan of study. See plan of study requirements above. Failure to adhere to the plan of study may result in separation from the program.
2. Students are expected to make timely progress on their coursework and research. Persistent failure to meet deadlines and milestones or other indicators that demonstrate progress, as assessed and documented by the guidance or advisory committee may lead to separation from the program.
3. Students are expected to remain within the specialization area of their advisor and committee members. Students that deviate outside of the agreed upon research area will be notified of this deviation. The student may lose the support of their advisor and committee if the deviation persists. A student will be given a limited period of time (generally one semester) to acquire an advisor that is capable of supporting their

new research direction. Separation from the program will result if the student cannot obtain a new advisor, whether this is due to the lack of a specialization in the new field, or if a faculty with a suitable specialization cannot take on additional advising responsibilities.

- Similarly, if a student is left without an advisor for any other reason (e.g. departure of a faculty advisor from the program), it is contingent on the student to obtain a new advisor in a timely manner. This may require flexibility and willingness by the student to adjust their area of specialization. The department will assist the student and take their particular situation into consideration when the loss of an advisor is due to factors outside of the student's control. Separation from the program will, however, result if no advisor is obtained after a limited period of time (generally one semester).

Quality of Research

- A student that persistently submits work of low quality whether it be in documented or in oral form, may be required to submit for special reviews by the committee. Records taken by the advisor, and the guidance or advisory committees, which document the quality problems and present remedial actions where appropriate will be used to help ascertain whether the problems can reasonably be expected to be resolved, or if separation from the program is warranted.

Ethical Behavior

- Any student partaking or demonstrating behaviors that might be considered to go against the policies and conditions expected for responsible conduct in research, Old Dominion University expected codes of conduct, or ethical considerations that might be specific to an area of research, may result in separation from the program.

Department of Mechanical and Aerospace Engineering

Web Site: <http://www.odu.edu/mae> (<http://www.odu.edu/mae/>)

757-683-6363

Marwan Al-Haik, Chair
Colin Britcher, Associate Chair

Drew Landman, Graduate Program Director

Overview

The Department of Mechanical and Aerospace Engineering strives to provide the highest quality engineering education at the undergraduate and graduate levels, to engage in scholarly research at the forefront of mechanical and aerospace engineering, and to serve the professions of mechanical and aerospace engineering. Graduate degrees in mechanical engineering and aerospace engineering include the Master of Engineering, Master of Science, and Doctor of Philosophy degrees and are designed to prepare graduates for professional practice in teaching, research and development, design, and consulting. Graduates are prepared for challenging and rewarding employment in high-technology industries, research organizations, consulting firms and government agencies. These programs are also designed to serve both full-time and part-time graduate students. The department is closely associated with area industries, consulting firms, government agencies and research laboratories, which add relevance to the graduate engineering curricula, creating a stimulating environment for the pursuit of graduate studies. The students also benefit from the University's affiliation with NASA Langley Research Center, the Jefferson National Laboratory, the National Institute of Aerospace, and the Virginia Modeling Analysis and Simulation Center. All degree programs offered by the department can be utilized as components within the linked Baccalaureate-Master's and Baccalaureate-Doctoral degree programs offered through the Batten College of Engineering and Technology. For additional information about the educational and research opportunities available please visit our website at <http://www.odu.edu/mae>. *This program is available on-campus and online.*

List of Degrees and Certificates

- Master of Engineering - Mechanical Engineering
- Master of Science, Engineering - Mechanical Engineering
- Master of Engineering - Aerospace Engineering
- Master of Science, Engineering - Aerospace Engineering
- Doctor of Philosophy, Engineering - Mechanical Engineering
- Doctor of Philosophy, Engineering - Aerospace Engineering
- Graduate Certificate - Naval Architecture and Marine Engineering

Graduate Course Portfolio

Core Graduate Courses

MAE 601	Engineering Mathematics	3
MAE 602	Fluid Dynamics and Aerodynamics	3
MAE 603	Advanced Mechanics of Solids	3
MAE 604	Analytical Dynamics	3
MAE 605	Advanced Classical Thermodynamics	3
MAE 607	Continuum Mechanics	3
MAE 620	Heat Transfer I	3
MAE 640	Modern Control Theory	3
MAE 672	Design of Experiments	3
MAE 682	Concurrent Engineering	3

Aerodynamics and Fluids Graduate Courses

MAE 503	Flight Mechanics	3
MAE 506	Flight Vehicle Aerodynamics	3
MAE 517	Propulsion Systems	3
MAE 560	Introduction to Space Systems Engineering	3
MAE 710/810	Supersonic Flow	3
MAE 711/811	Hypersonic Aerodynamics	3
MAE 712/812	Experimental Aerodynamics	3
MAE 713/813	Turbulent Flow	3
MAE 715/815	Boundary Layer Theory	3
MAE 716/816	Computational Fluid Dynamics I	3
MAE 718/818	Aerospace Test Facilities	3
MAE 772/872	Response Surface Methodology	3

Thermodynamics and Energy Graduate Courses

MAE 511	Mechanical Engineering Power Systems Theory and Design	3
MAE 512	Environmental Control	3
MAE 513	Energy Conversion	3
MAE 514	Introduction to Gas Dynamics	3
MAE 720/820	Heat Transfer II	3
MAE 723/823	Nuclear Engineering	3

Materials and Structures Graduate Courses

MAE 522	Modern Engineering Materials	3
MAE 730/830	Finite Element Analysis	3
MAE 731/831	Mechanics of Composite Structures	3
MAE 734/834	Theory of Vibrations	3
MAE 750/850	Nanoscale Mechanical and Structural Properties of Materials	3
MAE 751/851	Fatigue and Fracture	3
MAE 752/852	Mechanical Behavior of Materials	3
MAE 753/853	Composite Materials	3

Dynamics and Controls Graduate Courses

MAE 504	Vibrations	3
MAE 531	Mechanisms Analysis and Design	3

MAE 538	Applied Analog and Digital Control	3
MAE 740/840	Autonomous and Robotic Systems Analysis and Control	3
MAE 741/841	Optimal Control Theory	3
MAE 742/842	Multibody Dynamics: Theories and Applications	3
MAE 743/843	Kinematic Synthesis of Mechanisms	3
MAE 744/844	Atmospheric Flight Dynamics and Control	3
MAE 745/845	Space Flight Dynamics and Control	3
MAE 746/846	Advanced Control Methodologies	3
MAE 747/847	Aerospace Vehicle Performance	3

Design/Manufacturing Graduate Courses

MAE 780/880	Engineering Optimization	3
MAE 781/881	Advanced Design	3
MAE 783/883	Robots and Manufacturing Automation	3
MAE 785/885	Advanced Manufacturing Technology	3
MAE 788/888	Computational Intelligence for Engineering Design Optimization Problems	3
MAE 789/889	Engineering Design with Uncertainties	3

Programs

Doctor of Philosophy Programs

- Engineering with a Concentration in Aerospace Engineering (PhD) (p. 254)
- Engineering with a Concentration in Mechanical Engineering (PhD) (p. 257)

Master of Engineering Programs

- Engineering with a Concentration in Aerospace Engineering (ME) (p. 253)
- Engineering with a Concentration in Mechanical Engineering (ME) (p. 255)

Master of Science Programs

- Engineering with a Concentration in Mechanical Engineering (MS) (p. 256)

Certificate Program

- Naval Architecture and Marine Engineering Certificate (p. 258)

Master of Engineering Engineering with a Concentration in Aerospace Engineering (ME)

Master's Admission Information

To qualify as a candidate for a Master of Science or a Master of Engineering program, applicants must meet the general University admission requirements and have completed undergraduate-level coursework that includes subject matter equivalent to a bachelor's degree in mechanical engineering, aerospace engineering, engineering mechanics, or a closely related discipline such as physics or mathematics. An applicant with an overall grade point average (GPA) of 3.0 and a GPA in the major of 3.0 (4.0 scale) is eligible for regular admission. Applicants with a GPA below 3.0 may be eligible for provisional admission. Students are typically required to submit their Graduate Record Examination (GRE) scores, although the Graduate Program Director (GPD) may waive the GRE requirement for applicants with excellent academic credentials. For those applicants with non-engineering degrees, or with engineering degrees other than mechanical engineering, aerospace engineering, or engineering mechanics, successful

completion of remedial graduate coursework may be required as a condition of admission. The Master of Science programs requires a minimum of 24 semester credit hours of coursework beyond the bachelor's degree with at least a B (3.0) average and a minimum of 6 semester credit hours of thesis research. The Master of Engineering program requires a minimum of 30 semester credit hours of course work with at least a B (3.0) average.

Leveling Requirements

Students from disciplines other than Mechanical and Aerospace Engineering are required to complete a number of leveling courses depending on their undergraduate degrees:

Holders of a B.S. degree in Mechanical Engineering Technology (MET) from an ABET accredited institution must complete three of the following leveling courses per recommendation of the Graduate Program Director:

MATH 307	Ordinary Differential Equations
MAE 303	Mechanics of Fluids
MAE 312	Thermodynamics II
MAE 340	Computational Methods in Mechanical Engineering
MAE 436	Dynamic Systems and Control

If applicants already have a minor in Mechanical Engineering or Aerospace Engineering, then no leveling courses are necessary. The selected courses are subject to satisfying the prerequisites listed in the catalog.

Holders of a B.S. degree in Physics or Mathematics from an ABET accredited institution must complete three of the following leveling courses per recommendation of the Graduate Program Director:

MAE 303	Mechanics of Fluids
MAE 311	Thermodynamics I
MAE 315	Heat and Mass Transfer
MAE 332	Mechanical Engineering Design I
MAE 340	Computational Methods in Mechanical Engineering
MAE 433	Mechanical Engineering Design II

If applicants already have a minor in Mechanical Engineering or Aerospace Engineering, then no leveling courses are necessary. The selected courses are subject to satisfying the prerequisites listed in the catalog.

Curriculum Requirements

Core Courses

MAE 601	Engineering Mathematics	3
or MAE 608	Applied Mathematics for Engineers	
or MATH 691	Engineering Analysis I	
Select three from the following:		9
MAE 602	Fluid Dynamics and Aerodynamics	
MAE 603	Advanced Mechanics of Solids	
MAE 604	Analytical Dynamics	
MAE 605	Advanced Classical Thermodynamics	
MAE 607	Continuum Mechanics	
MAE 620	Heat Transfer I	
MAE 640	Modern Control Theory	
MAE 672	Design of Experiments	
MAE 682	Concurrent Engineering	

Total Credit Hours **12**

In all programs, a maximum of 6 semester credit hours may be derived from 500-level courses.

Master of Engineering (Non-Thesis) Programs

The Master of Engineering is a non-research degree. The 30 semester credit hours is thus met entirely by course work. During their final semester,

students are required to either pass a comprehensive examination covering their course work or successfully complete a 3 hour project course, which includes written and oral presentations. The master's comprehensive examination is administered by the Graduate Program Director, and the rules for the comprehensive exam are identical to the Preliminary Diagnostic Examination for the Ph.D. program.

Process for MAE 698 (project):

1. Pick a professor to work with (project advisor).
2. Identify a project with the professor.
3. The professor approves the project.
4. Perform the work.
5. Write a paper (typically a conference length paper).
6. Present your results to your advisor and one other faculty member.

Master of Science Engineering with a Concentration in Aerospace Engineering (MS) Master's Admission Information

To qualify as a candidate for a Master of Science or a Master of Engineering program, applicants must meet the general University admission requirements and have completed undergraduate-level coursework that includes subject matter equivalent to a bachelor's degree in mechanical engineering, aerospace engineering, engineering mechanics, or a closely related discipline such as physics or mathematics. An applicant with an overall grade point average (GPA) of 3.0 and a GPA in the major of 3.0 (4.0 scale) is eligible for regular admission. Applicants with a GPA below 3.0 may be eligible for provisional admission. Students are typically required to submit their Graduate Record Examination (GRE) scores, although the Graduate Program Director (GPD) may waive the GRE requirement for applicants with excellent academic credentials. For those applicants with non-engineering degrees, or with engineering degrees other than mechanical engineering, aerospace engineering, or engineering mechanics, successful completion of remedial graduate coursework may be required as a condition of admission. The Master of Science programs requires a minimum of 24 semester credit hours of coursework beyond the bachelor's degree with at least a B (3.0) average and a minimum of 6 semester credit hours of thesis research. The Master of Engineering program requires a minimum of 30 semester credit hours of course work with at least a B (3.0) average.

Leveling Requirements

Students from disciplines other than Mechanical and Aerospace Engineering are required to complete a number of leveling courses depending on their undergraduate degrees:

Holders of a B.S. degree in Mechanical Engineering Technology (MET) from an ABET accredited institution must complete three of the following leveling courses per recommendation of the Graduate Program Director:

MATH 307	Ordinary Differential Equations
MAE 303	Mechanics of Fluids
MAE 312	Thermodynamics II
MAE 340	Computational Methods in Mechanical Engineering
MAE 436	Dynamic Systems and Control

If applicants already have a minor in Mechanical Engineering or Aerospace Engineering, then no leveling courses are necessary. The selected courses are subject to satisfying the prerequisites listed in the catalog.

Holders of a B.S. degree in Physics or Mathematics from an ABET accredited institution must complete three of the following leveling courses per recommendation of the Graduate Program Director:

MAE 303	Mechanics of Fluids
MAE 311	Thermodynamics I

MAE 315	Heat and Mass Transfer
MAE 332	Mechanical Engineering Design I
MAE 340	Computational Methods in Mechanical Engineering
MAE 433	Mechanical Engineering Design II

If applicants already have a minor in Mechanical Engineering or Aerospace Engineering, then no leveling courses are necessary. The selected courses are subject to satisfying the prerequisites listed in the catalog.

MAE 682	Concurrent Engineering	
Total Credit Hours		12

In all programs, a maximum of 6 semester credit hours may be derived from 500-level courses.

Master of Science (Thesis) Programs

The Master of Science degree is a research degree requiring a written thesis. The thesis constitutes 6 semester credit hours within the 30 semester credit hour requirement. Students are given a verbal examination, administered as the student's thesis defense, under the direction of the faculty advisor with support from the Thesis Advisory Committee. The examination consists of two parts, a student presentation of their thesis research followed by a closed session where the Thesis Advisory Committee further questions the student. The committee concentrates on research presented in both oral and written formats, but may expand questioning to include related course work. The thesis should be formatted with guidelines established by the College.

Doctor of Philosophy Engineering with a Concentration in Aerospace Engineering (PhD)

The Doctor of Philosophy programs in Mechanical or Aerospace Engineering are advanced research degrees requiring a written dissertation offering new and unique contributions of a fundamental nature. Graduates are prepared for leadership roles in the many facets of engineering including teaching, research and development, design, and consulting. Doctoral students may select specializations in such technical areas as:

- aerodynamics and fluids
- thermodynamics and energy
- dynamics and controls
- materials and structures
- design and manufacturing

Students are also encouraged to select complementary courses in other engineering or science disciplines. The University's close associations with area industries, consulting firms, government agencies, and research laboratories create a stimulating environment for the pursuit of graduate studies.

Doctor of Philosophy Admission Requirements

To qualify for admission to a Doctor of Philosophy degree in Mechanical or Aerospace Engineering, a student must have earned a master’s degree from an accredited institution of higher learning in engineering, physics, or mathematics, including graduate-level course work equivalent to the corresponding master’s programs in Mechanical and Aerospace Engineering. Applicants with an overall grade point average (GPA) of 3.5 on a 4.0 scale at the master’s level are eligible for regular admission. Applicants with a GPA below 3.5 who present evidence and potential for improvement may be eligible for provisional admission. Students are typically required to submit their Graduate Record Examination (GRE) scores, although the Graduate Program Director (GPD) may waive the GRE requirement for applicants with excellent academic credentials.

Curriculum Requirements

Doctor of Philosophy Degree Requirements

A minimum of 24 credit hours of course work beyond the master’s degree and a minimum of 24 semester credit hours of dissertation research must be included in the doctoral degree program. At least 60% of the course work for the doctoral degree should be at the 800-level and the student should maintain at least a B (3.0) average. All doctoral students should satisfy either a foreign language or research skill requirement.

Additional Requirements

Preliminary Diagnostic Examination

Ph.D. students must take the diagnostic exam no later than the end of their first academic year. Diagnostic exams are scheduled annually in October and February and the exam dates are announced by the Graduate Program Director (GPD). Students who received their Master of Science degrees from ODU with a GPA of 3.5 or above are exempt from the diagnostic exam.

Students must fill the Ph.D. Diagnostic Exam form to notify the GPD of their desire to take the diagnostic exam. The form must be approved by the student's advisor. The diagnostic exam is a three hour long written exam containing four equally weighted questions from the core courses. It is conducted without any reference books or notes. Use of electronic devices with internet connection is not permitted. Only non-programmable scientific calculators are allowed. The questions might contain useful formulae to guide the students. Diagnostic exam questions will be prepared and graded by the faculty who taught these courses in the past five years. Students must pass each core topic area with a minimum passing grade of B. Students who pass at least two of the four subject areas in their first attempt can take the exam for a second time, where they will be tested on the failed areas. Students who fail their diagnostic exam can consider pursuing other MAE degrees. Students who fail their first attempt do not receive priority for departmental support as graduate teaching assistants or graders until they pass their diagnostic exam. However support as a graduate research assistant is within the discretion of the student's advisor. Part time or special status students attending ODU for joint foreign-institution/ODU degrees must also take their diagnostic exam within the first year of their Ph.D. studies at ODU.

Candidacy Examination

The candidacy exam is taken once the students finish their course work. The exam consists of written and oral parts. Written part of the exam can consist of a critical review report on a subject area determined by the student's advising committee. Written candidacy exam will be reviewed by the student's committee members for its technical content as well as for evaluation of the student's writing proficiency and research skills. Oral part of the candidacy exam is based on the defense of the written part, and will include extensive examination of the student's fundamental knowledge in his/her research area.

Dissertation Proposal

After the student passes the written and oral candidacy examinations, for advancement to candidacy, he/she must pass the dissertation proposal stage,

which is an oral presentation of the student's work containing literature survey and preliminary results sections to demonstrate feasibility of the proposed work.

Dissertation

Ph.D. candidates are expected to work with their dissertation advisors to form their Dissertation Committees. A Dissertation Committee should be composed of individuals with significant knowledge related to the candidate's dissertation research. The majority of whom must be full-time faculty members of the department.

Ph.D. candidates must submit their written dissertation to the committee members at least two weeks prior to the dissertation defense. The dissertation should be formatted in accordance with guidelines established by the college.

The dissertation defense consists of two parts; an open presentation to the general public and a closed examination conducted by the dissertation committee. The dissertation must be approved by the majority of the dissertation committee and must constitute a significant original contribution to the field. Students are permitted only two attempts to successfully complete the dissertation defense.

Master of Engineering Engineering with a Concentration in Mechanical Engineering (ME)

Master’s Admission Information

To qualify as a candidate for a Master of Science or a Master of Engineering program, applicants must meet the general University admission requirements and have completed undergraduate-level coursework that includes subject matter equivalent to a bachelor’s degree in mechanical engineering, aerospace engineering, engineering mechanics, or a closely related discipline such as physics or mathematics. An applicant with an overall grade point average (GPA) of 3.0 and a GPA in the major of 3.0 (4.0 scale) is eligible for regular admission. Applicants with a GPA below 3.0 may be eligible for provisional admission. Students are typically required to submit their Graduate Record Examination (GRE) scores, although the Graduate Program Director (GPD) may waive the GRE requirement for applicants with excellent academic credentials. For those applicants with non-engineering degrees, or with engineering degrees other than mechanical engineering, aerospace engineering, or engineering mechanics, successful completion of remedial graduate coursework may be required as a condition of admission. The Master of Science programs requires a minimum of 24 semester credit hours of coursework beyond the bachelor’s degree with at least a B (3.0) average and a minimum of 6 semester credit hours of thesis research. The Master of Engineering program requires a minimum of 30 semester credit hours of course work with at least a B (3.0) average.

Leveling Requirements

Students from disciplines other than Mechanical and Aerospace Engineering are required to complete a number of leveling courses depending on their undergraduate degrees:

Holders of a B.S. degree in Mechanical Engineering Technology (MET) from an ABET accredited institution must complete three of the following leveling courses per recommendation of the Graduate Program Director:

MATH 307	Ordinary Differential Equations
MAE 303	Mechanics of Fluids
MAE 312	Thermodynamics II
MAE 340	Computational Methods in Mechanical Engineering
MAE 436	Dynamic Systems and Control

If applicants already have a minor in Mechanical Engineering or Aerospace Engineering, then no leveling courses are necessary. The selected courses are subject to satisfying the prerequisites listed in the catalog.

Holders of a B.S. degree in Physics or Mathematics from an ABET accredited institution must complete three of the following leveling courses per recommendation of the Graduate Program Director:

MAE 303	Mechanics of Fluids
MAE 311	Thermodynamics I
MAE 315	Heat and Mass Transfer
MAE 332	Mechanical Engineering Design I
MAE 340	Computational Methods in Mechanical Engineering
MAE 433	Mechanical Engineering Design II

If applicants already have a minor in Mechanical Engineering or Aerospace Engineering, then no leveling courses are necessary. The selected courses are subject to satisfying the prerequisites listed in the catalog.

Curriculum Requirements

Core Courses

MAE 601	Engineering Mathematics	3
or MAE 608	Applied Mathematics for Engineers	
or MATH 691	Engineering Analysis I	
Select three from the following:		9
MAE 602	Fluid Dynamics and Aerodynamics	
MAE 603	Advanced Mechanics of Solids	
MAE 604	Analytical Dynamics	
MAE 605	Advanced Classical Thermodynamics	
MAE 607	Continuum Mechanics	
MAE 620	Heat Transfer I	
MAE 640	Modern Control Theory	
MAE 672	Design of Experiments	
MAE 682	Concurrent Engineering	

Total Credit Hours 12

In all programs, a maximum of 6 semester credit hours may be derived from 500-level courses.

Master of Engineering (Non-Thesis) Programs

The Master of Engineering is a non-research degree. The 30 semester credit hours is thus met entirely by course work. During their final semester, students are required to either pass a comprehensive examination covering their course work or successfully complete a 3 hour project course, which includes written and oral presentations. The master's comprehensive examination is administered by the Graduate Program Director, and the rules for the comprehensive exam are identical to the Preliminary Diagnostic Examination for the Ph.D. program.

Process for MAE 698 (project):

1. Pick a professor to work with (project advisor).
2. Identify a project with the professor.
3. The professor approves the project.
4. Perform the work.
5. Write a paper (typically a conference length paper).
6. Present your results to your advisor and one other faculty member.

Master of Science Engineering with a Concentration in Mechanical Engineering (MS)

Master's Admission Information

To qualify as a candidate for a Master of Science or a Master of Engineering program, applicants must meet the general University admission requirements and have completed undergraduate-level coursework that includes subject matter equivalent to a bachelor's degree in mechanical

engineering, aerospace engineering, engineering mechanics, or a closely related discipline such as physics or mathematics. An applicant with an overall grade point average (GPA) of 3.0 and a GPA in the major of 3.0 (4.0 scale) is eligible for regular admission. Applicants with a GPA below 3.0 may be eligible for provisional admission. Students are typically required to submit their Graduate Record Examination (GRE) scores, although the Graduate Program Director (GPD) may waive the GRE requirement for applicants with excellent academic credentials. For those applicants with non-engineering degrees, or with engineering degrees other than mechanical engineering, aerospace engineering, or engineering mechanics, successful completion of remedial graduate coursework may be required as a condition of admission. The Master of Science programs requires a minimum of 24 semester credit hours of coursework beyond the bachelor's degree with at least a B (3.0) average and a minimum of 6 semester credit hours of thesis research. The Master of Engineering program requires a minimum of 30 semester credit hours of course work with at least a B (3.0) average.

Leveling Requirements

Students from disciplines other than Mechanical and Aerospace Engineering are required to complete a number of leveling courses depending on their undergraduate degrees:

Holders of a B.S. degree in Mechanical Engineering Technology (MET) from an ABET accredited institution must complete three of the following leveling courses per recommendation of the Graduate Program Director:

MATH 307	Ordinary Differential Equations
MAE 303	Mechanics of Fluids
MAE 312	Thermodynamics II
MAE 340	Computational Methods in Mechanical Engineering
MAE 436	Dynamic Systems and Control

If applicants already have a minor in Mechanical Engineering or Aerospace Engineering, then no leveling courses are necessary. The selected courses are subject to satisfying the prerequisites listed in the catalog.

Holders of a B.S. degree in Physics or Mathematics from an ABET accredited institution must complete three of the following leveling courses per recommendation of the Graduate Program Director:

MAE 303	Mechanics of Fluids
MAE 311	Thermodynamics I
MAE 315	Heat and Mass Transfer
MAE 332	Mechanical Engineering Design I
MAE 340	Computational Methods in Mechanical Engineering
MAE 433	Mechanical Engineering Design II

If applicants already have a minor in Mechanical Engineering or Aerospace Engineering, then no leveling courses are necessary. The selected courses are subject to satisfying the prerequisites listed in the catalog.

Curriculum Requirements

Core Courses

MAE 601	Engineering Mathematics	3
or MAE 608	Applied Mathematics for Engineers	
or MATH 691	Engineering Analysis I	
Select three from the following:		9
MAE 602	Fluid Dynamics and Aerodynamics	
MAE 603	Advanced Mechanics of Solids	
MAE 604	Analytical Dynamics	
MAE 605	Advanced Classical Thermodynamics	
MAE 607	Continuum Mechanics	
MAE 620	Heat Transfer I	
MAE 640	Modern Control Theory	
MAE 672	Design of Experiments	

In all programs, a maximum of 6 semester credit hours may be derived from 500-level courses.

Master of Science (Thesis) Programs

The Master of Science degree is a research degree requiring a written thesis. The thesis constitutes 6 semester credit hours within the 30 semester credit hour requirement. Students are given a verbal examination, administered as the student's thesis defense, under the direction of the faculty advisor with support from the Thesis Advisory Committee. The examination consists of two parts, a student presentation of their thesis research followed by a closed session where the Thesis Advisory Committee further questions the student. The committee concentrates on research presented in both oral and written formats, but may expand questioning to include related course work. The thesis should be formatted with guidelines established by the College.

Doctor of Philosophy Engineering with a Concentration in Mechanical Engineering (PhD)

The Doctor of Philosophy programs in Mechanical or Aerospace Engineering are advanced research degrees requiring a written dissertation offering new and unique contributions of a fundamental nature. Graduates are prepared for leadership roles in the many facets of engineering including teaching, research and development, design, and consulting. Doctoral students may select specializations in such technical areas as:

- aerodynamics and fluids
- thermodynamics and energy
- dynamics and controls
- materials and structures
- design and manufacturing

Students are also encouraged to select complementary courses in other engineering or science disciplines. The University's close associations with area industries, consulting firms, government agencies, and research laboratories create a stimulating environment for the pursuit of graduate studies.

Doctor of Philosophy Admission Requirements

To qualify for admission to a Doctor of Philosophy degree in Mechanical or Aerospace Engineering, a student must have earned a master's degree from an accredited institution of higher learning in engineering, physics, or mathematics, including graduate-level course work equivalent to the corresponding master's programs in Mechanical and Aerospace Engineering. Applicants with an overall grade point average (GPA) of 3.5 on a 4.0 scale at the master's level are eligible for regular admission. Applicants with a GPA below 3.5 who present evidence and potential for improvement may be eligible for provisional admission. Students are typically required to submit their Graduate Record Examination (GRE) scores, although the Graduate Program Director (GPD) may waive the GRE requirement for applicants with excellent academic credentials.

Curriculum Requirements

Doctor of Philosophy Degree Requirements

A minimum of 24 credit hours of course work beyond the master's degree and a minimum of 24 semester credit hours of dissertation research must be included in the doctoral degree program. At least 60% of the course work for the doctoral degree should be at the 800-level and the student should maintain at least a B (3.0) average. All doctoral students should satisfy either a foreign language or research skill requirement.

Additional Requirements

Preliminary Diagnostic Examination

Ph.D. students must take the diagnostic exam no later than the end of their first academic year. Diagnostic exams are scheduled annually in October and February and the exam dates are announced by the Graduate Program Director (GPD). Students who received their Master of Science degrees from ODU with a GPA of 3.5 or above are exempt from the diagnostic exam.

Students must fill the Ph.D. Diagnostic Exam form to notify the GPD of their desire to take the diagnostic exam. The form must be approved by the student's advisor. The diagnostic exam is a three hour long written exam containing four equally weighted questions from the core courses. It is conducted without any reference books or notes. Use of electronic devices with internet connection is not permitted. Only non-programmable scientific calculators are allowed. The questions might contain useful formulae to guide the students. Diagnostic exam questions will be prepared and graded by the faculty who taught these courses in the past five years. Students must pass each core topic area with a minimum passing grade of B. Students who pass at least two of the four subject areas in their first attempt can take the exam for a second time, where they will be tested on the failed areas. Students who fail their diagnostic exam can consider pursuing other MAE degrees. Students who fail their first attempt do not receive priority for departmental support as graduate teaching assistants or graders until they pass their diagnostic exam. However support as a graduate research assistant is within the discretion of the student's advisor. Part time or special status students attending ODU for joint foreign-institution/ODU degrees must also take their diagnostic exam within the first year of their Ph.D. studies at ODU.

Candidacy Examination

The candidacy exam is taken once the students finish their course work. The exam consists of written and oral parts. Written part of the exam can consist of a critical review report on a subject area determined by the student's advising committee. Written candidacy exam will be reviewed by the student's committee members for its technical content as well as for evaluation of the student's writing proficiency and research skills. Oral part of the candidacy exam is based on the defense of the written part, and will include extensive examination of the student's fundamental knowledge in his/her research area.

Dissertation Proposal

After the student passes the written and oral candidacy examinations, for advancement to candidacy, he/she must pass the dissertation proposal stage, which is an oral presentation of the student's work containing literature survey and preliminary results sections to demonstrate feasibility of the proposed work.

Dissertation

Ph.D. candidates are expected to work with their dissertation advisors to form their Dissertation Committees. A Dissertation Committee should be composed of individuals with significant knowledge related to the candidate's dissertation research. The majority of whom must be full-time faculty members of the department.

Ph.D. candidates must submit their written dissertation to the committee members at least two weeks prior to the dissertation defense. The dissertation should be formatted in accordance with guidelines established by the college.

The dissertation defense consists of two parts; an open presentation to the general public and a closed examination conducted by the dissertation committee. The dissertation must be approved by the majority of the dissertation committee and must constitute a significant original contribution to the field. Students are permitted only two attempts to successfully complete the dissertation defense.

Certificate

Naval Architecture and Marine Engineering Certificate

In order to provide the opportunity for practicing engineers to further their knowledge and to become more competent in the fields of Naval Architecture and Marine Engineering, the Department of Mechanical and Aerospace Engineering offers a non-degree graduate level certificate program in Naval Architecture and Marine Engineering. Admission to the program requires a Bachelor of Science degree (or equivalent) in Mechanical Engineering, Aerospace Engineering, Naval Architecture and Marine Engineering, or a related field. The students must complete four 3-credit graduate-level courses to earn a certificate. The certificate program credits will be transferable to the Master's degree programs in Mechanical and Aerospace Engineering. The certificate program offers two tracks:

1. Naval Architecture
2. Marine Engineering

Curriculum Requirements

To meet the requirements of either track, students must complete a common required course, Engineering Mathematics or MAE 608 (<http://catalog.odu.edu/search/?P=MAE%20608>), Applied Mathematics for Engineers and three 3-credit courses described below.

Naval Architecture Track

Required

MAE 550	Principles of Naval Architecture	3
Select two of the following:		6
MAE 788	Computational Intelligence for Engineering Design Optimization Problems	
MAE 695	Topics in Mechanical and Aerospace Engineering (Numerical Marine Hydrodynamics)	
MAE 695	Topics in Mechanical and Aerospace Engineering (Ship Resistance and Propulsion)	
MAE 695	Topics in Mechanical and Aerospace Engineering (Dynamics of Marine Crafts)	
MAE 695	Topics in Mechanical and Aerospace Engineering (Marine Structures)	
Total Credit Hours		9

Marine Engineering Track

Required

MAE 511	Mechanical Engineering Power Systems Theory and Design	3
Select two of the following:		6
MAE 512	Environmental Control	
MAE 517	Propulsion Systems	
MAE 602	Fluid Dynamics and Aerodynamics	
Total Credit Hours		9

School of Health Professions

The School of Health Professions provides progressive, nationally recognized graduate training at facilities throughout Hampton Roads.

Program Areas

- Biomedical Sciences Programs (p. 259)
- Counseling & Art Therapy Programs (p. 266)
- Health Sciences Programs (p. 268)
- Laboratory Animal Science Programs (p. 270)
- Medical and Health Professions Education Programs (p. 273)
- Medical Science Programs (p. 281)
- Pathologists' Assistant Programs (p. 283)
- Physician Assistant Programs (p. 286)
- Reproductive Clinical Science Programs (p. 287)
- Surgical Assisting Programs (p. 293)

Programs

Master of Health Sciences, Pathologists' Assistant Program

- Pathologists' Assistant (MHSPA) (p. 283)

Master of Medical and Health Professions Education Program

- Medical and Health Professions Education (MMHPE) (p. 274)

Master of Physician Assistant Program

- Physician Assistant (MPA) (p. 286)

Master of Science Programs

- Biomedical Sciences - Medical Masters (MS) (p. 259)
- Biomedical Sciences-Research (MS) (p. 261)
- Counseling & Art Therapy (MS) (p. 266)
- Laboratory Animal Science (MS) (p. 270)
- Reproductive Clinical Science-Embryology and Andrology (MS) (p. 287)

Master of Surgical Assisting Program

- Surgical Assisting (MSA) (p. 293)

Doctor of Education Program

- Medical and Health Professions Education (EdD) (p. 276)

Doctor of Health Sciences Program

- Health Sciences (DHSc) (p. 269)

Doctor of Medical Science Program

- Medical Science (DMSc) (p. 281)

Doctor of Philosophy Programs

- Biomedical Sciences (PhD) (p. 264)
- Medical and Health Professions Education (PhD) (p. 278)
- Reproductive Clinical Sciences-Embryology and Andrology (PhD) (p. 289)

Certificate Programs

- Advanced Cultural Humility Certificate (p. 268)
- Clinical Andrology Certificate (p. 291)
- Clinical Embryology Certificate (p. 292)
- Clinical Leadership and Administration Certificate (p. 283)

- Educational Leadership and Administration Certificate (p. 283)
- Laboratory Animal Anesthesia and Handling Techniques Certificate (p. 273)
- MHPE Scholarship Certificate (p. 279)
- MHPE Simulation Program Management Certificate (p. 280)
- MHPE Teaching Certificate (p. 281)
- Surgical Assistant Certificate (p. 295)
- Trauma and Neuroscience Informed Art Psychotherapy Certificate (p. 268)

Biomedical Sciences Programs

The Biomedical Sciences program offers a comprehensive and rigorous education through three distinct tracks: a Research Master's, a Medical Master's, and a Ph.D. program. Each track is designed to prepare students for advanced roles in their respective fields. All courses emphasize hands-on, experiential learning through laboratory work, clinical case studies, and faculty-guided research projects. Graduates emerge with the practical expertise and academic preparation necessary to contribute meaningfully to biomedical innovation and healthcare advancement.

Programs

Master of Science Programs

- Biomedical Sciences-Research (MS) (p. 261)

Doctor of Philosophy Programs

- Biomedical Sciences (PhD) (p. 264)

Master of Science Biomedical Sciences - Medical Masters (MS)

The Macon & Joan Brock Virginia Health Sciences at Old Dominion University Biomedical Sciences - Medical One Year Program

The VHS Biomedical Sciences - Medical Program is a one-year pre-professional (postbaccalaureate) master's degree program designed for students who wish to matriculate into medical school.

The curriculum, which mainly consists of medical school courses taken with first year medical students, also has a medical preparation course aimed at improving students' interview skills and knowledge about other players in the healthcare field with whom they would interact as a physician.

The program provides an opportunity for highly motivated students to improve their academic credentials by demonstrating their academic abilities in a rigorous medical school environment. For this reason, it is particularly suitable to help students make themselves more competitive applicants to allopathic and osteopathic medical programs.

Goals and Objectives

It is the goal of the Biomedical Sciences - Medical One Year Program that every student successfully completes the program to become more academically competitive and an overall better candidate for admission to the professional school of his/her choice.

To accomplish this goal, the program has established the following objectives:

- Offer four first-year medical school courses within the Biomedical Sciences - Medical Program curriculum to create a challenging academic environment.
- Enhance student interviewing skills through the use of mock interviews with accompanying feedback.
- Initiate patient exposure through Standardized Patient experiences.

- Advise students individually and in small groups based on student ability and intention.

Transferability of Credit

No courses may be transferred for credit leading to the Biomedical Sciences - Medical Degree.

Admission

- A bachelor's degree from a regionally accredited institution in the U.S. or Canada prior to matriculating at VHS. Official transcripts from the awarding institution must indicate the date the degree was conferred.
- Successfully completed each of the following medical school prerequisite courses:
 - Two semesters or three quarters of physics with labs
 - Two semesters or three quarters of organic chemistry/biochemistry with labs
 - Two semesters or three quarters of chemistry with labs
 - Two semesters or three quarters of biology with labs

*Study abroad coursework is **not** accepted to fulfill prerequisite requirements.*

- A cumulative grade point average of 2.75 (B-) or better.
- Medical College Admission Test (MCAT) for students pursuing medical school
 - One-year program: MCAT with a **minimum score of 503**.
 - Two-year program: MCAT with a **minimum score of 496**.

We **do not** accept GRE scores in place of MCAT scores.

- Clinical experiences with patient contact (including scribing, shadowing, hospice, EMT)
 - At least 100 hours
- Volunteerism (clinical or not)
 - At least 100 hours

Applicants must be U.S. citizens or U.S. permanent residents.

Applicants from rural or other underserved regions and those who have been disadvantaged or underrepresented for economic, racial or social reasons, and who possess the motivation and aptitude required for the study of medicine, are strongly encouraged to apply.

All courses to fulfill the degree requirements for the Biomedical Sciences - Medical Program must be taken at Macon & Joan Brock Virginia Health Sciences at Old Dominion University. No credit will be given for courses taken at another institution.

Since we have a **rolling admissions process**, applicants are encouraged to **apply early** and submit all of their application materials as they become available, even when planning to take the MCAT at a later date.

Technical Standards

The abilities and skills candidates and students must possess in order to complete the education and training of the Biomedical Sciences Medical Master's Program are referred to as "Technical Standards." These abilities and skills are essential for entry into most professional practice settings associated with this degree program.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory, and tactile) in the lecture hall, laboratory and/or online settings.

1.02 Indicators include, but are not limited to, this example:

- a. Accurate visualization and discrimination of text, numbers, patterns, graphic illustrations, and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with healthcare professionals, and with people of varying cultures, ethnicities and personalities.

2.02 Indicators include, but are not limited to, these examples:

- a. Clear, efficient and intelligible articulation of spoken English language.
- b. Legible, efficient and intelligible written English language.
- c. Accurate and efficient English language reading skills.
- d. Accurate and efficient expressive and receptive communication skills.
- e. Ability to accurately follow oral and written directions.

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including, but not limited to, intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include, but are not limited to, these examples:

- a. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
- b. Demonstrate ability to acquire, retain and apply new and learned information.

4.0 Motor and Sensory Function Technical Standard

4.01 Perform demonstrations and experiments in the basic sciences.

4.02 Observe a patient accurately, both at a distance and close at hand; this ability requires the functional use of vision and somatic sensation.

4.03 Speak, hear, and observe patients in order to elicit information, describe changes in mood, activity, and posture, and perceive nonverbal communications.

4.04 Communicate effectively and efficiently in oral and written form.

4.05 Execute movements reasonably required to provide patients with general care and emergency treatment.

4.06 Students should also have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other diagnostic techniques.

4.07 The ability to solve problems, a skill which is critical to the practice of medicine, requires the intellectual abilities of measurement, calculation, reasoning, analysis and synthesis. In addition, a student must possess the emotional health required for full utilization of his or her intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities required for the diagnosis and care of patients, and the development of mature, sensitive, and effective relationships with patients.

4.08 All students of medicine must possess the intellectual, ethical, physical, and emotional capabilities required to undertake the full curriculum and to achieve the levels of competence required by the faculty.

5.0 Behavioral and Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a professional program and service as a practicing laboratory professional.

5.02 Indicators include, but are not limited to, these examples:

- a. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect, and cognition).
- b. Ability to develop mature and effective professional relationships with faculty, patients, the public, and other members of the healthcare team.
- c. Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
- d. Demonstrate impartial motives, attitudes, and values in roles, functions, and relationships.
- e. Ability to monitor and react appropriately to one's own emotional needs and responses.
- f. Display appropriate flexibility and adaptability in the face of stress or uncertainty associated with laboratory experiments.
- g. Compliance with standards, policies, and practices set forth in the institutional student handbook and the program handbook.

Curriculum Requirements

Unique to our Two-Year Program

The Biomedical Sciences - Medical Program is a two-year pre-professional (post-baccalaureate) master's degree program designed for students who wish to matriculate into medical school.

The curriculum, which mainly consists of medical school courses taken with first year medical students, also contains the following courses: Medical School Preparation 1.0, 1.5 and 2.0, Principles of Epidemiology, MCAT Preparation, Legal and Ethical Issues in Medicine and Social and Behavioral Sciences for Public Health.

The program provides an opportunity for highly motivated students to improve their academic credentials by demonstrating their academic abilities in a rigorous medical school environment. For this reason, it is particularly suitable to help students make themselves more competitive applicants to allopathic and osteopathic medical programs as well as dental and other health professions programs.

Goals and Objectives

- It is the goal of the Biomedical Sciences - Medical Two-Year Program that every student successfully completes the program to become more academically competitive and an overall better candidate for admission to the professional school of his/her choice.
- To accomplish this goal, the program has established the following objectives:
- Offer four first-year medical school courses within the Biomedical Sciences - Medical Program curriculum to create a challenging academic environment.
 - Enhance student interviewing skills through the use of mock interviews with accompanying feedback.
 - Initiate patient exposure through Standardized Patient experiences.
 - Advise students individually and in small groups based on student ability and intention.
 - Provide MCAT preparation to improve MCAT scores and improve students' competitiveness for medical school.

Transferability of Credit

No courses may be transferred for credit leading to the Biomedical Sciences - Medical Degree.

Note

Students must complete both years of the program to be eligible to matriculate into EVMS.

One-year program

Term 1	20

BM 519	Medical School Preparation 2.0
BM 501	Foundations of Disease
BM 536	Human Structure
Term 2	12
BM 502	Introduction to Organ Systems
BM 503	Hormones
Total Credit Hours	32
Two-year program	
Term 1	12
BM 524	Medical School Preparation 1.0
BM 530	Foundational Science II
MPH 611	Social and Behavioral Sciences for Public Health
Term 2	10
BM 525	Medical School Preparation 1.5
BM 534	MCAT Preparation
MPAS 604	Legal & Ethical Issues in Medicine
MPHO 614	Principles of Epidemiology
Term 3	20
BM 501	Foundations of Disease
BM 519	Medical School Preparation 2.0
BM 536	Human Structure
Term 4	12
BM 502	Introduction to Organ Systems
BM 503	Hormones
Total Credit Hours	54

Master of Science

Biomedical Sciences-Research (MS)

The Biomedical Sciences MS (Research) program provides students with a strong foundation in biomedical research while developing critical thinking and analytical skills valued in the scientific and medical communities worldwide. Through coursework and hands-on research experience, students build a solid understanding of the biological mechanisms underlying human health and disease. This degree serves as a versatile platform for diverse career paths in research, education, biotechnology, and healthcare etc., and also provides excellent preparation for advanced academic pursuits, including PhD, MD, or other professional programs.

This program is offered to students with two options: thesis or non-thesis. Students chose their path in the fall semester of their second year. Students in both options will complete independent laboratory research projects in a faculty member's lab. Additionally, students will complete core academic courses, two laboratory rotations and advanced electives.

- Thesis option:
 - Students choosing the thesis option complete a research project that is developed into a written thesis and is defended in an institute-wide oral presentation.
- Non-Thesis option:
 - Students in the non-thesis option prepare a written report of their research followed by an oral presentation to their guidance committee.

Admission

The Biomedical Sciences Research Master's program is now participating in the BioMedCAS (<https://biomedcas2024.cas.myliaison.com/applicant-ux/#/> login), specifically designed for biomedical programs.

Applicants to the program must have:

- A bachelor's degree prior to matriculating as a student
 - If the bachelor's degree was issued by a U.S. college or university, as a general rule it should be from a regionally accredited institution. However, the program may grant exceptions on a case-by-case basis.
 - Official transcripts from the awarding institution must specify the date upon which the degree was issued.
- A cumulative grade point (GPA) of 3.0 or better (preferred)
 - We conduct a holistic review of applications and consider an applicant's entire record. Applicants with a GPA between 2.8 and 3.0 may be accepted. We pay special attention to science and math course grades, and we prefer to accept applicants with mostly A's and B's in these courses.
- Successfully completed the following courses:
 - General Biology (one semester with lab)
 - Additional Biology (one semester with lab)
 - General Chemistry (two semesters with labs)
 - Organic Chemistry I (one semester with lab)
 - Organic Chemistry II or Biochemistry (one semester, lab not required)
 - General Math, Calculus or statistics (one semester)
 - College Math or Physics (one semester)
- Completed the Test of English as a Foreign Language (TOEFL)
 - This applies to international applicants only.
- Completed the online application (<https://biomedcas2024.cas.myliaison.com/applicant-ux/#/login>) including a personal statement, along with an application fee
- Official transcripts from all colleges and universities attended, sent by the registrar at those institutions
 - Official transcripts from the awarding institution must specify the date upon which the degree is issued.
 - Graduate Record Exam (GRE) is no longer required for admission to this program
 - Official TOEFL scores (if applicable)
 - Two letters of recommendation submitted using the form provided within the online application
- Transcripts must be sent to BioMedCAS (<https://biomedcas2024.cas.myliaison.com/applicant-ux/#/login>) only. BioMedCAS (<https://biomedcas2024.cas.myliaison.com/applicant-ux/#/login>) only accepts electronic transcripts from the following sites:
 - Credentials Solutions (<http://www.transcriptplus.net/order/>)
 - Parchment (<https://www.parchment.com/order/>)
 - National Student Clearinghouse (<https://www.studentclearinghouse.org/>)

If your school does not offer these services, download and send a transcript request form to your school's registrar, who should send the transcript to:

BioMedCAS Transcript Processing Center
P.O. Box 9207
Watertown, MA 02471

Additional Requirements for International Applicants

Sending International Transcripts to BioMedCAS

- BioMedCAS will ONLY accept the evaluation report from the credentialing agency. Do not send your foreign transcript to BioMedCAS.
- All other foreign transcript evaluations from the credentialing agency must be sent directly to BioMedCAS.

Transcript evaluation: International applicants who attended any institution outside of the United States must contact one of the following credentialing agencies to submit transcripts for official evaluation:

- World Education Services (<http://www.wes.org/>)
- Educational Credential Evaluators (<http://www.ece.org/>)

These are preferred credentialing services. If you wish to select a company other than these, please contact us (https://www.evms.edu/education/masters_programs/biomedical_sciences_research_masters_program/application_process/#Contact) first.

Note: It can take 4 to 6 weeks for transcript evaluations to arrive after the agency receives transcripts. Plan ahead and request these documents early. Incomplete applications will not be reviewed.

Translation: If the academic institution that you attended does not issue documents in English, the credentialing agency may require that you submit a word-for-word translation of your transcripts if they do not have this service available for purchase. You can contact University Language Services (<http://www.universitylanguage.com/>) to submit your transcript for translation and instruct them to send the translated transcript to the credentialing agency.

TOEFL: International applicants whose native language is not English must take the TOEFL exam and receive a score as follows:

- Paper-based test: 550
- Computer-based test: 213
- IBT exam: 80

the TOEFL School Code is B886.

Please take the TOEFL exam online through the Education Testing Service (<http://www.ets.org/>) (ETS), and request your TOEFL scores be sent directly to Admissions and Enrollment team for Health Professions. ETS reports scores for two years after the test date. If you have previously taken the TOEFL but the two-year period has expired, the program will accept a personal copy if available.

Transfer Credit Policy

Transfer of credit may be allowed for courses comparable to those offered in our programs. Courses must have been taken at an accredited biomedical or biological sciences graduate program in the U.S. Grades of B or higher or a passing grade in a pass/fail course are required. The Biomedical Sciences Research master's program may accept up to nine transfer credits. Transfer credit will be determined by the program director in consultation with program faculty after a student matriculates into the program.

Early Assurance Program

The Early Assurance Program (EAP) exists to offer outstanding and qualified undergraduate students with firm interests in a career in biomedical science and the opportunity to gain early assurance of acceptance into the Biomedical Sciences Research Master's program before beginning their final year of college.

By granting early assurance of acceptance into the program, students will be able to broaden their academic focus, engage in extracurricular leadership activities and pursue first-hand, lab experience.

Partner Institutions

- Norfolk State University
- Regent University
- Hampton University
- Longwood University
- Virginia Wesleyan University
- Hampden-Sydney College
- Christopher Newport University

Each January, early assurance program advisers at each partner institution will forward names of eligible students who are interested in applying to the Biomedical Sciences Research Master's program through the Early Assurance Program. Students interested in the program are required to maintain regular contact with the EAP adviser during their college career.

Eligible students will receive an email containing the necessary links and instructions to apply.

Below are the main steps necessary to apply through the Early Assurance Program:

- Meet with the EAP adviser at your institution as soon as possible.
- Establish a plan to complete prerequisites, certification and patient care experience prior to application deadline.
- Complete the BioMedCAS application by June 15 of your junior year.
- Complete the undergraduate degree requirements and maintain EAP eligibility.

Eligibility

To be eligible to apply for the Early Assurance Program, a student must:

- Have completed the fall semester of their junior year with only one more academic year to complete;
- Meet all institutional and degree requirements to continue as a student in good standing;
- Maintain an overall (cumulative) GPA of 3.25 or better;
- Have satisfactorily completed seven of eight prerequisite courses by the time of application without withdrawing from or repeating any courses used to satisfy the prerequisites;
- Obtain grades of B or above in all science courses taken in sophomore, junior, or senior year;
- Have no academic or conduct code violations.

Maintaining Eligibility

Continuation in the EAP will require evidence of general academic progress consistent with past performance, and of significant progress toward achievement of individually specified goals outlined in the application. Ongoing communication between the EAP applicant, the EAP advisor, and the Biomedical Sciences program will ensure that both the school's requirements and individual applicant's objectives are being met. In addition, the following criteria must be maintained by the student to continue eligibility:

- Meet with EAP adviser each semester;
- Maintain contact with the Biomedical Sciences Program during the senior year;
- Carry sufficient credit load during the remaining regular academic semesters to fulfill undergraduate degree requirements;
- Maintain an overall (cumulative) GPA of 3.25 or better with consistent academic performance; obtain grades of B or above in all science courses taken after the freshman year;
- Make significant progress toward achieving the individually-specified goals outlined on the PUR submitted with the student's application;
- Fulfill all institution and degree requirements to maintain status as a student in good standing (no academic or conduct code violations) and earn a bachelor's degree prior to matriculating in the Research MS program;
- Complete any additional specific matriculation conditions set by the Research MS program at the time of acceptance notification (e.g., official transcripts confirming date of degree conferral, a criminal background check, indication of ability to independently meet the Technical Standards, and submission of all health requirements)

Failure to meet or maintain these eligibility standards will constitute grounds for dismissal from the program. Admission to the Research MS Program can be denied if events occur that would cause the Admissions Committee to question a student's suitability to pursue a career in biomedical research. These include, but are not limited to, misdemeanor or felony convictions, academic dishonesty or other code of conduct violations, unprofessional conduct in a laboratory or education setting, or inability to meet the Technical Standards.

Transfer Credit Policy

Transfer of credit may be allowed for courses comparable to those offered in our programs. Courses must have been taken at an accredited biomedical or biological sciences graduate program in the U.S. Grades of B or higher or a passing grade in a pass/fail course are required. The Biomedical Sciences Research master's program may accept up to nine transfer credits. Transfer credit will be determined by the Program Director in consultation with program faculty after a student matriculates into the program.

Official transcripts must be sent to BioMedCAS. Test scores and supportive application documents should be electronically submitted or mailed to Admissions and Enrollment.

Technical Standards

The abilities and skills candidates and students must possess in order to complete the education and training of the Biomedical Sciences Research master's programs are referred to as technical standards. These abilities and skills are essential for entry into most professional practice settings associated with this degree program.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory and tactile) in the lecture hall, laboratory and/or online settings.

1.02 Indicators include, but are not limited to, this example:

1. Accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with other students, faculty members, laboratory staff members and scientific colleagues.

2.02 Indicators include, but are not limited to, these examples:

1. Clear, efficient and intelligible articulation of verbal language.
2. Legible, efficient and intelligible written English language.
3. Accurate and efficient English language reading skills.
4. Accurate and efficient expressive and receptive communication skills.
5. Ability to accurately follow oral and written directions.

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including, but not limited to, intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include, but are not limited to, these examples:

1. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
2. Demonstrate ability to acquire, retain and apply new and learned information.
3. Demonstrate ability to pursue a course of independent research in a laboratory setting, including the ability to plan and execute experiments.

4.0 Motor And Sensory Function Technical Standard

4.01 Demonstrate sufficient motor and sensory function to perform typical research laboratory duties.

4.02 Indicators include, but are not limited to, these examples:

1. Functional and sufficient sensory capacity (visual, auditory and tactile) to use laboratory equipment and perform experiments.
2. Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom and laboratories).
3. Physical stamina sufficient to complete the didactic and laboratory requirements, including prolonged periods of sitting or standing.

5.0 Behavioral And Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a professional program and service as a practicing laboratory professional.

5.02 Indicators include, but are not limited to, these examples:

- 1. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
- 2. Ability to develop mature and effective professional relationships with faculty, students and other members of the research team.
- 3. Demonstrate impartial motives, attitudes and values in roles, functions and relationships.
- 4. Ability to monitor and react appropriately to one’s own emotional needs and responses.
- 5. Display appropriate flexibility and adaptability in the face of stress or uncertainty associated with technical difficulties in research or scientific review (e.g., criticism of ideas shared in written or oral presentations, manuscripts, etc.)

Compliance with standards, policies and practices set forth in the Student Handbook and the program handbook.

Curriculum Requirements

Thesis Option

(Path Decision - Fall Semester of 2nd Year)		
Course Sequence - 1st Year		
Term 1 - Fall		12
BP 700	Molecules to Cells	
BP 701	Molecular and Cellular Techniques	
BP 703	Cell Communication and Signaling	
BP 704	Molecular Genetics	
BP 710	Oral Communication Forum	
BP 719	Biomedical Sciences Lab Rotation I	
Term 2 - Spring		11
BP 706	Cell Energetics & Organ Function	
BP 710	Oral Communication Forum	
BP 720	Biomedical Sciences Lab Rotation II	
BP 781	Applied Biostatistics & Bioinformatics	
BP 798	Research	
Term 3 - Summer		3
BP 798	Research	
Course Sequence - 2nd Year		
Term 4 - Fall		9
BP 771	Methods & Logic in Translational Biology	
BP 773	Responsible Conduct in Science	
BP 710	Oral Communication Forum	
BP 798	Research	
*Elective (2-3 credits as available, taken in lieu of research)		
Term 5 - Spring		4
BP 710	Oral Communication Forum	
BP 798	Research	
*Elective (2-3 credits as available, taken in lieu of research)		
Term 6 - Summer		4
BP 798	Research	
BP 799 Thesis		
Total Credit Hours		43

Non-Thesis Option

(Path Decision - Fall Semester of 2nd Year)		

Course Sequence - 1st Year		
Term 1 - Fall		12
BP 700	Molecules to Cells	
BP 701	Molecular and Cellular Techniques	
BP 703	Cell Communication and Signaling	
BP 704	Molecular Genetics	
BP 719	Biomedical Sciences Lab Rotation I	
Term 2 - Spring		11
BP 706	Cell Energetics & Organ Function	
BP 710	Oral Communication Forum	
BP 720	Biomedical Sciences Lab Rotation II	
BP 781	Applied Biostatistics & Bioinformatics	
BP 798 Research		
Term 3 - Summer		3
BP 798	Research	
Course Sequence - 2nd Year		
Term 4 - Fall		9
BP 771	Methods & Logic in Translational Biology	
BP 773	Responsible Conduct in Science	
BP 710	Oral Communication Forum	
BP 798	Research	
*Elective (2-3 credits as available, taken in lieu of research)		
Term 5 - Spring		4
BP 710	Oral Communication Forum	
BP 798	Research	
*Elective (2-3 credits as available, taken in lieu of research)		
Term 6 - Summer		3
BP 798	Research	
Oral Presentation of Research		
Total Credit Hours		42

Doctor of Philosophy Biomedical Sciences (PhD)

The Biomedical Sciences PhD program offers multidisciplinary training designed to prepare students for successful careers. Core coursework and laboratory rotations provide a strong foundation across the biomedical sciences, while advanced training is tailored to each student’s specific interests. Areas of study explore the molecular, cellular, and organismal mechanisms underlying human diseases, with opportunities to specialize in fields such as cancer biology, cardiovascular physiology, endocrinology, infectious disease, neurobiology, and reproduction.

Admission

The Biomedical Sciences, PhD program is now participating in the BioMedCAS (<https://biomedcas2024.cas.myliaison.com/applicant-ux/#/> login), specifically designed for biomedical programs.

Applicants to the program must have:

- A bachelor’s degree prior to matriculating as a student
 - If the bachelor’s degree was issued by a U.S. college or university, as a general rule it should be from a regionally accredited institution. However, the program may grant exceptions on a case-by-case basis.
 - Official transcripts from the awarding institution must specify the date upon which the degree was issued.
- An overall grade point average (GPA) of 3.0 or higher (undergraduate and graduate GPA combined).
 - While a holistic review is adopted, admission is competitive; most accepted applicants have a cumulative GPA of 3.3 or higher.
- Completed the Test of English as a Foreign Language (TOEFL)
 - This applies to international applicants only.

- Successfully completed the following courses:
 - General Biology (1 semester with lab)
 - Additional Biology (1 semester with lab)
 - Calculus and/or statistics (1 year)
 - General Chemistry (1 year with lab)
 - Organic Chemistry I (1 semester with lab)
 - Organic Chemistry II or Biochemistry (1 semester, lab not required)
 - Physics (one semester; one year preferred)
 - An additional course in mathematics, computer science or chemistry may substitute for the second semester of physics.

Applicants must also have previous laboratory research experience, and we recommend that they take additional courses in biology, chemistry, and physics.

- Complete the online application (<https://biomedcas2024.cas.myliaison.com/applicant-ux/#/login>) including a personal statement, along with the \$86 application fee:
- Official transcripts from all colleges and universities attended, sent by the registrar at those institutions
 - Official transcripts from the awarding institution must specify the date upon which the degree is issued.
 - Transcripts must be sent to BioMedCAS (<https://biomedcas2024.cas.myliaison.com/applicant-ux/#/login>) only. BioMedCAS only accepted electronic transcripts from Credentials Solutions, Parchment, and National Student Clearinghouse. If your school does not offer either of these services, your transcripts must be sent via mail. Please use the information below to send your transcripts.
- Sending transcripts to BioMedCAS electronically:
 - Credentials Solutions - <http://www.transcriptsplus.net/order> (<http://www.transcriptsplus.net/order/>)
 - Parchment - <https://www.parchment.com/order/> (<https://www.parchment.com/order/%C2%A0/>)
 - National Student Clearinghouse - <http://www.studentclearinghouse.org> (<http://www.studentclearinghouse.org/>)
- Sending transcripts to BioMedCAS by mail:
 - Download a transcript request form after you enter each institution in BioMedCAS.
 - Send the transcript request form to the institution registrar to send the transcript by mail to the address below:

BioMedCAS Transcript Processing Center
P.O. Box 9207
Watertown, MA 02471

- Three letters of recommendation submitted using the form provided within the online application
 - At least two letters should be written by faculty at colleges attended by the applicant who are familiar with the student's academic and research capabilities
 - Only professional references are acceptable. Letters from personal friends and family members will not be considered.

Additional Requirements for International Applicants

Sending International Transcripts to BioMedCAS

- BioMedCAS will ONLY accept the evaluation report from the credentialing agency. Do not send your foreign transcript to BioMedCAS.
- All other foreign transcript evaluations from the credentialing agency must be sent directly to BioMedCAS.

Transcript evaluation: International applicants who attended any institution outside of the United States must contact one of the following credentialing agencies to submit transcripts for official evaluation:

- World Education Services (<http://www.wes.org/>)
- Educational Credential Evaluators (<http://www.ece.org/>)

These are preferred credentialing services. If you wish to select a company other than these, please contact us (https://www.evms.edu/education/masters_programs/biomedical_sciences_research_masters_program/application_process/#Contact) first.

Note: It can take 4 to 6 weeks for transcript evaluations to arrive after the agency receives transcripts. Plan ahead and request these documents early. Incomplete applications will not be reviewed.

Translation: If the academic institution that you attended does not issue documents in English, the credentialing agency may require that you submit a word-for-word translation of your transcripts if they do not have this service available for purchase. You can contact University Language Services (<http://www.universitylanguage.com/>) to submit your transcript for translation and instruct them to send the translated transcript to the credentialing agency.

TOEFL: International applicants whose native language is not English must take the TOEFL exam and receive a score as follows:

- Paper-based test: 550
- Computer-based test: 213
- IBT exam: 80

The TOEFL School Code is B886.

Please take the TOEFL exam online through the Education Testing Service (<http://www.ets.org/>) (ETS) and request your TOEFL scores be sent directly to the Admissions and Enrollment team for Health Professions. ETS reports scores for two years after the test date. If you have previously taken the TOEFL but the two-year period has expired, the program will accept a personal copy if available.

Transfer Credit Policy

Transfer of credit may be allowed for courses comparable to those offered in our program. Courses must have been taken at an accredited biomedical or biological sciences graduate program in the U.S. Grades of B or higher or a passing grade in a pass/fail course are required. The Biomedical Sciences PhD program may accept up to 12 transfer credits. Transfer credit will be determined by the program director in consultation with program faculty after matriculation of a student into the program.

Official transcripts must be sent to BioMedCAS. Test scores and supportive application documents should be electronically submitted or mailed to the Admissions and Enrollment team for Health Professions.

Technical Standards

The abilities and skills candidates and students must possess in order to complete the education and training of the Biomedical Sciences PhD program are referred to as technical standards. These abilities and skills are essential for entry into most professional practice settings associated with these degree programs.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory, and tactile) in the lecture hall, laboratory, and/or online settings.

1.02 Indicators include, but are not limited to, this example:

1. Accurate visualization and discrimination of text, numbers, patterns, graphic illustrations, and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with other students, faculty members, laboratory staff members, and scientific colleagues.

2.02 Indicators include, but are not limited to, these examples:

1. Clear, efficient, and intelligible articulation of verbal language.
2. Legible, efficient, and intelligible written English language.
3. Accurate and efficient English language reading skills.
4. Accurate and efficient expressive and receptive communication skills.
5. Ability to accurately follow oral and written directions.

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including, but not limited to, intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include, but are not limited to, these examples:

1. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
2. Demonstrate ability to acquire, retain and apply new and learned information.
3. Demonstrate ability to pursue a course of independent research in a laboratory setting, including the ability to plan and execute experiments.

4.0 Motor And Sensory Function Technical Standard

4.01 Demonstrate sufficient motor and sensory function to perform typical research laboratory duties.

4.02 Indicators include, but are not limited to, these examples:

1. Functional and sufficient sensory capacity (visual, auditory and tactile) to use laboratory equipment and perform experiments.
2. Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom and laboratories).
3. Physical stamina sufficient to complete the didactic and laboratory requirements, including prolonged periods of sitting or standing.

5.0 Behavioral And Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a professional program and service as a practicing laboratory professional.

5.02 Indicators include, but are not limited to, these examples:

1. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
2. Ability to develop mature and effective professional relationships with faculty, students and other members of the research team.
3. Demonstrate impartial motives, attitudes and values in roles, functions and relationships.
4. Ability to monitor and react appropriately to one's own emotional needs and responses.
5. Display appropriate flexibility and adaptability in the face of stress or uncertainty associated with technical difficulties in research or scientific review (e.g., criticism of ideas shared in written or oral presentations, manuscripts, etc.).
6. Compliance with standards, policies and practices set forth in the Student Handbook (https://www.evms.edu/education/resources/student_policies_handbooks/) and the program handbook.

Curriculum Requirements

Our program aims to develop graduates who will pursue careers as independent investigators with an appreciation for both basic and clinical aspects of biomedical research.

Students will complete 1.5 years of core academic courses, three laboratory rotations and advanced electives. Beginning in the summer following

the first year, students will start mentored research projects in a faculty member's laboratory.

Core Course Sequence

<i>Year 1 - Fall</i>	<i>12</i>
BP 700	Molecules to Cells
BP 703	Cell Communication and Signaling
BP 701	Molecular and Cellular Techniques
BP 704	Molecular Genetics
BP 708	Oral Communication Forum
BP 819	Lab Rotation I
<i>Year 1 - Spring</i>	<i>11</i>
BP 706	Cell Energetics & Organ Function
BP 708	Oral Communication Forum
BP 781	Applied Biostatistics & Bioinformatics
BP 820	Lab Rotation II
BP 821	Lab Rotation III
<i>Year 2 - Fall</i>	<i>6</i>
BP 709	Scientific Writing & Research Design
BP 771	Methods & Logic in Translational Biology
BP 773	Responsible Conduct in Science
BP 795 Elective Courses	6
Elective courses are taken as available and in lieu of research	
BP 898 Research	30
BP 708 Oral Communication Forum	5
BP 899 Dissertation	9
Total Credit Hours	79

Counseling & Art Therapy Programs

Our faculty members are talented educators and dedicated scholars with strong counselor identities who are members of the American Counseling Association (<https://www.counseling.org/>), serve on the American Counseling Association Foundation (<https://www.counseling.org/about/aca-foundation/>), and have been elected to state and national leadership positions in the Virginia Art Therapy Association (<https://www.vaarttherapy.org/>) and the American Art Therapy Association (<https://arttherapy.org/>).

Through our faculty members' teaching methods, students in our 61 credit hour, two-year program engage with the elements of counseling and art therapy practice and the research that leads to improved care. Our instruction focuses on collaborative and experiential learning, reflecting on learning and applying those lessons to internships and clinical work.

Programs

Master of Science Programs

- Counseling & Art Therapy (MS) (p. 266)

Certificate Programs

- Advanced Cultural Humility Certificate (p. 268)
- Trauma and Neuroscience Informed Art Psychotherapy Certificate (p. 268)

Master of Science Counseling & Art Therapy (MS)

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future at VHS.

Admission

Both personal characteristics and academic qualifications of applicants are evaluated to ensure that students are capable of developing professional competence as counselors and art therapists.

Our Admissions Guide (http://catalog.odu.edu/graduate/health-professions/counseling-and-art-therapy/counseling-and-art-therapy-ms/Admissions_Guide_2024-25.pdf) contains specific information about the admissions requirements, process, and timeline for the program. We offer both a full-time and part-time options (https://www.evms.edu/education/masters_programs/counseling_art_therapy/curriculum/part-time_curriculum/) for our curriculum. We also offer three stand-alone Graduate Certificates. (https://www.evms.edu/education/masters_programs/art_therapy_counseling_program/continuing_education/)

- A **qualifying grade point average** of 3.0 or better.
- A **Bachelor's degree** completed no later than July 1.
- All **prerequisite coursework** satisfactorily completed no later than July 1:
 - **Psychology Coursework**
 - 6 semester credit hours in Psychology (must include developmental, abnormal) and
 - 6 optional psychology semester credit hours in psychology and/or human services related field.
 - **Studio Art Coursework or equivalency**
 - 12 semester credit hours in Studio Art (must include painting, drawing, sculpture/3-D and clay/ceramics) [recommended] or
 - Portfolio equivalency in Painting, Drawing, Sculpture/3D, and/or Clay/ceramics [considered for review by the Admissions Committee]
 - Satisfaction of prerequisite competencies in studio art may be demonstrated by competencies through portfolio review
 - Applicants must submit a portfolio of at least 6 artworks in the category for prerequisite review (i.e., 6 artworks in Painting for painting coursework equivalency).
 - Artworks must display adequate to proficient skills in the use of the media and principles of design.
 - A combination of coursework and portfolio equivalency may be considered for review by the Admissions Committee.
- Complete the online application (<https://www.evms.edu/hpapplication/>) including the following:
 - Official transcript(s) from all academic institutions attended
 - Official TOEFL scores (if applicable)
 - Two letters of reference
 - Personal interview with portfolio presentation
- Reviewed the technical standards (https://www.evms.edu/education/masters_programs/art_therapy_counseling_program/technical_standards/).

Transcripts must be sent to GradCAS only. GradCAS only accepts electronic transcripts from the following sites:

- Credentials Solutions (<http://www.transcriptsplus.net/order/>)
- Parchment (<https://www.parchment.com/order/>)
- National Student Clearinghouse (<http://www.studentclearinghouse.org/>)

If your school does not offer these services, download and send a transcript request form to your school's registrar, who should send the transcript to: GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

Additional Requirements for International Applicants

Applicants with foreign degrees may be considered on a case-by-case basis. A written request must be submitted to HP Admissions (vhs-admissions@odu.edu) with all of the following included for consideration:

An official academic credential evaluation of the foreign transcript. The evaluation must include the following components:

- Analysis of credentials to determine equivalence to an accredited U.S. bachelor's degree
- Course-by-course translation, including information on course name, grade and U.S. credit equivalency
- Overall performance in comparison to the standard U.S. grading system (i.e., GPA)

Official transcripts of all coursework done in the U.S. educational system to date;

TOEFL scores for any applicant with a foreign degree and English as a second language or who entered the U.S. after age 12 from a non-English-speaking country of origin (as determined by high school graduation or personal statement). Graduation with an undergraduate degree from a U.S. educational institution will not fulfill this requirement. To ensure an ability to function at the graduate level due to the importance of communication in the English language for both learning and providing healthcare, the following are expected minimal scores:

- Internet-based test (preferred): 85
- Computer-based test: 220
- Speaking component: 25

Although multiple companies provide translation services, an English translation without the appropriate information above will not be accepted in place of an academic credential evaluation. Our preference is that you submit an evaluation completed by World Education Services to provide us with the most complete picture of your previous educational background.

All 30 credits of prerequisite coursework must be completed at an accredited U.S. or Canadian institution with a B, 3.0 (on a 4.0 scale) grade or better in order to establish a record of academic performance in this educational system. No foreign courses, degrees, work experience or other summative exams (e.g., GRE or MAT) will substitute for prerequisite coursework.

At the time of program interviews, if language issues are identified, further demonstration of English proficiency - to include TOEFL testing - may be requested as a condition of acceptance.

Early Assurance Program

To be eligible for the Early Assurance Program (EAP) with Regent University, a student must:

- Be at least in their junior year at Regent University and with only one academic year left to complete their undergraduate education when applying. Interested students should meet with the Regent University EAP Advisor (advising@regent.edu | 757.352.4385) during their freshman year or within the first semester of coursework to express interest in the EAP;
- Meet citizenship requirements of the program;
- Meet all Regent University institutional and degree requirements to continue as a student in good standing;
- Have an overall (cumulative) GPA of 3.0 or better;
- Have no academic or other code of conduct violations;
- Follow the Admission (https://www.evms.edu/education/masters_programs/art_therapy_counseling_program/admissions_requirements/) guidelines;
- Have a pre-matriculation meeting with the Program Director during the spring semester before the fall matriculation date.

The guarantee of admission through the EAP is contingent upon the student's continued eligibility in the EAP.

Curriculum Requirements

Our faculty members are talented educators and dedicated scholars with strong counselor identities who are members of the American Counseling Association (<https://www.counseling.org/>), serve on the American Counseling Association Foundation (<https://www.counseling.org/about/aca->

foundation/), and have been elected to state and national leadership positions in the Virginia Art Therapy Association (<https://www.vaarttherapy.org/>) and the American Art Therapy Association (<https://arttherapy.org/>).

Through our faculty members' teaching methods, students in our 61 credit hour, two-year program engage with the elements of counseling and art therapy practice and the research that leads to improved care. Our instruction focuses on collaborative and experiential learning, reflecting on learning and applying those lessons to internships and clinical work.

Course Sequence - 1st Year

<i>Term 1 - Fall</i>		16
CAT 604	Individual Counseling	
CAT 605	Processes & Materials I	
CAT 608	Psychopathology	
CAT 610	Theories of Development	
CAT 611	Introduction to Art Therapy	
CAT 616	Cultural Humility	
<i>Term 2 - Spring</i>		15
CAT 600	Basic Counseling Skills	
CAT 603	Group Counseling	
CAT 606	Processes & Materials II	
CAT 609	Assessment	
CAT 615	Research Methods & Program Evaluation	
<i>Term 3 - Summer</i>		4-5
CAT 607	Case Presentation Skills	
CAT 669	Practicum	
CAT 690	Capstone Project ***	

Course Sequence - 2nd Year

<i>Term 4 - Fall</i>		12-13
CAT 618	Ethics & Professionalism	
CAT 620	Addictions	
CAT 622	Trauma & Neuroscience Informed Counseling	
CAT 668	Internship *	
CAT 690	Capstone Project ***	
<i>Term 5 - Spring</i>		13-14
CAT 614	Clinical Case Conference	
CAT 617	Family Counseling	
CAT 619	Creativity Symbolism Metaphor	
CAT 621	Career Counseling	
CAT 668	Internship *	
CAT 690	Capstone Project ***	
<i>Electives and Sub-Specialization Courses</i>		1-4
CAT 612	Medical Art Therapy	
CAT 625	Community Art	
CAT 627	Countertransference/Jung	
CAT 628	Exploration of the Psyche	
CAT 631	Applied Cultural Sensitivity **	
CAT 639	Art Therapy in the Schools	
CAT 698	Independent Study Research Methods	

Total Credit Hours 61-67

- * 6 credits required
- ** May be repeated for up to 8 credits
- *** Degree requirement (1) credit Capstone; may be completed in the Fall or Spring of 2nd year; Research based Capstones require 1 elective credit to develop proposal before beginning Capstone.

Certificate Advanced Cultural Humility Certificate

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future at VHS.

Admission

- A **qualifying grade point average** of 3.0 or better.
- A **Bachelor's degree**
- A Master's degree (*Master's degree in Counseling, any related field or other advanced degree for Trauma and Neuroscience Informed Therapy Certificate)
- Complete the online application (<https://www.evms.edu/hpapplication/>) including the following:
 - Official transcript(s) from all academic institutions attended. **Transcripts must be sent to GradCAS only.**
 - Current CV/resume documenting professional experience, educational achievement, and any volunteer experience
 - Two letters of reference
 - Personal statement

Curriculum Requirements

CAT 616	Cultural Humility	3
CAT 631	Applied Cultural Sensitivity	4
Total Credit Hours		7

Certificate Trauma and Neuroscience Informed Art Psychotherapy Certificate

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future at VHS.

Admission

- A **qualifying grade point average** of 3.0 or better.
- A **Bachelor's degree**
- A Master's degree in art therapy
- Complete the online application (<https://www.evms.edu/hpapplication/>) including the following:
 - Official transcript(s) from all academic institutions attended. **Transcripts must be sent to GradCAS only.**
 - Current CV/resume documenting professional experience, educational achievement, and any volunteer experience
 - Two letters of reference
 - Personal statement

Curriculum Requirements

CAT 622	Trauma & Neuroscience Informed Counseling	3
Total Credit Hours		3

Health Sciences Programs

The program consists of 14 courses for a total of 42 credit hours, delivered in eight consecutive semesters via online, asynchronous instruction. The online format allows students anywhere to earn the degree while balancing work and other responsibilities.

Programs

Doctor of Health Sciences Program

- Health Sciences (DHSc) (p. 269)

Doctor of Health Sciences Health Sciences (DHSc)

The program consists of 14 courses for a total of 42 credit hours, delivered in eight consecutive semesters via online, asynchronous instruction. The online format allows students anywhere to earn the degree while balancing work and other responsibilities.

Admission

- A master's or doctoral degree awarded by a regionally accredited institution in the field of healthcare, education, management, or related disciplines.
- Qualifying grade point average (GPA) of 3.0 or better (on a 4-point scale), taken from the highest of the following two possible calculations:
 - Completed Undergraduate GPA (foreign degrees considered on a case by case basis)
 - Completed U.S. graduate degree GPA
- Two letters of recommendation from individuals who can reasonably assess the applicant's ability to successfully complete our doctoral program. Make sure your recommenders submit this form through the GradCAS Evaluator portal.
- Personal essay of approximately 300-500 words describing how the Doctor of Health Sciences program will enhance the applicant's academic and/or professional career goals.
- Current resume/CV documenting professional experience and educational achievements.
- Applicants must report all institutions attended and send all official transcripts to GradCAS. If you do not list or send official transcripts for all institutions attended, processing of your application may be delayed.
- Following the online instructions, applicants must contact every college or university attended and request transcripts be sent directly to GradCAS.
 - GradCAS accepts electronic transcripts from:
 - Credential Solutions (<http://www.transcriptsplus.net/order/>)
 - Parchment (<https://www.parchment.com/order/my-credentials/>)
 - National Student Clearinghouse (<https://www.studentclearinghouse.org/>)
 - Sending transcripts to GradCAS by mail
 - Download a transcript request form after you enter each institution in GradCAS
 - Send the transcript request form to the institution registrar to send transcript by mail to the address below:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

Additional Requirements for International Applicants

English Proficiency Exams – Competitive applicants should achieve or surpass the following scores for the Test of English as a Foreign Language (TOEFL):

- 80 for the iBT (preferred),
- 213 for CBT or
- 550 for the PBT.

Scores must have been obtained within two years of the application date. This requirement will be waived for applicants who have completed an undergraduate or graduate degree from a regionally accredited institution in the United States.

- TOEFL School Code: B886

Transcript Evaluation – In addition to providing official transcripts, applicants must provide both a transcript evaluation and translation, including a course-by-course evaluation and an overall GPA calculation, through one of the following credentialing agencies:

- World Education Services (<https://www.wes.org/>)
- Educational Credential Evaluators (<https://www.ece.org/>)

Sending International Transcripts to GradCAS – GradCAS will ONLY accept the evaluation report from the credentialing agency. DO NOT SEND your foreign transcript to GradCAS.

All foreign transcript evaluations from a credentialing agency must be sent directly to GradCAS to the following address:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

Applicant Help Center

- Having trouble accessing the application? The preferred browsers are Google Chrome or Firefox
- Applicant Help Center (https://help.liaisonedu.com/GradCAS_Applicant_Help_Center/)
- If you have questions about your application status, please contact your GradCAS Customer Service Representative at 857.304.2086 or GradCASinfo@liaisonedu.com.

Technical Standards

The essential abilities and skills that candidates and students must possess in order to complete the education and training associated with the Doctor of Health Sciences program are referred to as technical standards.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory and tactile) in the lecture hall, in clinical and educational settings and online.

2.02 Indicators include, but are not limited to, this example:

1. Accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with professionals of varying cultures, ethnicities and personalities.

2.02 Indicators include, but are not limited to, these examples:

1. Clear, efficient and intelligible articulation of spoken English language.
2. Legible, efficient and intelligible written English language.
3. Accurate and efficient English language reading skills.
4. Accurate and efficient, expressive and receptive communication skills.
5. Ability to accurately follow directions (oral and written).

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including but not limited to intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include but are not limited to these examples:

1. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
2. Demonstrate ability to acquire, retain and apply new and learned information.

4.0 Motor and Sensory Function Technical Standard

4.01 Demonstrate sufficient motor and sensory function.

4.02 Indicators include, but are not limited to, these examples:

1. Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom, online).
2. Physical stamina sufficient to complete online didactic study, which will include prolonged periods of sitting.

5.0 Behavioral and Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a graduate-level academic program.

5.02 Indicators include, but are not limited to, these examples:

1. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
2. Ability to develop mature and effective professional relationships with faculty and other members of the educational and healthcare team.
3. Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
4. Demonstrate impartial motives, attitudes, and values in roles, functions and relationships.
5. Ability to monitor and react appropriately to one's own emotional needs and responses.
6. Display appropriate flexibility and adaptability in the face of stress or uncertainty in teaching and learning environments.
7. Compliance with standards, policies and practices set forth in the program handbook.

Curriculum Requirements

The program consists of 14 courses for a total of 42 credit hours, delivered in eight consecutive semesters via online, asynchronous instruction.

Course Sequence - 1st Year

<i>Term 1 - Fall</i>		6
DHSC 700	Strategic Communication	
DHSC 702	Healthcare Delivery Systems	
<i>Term 2 - Spring</i>		6
DHSC 701	Management of Organizational Change	
DHSC 703	Conflict Analysis & Negotiation	
<i>Term 3 - Summer</i>		3
DHSC 805	Population Health & Preventive Care	

Course Sequence - 2nd Year

<i>Term 4 - Fall</i>		6
DHSC 800	Essentials of Financial Management	
DHSC 704	Intro to Healthcare Analytics	
<i>Term 5 - Spring</i>		6
DHSC 706	Research Methods	
DHSC 803	Program Evaluation	
<i>Term 6 - Summer</i>		3
DHSC 804	Leadership and Professionalism	

Course Sequence - 3rd Year

<i>Term 7 - Fall</i>		6
DHSC 900	Policy & Politics of Health	
DHSC 901	Healthcare Strategy	
<i>Term 8 - Spring</i>		6
DHSC 705	Information Technology for Healthcare Organizations	

Laboratory Animal Science Programs

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future.

Programs

Master of Science Programs

- Laboratory Animal Science (MS) (p. 270)

Certificate Programs

- Laboratory Animal Anesthesia and Handling Techniques Certificate (p. 273)

Master of Science Laboratory Animal Science (MS)

The online Master of Laboratory Animal Science program is designed for individuals who may be currently working within the field of laboratory animal science, those seeking career advancement or those looking for opportunities in research laboratories but who do not want to relocate to attend a traditional master's program.

Admission

The program is designed to provide basic training in laboratory animal science, animal resource management and study design to highly motivated veterinary students, veterinary technicians and research associates in educational or pharmaceutical research facilities.

The following elements are requirements to be considered for admission into the program:

For all applicants

- Bachelor's or graduate degree with a qualifying GPA of 2.5 or higher from a regionally and nationally accredited U.S. college or university or an international equivalent.
 - The program may grant exceptions on a case-by-case basis.
- Please be advised that all students in the EVMS School of Health Professions are expected to attain a term Grade Point Average of at least 3.0 to be considered in good academic standing and a cumulative GPA of at least 3.0 to graduate.
- Successful completion of two semesters each of college-level Biology and Chemistry and one semester of Mathematics.
 - No more than one prerequisite course will be accepted without a traditional letter grade (e.g. Pass, Advanced Placement, International Baccalaureate, etc.).
 - The courses without a traditional letter grade can only be accepted for intro level prerequisite courses of Biology I, Chemistry I or Mathematics I.
 - Replacement courses may be accepted for missing prerequisite courses, only with Program Director's approval. Replacement course syllabus should be submitted by applicant for consideration.
- Minimum of three months or 500 hours of hands-on experience, as described below is required prior to the start of the first semester.
 - Applicants who desire a future as a Laboratory Animal technologist are strongly encouraged to continue a full-time experience/employment during the two years of the program to be eligible for LAT and LATG certification through American Association of Laboratory Animal Science (AALAS).
- Two letters of Recommendation (https://www.evms.edu/media/evms_public/departments/distance_education/EVMS-

GradCAS_Reference-Form2.pdf), one of which must verify the minimum hands-on animal experience requirement.

- Personal statement outlining the applicant's academic and professional goals.
- Computer and computer services with various specifications.

Additional Requirements for International Applicants

In addition to meeting the admissions requirements above, international applicants are required to meet the following:

Foreign Transcripts

- Request a course by course evaluation of all foreign transcripts showing GPA calculation on a four-point scale.
- EVMS does not endorse any particular evaluating and/or credentialing service. You can use the following agencies:
 - World Education Services (<https://www.wes.org/>)
 - Educational Credential Evaluators (<https://www.ece.org/>)

Translation

If the academic institution that you attended does not issue documents in English, the credentialing agency will require that you submit a word-for-word translation of your transcripts. You can contact University Language Services (<https://www.universitylanguage.com/>) to submit your transcript for translation and instruct them to send the translated transcript to the credentialing agency you choose.

Transcript Evaluation

International students whose native language is not English may contact one of the following credentialing agencies to submit transcripts for official evaluation: WES or ECE. Instruct the credentialing agency to send the official evaluation (and translation) directly to GradCAS. You must provide both a course-by-course evaluation report along with an overall GPA calculation. Evaluations are mandatory even for transcripts from institutions that report grades in English. This provides EVMS with a U.S. credit equivalency and allows the transcripts to be reviewed accurately. WES and ECE are preferred credentialing services. If you wish to select a company other than these, please contact the program first.

TOEFL

International applicants whose native language is not English must take the TOEFL exam and receive a score as follows: Paper-based test: 550; Computer-based test: 213; iBT exam: 80. Please go to the ETS website to take the TOEFL exam, and request your TOEFL scores be sent directly to GradCAS. ETS reports scores for two years after the test date. If you have previously taken the TOEFL but the two-year period has expired, the program will accept a personal copy if available.

Note

If the candidate has received a BS or graduate degree from a college or university in a country where English is the primary language (like the U.S., Canada and UK), applicants could request for the TOEFL requirement to be waived by the Program Director or the Admission Committee.

GradCAS

GradCAS (https://catalog.evms.edu/preview_program.php?catoid=9&pooid=2036#GradCAS) will **ONLY** accept the evaluation report from the credentialing agency. **Do not send** your foreign transcript to GradCAS.

All other foreign transcript evaluations from the credentialing agency must be sent directly to GradCAS to the following address:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

GRE School Code: 5729 TOEFL School Code is B886

Application submission

Applications should be submitted by March 1 for early admission consideration. Applications submitted after March 1 will be considered until all positions are filled. Students who plan to seek Financial Aid (https://www.evms.edu/education/financial_aid/) are advised to submit their applications as early as possible. Upon acceptance into the program, a \$300 nonrefundable matriculation fee (which will be credited toward the first semester's tuition) is required to secure class placement.

Important Note:

International applicants who are applying for ICLAS Scholarships (<https://iclas.org/iclas-scholarship-program-for-veterinarians/>), should contact program director immediately for an early application review and provisional acceptance which is needed for ICLAS application process.

Prerequisite Experience

Applicants are encouraged to include all animal-related experience they have. Experience and skills related to the maintenance of the health and well-being of animals in research or laboratory animal facility settings will be considered as hour-for-hour against experience requirement. Such experience includes procurement, care, use, handling, treatment, surgical or necropsy activities, cage wash operations, clinical pathology, quality assurance and IACUC functions that relate to laboratory animal science or the direct supervision or training of personnel engaged in these activities, and experience gained as part of an externship, internship, preceptorship or fellowship in a laboratory animal facility.

Experience and skills in a laboratory animal facility that do not affect the health and well-being of laboratory animals - such as office/administration, selling laboratory animals equipment - or in a non-laboratory animal facility - such as veterinary clinics, zoos, pet stores or other similar businesses - will be considered based on a 3-to-1 ratio. Therefore, nine (9) months of such experience will be considered as equal to three (3) months of hands-on experience.

Transfer credits

Transfer of credit may be allowed for coursework taken at a regionally accredited institution of higher learning, such as an accredited member of the Southern Association of Colleges and Schools (<http://www.sacscoc.org/>), for courses in which a grade of B (3.0) or higher was received and for a maximum of 9 transfer credits. Course grades obtained from another institution will not be counted in the GPA. All applicants seeking to transfer credit(s) should contact the program (lasinfo@evms.edu) for special application or credential requirements. Decisions regarding applicability of transfer courses/credits will be made by the program director in consultation with faculty as deemed appropriate.

Technical Standards

The abilities and skills that candidates and students must possess in order to complete the education and training associated with the Master's of Laboratory Animal Science Program are referred to as "Technical Standards." These abilities and skills are essential for professionals in animal care facilities and preclinical biomedical research settings which utilize animal models.

The abilities and skills that candidates and students must possess in order to complete the education and training associated with the master's of Laboratory Animal Science Program are referred to as "Technical Standards." These abilities and skills are essential for professionals in animal care facilities and preclinical biomedical research settings which utilize animal models.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory and tactile) in the lecture hall, laboratory and/or online settings. Indicators include but are not limited to accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with biomedical research or animal care professionals and with people of varying cultures, ethnicities and personalities.

2.02 Indicators include, but are not limited to, these examples:

1. Clear, efficient and intelligible articulation of spoken English language.
2. Legible, efficient and intelligible written English language.
3. Accurate and efficient English language reading skills.
4. Accurate and efficient, expressive and receptive communication skills.
5. Ability to accurately follow directions (oral and written).

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including but not limited to intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include but are not limited to these examples:

1. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
2. Demonstrate ability to acquire, retain and apply new and learned information.

4.0 Motor and Sensory Function Technical Standard

4.01 Demonstrate sufficient motor and sensory function to perform typical animal care or laboratory duties.

4.02 Indicators include but are not limited to these examples:

1. Functional and sufficient sensory capacity (visual, auditory and tactile) to use laboratory equipment and perform procedures.
2. Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom, online and laboratories).
3. Physical stamina sufficient to complete the online didactic and some laboratory study, which will include prolonged periods of sitting.

5.0 Behavioral and Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a professional program and service as a practicing animal care and laboratory professional.

5.02 Indicators include but are not limited to these examples:

1. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
2. Ability to develop mature and effective professional relationships with faculty, animal user researchers, the public and other members of the animal care or use team.
3. Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
4. Demonstrate impartial motives, attitudes and values in roles, functions and relationships.
5. Ability to monitor and react appropriately to one's own emotional needs and responses.
6. Display appropriate flexibility and adaptability in the face of stress or uncertainty associated with clinical encounters and clinical environments.
7. Compliance with standards, policies and practices set forth in the program handbook.

Curriculum Requirements

The program has a total of 31 credits in five semesters over two years.

Medical and Health Professions Education Programs

MHPE Program Overview

The Medical and Health Professions Education (MHPE) Program offers the Master's of Medical and Health Professions Education (MMHPE), Doctor of Philosophy (PhD), and the Doctor of Education (EdD) degrees along with graduate certificates in Scholarship, Teaching, and Simulation Program Management.

Mission

The Medical & Health Professions Education program is dedicated to building an interprofessional learning community of scholars committed to advancing ethical, community-oriented education, research, and service in the health professions. Students who enroll in MHPE programs will engage in transformational learning that connects their experiences, coursework, and

knowledge to develop a more sophisticated understanding of the world that informs their teaching, research, and professional practice.

Program Director: Peggy Gesing gesingme@odu.edu

The Medical and Health Professions Education (MHPE) Program offers the Master's of Medical and Health Professions Education (MMHPE), Doctor of Philosophy (PhD), and the Doctor of Education (EdD) degrees along with graduate certificates in Scholarship, Teaching, and Simulation Program Management.

Mission

The Medical & Health Professions Education program is dedicated to building an interprofessional learning community of scholars committed to advancing ethical, community-oriented education, research, and service in the health professions. Students who enroll in MHPE programs will engage in transformational learning that connects their experiences, coursework, and knowledge to develop a more sophisticated understanding of the world that informs their teaching, research, and professional practice.

Program Director: Peggy Gesing gesingme@odu.edu

Admission

Candidates must have completed all undergraduate degree requirements and have been issued a bachelor's degree prior to matriculating as an EVMS student. If the bachelor's degree was issued by a U.S. college or university, as a general rule, it should be from a regionally accredited institution. However, the program may grant exceptions on a case-by-case basis. Official transcripts from the awarding institution must specify the date upon which the degree was issued.

Requirements for Admission

- A bachelor's degree in Health Professions/Medical discipline or related field or a bachelor's degree in an unrelated field with the addition of three or more years of work experience in a health field
- Complete and submit online application (<https://gradcas.liaisoncas.org/apply/>) (including \$60 application fee)
- Qualifying GPA of 3.0 or better (4-point scale)
 - Actual undergraduate GPA of 3.0 or better (**degrees earned outside the U.S. are considered on a case-by-case basis**) from the degree-granting institution, OR

- Completed U.S. graduate degree GPA of 3.0 or better from the degree-granting institution, OR
- A replacement GPA of 3.0 or better computed from the most recent 40 semester credit hours of U.S. graduate and undergraduate coursework in the case where a graduate degree was started and not completed
- Two letters of recommendation from those familiar with student's ability to be successful in an online graduate program
 - Recommenders must submit this form through the GradCAS Evaluator Portal.
- Letter of intent/personal essay outlining the applicant's academic and professional goals related to medical and health professions education
- Resume/Curriculum Vitae
- Official transcripts from each college/university attended, including an official transcript from any degree-granting institution that specifies the date upon which the degree was issued. Transcripts must be sent electronically or by mail directly to GradCAS. Any **official transcript** received by the program or the School of Health Professions Admissions and Enrollment department will not be accepted. If you do not list or send official transcripts for all institutions attended, processing of your application will be delayed.
- Sending Transcripts Electronically (Click here (https://help.liaisonedu.com/GradCAS_Applicant_Help_Center/) for additional information)
- GradCAS only accepts electronic transcripts from:
 - Credentials Solutions (<http://www.transcriptsplus.net/order/>)
 - Parchment (<http://www.parchment.com/order/>)
 - National Student Clearinghouse (<http://www.studentclearinghouse.org/>)
 - (<http://www.studentclearinghouse.org/>) To send transcripts to GradCAS by mail:
- Provide the registrar with the following items:
 - Your GradCAS ID#.
 - All information needed by the registrar to properly identify you in the school's database including any name changes.
 - Any transcript fees required by the registrar.
 - Any school-specific forms required by the registrar.
 - If you cannot use this form, make sure the registrar prints "GradCAS" and your full GradCAS ID# on the transcript before mailing it.
 - GradCAS Transcript Request Form. Ask the registrar to attach it to your official transcripts. This form is not required but strongly recommended as it helps ensure your official transcripts are properly matched to your application.
- Institutions must send transcripts directly to GradCAS to the following address:

**GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471**

Additional Requirements for International Applicants

Requirements for admission include:

- English proficiency exams (may be waived)
 - TOEFL Minimum Scores: Paper 550, Computer 213, iBT 80
 - IELTS Minimum Scores: Total 6.5, Subscores 6
- A transcript evaluation and translation
 - Please refer to Educational Credential Evaluators or World Education Services.
 - Applicants must supply a course-by-course evaluation and an overall GPA calculation
- GradCAS will **ONLY** accept the evaluation report from the credentialing agency. Do not send your foreign transcript to GradCAS.
 - All other foreign transcript evaluations from the credentialing agency must be sent directly to GradCAS to the following address:

GRE School Code is: 5729 TOEFL School Code is B886

Transfer Credits

Requests to transfer graduate credits from another accredited U.S. or Canadian institution are considered on an individual basis after students are admitted to the MMHPE program. International credits are reviewed on a case-by-case basis.

A student may transfer up to nine graduate credit hours, if all of the following conditions hold:

- Graduate course credits were completed at an accredited U.S. or Canadian institution and are reflected on an official transcript
- Transfers can feasibly occur within the three-year matriculation limit of this MMHPE program
- Grade earned is a B or better

All requests must be made by the end of the first term in the program. Students who wish to request that graduate credits be transferred into the MHPE program must submit a copy of the syllabus for the course to the program director who will consult with teaching faculty as appropriate and render a decision. Approved transfer grades are included on student's transcript; however, transfer grades are not included in semester or cumulative GPA calculations. Approved transfer grades are included on student's transcript; however, transfer grades are not included in semester or cumulative GPA calculations.

Applicant Help Center

- Having trouble accessing the GradCAS application? The preferred browsers are Google Chrome or Firefox
- The Applicant Help Center can be accessed here: Applicant Help Center (https://help.liaisonedu.com/GradCAS_Applicant_Help_Center/)
- If you have questions about your application status, please contact your GradCAS Customer Service Representative contact information at tel:8573042086 (https://catalog.evms.edu/preview_program.php?catoid=11&poid=2462#tel:8573042086) or GradCASinfo@liaisonedu.com (GradCASinfo@liaisonedu.com%)

Admission will occur on a rolling basis until the cohort is filled. Graduates of foreign programs will be considered on a case-by-case basis.

Technical Standards

The essential abilities and skills that candidates and students must possess in order to complete the education and training associated with this program are referred to as Technical Standards.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory and tactile) in the lecture hall, in clinical and educational settings and online. Indicators include but are not limited to accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with professionals of varying cultures, ethnicities and personalities.

2.02 Indicators include, but are not limited to, these examples:

1. Clear, efficient and intelligible articulation of spoken English language.
2. Legible, efficient and intelligible written English language.
3. Accurate and efficient English language reading skills.
4. Accurate and efficient, expressive and receptive communication skills.
5. Ability to accurately follow directions (oral and written).

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including but not limited to intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include but are not limited to these examples:

1. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
2. Demonstrate ability to acquire, retain and apply new and learned information.

4.0 Motor and Sensory Function Technical Standard

4.01 Demonstrate sufficient motor and sensory function.

4.02 Indicators include but are not limited to these examples:

1. Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom, online).
2. Physical stamina sufficient to complete online didactic study, which will include prolonged periods of sitting.

5.0 Behavioral and Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a graduate-level academic program.

5.02 Indicators include but are not limited to these examples:

1. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
2. Ability to develop mature and effective professional relationships with faculty and other members of the educational and healthcare team.
3. Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
4. Demonstrate impartial motives, attitudes and values in roles, functions and relationships.
5. Ability to monitor and react appropriately to one's own emotional needs and responses.
6. Display appropriate flexibility and adaptability in the face of stress or uncertainty in teaching and learning environments.
7. Compliance with standards, policies and practices set forth in the program handbook.

Curriculum Requirements

The curriculum for the MMHPE program has been constructed with the input from the course and program directors. The curriculum is designed to prepare educational leaders in various medical and health professions organizational settings. The program provides advanced education in the areas of teaching and learning, scholarship, and health professions education with an emphasis on real-world, practical applications.

The 31 credit hour distance learning program is designed to be completed in four 16 week terms and one 12 week term. Students will take two courses at a time over the 16 week term with the exception of the final spring term when the one credit Capstone is also taken.

Students complete coursework and interact with instructors and classmates through a distance education format utilizing the Canvas Learning Management System. Upon successful completion of the program, students are awarded the Master of Medical and Health Professions Education (MMHPE) degree and may use the initials MMHPE after their name.

Educational Format

Courses are delivered entirely online asynchronously with the occasional synchronous session. Students complete the practicum virtually, building upon didactic knowledge to design a completely online course.

Doctor of Education Medical and Health Professions Education (EdD)

MHPE Program Overview

The Medical and Health Professions Education (MHPE) Program offers the Master's of Medical and Health Professions Education (MMHPE), Doctor of Philosophy (PhD), and the Doctor of Education (EdD) degrees along with graduate certificates in Scholarship, Teaching, and Simulation Program Management.

Mission

The Medical & Health Professions Education program is dedicated to building an interprofessional learning community of scholars committed to advancing ethical, community-oriented education, research, and service in the health professions. Students who enroll in MHPE programs will engage in transformational learning that connects their experiences, coursework, and knowledge to develop a more sophisticated understanding of the world that informs their teaching, research, and professional practice.

Program Director: Peggy Gesing gesingme@odu.edu

Admission

The Medical and Health Professions Education (MHPE) Doctoral Program evaluates applicants using a variety of items submitted by the applicant. All components of an application are reviewed prior to making an admission decision.

- Application opens **October 1**. Application deadline is **March 15**. Applicants will be accepted after March 15 on a rolling basis.
- A master's degree from a regionally accredited institution with a cumulative grade point average of 3.00 or better prior to matriculation
 - For those applying to the **Contemporary Human Anatomy Education (CHAE) concentration**, the master's degree must be comprised of a minimum of 30 graduate-level credits and should include Clinical Gross Anatomy, Embryology and Histology at the master's level.
- One year of teaching experience in medical and health professions/higher education preferred.
- One-page personal essay outlining how the MHPE Doctoral degree will help the applicant reach their professional goals. The Personal Essay should include a brief discussion of the applicant's educational research interest related to health professions education.
- An original two-page single-spaced academic writing sample providing an introduction and brief review of the literature related to the applicant's research interest related to health professions education. The writing sample should follow the APA 7 style guide and include five - eight scholarly references.
- Curriculum vitae and/or resume
- Recommendations from two academic references (electronic form provided in GradCAS).

Official transcripts from each college/university attended, including an official transcript from any degree-granting institution that specifies the date

upon which the degree was issued. Transcripts must be sent electronically or by mail directly to GradCAS. Any **official transcript** received by the program or the School of Health Professions Admissions and Enrollment department will not be accepted. If you do not list or send official transcripts for all institutions attended, processing of your application will be delayed.

- Click here (https://help.liaisonedu.com/GradCAS_Applicant_Help_Center/) to send transcripts electronically
- GradCAS only accepts electronic transcripts from:
 - National Student Clearinghouse (<http://www.studentclearinghouse.org/>)
 - Parchment (<http://www.parchment.com/order/>)
 - Credentials Solutions (<http://www.transcriptsplus.net/order/>)
- To send transcripts to GradCAS by mail:
- Provide the registrar with the following items:
 - GradCAS Transcript Request Form. Ask the registrar to attach it to your official transcripts. This form is not required but strongly recommended as it helps ensure your official transcripts are properly matched to your application.
 - If you cannot use this form, make sure the registrar prints "GradCAS" and your full GradCAS ID# on the transcript before mailing it.
 - Any school-specific forms required by the registrar.
 - Any transcript fees required by the registrar.
 - All information needed by the registrar to properly identify you in the school's database including any name changes.
 - Your GradCAS ID#.
- Institutions must send transcripts directly to GradCAS to the following address:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

Submit an application (<https://gradcas.liaisoncas.org/apply/>) to the Doctoral Program in Medical & Health Professions Education program.

Transfer Credits

Requests to transfer graduate credits from another accredited U.S. or Canadian institution are considered on an individual basis after students are admitted to the MHPE Doctoral program. International credits are reviewed on a case-by-case basis.

A student may transfer up to 12 graduate credit hours, if all of the following conditions hold:

- Graduate course credits were completed at an accredited U.S. or Canadian institution and are reflected on an official transcript
- Transfers can feasibly occur within the five-year matriculation limit of this MHPE program
- Grade earned is a B or better

All requests must be made no later than one full term prior to graduation from the program.

All requests must be made by the end of the first term in the program. Students who wish to request that graduate credits be transferred into the MHPE program must submit a copy of the syllabus for the course to the program director who will consult with teaching faculty as appropriate and render a decision. Approved transfer grades are included on student's transcript; however, transfer grades are not included in semester or cumulative GPA calculations.

Additional Requirements for International Applicants

Requirements for admission include:

- English proficiency exams (may be waived)
 - TOEFL Minimum Scores: Paper 550, Computer 213, iBT 80
 - IELTS Minimum Scores: Total 6.5, Subscores 6

- A transcript evaluation and translation
 - Please refer to Educational Credential Evaluators or World Education Services.
 - Applicants must supply a course-by-course evaluation and an overall GPA calculation
- GradCAS will ONLY accept the evaluation report from the credentialing agency. Do not send your foreign transcript to GradCAS.
 - All other foreign transcript evaluations from the credentialing agency must be sent directly to GradCAS to the following address:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

TOEFL School Code is B886

Technical Standards

The essential abilities and skills that candidates and students must possess in order to complete the education and training associated with this program are referred to as Technical Standards.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory and tactile) in the lecture hall, in clinical and educational settings and online. Indicators include but are not limited to accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with professionals of varying cultures, ethnicities and personalities.

2.02 Indicators include, but are not limited to, these examples:

1. Clear, efficient and intelligible articulation of spoken English language.
2. Legible, efficient and intelligible written English language.
3. Accurate and efficient English language reading skills.
4. Accurate and efficient, expressive and receptive communication skills.
5. Ability to accurately follow directions (oral and written).

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including but not limited to intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include but are not limited to these examples:

1. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
2. Demonstrate ability to acquire, retain and apply new and learned information.

4.0 Motor and Sensory Function Technical Standard

4.01 Demonstrate sufficient motor and sensory function.

4.02 Indicators include but are not limited to these examples:

1. Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom, online).
2. Physical stamina sufficient to complete online didactic study, which will include prolonged periods of sitting.

5.0 Behavioral and Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a graduate-level academic program.

5.02 Indicators include but are not limited to these examples:

1. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).

2. Ability to develop mature and effective professional relationships with faculty and other members of the educational and healthcare team.
3. Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
4. Demonstrate impartial motives, attitudes and values in roles, functions and relationships.
5. Ability to monitor and react appropriately to one's own emotional needs and responses.
6. Display appropriate flexibility and adaptability in the face of stress or uncertainty in teaching and learning environments.
7. Compliance with standards, policies and practices set forth in the program handbook.

Curriculum Requirements

The 48-credit hour distance learning program is designed to be completed in 3.5 - 4.5 years: Seven (12-16 week) terms of coursework with 6 - 7 credit hours per term and one year for research and dissertation completion.

The curriculum for the MHPE Doctoral Program has been constructed with the input from the course and program directors. The curriculum is designed to prepare educational leaders in various medical and health professions' organizational settings. The EdD is a professional doctoral degree designed for educators and leaders seeking to apply research to practice in educational, organizational, or community settings.

1. Teaching and Learning Core Courses

MHPE 720	Exploring Paradigms in Higher Education	3
MHPE 808	Contexts of Teaching and Learning	3
MHPE 809	Designing Educational Experiences	3
MHPE 869	Practicum	3

2. Research Core Courses

MHPE 702	Program Evaluation	3
MHPE 705	Applied Statistics	3
MHPE 715	Educational Scholarship Method	3
MHPE 806	Mixed Method Research Design	3
MHPE 807	Advanced Research Methods	3

3. Dissertation Courses

MHPE 804	Educational Scholarship Seminar *	3
MHPE 830	Candidacy Seminar	3
MHPE 900	Research **	6

4. Concentration Courses (Please select one concentration.)

Contemporary Human Anatomy Education Concentration Courses

CHAE 813	Stewards of Anatomy Education	
CHAE 814	Anatomy Education Foundations	
CHAE 815	Teaching & Tech for Anatomy	

Higher Education Concentration Courses

MHPE 813	Community Partnerships in Health Professions Education	
MHPE 814	Organization and Management	
MHPE 815	Current Issues in Higher Education	

Simulation Education Concentration Courses

MHPE 704	Simulation in Healthcare	
MHPE 725	Business of Simulation	
MHPE 814	Organization and Management	

Total Credit Hours **48**

* You must repeat MHPE 804 three times for a total of 3 credits.

** After completing the 6 credits of MHPE 900, you may register for MHPE 905 for additional dissertation credits if needed.

Doctor of Philosophy Medical and Health Professions Education (PhD)

- GradCAS only accepts electronic transcripts from:
 - Credentials Solutions (<http://www.transcriptsplus.net/order/>)
 - Parchment (<http://www.parchment.com/order/>)
 - National Student Clearinghouse (<http://www.studentclearinghouse.org/>)
- To send transcripts to GradCAS by mail:
 - Provide the registrar with the following items:
 - GradCAS Transcript Request Form. Ask the registrar to attach it to your official transcripts. This form is not required but strongly recommended as it helps ensure your official transcripts are properly matched to your application.
 - If you cannot use this form, make sure the registrar prints “GradCAS” and your full GradCAS ID# on the transcript before mailing it.
 - Any school-specific forms required by the registrar.
 - Any transcript fees required by the registrar.
 - All information needed by the registrar to properly identify you in the school’s database including any name changes.
 - Your GradCAS ID#.
- Institutions must send transcripts directly to GradCAS to the following address:

GradCAS Transcript Processing Center

P.O. Box 9217

Watertown, MA 02471

Applicant Help Center

- Having trouble accessing the GradCAS application? The preferred browsers are Google Chrome or Firefox
- Access the Applicant Help Center (https://help.liaisonedu.com/GradCAS_Applicant_Help_Center/)
- If you have questions about your application status, please contact your GradCAS Customer Service Representative contact information at (857) 304-2086 or GradCASinfo@liaisonedu.com

Admission will occur on a rolling basis until the cohort is filled.

Certificate Programs

- Clinical Leadership and Administration Certificate (p. 283)
- Educational Leadership and Administration Certificate (p. 283)

Doctor of Medical Science Medical Science (DMSc)

The Doctor of Medical Science (D.M.Sc.) is designed for PAs seeking to advance their careers through leadership, scholarly inquiry, and evidence-based practice. This fully online, asynchronous program provides an interdisciplinary approach to healthcare, equipping students with the

knowledge and skills necessary to drive change in clinical practice, education, and healthcare systems.

With a strong emphasis on leadership and quality improvement, the D.M.Sc. program prepares graduates to analyze complex healthcare challenges, implement innovative solutions, and contribute to scholarly research. The curriculum includes advanced topics in health policy, grant writing, and quality improvement initiatives, ensuring that graduates are well-prepared to enhance patient care and improve healthcare delivery.

The program is structured to accommodate working professionals, allowing students to balance their education with professional practice.

As one of the most cost-effective doctoral programs for PAs, we offer a high-quality education at a competitive price. Graduates of the program emerge as leaders, educators, and advocates, capable of influencing healthcare at institutional, community, and national levels. Whether aiming for academic roles, executive leadership positions, or clinical excellence, our graduates are equipped to make a meaningful impact in modern healthcare.

Admission

- A master's degree awarded by a regionally accredited institution in healthcare, education, management, or related disciplines.
- Graduation from an ARC-PA certified PA Program.
- Certification from the NCCPA. Submit this form through the GradCAS
- State Licensure as a Physician as a Physician Assistant
- Applicant must report all institutions attended and send all official transcripts to GradCAS. If you do not list or send official transcripts for all institutions attended, processing of your application may be delayed.
- 2 letters of Reference submitted directly to GradCAS. Submit this form through the GradCAS Evaluator Portal.
- A personal statement, submitted with GradCAS application.
- Following the online instructions, applicants must contact every college or university attended and request transcripts be sent directly to GradCAS.
 - GradCAS accepts electronic transcripts from:
 - Credential Solutions (<http://www.transcriptsplus.net/order/>)
 - Parchment (<https://www.parchment.com/order/my-credentials/>)
 - National Student Clearinghouse (<https://www.studentclearinghouse.org/>)
- Sending transcripts to GradCAS by mail
 - Download a transcript request form after you enter each institution in GradCAS
 - Send the transcript request form to the institution registrar to send transcript by mail to the address below:

Technical Standards

The essential abilities and skills that candidates and students must possess in order to complete the education and training associated with the Doctor of Medical Sciences program are referred to as technical standards.

Observational Skills

Demonstrate sufficient attention and accuracy in observation skills (visual, auditory, and tactile) in the lecture hall, in clinical and education settings and online. Indicators include but are not limited to: accurate visualization

and discrimination of text, numbers, patterns, graphic illustrations and other imaging texts.

Communication Skills

Demonstrate effective communication skills with professionals and with people of varying cultures, ethnicities and personalities.

Indicators include, but are not limited to, these examples:

- Clear, efficient and intelligible articulation of spoken English language.
- Legible, efficient and intelligible written English language.
- Accurate and efficient English language reading skills.
- Accurate and efficient, expressive and receptive communication skills.
- Ability to accurately follow directions (oral and written).

Critical Reasoning Skills

Demonstrate critical reasoning skills including, but not limited to intellectual, conceptual, integrative and quantitative abilities.

Indicators include, but are not limited to these examples:

- Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
- Demonstrate ability to acquire, retain and apply new and learned information.

Motor and Sensory Function

Demonstrate sufficient motor and sensory function.

Indicators include, but are not limited to, these examples:

- Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom, online).
- Physical stamina sufficient to complete online didactic study, which will include prolonged periods of sitting.

Behavioral and Social Attributes Technical Standard

Demonstrate the behavioral and social attributes vital to participation in a graduate-level academic program.

Indicators include, but are not limited to, these examples:

- Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
- Ability to develop mature and effective professional relationships with faculty and other members of the educational and healthcare team.
- Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
- Demonstrate impartial motives, attitudes, and values in roles, functions and relationships.
- Ability to monitor and react appropriately to one's own emotional needs and responses.
- Display appropriate flexibility and adaptability in the face of stress or uncertainty in teaching and learning environments.
- Compliance with standards, policies and practices set forth in the program handbook.

Pathologists' Assistant Programs

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future.

Programs

Master of Health Sciences, Pathologists' Assistant Program

- Pathologists' Assistant (MHSPA) (p. 283)

Master of Health Sciences, Pathologists' Assistant Pathologists' Assistant (MHSPA)

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future at VHS.

Admission

Candidates must have completed all undergraduate degree requirements and have been issued a bachelor's degree prior to matriculating as a Macon & Joan Brock Virginia Health Sciences at Old Dominion University student. If the bachelor's degree was issued by a U.S. college or university, as a general rule it should be from a regionally accredited institution. Official transcripts from the awarding institution must specify the date upon which the degree was issued.

Applicants must have a bachelor's degree from an accredited university with a weighted undergraduate cumulative grade point average of 3.0 or higher (on a 4-point scale) and must have completed the following:

- Required science courses
 - Two semesters of General Biology with lab or equivalent
 - Two semesters of General Chemistry with lab
 - Two semesters of Organic Chemistry with lab or one semester of Organic Chemistry with lab and one semester of Biochemistry
 - One semester of Mathematics
 - One semester of Physics
- Recommended science courses (if a deficiency is apparent with low GPA on prerequisite course work)
 - One semester of Microbiology
 - One semester of combined Anatomy and Physiology
 - Neuroanatomy and Histology courses
- Required Shadowing Experience
 - The Macon & Joan Brock Virginia Health Sciences at Old Dominion University Pathologists' Assistant Program requires applicants to have shadowing experience. In many instances, 30 to 40 hours of shadowing can be sufficient to fulfill this requirement. The shadowing experience should include observing the dissection and dictation of a variety of complex specimens, exposure to the frozen section technique, and if feasible autopsy cases (medical or forensic). We encourage candidates to obtain as much shadowing experience as is possible prior to the interview process.
- Official transcripts must be sent in an unopened envelope directly to GradCAS.
- Submit three letters of recommendation from faculty (**in the prerequisite courses**) who are familiar with the student's ability to be successful in a graduate program. Letters from employers may be submitted and will be considered as supplemental letters but will not serve in lieu of the three required from faculty.
- Letter of intent/personal essay outlining the applicant's academic and professional goals and their particular interest in the Pathologists' Assistant career.
- Resume/CV with health-related experience listed (including shadowing experience)
- GRE GMAT or MCAT scores will be relevant for five years. Older scores will need to be retaken.
- An interview with Pathologists' Assistant Admissions Committee
- Complete and submit online application (<https://gradcas2019.liaisoncas.com/>) (including \$125 nonrefundable application fee). Application will not be deemed complete until the application fee has been paid.

Additional Requirements for International Applicants

- English Proficiency Exams
 - TOEFL (<https://www.ets.org/toefl/>) (Minimum scores: Paper 550, Computer 213, iBT 80)
 - IELTS (<https://www.ielts.org/en-us/>) (Minimum scores: Total 6.5, Subscores: 6)
- In addition to official transcripts, provide both a transcript evaluation and translation (course-by-course evaluation with an overall GPA calculation) through one of these services:
 - Educational Credential Evaluators (<https://www.ece.org/ECE/>) or World Education Services (<https://www.wes.org/>)

Technical Standards

Technical standards for admission are defined as "physical, cognitive and behavioral abilities required for satisfactory completion of all aspects of the curriculum and for entry into the profession."

The technical standards for admission establish the expectations and abilities considered essential for students admitted to the Macon & Joan Brock Virginia Health Sciences at Old Dominion University Pathologists' Assistant program in order to achieve the level of competency required for graduation and competency in the practice for a Pathologists' Assistant.

Applicants to the program must possess independent ability, aptitude and skills in the following areas - observation, communication, critical reasoning, motor and sensory functions and behavioral and social attributes - as outlined below. It is expected that students also have sufficient computer skills and are comfortable with electronic communication and media to successfully and professionally function as a Pathologists' Assistant student.

Observation Skills Technical Standard

Demonstrate sufficient attention and proficiency in observation skills (visual, auditory and tactile) in the lecture hall, laboratory and clinical rotations and setting.

Indicators include but are not limited to the following examples:

- Accurate observation and participation in the lecture hall and the laboratory and during clinical rotations at affiliated hospitals and other clinical settings.
- Accurate identification of appropriate pathology in frozen and fixed surgical specimens and gross findings in autopsy cases.
- Accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and findings in academic and clinical settings.

Communication Skills Technical Standard

Demonstrate effective verbal and non-verbal communication skills with other students, faculty, pathologists, surgeons and other healthcare providers from different social backgrounds, cultural backgrounds and varying personalities.

Indicators include but are not limited to the following examples:

- Clear, efficient and intelligible articulation of English language.
- Legible, efficient and intelligible written English language.
- Ability to prepare and communicate concise oral and written summaries of gross surgical specimens and case presentations of autopsy findings.
- Ability to provide appropriate dictations of gross specimens.
- Record examination and provide clear, accurate and precise descriptions of autopsy cases.

Critical Reasoning Skills Technical Standard

Demonstrate critical reasoning skills required to undertake the full curriculum, achieve the level of competency required by the faculty and meet the demands of a fully competent Pathologists' Assistant. These skills include, but are not limited to, intellectual, conceptual, integrative and quantitative abilities.

Indicators include, but are not limited to, these examples:

- Accurate and efficient reading skills (English language).
- Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
- Comprehend the spatial relationships of structures (e.g. three-dimensional relationships)
- Demonstrate ability to acquire, retain, assimilate and apply large amounts of complex, technical and detailed general medical, specific pathological and non-medical information.
- Demonstrate ability to synthesize and apply concepts and information from various disciplines in order to deliver appropriate technical support.
- Demonstrate appropriate judgment in pathological cases, including planning, time management, extraction of critical information from review of medical charts and medical history and use of resources to obtain relevant information.

Motor and Sensory Function Technical Standard

Demonstrate sufficient motor and sensory function to perform typical functions of a Pathologists' Assistant, including, but not limited to, physical examinations of autopsies, assessment of surgical pathology specimens, tissue preparation and fixation techniques and general functions that pertain to a career as a Pathologists' Assistant.

Indicators include but are not limited to the following examples:

- Functional and sufficient sensory capacity (visual, auditory and tactile) to adequately perform a complete physical examination in autopsy cases and elicit information gained from proper use of examination tools and maneuvers.
- Execute fine and gross motor movements with sufficient coordination, postural control, equilibrium and hand-eye coordination to safely participate in laboratory sessions, use standard medical/surgical instruments, assess cadavers, provide appropriate summary and findings and participate in basic and advanced assistance of pathological diagnostic maneuvers and procedures.
- Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom, laboratories and clinical rotations, including appropriate negotiation of self in various clinical support environments).
- Physical stamina sufficient to complete the rigorous course of didactic and clinical study, which may include prolonged periods of sitting, standing and/or rapid ambulation.
- Coordination of motor skills necessary to respond to “on-call” emergency situations quickly and appropriately.

Behavioral and Social Attributes Technical Standard

Demonstrate the behavioral and social attributes vital to participation in a professional program and service as a practicing professional Pathologists’ Assistant.

Indicators include but are not limited to the following examples:

- Possess personal qualities that facilitate effective peer interactions (e.g., compassion, empathy, integrity, honesty, benevolence, confidentiality).
- Possess the emotional health required for full utilization of mental faculties (including judgment, orientation, affect and cognition).
- Ability to establish rapport and develop mature and effective professional relationships with faculty, professional peers, the public and other members of the medical profession team.
- Demonstrate impartial motives, attitudes and values in roles, functions and relationships. Communicate and interact with, in a non-judgmental way, persons who differ from oneself and one’s beliefs in a variety of ways, including but not limited to gender, age, race, ethnicity, socio-economic status, culture, creed, military status, sexual orientation and identity and religious or spiritual beliefs.
- Ability to monitor and react appropriately to one’s own emotional needs and responses.
- Display appropriate flexibility, adaptability, composure and emotional stability during periods of high stress or uncertainty associated with didactic and clinical encounters and environments.
- Ability to accurately follow oral and written directions with prompt completion of all responsibilities in the classroom and clinical setting.
- Compliance with standards, policies and practices set forth in the program handbook (https://www.evms.edu/media/evms_public/departments/health_professions/pathologist_assistant/PathA_Student_Handbook_8_09_18_Ver6.0_FINAL.pdf).

These standards will serve as prerequisites for entrance, continuation, promotion and graduation from the Pathologists’ Assistant program. Pathologists’ Assistant students and applicants must be prepared to meet the technical standards, with or without reasonable accommodation, in order to complete the program and indicate possession of such ability prior to their matriculation into the program and during registration for each semester.

Note that the use of an intermediary (a person trained to perform essential skills on behalf of the student) is not permitted.

Macon & Joan Brock Virginia Health Sciences at Old Dominion University must maintain the integrity of the curriculum and preserve those elements deemed essential to the education of a pathologists’ assistant and cannot compromise the health and safety of other students or health officials.

Inquiry by the program faculty and staff regarding disability is strictly prohibited. The Pathologists’ Assistant program, in accordance with Macon & Joan Brock Virginia Health Sciences at Old Dominion University policy and as delineated by federal and Virginia law, does not discriminate in admissions, educational programs or employment against any individual on the basis of that individual’s disability and will make good faith efforts at providing reasonable accommodation as required. However the program reserves the right not to admit or register students who cannot meet the technical standards or who would constitute a direct threat to the health and safety or others.

Applicants or students who may have questions regarding these technical standards or who believe they may need to request reasonable accommodation in order to meet the standards are encouraged to contact the Macon & Joan Brock Virginia Health Sciences at Old Dominion University Disability Officer by email at studentdisability@evms.edu or by phone at 757.446.7261.

Revealing a disability is voluntary; however, such disclosure is necessary before any accommodations may be made in the learning environment or in the program’s procedures. Information regarding disabilities is handled in a confidential manner

Curriculum Requirements

Students rotate through various facilities where they observe and practice the various aspects of anatomical pathology under the supervision of pathologists and pathology assistants. Rotations account for a minimum of 20 credit hours. Review the Supervised Clinical Practice Guidebook for more information.

Course Sequence - 1st Year

<i>Term 1 - Fall</i>	<i>14</i>
PATH 500	Introduction to Anatomical Laboratories
PATH 501	Medical Ethics
PATH 503	Essential Physiology & Anatomy
PATH 512	Histotechnology I
PATH 513	Histology Health Professions
PATH 514	Medical Terminology
<i>Term 2- Spring</i>	<i>16</i>
PATH 504	Anatomical Foundations
PATH 507	Neuroanatomy
PATH 510	Pathophysiology
PATH 515	Embryology
PATH 516	General Mechanisms of Disease
<i>Term 3 - Summer</i>	<i>13</i>
PATH 502	Educational Methodologies
PATH 506	Microbiology
PATH 508	Medical Photography
PATH 509	Autopsy & Surgical Path Techniques

Physician Assistant Programs

The PA program is divided into two phases, spanning 28 consecutive months over seven semesters.

Phase I, the 16-month pre-clinical year, spans four consecutive semesters (66.5 credit hours) and incorporates traditional classroom interaction with clinical skills development and simulated patient interaction through the Sentara Center for Simulation and Immersive Learning.

In Phase II (34 credit hours), students complete nine clinical field experiences with supervised, direct patient care in various medical and surgical disciplines, which form the basis of the professional socialization process and adaptation to the role and functions of a physician assistant.

Most of the clinical sites are located throughout Hampton Roads. Opportunities exist for clinical placements outside the region and for students to initiate new rotation sites. However, international clinical placements are not an option.

Graduates are required to pass the Physician Assistant National Certifying Examination (PANCE) and meet state-specific regulations in order to practice clinically.

Programs

Master of Physician Assistant Program

- Physician Assistant (MPA) (p. 286)

Master of Physician Assistant Physician Assistant (MPA)

The program upholds a distinct admissions process tailored specifically to its goals and standards. Prospective students are strongly encouraged to review the admissions criteria (https://www.evms.edu/education/masters_programs/physician_assistant/admissions_information/) thoroughly to ensure they are well-prepared for a successful future at VHS.

Admission

Admission to the PA profession has become increasingly competitive over the years. The PA program evaluates applicants through four lenses: cognitive/academic, personal/non-cognitive, healthcare experience and community service. Detailed information about admissions criteria for a competitive application can be found on our Admissions page (https://www.evms.edu/education/masters_programs/physician_assistant/admissions_information/).

Curriculum Requirements

The PA program is divided into two phases, spanning 28 consecutive months over seven semesters.

Phase I, the 16-month pre-clinical year, spans four consecutive semesters (66.5 credit hours) and incorporates traditional classroom interaction with clinical skills development and simulated patient interaction through the Sentara Center for Simulation and Immersive Learning.

In Phase II (34 credit hours), students complete nine clinical field experiences with supervised, direct patient care in various medical and surgical disciplines, which form the basis of the professional socialization process and adaptation to the role and functions of a physician assistant.

Graduates are required to pass the Physician Assistant National Certifying Examination (PANCE) and meet state-specific regulations in order to practice clinically.

Course Sequence

PA students are expected to complete the program curriculum in the order specified below. Each semester's coursework is to be considered prerequisite to the next semester. Students may not enter the program with advanced standing, regardless of educational or work experience, and no accelerated curriculum or course waivers are offered.

For the courses that span more than one semester, credit hours are awarded in the last semester that it is taken.

Phase I: Didactic Curriculum

Term 1 - Spring 16

MPAS 601	Introduction to the PA Profession
MPAS 602	Business of Medicine
MPAS 603	Introduction to Medical Diagnostics
MPAS 604	Legal & Ethical Issues in Medicine
MPAS 615	Anatomy for Health Professions
MPAS 619	Physiology and Pathophysiology
MPAS 620	Foundations of IPE *

Term 2 - Summer 16

MPAS 623	Medical Diagnostics I
MPAS 624	Patient Counseling & Education
MPAS 625	Clinical Assessment & Reasoning I
MPAS 628	Clinical Pharmacology I
MPAS 639	Introduction to Clinical Medicine I

Term 3 - Fall 17.5

MPAS 640	Practicum for IPE **
MPAS 643	Medical Diagnostics II
MPAS 644	Introduction to Epidemiology and Evidence-Based Medicine
MPAS 645	Clinical Assessment & Reasoning II
MPAS 648	Clinical Pharmacology II
MPAS 649	Introduction to Clinical Medicine II

Term 4 - Spring 16

MPAS 663	Medical Diagnostics III
MPAS 664	Psychosocial Elements of Wellness
MPAS 665	Clinical Assessment & Reasoning III
MPAS 689	Introduction to Clinical Medicine III
MPAS 688	Clinical Pharmacology III

Phase II: Clinical Curriculum ***

Term 5 - Summer 16

MPAS 701	Introduction to Clinical Practice
MPAS 702	Interprofessional Practice ****
MPAS 794	Senior Seminar ****

3 SCPE Courses from SCPE Pool

Term 6 - Fall 9

3 SCPE Courses from SCPE Pool

Term 7 - Spring 9

3 SCPE Courses from SCPE Pool

SCPE Pool Courses

MPAS 710	SCPE in Family Medicine
MPAS 720	SCPE in Pediatric Medicine
MPAS 730	SCPE in General Internal Medicine
MPAS 740	SCPE in Emergency Medicine
MPAS 750	SCPE in General Surgery
MPAS 760	SCPE in Womens Health
MPAS 770	SCPE in Psychiatry & Behavioral Health

MPAS 780	SCPE in Elective I	
MPAS 785	SCPE in Elective II	
Total Credit Hours		99.5
*	Spans semesters 1 & 2. Grade earned after 2nd semester	
**	Spans semesters 3 & 4. Grade earned after 4th semester	
***	Each semester is approximately four months in duration. The sequence of clinical rotations is subject to change based on the number, specialty and location of preceptor sites, and will vary from student to student. Clinical electives include Orthopedics, Neonatology, Neurology, Dermatology, Cardiothoracic Medicine, Cardiology, Neonatology, Plastic Surgery, Trauma, Endocrinology, Pediatric Neurology, Gastroenterology, Pediatric Gastroenterology, and Nephrology. Additional electives can be pre-arranged with proper planning on the part of the student.	
****	Courses that span the entire clinical year (semesters 5, 6, & 7). Grade earned after 7 th semester.	

Reproductive Clinical Science Programs

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future.

Programs

Master of Science Program

- Reproductive Clinical Science-Embryology and Andrology (MS) (p. 287)

Doctor of Philosophy Program

- Reproductive Clinical Sciences-Embryology and Andrology (PhD) (p. 289)

Certificate Programs

- Clinical Andrology Certificate (p. 291)
- Clinical Embryology Certificate (p. 292)

Master of Science Reproductive Clinical Science-Embryology and Andrology (MS)

The 24-month program provides coursework and research opportunities that give students general and specialized biomedical sciences training. The program is designed to be completed in six semesters at an average of two to three courses per semester for a total of 16 online courses (36 credits). Those entering the program with no experience will be required to take elective internship courses in their second year to gain clinical IVF experience.

Admissions

Candidates must have completed all undergraduate degree requirements and have been issued a bachelor's degree prior to matriculating as an EVMS student. If the bachelor's degree was issued by a U.S. college or university, as a general rule, it should be from a regionally accredited institution. However, the program may grant exceptions on a case-by-case basis. Official transcripts from the awarding institution must specify the date upon which the degree was issued. Graduate level course transfer credits will be considered on a case-by-case basis.

Applicants must:

- Have a grade point average of 2.75 (B-) or better.
- Have successfully completed two semesters of college-level biology and chemistry with lab.
- Submit two letters of recommendation (https://www.evms.edu/media/evms_public/departments/distance_education/EVMS-GradCAS_Reference-Form2.pdf) (submitted by the reference electronically) from individuals who are acquainted with you academically and/or professionally. References from close friends and family members are unacceptable.
- Submit a personal essay. Complete essay instructions are available inside the online application portal.
- Submit a CV/resume.

If you are applying as an experienced embryologist or andrologist, you must:

- Currently, work or have worked in clinical IVF or basic reproductive research as an embryologist, andrologist, nurse, physician or research scientist.
- Complete a Reproductive Clinical Science MS Degree Program Skills Report Form (https://www.evms.edu/media/evms_public/departments/health_professions/reproductive_clinical_science/Reproductive_Clinical_Science_MS_Degree_Program_Skills_Report.pdf) and submit it within your online application portal.

If you are applying with no experience, you must:

- Shadow at an IVF facility and obtain a letter that lists what was observed.
- Complete a Reproductive Clinical Science Master's Program Shadowing/Observation Report Form (https://www.evms.edu/media/evms_public/departments/health_professions/reproductive_clinical_science/MRCS_Shadowing_Report.pdf) and submit it within your online application portal.

International students, or applicants whose native language is not English, must take the TOEFL and receive a score equal to or greater than 550 for the paper-based test, 213 for the computer-based test or 80 for the iBT exam.

Additional Requirements for International Applicants

In addition to meeting the admissions requirements above, international applicants are required to meet the following:

Foreign Transcripts

- Request a course by course evaluation of all foreign transcripts showing GPA calculation on a four point scale.
- Eastern Virginia Medical School does not endorse any particular evaluating and/or credentialing service. You can use the following agencies:
 - World Education Services (<http://www.wes.org/>)
 - Educational Credential Evaluators (<http://www.ece.org/>)

Translation: If the academic institution that you attended does not issue documents in English, the credentialing agency will require that you submit a word-for-word translation of your transcripts. You can contact University Language Services (<http://www.universitylanguage.com/>) to submit your transcript for translation and instruct them to send the translated transcript to the credentialing agency you choose.

Transcript Evaluation: International students whose native language is not English may contact one of the following credentialing agencies to submit transcripts for official evaluation: WES (<http://www.wes.org/>) or ECE (<https://www.ece.org/>). Instruct the credentialing agency to send the official evaluation (and translation) directly to GradCAS. You must provide both a course-by-course evaluation report along with an overall GPA calculation. Evaluations are mandatory even for transcripts from institutions that report grades in English. This provides EVMS with a U.S. credit equivalency and allows the transcripts to be reviewed accurately. WES and ECE are preferred credentialing services. If you wish to select a company other than these, please contact the program (russelhi@evms.edu) first.

TOEFL: International applicants whose native language is not English must take the TOEFL exam and receive a score as follows: Paper-based test: 550; Computer-based test: 213; iBT exam: 80. Please go to the ETS website (<http://www.ets.org/>) to take the TOEFL exam, and request your TOEFL scores be sent directly to GradCAS. ETS reports scores for two years after the test date. If you have previously taken the TOEFL but the two-year period has expired, the program will accept a personal copy if available.

GradCAS: GradCAS will **ONLY** accept the evaluation report from the credentialing agency. **Do not send** your foreign transcript to GradCAS.

All other foreign transcript evaluations from the credentialing agency must be sent directly to GradCAS to the following address:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

GRE School Code: 5729 TOEFL School Code is B886

Applicant Help Center

- Having trouble accessing the application? The preferred browsers are Google Chrome or Firefox
- Applicant Help Center (https://help.liasonedu.com/GradCAS_Applicant_Help_Center/)
- If you have questions about your application status, please contact your GradCAS Customer Service Representative at tel:8573042086 (https://catalog.evms.edu/preview_program.php?catoid=9&poid=2048#tel:8573042086) or GradCASinfo@liaisonedu.com

Technical Standards

The abilities and skills candidates and students must possess in order to complete the education and training associated with the master's in Reproductive Clinical Science are referred to as technical standards. These abilities and skills are essential for clinical laboratory practice as an embryologist and/or andrologist.

1. Observation Skills Technical Standard

- 1.1. Demonstrate sufficient attention and accuracy in observation skills (visual, auditory and tactile) in the lecture hall, laboratory and/or online settings. Indicators include, but are not limited to, accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and other imaging texts.

2. Communication Skills Technical Standard

- 2.1. Demonstrate effective communication skills with healthcare professionals and with people of varying cultures, ethnicities and personalities.
- 2.2. Indicators include, but are not limited to, these examples:
 - Clear, efficient and intelligible articulation of spoken English language.
 - Legible, efficient and intelligible written English language.
 - Accurate and efficient English language reading skills.
 - Accurate and efficient, expressive and receptive communication skills.
 - Ability to accurately follow directions (oral and written).

3. Critical Reasoning Skills Technical Standard

- 3.1. Demonstrate critical reasoning skills, including, but not limited to, intellectual, conceptual, integrative and quantitative abilities.
- 3.2. Indicators include, but are not limited to, these examples:
 - Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
 - Demonstrate ability to acquire, retain and apply new and learned information.

4. Motor And Sensory Function Technical Standard

4.1. Demonstrate sufficient motor and sensory function to perform typical clinical laboratory duties.

4.2. Indicators include, but are not limited to, these examples:

- Functional and sufficient sensory capacity (visual, auditory and tactile) to use laboratory equipment and perform procedures.
- Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom, online and laboratories).
- Physical stamina sufficient to complete the online didactic and some laboratory study, which will include prolonged periods of sitting.

5. Behavioral And Social Attributes Technical Standard

5.1. Demonstrate the behavioral and social attributes vital to participation in a professional program and service as a practicing laboratory professional.

5.2. Indicators include, but are not limited to, these examples:

- Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
- Ability to develop mature and effective professional relationships with faculty, patients, the public and other members of the healthcare team.
- Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
- Demonstrate impartial motives, attitudes and values in roles, functions and relationships.
- Ability to monitor and react appropriately to one's own emotional needs and responses.
- Display appropriate flexibility and adaptability in the face of stress or uncertainty associated with clinical encounters and clinical environments.
- Compliance with standards, policies and practices set forth in the EVMS Student Handbook and the program handbook.

Curriculum Requirements

Students must attend two residential courses at Eastern Virginia Medical School's campus in Norfolk, Virginia. First-year students' five-day session is in the third week of July; second-year students take their seven-day course in the third week of June.

Course Sequence

<i>Term 1 - Summer</i>		5
RCS 700	Biochemistry and Molecular Cell Biology	
RCS 701	Introduction IVF, Laboratory Tech and Skills Development	
<i>Term 2 - Fall</i>		7
RCS 702	Molecular Biology & Genetics	
RCS 703	Female Reproductive Endocrinology & Infertility	
RCS 704	Current Topics in IVF - Journal Club	
<i>Term 3 - Spring</i>		8
RCS 705	IVF Technology	
RCS 706	Gametes and Embryos	
RCS 707	Research Methods and Capstone/Thesis: Project and Statistics	
<i>Term 4 - Summer</i>		3
RCS 708	Advanced IVF, Laboratory Tech and Skills Development	
RCS 709	Research Methods Capstone/Thesis: Project Proposal	
<i>Term 5 - Fall</i>		7
RCS 710	Genetics of Reproduction and Infertility	

RCS 711	Research Methods Capstone/Thesis: Master's Project	
RCS 712	Male Reproductive Function and Dysfunction	
<i>Term 6 - Spring *</i>		6
RCS 713	Research Methods Capstone/Thesis: Scientific Writing	
RCS 714	Cryopreservation	
RCS 715	Ethics, Society, & ART	
RCS 768	IVF Clinical Internship	
<i>Additional Course **</i>		
RCS 716	Scientific Writing	
Total Credit Hours		36

* Students who do not have previous experience are required to take internship courses.

** Students who do not successfully complete the thesis requirement will be required to enroll in this extended writing course until it is completed. This course can only be repeated a select number of times.

Doctor of Philosophy Reproductive Clinical Sciences- Embryology and Andrology (PhD)

This is an online program that has been designed for adult learners and working professionals who are in the workforce while they are enrolled in this program, with the exception of one on-campus course during the program. This 49 credit-hour program is projected to be completed in 32 months; however, due to the nature of independent research, more time may be needed.

The program starts in the fall. Students take two years of graduate-level didactic and research development courses and must pass a comprehensive qualifying exam at the end of their third semester to advance to candidacy. The final year of the program focuses on dissertation research. During the final semester, the students will prepare and defend their dissertation projects. Six to eight students are accepted each year to this three-year online program.

Admission

Candidates must have completed all master's degree requirements and have been issued a master's degree prior to matriculating as an EVMS student. If the master's degree was issued by a U.S. college or university, as a general rule it should be from a regionally accredited institution. However, the program may grant exceptions on a case-by-case basis. Official transcripts from the awarding institution must specify the date upon which the degree was issued. Graduate-level transfer credits will be considered on a case-by-case basis.

Listed below are the requirements for application and admission into the RCS PhD program. If you have any questions or concerns about these requirements, please contact the program (<http://catalog.odu.eduemailto:RCSCourses@evms.edu>).

Applicants must:

- Have a Master of Science degree in one of the following areas: Clinical Embryology, Biology, Molecular Biology, Developmental Biology, Reproductive Sciences or Biochemistry. Other Master of Science Degrees may be acceptable; contact the program to inquire.
- Have a grade point average (GPA) of 3.0 (B) or higher in the master's degree.
- Prerequisites: Have successfully completed a master's in Clinical Embryology and Andrology or in an acceptable master's with one semester of each of the following:

- Biochemistry
- Introductory Biostatistics
- Molecular Cellular Biology
- Genetics or Developmental Biology
- Be an established clinical embryologist/andrologist with at least three years of embryology experience. Submit letters of support from employers indicating level of experience and willingness to allow applicant to perform research projects in their current position.
- Submit three letters of recommendation (https://www.evms.edu/media/evms_public/departments/distance_education/EVMS-GradCAS_Reference-Form2.pdf) (submitted by the reference electronically) from individuals who are acquainted with you academically and/or professionally. References from close friends and family members are not acceptable.
- Letters of Support to Conduct Research
 - Submit a letter of support from your employer, lab director or medical director stating that you will be allowed to conduct research where you work as part of the PhD in RCS.
 - This letter is a separate letter from the letters of Recommendation.
- Submit a personal essay that will persuade the faculty that your past experiences will provide the foundation for success in graduate school. The statement will also be reviewed as an example of your ability to communicate effectively.
- Curriculum vitae and/or resume

International students, or applicants whose native language is not English, must take the TOEFL exam.

Additional Requirements for International Applicants

In addition to meeting the admissions requirements above, international applicants are required to meet the following:

Foreign Transcripts

- Request a course by course evaluation of all foreign transcripts showing GPA calculation on a four point scale.
- Eastern Virginia Medical School does not endorse any particular evaluating and/or credentialing service. You can use the following agencies:
 - World Education Services (<https://www.wes.org/>)
 - Educational Credential Evaluators (<https://www.ece.org/>)

Translation: If the academic institution that you attended does not issue documents in English, the credentialing agency will require that you submit a word-for-word translation of your transcripts. You can contact University Language Services (<https://www.universitylanguage.com/>) to submit your transcript for translation and instruct them to send the translated transcript to the credentialing agency you choose.

Transcript Evaluation: International students whose native language is not English may contact one of the following credentialing agencies to submit transcripts for official evaluation: WES (<https://www.wes.org/>) or ECE (<https://www.ece.org/>). Instruct the credentialing agency to send the official evaluation (and translation) directly to GradCAS. You must provide both a course-by-course evaluation report along with an overall GPA calculation. Evaluations are mandatory even for transcripts from institutions that report grades in English. This provides EVMS with a U.S. credit equivalency and allows the transcripts to be reviewed accurately. WES and ECE are preferred credentialing services. If you wish to select a company other than these, please contact the program (russelhi@evms.edu) first.

TOEFL: International applicants whose native language is not English must take the TOEFL exam and receive a score as follows: Paper-based test: 550; Computer-based test: 213; iBT exam: 80. Please go to the ETS (<https://www.ets.org/>) website to take the TOEFL exam, and request your TOEFL scores be sent directly to GradCAS. ETS reports scores for two years after the test date. If you have previously taken the TOEFL but the two-year period has expired, the program will accept a personal copy if available.

GradCAS: GradCAS will **ONLY** accept the evaluation report from the credentialing agency. Do not send your foreign transcript to GradCAS.

All other foreign transcript evaluations from the credentialing agency must be sent directly to GradCAS to the following address:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

GRE School Code: 5729 TOEFL School Code is B886

Applicant Help Center

- Having trouble accessing the application? The preferred browsers are Google Chrome or Firefox
- Applicant Help Center (https://help.liaisonedu.com/GradCAS_Applicant_Help_Center/)
- If you have questions about your application status, please contact your GradCAS Customer Service Representative at 857.304.2086 or GradCASinfo@liaisonedu.com.

Technical Standards

The abilities and skills candidates and students must possess in order to complete the education and training associated with Reproductive Clinical Science PhD program are referred to as technical standards. These abilities and skills are essential for clinical laboratory practice as an embryologist and/or andrologist.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory and tactile) in the lecture hall, laboratory and/or online settings. Indicators include, but are not limited to, accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with healthcare professionals and with people of varying cultures, ethnicities and personalities.

2.02 Indicators include, but are not limited to, these examples:

1. Clear, efficient and intelligible articulation of spoken English language.
2. Legible, efficient and intelligible written English language.
3. Accurate and efficient English language reading skills.
4. Accurate and efficient, expressive and receptive communication skills.
5. Ability to accurately follow directions (oral and written).

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including, but not limited to, intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include, but are not limited to, these examples:

1. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
2. Demonstrate ability to acquire, retain and apply new and learned information.

4.0 Motor And Sensory Function Technical Standard

4.01 Demonstrate sufficient motor and sensory function to perform typical clinical laboratory duties.

4.02 Indicators include, but are not limited to, these examples:

1. Functional and sufficient sensory capacity (visual, auditory and tactile) to use laboratory equipment and perform procedures.
2. Execute motor movements that demonstrate safety and efficiency in the various learning settings (i.e., classroom, online and laboratories).

3. Physical stamina sufficient to complete the online didactic and some laboratory study, which will include prolonged periods of sitting.

5.0 Behavioral And Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a professional program and service as a practicing laboratory professional.

5.02 Indicators include, but are not limited to, these examples:

1. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
2. Ability to develop mature and effective professional relationships with faculty, patients, the public and other members of the healthcare team.
3. Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
4. Demonstrate impartial motives, attitudes and values in roles, functions and relationships.
5. Ability to monitor and react appropriately to one's own emotional needs and responses.
6. Display appropriate flexibility and adaptability in the face of stress or uncertainty associated with clinical encounters and clinical environments.
7. Compliance with standards, policies and practices set forth in the EVMS Student Handbook (https://www.evms.edu/education/resources/student_policies_handbooks/) and the program handbook.

Curriculum Requirements

Course Sequence

<i>Term 1 - Fall</i>		7
RCS 801	Advanced Statistics	
RCS 802	Assisted Reproduction Evidence-Based Practice Journal Club	
RCS 803	Comparative Anatomy and Physiology of Reproduction	
<i>Term 2 - Spring</i>		7
RCS 804	Experimental Design	
RCS 805	Advanced Topics IVF	
RCS 806	Developmental Biology	
<i>Term 3 - Summer</i>		4
RCS 815	Dissertation Research Proposal Development	
Course Sequence		
<i>Term 4 - Fall</i>		7
RCS 809	Toxicology and Infertility	
RCS 810	Research Literature Review	
RCS 811	Male Infertility Research Literature	
<i>Term 5 - Spring</i>		7
RCS 812	Clinical Laboratory Management	
RCS 814	Genetics and Art	
RCS 898	Dissertation Research	
<i>Term 6 - Summer</i>		3
RCS 898	Dissertation Research	
Course Sequence		
<i>Term 7 - Fall</i>		7
RCS 898	Dissertation Research	
RCS 819	The Business of IVF	
<i>Term 8 - Spring</i>		7
RCS 898	Dissertation Research	
Total Credit Hours		49

Add additional course: RCS 898, Dissertation Research, 1 credit hour.
 Students who do not successfully complete the dissertation requirement

will be required to enroll in this extended research/writing course until it is completed. This course can only be repeated a select number of times.

Certificate

Clinical Andrology Certificate

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future at VHS.

Admissions

Candidates must have completed all undergraduate degree requirements and have been issued a bachelor's degree prior to matriculating as a VHS student. If the bachelor's degree was issued by a U.S. college or university, as a general rule, it should be from a regionally accredited institution. However, the program may grant exceptions on a case-by-case basis. Official transcripts from the awarding institution must specify the date upon which the degree was issued. Graduate-level course transfer credits will be considered on a case-by-case basis.

Applicants must:

- Have a grade point average of 2.75 (B-) or better.
- Have successfully completed two semesters of college-level biology and chemistry with lab.
- Submit two letters of recommendation (https://www.evms.edu/media/evms_public/departments/distance_education/EVMS-GradCAS_Reference-Form2.pdf) (submitted by the reference electronically) from individuals who are acquainted with you academically and/or professionally. References from close friends and family members will not be acceptable.
- Submit a personal essay. Complete essay instructions are available inside the online application portal.
- Curriculum vitae and/or resume

If you are applying as an experienced embryologist or andrologist, you must:

- Currently, work or have worked in clinical IVF or basic reproductive research as an embryologist, andrologist, nurse, physician or research scientist.
- Complete a Reproductive Clinical Science MS Degree Program Skills Report Form (https://www.evms.edu/media/evms_public/departments/health_professions/reproductive_clinical_science/Reproductive_Clinical_Science_MS_Degree_Program_Skills_Report.pdf) and submit it within your online application portal.

If you are applying with no experience, you must:

- Shadow at an IVF facility and obtain a letter that lists what was observed.
- Complete a Reproductive Clinical Science Master's Program Shadowing/Observation Report Form (https://www.evms.edu/media/evms_public/departments/health_professions/reproductive_clinical_science/MRCS_Shadowing_Report.pdf) and submit it within your online application portal.

Contact the program (RCSCourses@evms.edu) for more details and assistance if needed.

International students, or applicants whose native language is not English, must take the TOEFL and receive a score equal to or greater than 550 for the paper-based test, 213 for the computer-based test or 80 for the iBT exam.

Application Procedures

- Log into GradCAS (<http://gradcas.liaisoncas.org/apply/>), create a username/password, and complete and submit the online form, including your personal essay, job history and CV/resume, along with the \$125 application fee. If you cannot complete the form in one sitting, your information will be saved, and you may return to finish the process.
- Using the form provided within the online system, submit two letters of Recommendation (https://www.evms.edu/media/evms_public/

[departments/distance_education/EVMS-GradCAS_Reference-Form2.pdf](#)) from two individuals who can realistically evaluate your abilities and probability of success in the program. Preferably, one of the letters should be from your current employer.

- List all related work or volunteer experience.
- Official transcripts from each college/university attended, including an official transcript from any degree-granting institution that specifies the date upon which the degree was issued. Transcripts must be sent electronically or by mail directly to GradCAS. Any **official transcript** received by the program or the School of Health Professions Admissions and Enrollment department will not be accepted. If you do not list or send official transcripts for all institutions attended, processing of your application will be delayed.
- < >Sending Transcripts Electronically (Click here (https://help.liaisonedu.com/GradCAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_GradCAS/Sending_Official_Transcripts_to_GradCAS/1_US_and_English_Canadian_Transcripts/#How_to_Send_US_or_English_Canadian_Transcripts) for additional information) GradCAS only accepts electronic transcripts from: Credentials Solutions (<http://www.transcriptsplus.net/order/>) Parchment (<http://www.parchment.com/order/>) National Student Clearinghouse (<http://www.studentclearinghouse.org/>) To send transcripts to GradCAS by mail: Provide the registrar with the following items: GradCAS Transcript Request Form. Ask the registrar to attach it to your official transcripts. This form is not required but strongly recommended as it helps ensure your official transcripts are properly matched to your application. If you cannot use this form, make sure the registrar prints "GradCAS" and your full GradCAS ID# on the transcript before mailing it. Any school-specific forms required by the registrar. Any transcript fees required by the registrar. All information needed by the registrar to properly identify you in the school's database including any name changes. Your GradCAS ID#. Institutions must send transcripts directly to GradCAS to the following address: A completed application requires a paid application fee, all transcripts and at least 2 letters of recommendation (https://www.evms.edu/media/evms_public/departments/distance_education/EVMS-GradCAS_Reference-Form2.pdf)
- All coursework must be entered in GradCAS in the Transcript Entry section

International Applicant Procedures

In addition to meeting the admissions requirements above, international applicants are required to meet the following:

Foreign Transcripts

- Request a course by course evaluation of all foreign transcripts showing GPA calculation on a four point scale.
- Eastern Virginia Medical School does not endorse any particular evaluating and/or credentialing service. You can use the following agencies:
 - World Education Services (<http://www.wes.org/>)
 - Educational Credential Evaluators (<http://www.ece.org/>)

Translation: If the academic institution that you attended does not issue documents in English, the credentialing agency will require that you submit a word-for-word translation of your transcripts. You can contact University Language Services (<http://www.universitylanguage.com/>) to submit your transcript for translation and instruct them to send the translated transcript to the credentialing agency you choose.

Transcript Evaluation: International students whose native language is not English may contact one of the following credentialing agencies to submit transcripts for official evaluation: WES (<http://www.wes.org/>) or ECE (<https://www.ece.org/>). Instruct the credentialing agency to send the official evaluation (and translation) directly to GradCAS. You must provide both a course-by-course evaluation report along with an overall GPA calculation. Evaluations are mandatory even for transcripts from institutions that report grades in English. This provides EVMS with a U.S. credit equivalency and allows the transcripts to be reviewed accurately. WES and ECE are preferred

credentialing services. If you wish to select a company other than these, please contact the program (russelhi@evms.edu) first.

TOEFL: International applicants whose native language is not English must take the TOEFL exam and receive a score as follows: Paper-based test: 550; Computer-based test: 213; iBT exam: 80. Internal Transfer Credits: Students taking courses in and completing the Clinical Andrology Certificate may apply to transfer these course credits into the Reproductive Clinical Science - Embryology & Andrology (M.S.) program. A grade of 'B' or better is required for each transferred course. If accepted into the program, approved internal transfer courses will be included on the student's transcript and will be used to calculate the cumulative GPA for the master's degree.

Certificate

Clinical Embryology Certificate

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admission requirements in order to best prepare themselves for a successful future at VHS.

Admissions

Candidates must have completed all undergraduate degree requirements and have been issued a bachelor's degree prior to matriculating as a VHS student. TOEFL: International applicants whose native language is not English must take the TOEFL exam and receive a score as follows: Paper-based test: 550; Computer-based test: 213; iBT exam: 80. Please go to the ETS website (<http://www.ets.org/>) to take the TOEFL exam, and request your TOEFL scores be sent directly to GradCAS. ETS reports scores for two years after the test date. If you have previously taken the TOEFL but the two-year period has expired, the program will accept a personal copy if available.

GradCAS: GradCAS will **ONLY** accept the evaluation report from the credentialing agency. **Do not send** your foreign transcript to GradCAS.

All other foreign transcript evaluations from the credentialing agency must be sent directly to GradCAS to the following address:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

GRE School Code: 5729 TOEFL School Code is B886

Curriculum Requirements

Course Sequence

<i>Term 1 - Fall</i>		3
RCS 703	Female Reproductive Endocrinology & Infertility	
<i>Term 2 - Spring</i>		4
RCS 706	Gametes and Embryos	

RCS 715	Ethics, Society, & ART	
<i>Term 3 - Summer</i>		3
RCS 701	Introduction IVF, Laboratory Tech and Skills Development	
Total Credit Hours		10

Internal Transfer Credits: Students taking courses in and completing the Clinical Embryology Certificate may apply to transfer these course credits into the Reproductive Clinical Science - Embryology & Andrology (M.S.) program. A grade of 'B' or better is required for each transferred course. If accepted into the program, approved internal transfer courses will be included on the student's transcript and will be used to calculate the cumulative GPA for the master's degree.

Surgical Assisting Programs

Through our guided training curriculum, the Surgical Assisting certificate program is designed to deliver candidates an approved curriculum. This 12-month program will start in May each year and be offered online. Students will be required to complete didactic and clinical content requirements. The program will pair students with educational liaisons to support their success in completion of the program.

Eligible candidates must be currently employed in the operating room and must have two years of work experience. These individuals include certified surgical technologists, registered nurses or practicing surgical assistants.

The institution is currently seeking Commission on Accreditation of Allied Health Education Programs accreditation.

As states continue to enact greater legislation requirements for the practice of surgical assisting, the goal of the Certificate of Surgical Assisting program is to assist current professionals and those seeking to enter the profession a training avenue that meets the changing requirements of the professional.

Programs

Master of Surgical Assisting Program

- Surgical Assisting (MSA) (p. 293)

Certificate Program

- Surgical Assistant Certificate (p. 295)

Master of Surgical Assisting Surgical Assisting (MSA)

The VHS Surgical Assisting program is the only CAAHEP-accredited surgical assistant program that does not require its students to be trained as surgical technicians. Our graduates earn a Master of Surgical Assisting degree and become certified in 22 months.

Our mission is to train competent surgical assistants in a dynamic academic environment and nurture future educators and leaders of the profession.

Admission

Candidates must have completed all undergraduate degree requirements and have been issued a bachelor's degree prior to matriculating as an VHS student. If the bachelor's degree was issued by a U.S. college or university, as a general rule it should be from a regionally accredited institution. However, the program may grant exceptions on a case-by-case basis. Official transcripts from the awarding institution must specify the date upon which the degree was issued. All individuals must satisfy the admission requirements. Currently the program does not accept international students or medical graduates.

Candidates must:

- be a U.S. citizen or have proof of permanent residency status. Applicants born outside the U.S. must provide proof of U.S. citizenship

- or permanent residency status upon agreeing to accept a student position at VHS.
- have a baccalaureate degree (in any area of study) and a qualifying grade point average of 3.0 (B) or better.
- have completed all prerequisite courses listed (https://www.evms.edu/education/masters_programs/surgical_assisting/admission/#prerequisites) with a grade of B- or better.
- submit an online application (<https://gradcas.liaisoncas.org/apply/>)
- pay a nonrefundable \$125 application fee
- submit two (2) evaluations of recommendation
- submit a personal statement
- submit official transcripts of all college-level coursework

Applications will be accepted between October 1 and May 31.

Following the online instructions, applicants must contact every college or university attended and request transcripts to be sent directly to GradCAS. GradCAS only accepts electronic transcripts from:

- Credentials Solutions (<http://www.transcriptsplus.net/order/>)
- Parchment (<https://www.parchment.com/order/>)
- National Student Clearinghouse (<https://www.studentclearinghouse.org/>)

To send transcripts to GradCAS by mail, download a transcript request form after you enter each institution in GradCAS. Send the transcript request form to the registrar at the institution and mail to:

**GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471**

The VHS SA program will not accept applications from practicing or retired physicians as these individuals can enter the surgical assistant profession by taking the Certified Surgical Assistant (CSA) Exam (<https://www.csaexam.com/>).

The application review process takes approximately eight weeks. The program director will send letters to all applicants indicating the determination of the admissions review committee. The program has a capacity to admit a maximum of 24 students a year. New classes are admitted in August, and students are enrolled for 22 consecutive months.

Prerequisite Courses

All prerequisite courses must have been completed within the past 10 years with a B- or better for acceptance. Waivers may be granted based on experience and other factors.

- Anatomy and Physiology I and II with lab (human anatomy/physiology recommended): 6-8 credit hours
- General Biology with lab {*an equivalent or a higher-level course in this subject matter*}: 3 credit hours
- General or Intro Chemistry with lab {*an equivalent or a higher-level course in this subject matter*}: 3 credit hours
- Microbiology with lab: 3 credit hours

TOEFL Scores

All applicants who entered the U.S. after the age of 12, have a foreign degree and/or English as a second language are required to provide TOEFL (<https://www.ets.org/toefl/>) scores. This requirement must be fulfilled before your application will be considered complete and eligible for review.

Due to the importance of communication in the English language for both learning and practicing, further demonstration of English proficiency may be requested as a condition of acceptance for applicants exhibiting difficulty with the written or spoken language.

To ensure an ability to function at the graduate level in this healthcare program, the following are acceptable TOEFL scores:

- Internet-based test (preferred): 85
- Computer-based test: 220
- Minimum of 25 in the speaking component

Early Assurance Program

The Early Assurance Program (EAP) offers early acceptance to undergraduate students in their junior year at a participating institution. Applicants must have expressed interest in Surgical Assisting, are in good academic standing and are enrolled at an accredited undergraduate institution. The following institutions are participating in the Early Assurance Program with the VHS Surgical Assisting Program:

- Hampton University
- Norfolk State University
- Regent University
- Virginia Wesleyan University

Eligibility

To be eligible for the Early Assurance Program, a student must:

- Be at least in their Junior Year at participating institution, having been enrolled as a “career student” at the institution from Freshman year of college (this program is not available to students transferring into the institution) and with only one academic year left to complete in their undergraduate education. Interested students should meet with the institution EAP Advisor during their freshman year or within the first semester of coursework to express interest in the EAP.
- Meet citizenship requirements of the Program.
- Meet all undergraduate institutional and degree requirements to continue as a student in good standing.
- Maintain an overall (cumulative) GPA of 3.00 or better.
- Have satisfactorily completed, by the time of application, 4 or 5 prerequisite courses at the institution as indicated on the Program’s EAP website and not having withdrawn from or repeated any course(s) used to satisfy the prerequisites.
- Have no academic or other code of conduct violations.

Technical Standards

The abilities and skills students must possess in order to complete the education and training associated with surgical assistant education are referred to as technical standards. These abilities and skills are essential for clinical practice as a surgical assistant. These technical standards reflect five categorical areas - observation, communication, critical reasoning (intellectual), motor and sensory, and behavioral and social - and represent minimum competency levels.

Students must attest that they meet these technical standards prior to or at the time of matriculation into the surgical assisting program. Students found to be in violation of technical standards are at risk for dismissal from the program. Each standard is defined and includes examples of indicators of minimum competence in that area.

1.0 Observation Skills Technical Standard

1.01 Demonstrate sufficient attention and accuracy in observation skills (visual, auditory and tactile) in the lecture hall, laboratory and the operating room and or clinical settings.

1.02 Indicators include, but are not limited to, these examples:

1. Accurate identification of changes in color of fluids, skin and culture media.
2. Accurate visualization and discrimination of text, numbers, patterns, graphic illustrations and findings on X-ray and other imaging texts.

2.0 Communication Skills Technical Standard

2.01 Demonstrate effective communication skills with healthcare professionals and with people of varying cultures, ethnicities and personalities.

2.02 Indicators include, but are not limited to, these examples:

1. Clear, efficient and intelligible articulation of verbal language.
2. Legible, efficient and intelligible written English language.
3. Accurate and efficient English language reading skills.
4. Accurate and efficient expressive and receptive communication skills.
5. Ability to accurately follow oral and written directions.

3.0 Critical Reasoning Skills Technical Standard

3.01 Demonstrate critical reasoning skills, including, but not limited to, intellectual, conceptual, integrative and quantitative abilities.

3.02 Indicators include, but are not limited to, these examples:

1. Demonstrate ability to measure, calculate, reason, analyze, integrate and synthesize information.
2. Demonstrate ability to acquire, retain and apply new and learned information.

4.0 Motor and Sensory Function Technical Standard

4.01 Demonstrate sufficient motor and sensory function to perform typical surgical assistant duties.

4.02 Indicators include, but are not limited to, these examples:

1. Functional and sufficient sensory capacity (visual, auditory and tactile) to use surgical tools and perform procedures.
2. Execute motor movements that demonstrate safety and efficiency in the various learning settings, (i.e., classroom, laboratories and clinical settings) including appropriate negotiation of self and patient's in-patient care environments.
3. Proper use of clinical instruments and devices for clinical intervention including, but not limited to, suturing needles, catheters, retractors, etc.
4. Ability to lift over 50 lbs. with good body mechanics or 25-50 lbs. with improper body mechanics.
5. Physical stamina sufficient to complete the rigorous course of didactic and clinical study, which may include prolonged periods of sitting, standing, rapid ambulation and/or wearing personal protective equipment, such as lead aprons, for extended periods of time.

5.0 Behavioral and Social Attributes Technical Standard

5.01 Demonstrate the behavioral and social attributes vital to participation in a professional program and service as a practicing professional surgical assistant.

5.02 Indicators include, but are not limited to, these examples:

1. Possess the emotional health required for full utilization of mental faculties (judgment, orientation, affect and cognition).
2. Ability to develop mature and effective professional relationships with faculty, patients, the public and other members of the healthcare team.
3. Possess personal qualities that facilitate effective therapeutic interactions (compassion, empathy, integrity, honesty, benevolence, confidentiality).
4. Demonstrate impartial motives, attitudes and values in roles, functions and relationships.
5. Ability to monitor and react appropriately to one's own emotional needs and responses.
6. Display appropriate flexibility and adaptability in the face of stress or uncertainty associated with clinical encounters and clinical environments.
7. Compliance with standards, policies and practices set forth in the VHS Student Handbook and the SA Academic Student Handbook.

Curriculum Requirements

Our 71-credit-hour program includes 36 credits of training in our 10 month didactic phase and 35 credits of clinical practice in the second year.

Didactic Phase

Our immersive experience allows for direct observation and active participation with the surgical team to develop the critical clinical skills surgical assistants need. Students are exposed to surgical services, including perioperative, intraoperative and postoperative patient care, and ancillary surgical services, such as central sterile services and pathology.

This training complements the hands-on instruction students receive in the surgical environment. Our students enter the clinical phase of the program with practical experience in the operating room and a strong foundation of surgical knowledge.

Clinical Phase

In contrast to other accredited programs, our program manages and assigns students' clinical placements. At the end of the clinical phase, students:

- Have completed eight clinical rotations.
- Have performed the duties of and served in the role of the surgical assistant in at least 240 cases.
- Have the equivalent competencies expected of a junior surgical resident.
- Are eligible to sit for a national certification exam.

Course Sequence

<i>Term 1 - Fall</i>		<i>18</i>
MSA 602	Medical Terminology	
MSA 603	Surgical Microbiology with Lab	
MSA 604	Advanced Topics of Surgical Assisting I	
MSA 606	Operative Practices	
MSA 610	Advanced Surgical Pharmacology	
MSA 612	Surgical Physiology

MSA 621	Capstone Project	

Certificate

Surgical Assistant Certificate

Through our guided training curriculum, the Surgical Assisting certificate program is designed to deliver candidates an approved curriculum. This 12-month program will start in May each year and be offered online. Students will be required to complete didactic and clinical content requirements. The program will pair students with educational liaisons to support their success in completion of the program.

Eligible candidates must be currently employed in the operating room and must have two years of work experience. These individuals include certified surgical technologists, registered nurses or practicing surgical assistants.

The institution is currently seeking Commission on Accreditation of Allied Health Education Programs accreditation.

As states continue to enact greater legislation requirements for the practice of surgical assisting, the goal of the Certificate of Surgical Assisting program is to assist current professionals and those seeking to enter the profession a training avenue that meets the changing requirements of the professional.

Admission

This program maintains an admission process unique to the program. Prospective students are encouraged to review the admissions requirements in order to best prepare themselves for a successful future.

Candidates must:

Grade Point Average: An overall grade point average (GPA) of 3.0 or higher in their surgical technology program is required.

Transcripts: Transcript(s) should demonstrate a conferred associate’s degree in surgical technology before the start of the CSA program.

Certification: Current certification as a Surgical Technologists (CST).

Employment Verification and Employer’s Attest to Training

Requirements: Current employment in at least level 2 hospital and signed statement from employer(s) to release time and/or access time to doctors, patients, and facilitate resources for training purposes.

Ellmer College of Health Sciences

Bonnie L. Van Lunen, Dean

Christopher K. Rhea, Associate Dean for Research & Innovation

Barbara Kraj, Associate Dean for Education & Innovation

3000 Ellmer Health Sciences Building

1019 W 41st. Street, Norfolk, VA 23529

757-683-4960

<http://www.odu.edu/hs> (<http://www.odu.edu/hs/>)

College Mission

The Ellmer College of Health Sciences mission is to engage learners, make discoveries and improve health. We are a forward-focused College that improves health in our communities through innovative and interdisciplinary approaches. The college values integrity, inclusiveness, excellence and partnership.

The college consists of the School of Exercise Science, the Gene W. Hirschfeld School of Dental Hygiene, the School of Medical Diagnostic and Translational Sciences, the School of Rehabilitation Sciences and the School of Speech-Language Pathology. These schools offer a variety of master's and doctoral degrees, non-degree certificate programs, linked and degree completion programs, and professional continuing education programs. In addition, many of these programs are offered in a variety of online learning formats. The degree programs are competitive, fully accredited (if applicable), and nationally recognized for their quality graduates.

Program Application, Acceptance, and Continuance

A separate application must be submitted to be considered for acceptance into the majority of health sciences majors. Application information, qualifications, deadlines, and advisors are listed in the specific program sections of this catalog and on the web site.

Acceptance to the University does not constitute or guarantee acceptance into a health sciences program. Students are notified by the program director of their acceptance and any other program specific requirements such as physicals, immunizations, technical standards, etc. Continuance in the health sciences programs requires strong academic achievement, including successful demonstration of knowledge and use of practical and critical thinking skills in laboratory and/or in clinical or rotations. Criminal background checks may be required as specified in course syllabi. Any student deemed unacceptable for field/clinical rotation due to results from a criminal background check will not be allowed to complete the program of study.

The Ellmer College of Health Sciences has developed graduate programs in the health-related professions that prepare individuals for practice, teaching, research, or administration in health-care delivery to meet the needs of the region, the state, and the nation. These programs include Master of Science degrees in Athletic Training, Dental Hygiene, Exercise Science, Medical Diagnostics and Precision Medicine, and in Speech-Language Pathology, the Doctor of Occupational Therapy degree, the Doctor of Physical Therapy, the Doctor of Applied Science in Kinesiology and the Ph.D. in Kinesiology and Rehabilitation.

Continuing Education Programs

Short courses, national conferences, workshops, refresher courses, certificate programs and seminars are offered by the different schools in the college on and off campus on a noncredit continuing education (CEU) basis. Professional continuing education programs cover a wide range of topics, including dental hygiene, dental assisting, nuclear medicine technology, medical laboratory science, physical therapy, mental health and speech-language pathology.

Continuing education serves the following functions:

- licensure and certification for professionals and practitioners and
- credential and degree achievement and professional development to update knowledge and skills.

Clientele served by the programs include nursing and allied health professionals, human service workers, managers and supervisory personnel, technicians, laboratory personnel, and health educators.

Visit the website to view current offerings.

Denise C. McKinney, PhD, RDH, Graduate Program Director

The challenge of effecting change in the scope and direction of dental hygiene and health care requires competencies in collaborative problem solving, evidence-based ethical decision making, and leadership.

Recipients of the Master of Science degree in dental hygiene develop skills to meet complex national and global health challenges in interprofessional education, knowledge-generation, information transfer, and health care for all members of society. Within a multidisciplinary, multicultural curricular framework that integrates theory, research, and practical experience, the competency-based program links goals and career aspirations of the student with relevant learning experiences, technologies, and resources to facilitate career advancement. Through specialized skills training, graduates are prepared to assume leadership roles necessary for quality professional dental hygiene care and advancing knowledge and practice.

Solutions to complex health problems need the participation of dental hygienists educated in community health, research, management, education, public policy, and advocacy, just to name a few. Therefore, the program offers distinct specialty areas in which students may specialize: education, administration/management, research, marketing, community health, global health and modeling and simulation. Although graduate education focuses on developing a specialty, such specialization is viewed as secondary to generating evidence-based knowledge and theory through research. Demand for master's level dental hygienists in these key areas of specialization continues to be strong and students are able to develop competencies essential in today's employment market.

Applicants are encouraged to contact the graduate program director to obtain additional information regarding requirements, experiential credit, cognate offerings, travel abroad, practica and externship opportunities. The program is available on campus, online, or as a hybrid of the two. Up to 12 approved graduate credit hours may be taken at another university and applied toward degree requirements, making this program one of the most flexible in the nation. The student-focused, nationally and internationally recognized faculty are committed to the educational preparation of dental hygienists leading to degrees at advanced levels; and the opportunity to segue to doctoral education in health services research within the College of Health Sciences. *This program is available on-campus and online.*

- Dental Hygiene with a Concentration in Research (MS) (p. 308)

Linked Bachelor of Science in Dental Hygiene to Master of Science Program

Entry-level and BSDH Post-Licensure online dental hygiene students who have a cumulative 3.30 grade point average and senior standing may complete the Bachelor of Science in Dental Hygiene to Master of Science (BSDH-MS) dental hygiene linked program application. This program allows exceptional undergraduate students the opportunity to take up to 12 credit hours of graduate course work and apply them to both the undergraduate and graduate degrees. Students in the linked program must earn a minimum of 150 credit hours (120 discrete credit hours for the undergraduate degree and 30 discrete credit hours for the graduate degree). Consult with the graduate program director for more information.

Admission Information

To qualify for admission, the applicant must possess a baccalaureate degree in dental hygiene, or a certificate or an associate's degree from an accredited dental hygiene program and a baccalaureate degree in a related field. International students who have graduated from a dental hygiene program, other than a CODA accredited dental hygiene program, will be considered on an individual basis. The applicant must have an overall grade point average (GPA) of at least 3.00 (on a 4.00 scale) in undergraduate education and a minimum of 3.00 in the undergraduate dental hygiene major. Applicants whose qualifications are slightly below the required level will be considered for admission to provisional status and may be required to take additional course work.

For consideration, the documents listed below must be submitted to the Office of Graduate Admissions, Old Dominion University, Rollins Hall, Norfolk, VA 23529.

International Students must submit their documents for consideration to the Office of International Admissions, Old Dominion University, 2101 Dragas Hall, Norfolk, VA 23529.

Students can apply online at the Office of Admissions (<http://www.odu.edu/admission/apply/>) website.

Visit: International Admissions at <http://www.odu.edu/admission/international> (<http://www.odu.edu/admission/international/>)
 Visit: VISA & Immigration Services Advising at: <https://www.odu.edu/visa> (<https://www.odu.edu/visa/>).

Applicants must provide the following documents:

1. Graduate Application.
2. Scores from the National Board Dental Hygiene Examination Note: International dental hygiene students who have not graduated from an CODA accredited dental hygiene program and who do not have National Board Dental Hygiene scores, will be considered for admission on a case-by-case basis. A current active dental hygiene license in at least one state may be submitted for national board scores; consult with the graduate program director.
3. Two letters of recommendation from academic sources.
4. A written statement including educational and professional goals, how the anticipated degree will assist in achieving those goals, and a detailed statement of research interests.
5. International applicants must present satisfactory evidence of competence in English by submitting score of at least 550 on the TOEFL, 79 on the TOEFL iBT or 6.5 or higher on IELTS.
6. If you are interested in competing for a University Fellowship, the GRE or Millers Analogy scores are required.
7. Evidence of a Bachelor's degree in dental hygiene or a related field and, in the latter case, have completed an accredited certificate or associate degree program in dental hygiene.
8. Evidence of an undergraduate overall quality point average of at least 3.0 (on a 4.0 scale).
9. Official transcripts of all college work.

The master's degree program is available under the Southern Regional Education Board's (SREB) Academic Common Market. Applicants who are legal residents of Delaware, Kentucky, Mississippi, or South Carolina may enroll, if accepted, as Academic Common Market students at in-state tuition rates. Students also may be required to take undergraduate courses or non-credit courses to make-up deficiencies in other areas.

For additional information, visit <http://www.schev.edu/index/tuition-aid/academic-common-market>. (<http://www.schev.edu/index/tuition-aid/academic-common-market/>)

Curriculum Requirements

Students must complete all courses within a eight-year time period with a minimum GPA of a 3.0 on a 4.0 scale. Students must also successfully present and defend a thesis or non-thesis project and pass an oral comprehensive examination.

Thesis option requirements include a minimum of 34 semester hours.

Non-Thesis option requirements include a minimum of 37 semester hours.

Students pursuing the generalist option will complete 6-12 elective credit hours from areas such as education, research, public health, marketing, administration and management. All core requirements may be taken on campus, online, or hybrid. Candidates are required to fulfill 25-28 credit hour core requirements to include:

Core Courses

Core Courses

DNTH 514	Educational Concepts for the Health Professional I	3
DNTH 515	Research Methods in the Health Sciences	3
DNTH 516	Administrative Leadership and Professional Development	3
DNTH 604	Clinical Administration and Teaching	3

MPHO 670	Cultural Issues in Health Promotion and Education	3
MPHO 688	Grant Writing for Public Health Practice	3
MPHO 776	Global Health	3
MPHO 712	Applied Biostatistics	3
MPHO 713	Applied Statistical Programming	3

This is not an exhaustive list of possible elective courses.

Thesis Option. (34 credit hours). This option requires original thesis research and writing for a total minimum program requirement of 34 credit hours and is considered essential for students interested in developing investigative and data management skills. The student is encouraged to become familiar with possible research areas soon after admission and contact the graduate program director to discuss the research proposal, funding options and the selection of the thesis committee. The student will be provided with a committee consisting of the thesis advisor and two other

faculty members selected by the graduate program director and the student. Prior to beginning the research, the student will present a written proposal to the thesis committee for approval. Candidates choosing the thesis option must satisfactorily complete the thesis at least four weeks prior to graduation with copies delivered to the thesis committee. An oral comprehensive examination and thesis defense will be conducted by the student's thesis committee during the last four weeks of the semester prior to graduation. The cost of the thesis is a student expense. The thesis option is not available to distance learning (on-line) students. Students should expect a minimum of two semesters enrolled to complete the course.

Non-Thesis Option. (37 credit hours). Candidates are required to complete: DNTH 698 (3 credits) and a minimum of three (3) additional credits of approved elective course work. This option is designed for students pursuing a less research-oriented program of study. A student in this program is required to complete an in-depth literature or systematic review, or execute a modest project as approved by the faculty. An oral comprehensive examination and project defense will be conducted prior to graduation. Students should expect a minimum of two semesters enrolled to complete the course.

The graduate dental hygiene degree is a writing-intensive program. Students deemed deficient in writing skills will be required to remedy their deficiency through the services of the Writing Center prior to the completion of 12 graduate credits. Students who fail to participate in the diagnostic writing exercise or to complete recommended developmental work through the Writing Center will not be allowed to register for subsequent semesters.

All faculty members in the school require written assignments, which will be evaluated on the basis of form and content. If needed, resources are available through the Writing Center. Graduate students and faculty employ the current edition of the Publication Manual of the American Psychological Association as the standard reference text for written assignments within the School of Dental Hygiene.

Master of Science Dental Hygiene with a Concentration in Administration and Management (MS) Master of Science - Dental Hygiene

757-683-5949

<http://www.odu.edu/dental> (<http://www.odu.edu/dental/>)

Denise C. McKinney PhD, RDH, Graduate Program Director

The challenge of effecting change in the scope and direction of dental hygiene and health care requires competencies in collaborative problem solving, evidence-based ethical decision making, and leadership.

Recipients of the Master of Science degree in dental hygiene develop skills to meet complex national and global health challenges in interprofessional education, knowledge-generation, information transfer, and health care for all members of society. Within a multidisciplinary, multicultural curricular framework that integrates theory, research, and practical experience, the competency-based program links goals and career aspirations of the student with relevant learning experiences, technologies, and resources to facilitate career advancement. Through specialized skills training, graduates are prepared to assume leadership roles necessary for quality professional dental hygiene care and advancing knowledge and practice.

Solutions to complex health problems need the participation of dental hygienists educated in community health, research, management, education, public policy, and advocacy, just to name a few. Therefore, the program offers distinct specialty areas in which students may specialize: education, administration/management, research, marketing, community health, global health and modeling and simulation. Although graduate education focuses on developing a specialty, such specialization is viewed as secondary to generating evidence-based knowledge and theory through research. Demand for master's level dental hygienists in these key areas of specialization

continues to be strong and students are able to develop competencies essential in today's employment market.

Applicants are encouraged to contact the graduate program director to obtain additional information regarding requirements, experiential credit, cognate offerings, travel abroad, practica and externship opportunities. The program is available on campus, online, or as a hybrid of the two. Up to 12 approved graduate credit hours may be taken at another university and applied toward degree requirements, making this program one of the most flexible in the nation. The student-focused, nationally and internationally recognized faculty are committed to the educational preparation of dental hygienists leading to degrees at advanced levels; and the opportunity to segue to doctoral education in health services research within the College of Health Sciences. *This program is available on-campus and online.*

Admission Information

To qualify for admission, the applicant must possess a baccalaureate degree in dental hygiene, or a certificate or an associate's degree from an accredited dental hygiene program, and a baccalaureate degree in a related field. International students who have graduated from a dental hygiene program, other than a CODA accredited dental hygiene program, will be considered on an individual basis. The applicant must have an overall grade point average (GPA) of at least 3.00 (on a 4.00 scale) in undergraduate education and a minimum of 3.00 in the undergraduate dental hygiene major. Applicants whose qualifications are slightly below the required level will be considered for admission to provisional status and may be required to take additional course work.

For consideration, the documents listed below must be submitted to the Office of Graduate Admissions, Old Dominion University, Rollins Hall, Norfolk, VA 23529.

International Students must submit their documents for consideration to the Office of International Admissions, Old Dominion University, 2101 Dragas Hall, Norfolk, VA 23529.

Students can apply online at the Office of Admissions (<http://www.odu.edu/admission/apply/>) website.

Visit: International Admissions at <http://www.odu.edu/admission/international/>

Visit: VISA & Immigration Services Advising at: <https://www.odu.edu/visa> (<https://www.odu.edu/visa/>).

Applicants must provide the following documents:

1. Graduate Application.
2. Scores from the National Board Dental Hygiene Examination Note: International dental hygiene students who have not graduated from an CODA accredited dental hygiene program and who do not have National Board Dental Hygiene scores, will be considered for admission on a case-by-case basis. A current active dental hygiene license in at least one state may be submitted for national board scores; consult with the graduate program director.
3. Two letters of recommendation from academic sources.
4. A written statement including educational and professional goals, how the anticipated degree will assist in achieving those goals, and a detailed statement of research interests.
5. International applicants must present satisfactory evidence of competence in English by submitting score of at least 550 on the TOEFL, 79 on the TOEFL iBT or 6.5 or higher on IELTS.
6. If you are interested in competing for a University Fellowship, the GRE or Millers Analogy scores are required.
7. Evidence of a Bachelor's degree in dental hygiene or a related field and, in the latter case, have completed an accredited certificate or associate degree program in dental hygiene.
8. Evidence of an undergraduate overall quality point average of at least 3.0 (on a 4.0 scale).
9. Official transcripts of all college work.

The master's degree program is available under the Southern Regional Education Board's (SREB) Academic Common Market. Applicants who are

legal residents of Delaware, Kentucky, Mississippi, or South Carolina may enroll, if accepted, as Academic Common Market students at in-state tuition rates. Students also may be required to take undergraduate courses or non-credit courses to make-up deficiencies in other areas.

For additional information, visit <http://www.schev.edu/index/tuition-aid/academic-common-market>. (<http://www.schev.edu/index/tuition-aid/academic-common-market/>)

Curriculum Requirements

Students must complete all courses within a eight-year time period with a minimum GPA of a 3.0 on a 4.0 scale. Students must also successfully present and defend a thesis or non-thesis project and pass an oral comprehensive examination.

Thesis option requirements include a minimum of 34 semester hours.

Non-Thesis option requirements include a minimum of 37 semester hours.

Students must select one specialty area for elective courses. Additional courses within the specialty area may be substituted with advisor's approval. Note - The Global Health certificate requires a separate admission into the program. All core requirements may be taken on campus, online or hybrid. Candidates are required to fulfill 25-28 credit hour core requirements to include:

Core Courses		
DNTH 514	Educational Concepts for the Health Professional I	3
DNTH 515	Research Methods in the Health Sciences	3
DNTH 516	Administrative Leadership and Professional Development	3
DNTH 604	Clinical Administration and Teaching	3
DNTH 669	Clinical Administration & Teaching Practicum	1
DNTH 660	Educational Concepts for the Health Professional II	3
DNTH 668	Internship	3-9
FOUN 722	Introduction to Applied Statistics and Data Analysis	3
or MPOH 605	Introduction to Biostatistics for Public Health	
Concentration Credits		6-12
Research Credits		3-6
<i>Non-Thesis Option</i>		
DNTH 698	Research	
<i>Thesis Option</i>		
DNTH 698	Research	
DNTH 699	Thesis	
Total Credit Hours		34-37

Administration and Management Concentration

Concentration Courses		6 to 12
Students will select between 6-12 credits of the following courses		
PADM 724	Administration of Human Services	3
PADM 671	Public Budgeting and Financial Management	3
PADM 714	Public-Private Partnerships	3
PADM 715	Management and Governance of Nonprofit Organizations	3
PADM 716	Introduction to Nonprofit Sector	3
PADM 717	Nonprofit Financial Management	3
PADM 719	Leadership	3
PADM 736	Diversity, Equity, & Inclusion: A Public Administration and Public Policy Perspective	3

This is not an exhaustive list of possible elective courses.

Thesis Option. (34 credit hours). This option requires original thesis research and writing for a total minimum program requirement of 34 credit hours and is considered essential for students interested in developing investigative and data management skills. The student is encouraged to become familiar with possible research areas soon after admission and contact the graduate program director to discuss the research proposal, funding options and the selection of the thesis committee. The student will be provided with a committee consisting of the thesis advisor and two other faculty members selected by the graduate program director and the student. Prior to beginning the research, the student will present a written proposal to the thesis committee for approval. Candidates choosing the thesis option must satisfactorily complete the thesis at least four weeks prior to graduation with copies delivered to the thesis committee. An oral comprehensive examination and thesis defense will be conducted by the student's thesis committee during the last four weeks of the semester prior to graduation. The cost of the thesis is a student expense. The thesis option is not available to online students. Students should expect a minimum of two semesters enrolled to complete the course.

Non-Thesis Option. (37 credit hours). Candidates are required to complete: DNTH 698 (3 credits) and a minimum of three (3) additional credits of approved elective course work. This option is designed for students pursuing a less research-oriented program of study. A student in this program is required to complete an in-depth literature or systematic review, or execute a modest project as approved by the faculty. An oral comprehensive examination and project defense will be conducted prior to graduation. Students should expect a minimum of two semesters enrolled to complete the course.

The graduate dental hygiene degree is a writing-intensive program. Students deemed deficient in writing skills will be required to remedy their deficiency through the services of the Writing Center prior to the completion of 12 graduate credits. Students who fail to participate in the diagnostic writing exercise or to complete recommended developmental work through the Writing Center will not be allowed to register for subsequent semesters.

All faculty members in the school require written assignments, which will be evaluated on the basis of form and content. If needed, resources are available through the Writing Center. Graduate students and faculty employ the current edition of the Publication Manual of the American Psychological Association as the standard reference text for written assignments within the School of Dental Hygiene.

Master of Science Dental Hygiene with a Concentration in Community and Public Health (MS)

Master of Science - Dental Hygiene

757-683-5949

<http://www.odu.edu/dental> (<http://www.odu.edu/dental/>)

Denise C. McKinney, PhD, RDH, Graduate Program Director

The challenge of effecting change in the scope and direction of dental hygiene and health care requires competencies in collaborative problem solving, evidence-based ethical decision making, and leadership.

Recipients of the Master of Science degree in dental hygiene develop skills to meet complex national and global health challenges in interprofessional education, knowledge-generation, information transfer, and health care for all members of society. Concentration Courses **6-12**

Research Credits **3-6**

Thesis and Non-Thesis Options

DNTH 698 Research

Thesis Option

DNTH 699 Thesis

Total Credit Hours **34-37**

Education Concentration

Select 6-12 credits of the following:

COUN 601	Principles of Professional Counseling and Ethics
COUN 633	Counseling and Psychotherapy Techniques
TLED 640	The Management of Learning and Instruction
IDT 617	Foundations of Instructional Technology
IDT 746	Foundations of Distance Education
IDT 756	Instructional Gaming: Theories and Practice
IDT 763	Instructional Design Theory
TLED 632	Multicultural Education
FOUN 641	Assessment and Evaluation of Student Learning
FOUN 640	Fundamentals of Measurement and Assessment

This is not an exhaustive list of possible elective courses.

Thesis Option. (34 credit hours). This option requires original thesis research and writing for a total minimum program requirement of 34 credit hours and is considered essential for students interested in developing investigative and data management skills. The student is encouraged to become familiar with possible research areas soon after admission and contact the graduate program director to discuss the research proposal, funding options and the selection of the thesis committee. The student will be provided with a committee consisting of the thesis advisor and two other faculty members selected by the graduate program director and the student. Prior to beginning the research, the student will present a written proposal to the thesis committee for approval. Candidates choosing the thesis option must satisfactorily complete the thesis at least four weeks prior to graduation with copies delivered to the thesis committee. An oral comprehensive examination and thesis defense will be conducted by the student's thesis committee during the last four weeks of the semester prior to graduation. The cost of the thesis is a student expense. The thesis option is not available to online students. Students should expect a minimum of two semesters enrolled to complete the course.

Non-Thesis Option. (37 credit hours). Candidates are required to complete: DNTH 698 (3 credits) and a minimum of three (3) additional credits of approved elective course work. This option is designed for students pursuing a less research-oriented program of study. A student in this program is required to complete an in-depth literature or systematic review, or execute a modest project as approved by the faculty. An oral comprehensive examination and project defense will be conducted prior to graduation. Students should expect a minimum of two semesters enrolled to complete the course.

The graduate dental hygiene degree is a writing-intensive program. Students deemed deficient in writing skills will be required to remedy their deficiency through the services of the Writing Center prior to the completion of 12 graduate credits. Students who fail to participate in the diagnostic writing exercise or to complete recommended developmental work through the Writing Center will not be allowed to register for subsequent semesters.

All faculty members in the school require written assignments, which will be evaluated on the basis of form and content. If needed, resources are available through the Writing Center. Graduate students and faculty employ the current edition of the Publication Manual of the American Psychological Association as the standard reference text for written assignments within the School of Dental Hygiene.

Master of Science Dental Hygiene with a Concentration in Global Health (MS)

Master of Science - Dental Hygiene

757-683-5949

<http://www.odu.edu/dental> (<http://www.odu.edu/dental/>)

Denise C. McKinney, PhD, RDH, Graduate Program Director

The challenge of effecting change in the scope and direction of dental hygiene and health care requires competencies in collaborative problem solving, evidence-based ethical decision making, and leadership.

Recipients of the Master of Science degree in dental hygiene develop skills to meet complex national and global health challenges in interprofessional education, knowledge-generation, information transfer, and health care for all members of society. Up to 12 approved graduate credit hours may be taken at another university and applied toward degree requirements, making this program one of the most flexible in the nation. The student-focused, nationally and internationally recognized faculty are committed to the educational preparation of dental hygienists leading to degrees at advanced levels; and the opportunity to segue to doctoral education in health services research within the College of Health Sciences. *This program is available on-campus and online.*

Admission Information

To qualify for admission, the applicant must possess a baccalaureate degree in dental hygiene, or a certificate or an associate's degree from an accredited dental hygiene program and a baccalaureate degree in a related field. International students who have graduated from a dental hygiene program, other than a CODA accredited dental hygiene program, will be considered on an individual basis. The applicant must have an overall grade point average (GPA) of at least 3.00 (on a 4.00 scale) in undergraduate education and a minimum of 3.00 in the undergraduate dental hygiene major. Applicants whose qualifications are slightly below the required level will be considered for admission to provisional status and may be required to take additional course work.

For consideration, the documents listed below must be submitted to the Office of Graduate Admissions, Old Dominion University, Rollins Hall, Norfolk, VA 23529.

International Students must submit their documents for consideration to the Office of International Admissions, Old Dominion University, 2101 Dragas Hall, Norfolk, VA 23529.

Students can apply online at the Office of Admissions (<http://www.odu.edu/admission/apply/>) website.

Visit: International Admissions at <http://www.odu.edu/admission/international/>

Visit: VISA & Immigration Services Advising at: <https://www.odu.edu/visa> (<https://www.odu.edu/visa/>).

Applicants must provide the following documents:

1. Graduate Application.
2. Scores from the National Board Dental Hygiene Examination Note: International dental hygiene students who have not graduated from an CODA accredited dental hygiene program and who do not have National Board Dental Hygiene scores, will be considered for admission on a case-by-case basis. A current active dental hygiene license in at least one state may be submitted for national board scores; consult with the graduate program director.
3. Two letters of recommendation from academic sources.
4. A written statement including educational and professional goals, how the anticipated degree will assist in achieving those goals, and a detailed statement of research interests.
5. International applicants must present satisfactory evidence of competence in English by submitting score of at least 550 on the TOEFL, 79 on the TOEFL iBT or 6.5 or higher on IELTS.
6. If you are interested in competing for a University Fellowship, the GRE or Millers Analogy scores are required.
7. Evidence of a Bachelor's degree in dental hygiene or a related field and, in the latter case, have completed an accredited certificate or associate degree program in dental hygiene.
8. Evidence of an undergraduate overall quality point average of at least 3.0 (on a 4.0 scale).
9. Official transcripts of all college work.

The master's degree program is available under the Southern Regional Education Board's (SREB) Academic Common Market. Applicants who are legal residents of Delaware, Kentucky, Mississippi, or South Carolina may enroll, if accepted, as Academic Common Market students at in-state tuition rates. Students also may be required to take undergraduate courses or non-credit courses to make-up deficiencies in other areas.

For additional information, visit <http://www.schev.edu/index/tuition-aid/academic-common-market>. (<http://www.schev.edu/index/tuition-aid/academic-common-market/>)

Curriculum Requirements

Students must complete all courses within a eight-year time period with a minimum GPA of a 3.0 on a 4.0 scale. Students must also successfully present and defend a thesis or non-thesis project and pass an oral comprehensive examination.

Thesis degree requirements include a minimum of 34 semester hours.

Non-Thesis degree requirements include a minimum of 37 semester hours.

Students must select one specialty area for elective courses. Additional courses within the specialty area may be substituted with advisor's approval. Note - The Global Health certificate requires admission to the program. All core requirements may be taken on campus, online or hybrid. Candidates are required to fulfill a 22 credit hour core requirement to include:

Core Courses

DNTH 514	Educational Concepts for the Health Professional I	3
DNTH 515	Research Methods in the Health Sciences	3
DNTH 516	Administrative Leadership and Professional Development	3

DNTH 604	Clinical Administration and Teaching	3
DNTH 669	Clinical Administration & Teaching Practicum	1
DNTH 660	Educational Concepts for the Health Professional II	3
FOUN 722	Introduction to Applied Statistics and Data Analysis	3
or MPHO 605	Introduction to Biostatistics for Public Health	
DNTH 668	Internship	3-9
Concentration Courses		6-12
Research Credits		3-6
<i>Non-Thesis Option</i>		
DNTH 698	Research	
<i>Thesis Option</i>		
DNTH 698	Research	
DNTH 699	Thesis	
Total Credit Hours		34-37

Global Health Concentration

Global Health (Certificate Option) 15 hrs

HSR 746	Epidemiology	3
HSR 776	Global Health	3
HSR 802	Health Management	3
Elective courses (4 credit hrs) As determined by Director of Global Health		4
Practicum (2 credit hours) As determined by Director of Global Health		2
Total Credit Hours		15

Thesis Option. (34 credit hours). This option requires original thesis research and writing for a total minimum program requirement of 34 credit hours and is considered essential for students interested in developing investigative and data management skills. The student is encouraged to become familiar with possible research areas soon after admission and contact the graduate program director to discuss the research proposal, funding options and the selection of the thesis committee. The student will be provided with a committee consisting of the thesis advisor and two other faculty members selected by the graduate program director and the student. Prior to beginning the research, the student will present a written proposal to the thesis committee for approval. Candidates choosing the thesis option must satisfactorily complete the thesis at least four weeks prior to graduation with copies delivered to the thesis committee. An oral comprehensive examination and thesis defense will be conducted by the student's thesis committee during the last four weeks of the semester prior to graduation. The cost of the thesis is a student expense. The thesis option is not available to online students. Students should expect a minimum of two semesters enrolled to complete the course.

Non-Thesis Option. (37 credit hours). Candidates are required to complete: DNTH 698 (3 credits) and a minimum of three (3) additional credits of approved elective course work. This option is designed for students pursuing a less research-oriented program of study. A student in this program is required to complete an in-depth literature or systematic review, or execute a modest project as approved by the faculty. An oral comprehensive examination and project defense will be conducted prior to graduation. Students should expect a minimum of two semesters enrolled to complete the course.

The graduate dental hygiene degree is a writing-intensive program. Students deemed deficient in writing skills will be required to remedy their deficiency through the services of the Writing Center prior to the completion of 12 graduate credits. Students who fail to participate in the diagnostic writing exercise or to complete recommended developmental work through the Writing Center will not be allowed to register for subsequent semesters.

All faculty members in the school require written assignments, which will be evaluated on the basis of form and content. If needed, resources are available through the Writing Center. Graduate students and faculty employ

the current edition of the Publication Manual of the American Psychological Association as the standard reference text for written assignments within the School of Dental Hygiene.

Master of Science Dental Hygiene with a Concentration in Marketing (MS) Master of Science - Dental Hygiene

757-683-5949

<http://www.odu.edu/dental> (<http://www.odu.edu/dental/>)

Denise C. McKinney, PhD, RDH Graduate Program Director

The challenge of effecting change in the scope and direction of dental hygiene and health care requires competencies in collaborative problem solving, evidence-based ethical decision making, and leadership.

Recipients of the Master of Science degree in dental hygiene develop skills to meet complex national and global health challenges in interprofessional education, knowledge-generation, information transfer, and health care for all members of society. Within a multidisciplinary, multicultural curricular framework that integrates theory, research, and practical experience, the competency-based program links goals and career aspirations of the student with relevant learning experiences, technologies, and resources to facilitate career advancement. Through specialized skills training, graduates are prepared to assume leadership roles necessary for quality professional dental hygiene care and advancing knowledge and practice.

Solutions to complex health problems need the participation of dental hygienists educated in community health, research, management, education, public policy, and advocacy, just to name a few. Therefore, the program offers distinct specialty areas in which students may specialize: education, administration/management, research, marketing, community health, global health and modeling and simulation. Although graduate education focuses on developing a specialty, such specialization is viewed as secondary to generating evidence-based knowledge and theory through research. Demand for master's level dental hygienists in these key areas of specialization continues to be strong and students are able to develop competencies essential in today's employment market.

Applicants are encouraged to contact the graduate program director to obtain additional information regarding requirements, experiential credit, cognate offerings, travel abroad, practica and externship opportunities. The program is available on campus, online, or as a hybrid of the two. Up to 12 approved graduate credit hours may be taken at another university and applied toward degree requirements, making this program one of the most flexible in the nation. The student-focused, nationally and internationally recognized faculty are committed to the educational preparation of dental hygienists leading to degrees at advanced levels; and the opportunity to segue to doctoral education in health services research within the College of Health Sciences. *This program is available on-campus and online.*

Admission Information

To qualify for admission, the applicant must possess a baccalaureate degree in dental hygiene, or a certificate or an associate's degree from an accredited dental hygiene program and a baccalaureate degree in a related field. International students who have graduated from a dental hygiene program, other than a CODA accredited dental hygiene program, will be considered on an individual basis. The applicant must have an overall grade point average (GPA) of at least 3.00 (on a 4.00 scale) in undergraduate education and a minimum of 3.00 in the undergraduate dental hygiene major. Applicants whose qualifications are slightly below the required level will be considered for admission to provisional status and may be required to take additional course work.

For consideration, the documents listed below must be submitted to the Office of Graduate Admissions, Old Dominion University, Rollins Hall, Norfolk, VA 23529.

International Students must submit their documents for consideration to the Office of International Admissions, Old Dominion University, 2101 Dragas Hall, Norfolk, VA 23529.

Students can apply online at the Office of Admissions (<http://www.odu.edu/admission/apply/>) website.

Visit: International Admissions at <http://www.odu.edu/admission/international/>

Visit: VISA & Immigration Services Advising at: <https://www.odu.edu/visa/> (<https://www.odu.edu/visa/>).

Applicants must provide the following documents:

1. Graduate Application.
2. Scores from the National Board Dental Hygiene Examination Note: International dental hygiene students who have not graduated from an CODA accredited dental hygiene program and who do not have National Board Dental Hygiene scores, will be considered for admission on a case-by-case basis. A current active dental hygiene license in at least one state may be submitted for national board scores; consult with the graduate program director.
3. Two letters of recommendation from academic sources.
4. A written statement including educational and professional goals, how the anticipated degree will assist in achieving those goals, and a detailed statement of research interests.
5. International applicants must present satisfactory evidence of competence in English by submitting score of at least 550 on the TOEFL, 79 on the TOEFL iBT or 6.5 or higher on IELTS.
6. If you are interested in competing for a University Fellowship, the GRE or Millers Analogy scores are required.
7. Evidence of a Bachelor's degree in dental hygiene or a related field and, in the latter case, have completed an accredited certificate or associate degree program in dental hygiene.
8. Evidence of an undergraduate overall quality point average of at least 3.0 (on a 4.0 scale).
9. Official transcripts of all college work.

The master's degree program is available under the Southern Regional Education Board's (SREB) Academic Common Market. Applicants who are legal residents of Delaware, Kentucky, Mississippi, or South Carolina may enroll, if accepted, as Academic Common Market students at in-state tuition rates. Students also may be required to take undergraduate courses or non-credit courses to make-up deficiencies in other areas.

DNTH 668	Internship	3-9
Select one statistics course		
FOUN 722	Introduction to Applied Statistics and Data Analysis	3
MPHO 605	Introduction to Biostatistics for Public Health	3
Concentration Courses		6-12
Research Credits		3-6
<i>Non-Thesis Option</i>		
DNTH 698	Research	
<i>Thesis Option</i>		
DNTH 698	Research	
DNTH 699	Thesis	
Total Credit Hours		34-37

Marketing Concentration

Select 6-12 credits of the following:

MKTG 603	Marketing Management	3
MKTG 640	Global Marketing Management	3
MKTG 621	Managerial Problems in Marketing Strategy	3
MKTG 628	Marketing of Services	3
MKTG 630	Ethics and Marketing Decision-Making	3
MPHO 630	Health Communication and Social Marketing for Public Health	3

This is not an exhaustive list of possible elective courses.

Thesis Option. (34 credit hours). This option requires original thesis research and writing for a total minimum program requirement of 34 credit hours and is considered essential for students interested in developing investigative and data management skills. The student is encouraged to become familiar with possible research areas soon after admission and contact the graduate program director to discuss the research proposal, funding options and the selection of the thesis committee. The student will be provided with a committee consisting of the thesis advisor and two other faculty members selected by the graduate program director and the student. Prior to beginning the research, the student will present a written proposal to the thesis committee for approval. Candidates choosing the thesis option must satisfactorily complete the thesis at least four weeks prior to graduation with copies delivered to the thesis committee. An oral comprehensive examination and thesis defense will be conducted by the student's thesis committee during the last four weeks of the semester prior to graduation. The cost of the thesis is a student expense. The thesis option is not available to online students. Students should expect a minimum of two semesters enrolled to complete the course.

Non-Thesis Option. (37 credit hours). Candidates are required to complete: DNTH 698 (3 credits) and a minimum of three (3) additional credits of approved elective course work. This option is designed for students pursuing a less research-oriented program of study. A student in this program is required to complete an in-depth literature or systematic review, or execute a modest project as approved by the faculty. An oral comprehensive examination and project defense will be conducted prior to graduation. Students should expect a minimum of two semesters enrolled to complete the course.

The graduate dental hygiene degree is a writing-intensive program. Students deemed deficient in writing skills will be required to remedy their deficiency through the services of the Writing Center prior to the completion of 12 graduate credits. Students who fail to participate in the diagnostic writing exercise or to complete recommended developmental work through the Writing Center will not be allowed to register for subsequent semesters. All faculty members in the school require written assignments, which

will be evaluated on the basis of form and content. If needed, resources are available through the Writing Center. Graduate students and faculty employ the current edition of the Publication Manual of the American Psychological Association as the standard reference text for written assignments within the School of Dental Hygiene.

Master of Science Dental Hygiene with a Concentration in Research (MS)

Master of Science - Dental Hygiene

757-683-5949

<http://www.odu.edu/dental> (<http://www.odu.edu/dental/>)

Denise C. McKinney, PhD, RDH, Graduate Program Director

The challenge of effecting change in the scope and direction of dental hygiene and health care requires competencies in collaborative problem solving, evidence-based ethical decision making, and leadership.

Recipients of the Master of Science degree in dental hygiene develop skills to meet complex national and global health challenges in interprofessional education, knowledge-generation, information transfer, and health care for all members of society. Within a multidisciplinary, multicultural curricular framework that integrates theory, research, and practical experience, the competency-based program links goals and career aspirations of the student with relevant learning experiences, technologies, and resources to facilitate career advancement. Through specialized skills training, graduates are prepared to assume leadership roles necessary for quality professional dental hygiene care and advancing knowledge and practice.

Solutions to complex health problems need the participation of dental hygienists educated in community health, research, management, education, public policy, and advocacy, just to name a few. Therefore, the program offers distinct specialty areas in which students may specialize: education, administration/management, research, marketing, community health, global health and modeling and simulation. Although graduate education focuses on developing a specialty, such specialization is viewed as secondary to generating evidence-based knowledge and theory through research. School of Medical Diagnostic and Translational Sciences

Overview

School of Medical Diagnostic and Translational Sciences
Ellmer College of Health Sciences
Macon & Joan Brock Virginia Health Sciences at Old Dominion University
1019 W. 41st Street, Norfolk, VA 23508
757-683-3247

The School of Medical Diagnostic and Translational Sciences at Old Dominion University prepares students for dynamic careers in healthcare, biotechnology, clinical diagnostics, research, and public health. Our graduate programs equip students with the scientific expertise and technical skills needed to thrive in hospital and commercial laboratories, biotechnology and pharmaceutical industries, government agencies, and academic institutions.

Our **Master of Science in Molecular Diagnostics & Precision Medicine** program empowers students to become leaders in the rapidly evolving fields of molecular diagnostics and targeted therapeutics. Built on the foundation of advances from the Human Genome Project, this program explores how precision medicine is transforming the detection and treatment of complex diseases. Students gain hands-on experience with cutting-edge molecular technologies while learning how these innovations influence clinical decision-making, medical research, population health, and drug development.

Learn more about the Molecular Diagnostics & Precision Medicine M.S. program

The Post-Baccalaureate **Certificate in Molecular Diagnostics** provides essential training in the principles and laboratory techniques of clinical molecular biology. Designed for individuals seeking to enhance their credentials or transition into clinical or research roles, this program emphasizes real-world application of molecular diagnostic procedures, preparing students to contribute meaningfully in high-complexity lab settings and molecular diagnostics environments.

Explore the Molecular Diagnostics Certificate program

Programs

Master of Science Program

- Molecular Diagnostics and Precision Medicine (MS) (p. 309)

Certificate Programs

- Modeling and Simulation - Health Sciences Certificate (p. 311)
- Molecular Diagnostics Certificate (p. 311)

Master of Science Molecular Diagnostics and Precision Medicine (MS)

The discipline of molecular diagnostics includes all tests and methods to identify disease, a predisposition for a disease, diagnosis and prognosis of disease, and potential responses to drug therapy by analysis of an individual's DNA, RNA, and proteins. The field is the fastest growing segment of clinical diagnostic testing as molecular techniques become standard practice in medicine. Precision medicine requires the application of molecular information to enable new approaches to the detection and treatment of complex diseases. This program is designed to prepare students

for possible careers in industry, academic, and/or clinical settings within molecular diagnostics and precision medicine.

Students will acquire the advanced knowledge required to complete high-complexity testing with a master's degree in Molecular Diagnostics & Precision Medicine.

Admission Criteria

For U.S. students

- A baccalaureate degree in biology, chemistry, medical laboratory science, health sciences, or related health and scientific disciplines, from a regionally accredited institution of higher education is required.
- A GPA of at least 2.7 on a 4.0 scale in the last 60 credits completed.
- Two (2) letters of recommendation.
- A personal statement describing how the Molecular Diagnostics & Precision Medicine (M.S.) program will enhance the applicant's academic and/or professional career goals.
- Current resume/CV documenting professional experience and educational achievements.
- Official transcripts from all colleges/universities attended. Ensure the degree conferral date is listed on the awarding institution's transcript. **Please note: Transcripts must be sent to GradCAS only. GradCAS only accepts electronic transcripts from Credentials Solutions, Parchment, and National Student Clearinghouse. If your school does not offer either of these services, your transcript must be sent via mail.**

Below are three ways to send your transcripts.

- Credentials Solutions (<http://www.transcriptsplus.net/order/>)
- Parchment (<https://www.parchment.com/students/order-status/>)
- National Student Clearinghouse (<https://www.studentclearinghouse.org/>)

To send transcripts to GradCAS by mail, after you enter each institution in GradCAS, download a transcript request form. Fill out and send the transcript request form to the institution registrar, asking them to mail the transcript to the address below:

GradCAS Transcript Processing Center
P.O. Box 9217
Watertown, MA 02471

For international students

- A baccalaureate degree in biology, chemistry, medical laboratory science, health sciences, or related health and scientific disciplines from a regionally accredited institution of higher education is required.
- A GPA of at least 2.7 on a 4.0 scale in the last 60 credits completed.
- Three letters of recommendation.
- Test of English as a Foreign Language (TOEFL) - Minimum scores:
 - Paper 550,
 - Computer 213,
 - iBT 80
 - TOEFL School Code is B886
- A personal statement describing how the Molecular Diagnostics & Precision Medicine (M.S.) program will enhance the applicant's academic and/or professional career goals.
- Current resume/CV documenting professional experience and educational achievements.
- Official transcripts from all colleges/universities attended. Ensure the degree conferral date is listed on the awarding institution's transcript. In cases where a non-U.S. grading system has been used, verification must be provided by one of the following services:
 - World Education Services (<https://www.wes.org/>) (WEC)
 - Educational Credential Evaluators (<https://www.ece.org/>) (ECE)

- GradCAS will ONLY accept the evaluation report from the credentialing agency. Do not send your foreign transcript to GradCAS.
- All foreign transcript evaluations from the credentialing agency must be sent directly to GradCAS to the following address:

GradCAS Transcript Processing Center
PO Box 9217
Watertown, MA 02471

- **Translation:** If the academic institution that you attended does not issue documents in English, the credentialing agency will require that you submit a word-for-word translation of your transcripts. You can contact University Language Services (<http://www.universitylanguage.com/>) to submit your transcript for translation and instruct them to send the translated transcript to the credentialing agency you choose.
- **Transcript Evaluation:** International students whose native language is not English may contact one of the following credentialing agencies to submit transcripts for official evaluation: WES (<http://www.wes.org/>) or ECE (<https://www.ece.org/>). Instruct the credentialing agency to send the official evaluation (and translation) directly to GradCAS. You must provide both a course-by-course evaluation report along with an overall GPA calculation. Evaluations are mandatory even for transcripts from institutions that report grades in English. This provides the school with a U.S. credit equivalency and allows the transcripts to be reviewed accurately. WES and ECE are preferred credentialing services. If you wish to select a company other than these, please hpadmissions@evms.edu first.

International students must abide by all U.S. Immigration laws throughout their enrollment in the program. This includes, but is not limited to, qualifying and obtaining a proper visa prior to attendance. For further information, please contact Human Resources (evmsshr@evms.edu) at 757-446-6043.

Curriculum Requirements

The Molecular Diagnostics & Precision Medicine (M.S.) (https://www.evms.edu/education/masters_programs/molecular_diagnostics_precision_medicine/) curriculum will consist of online asynchronous didactic courses, hybrid courses consisting of online asynchronous didactic instruction, and in-person laboratory, laboratory rotations, and practicum.

The rotations and practicum can be completed at ODU/EVMS laboratories or at student arranged off-site locations (e.g. current employer) with approval of the program director and agreement of the institution.

In all, 21 credit hours of didactic/laboratory training will be combined with 21 credit hours of independent laboratory rotations and practicum.

Course Sequence

Term 1 Fall		9
MDPM 500	Principles of Molecular Diagnostics	
MDPM 501	Molecular Diagnostics Lab	
MDPM 698	Molecular Diagnostics Lab	
Term 2 Spring		9
MDPM 600	Advanced Clinical Molecular Diagnostics	
MDPM 601	Advanced Molecular Diagnostics Lab	
MDPM 698	Molecular Diagnostics Lab	
Term 3 Summer		6
MDPM 620	Human Subjects Regulations and Ethics	
MDPM 669	Molecular Diagnostics Pract	
Term 4 Fall		9
MDPM 640	Molecular Cytology & Histology	
MDPM 669	Molecular Diagnostics Pract	
MDPM 720	Genomics and Bioinformatics	
Term 5 Spring		9

Certificate

Modeling and Simulation - Health Sciences Certificate

The Modeling and Simulation in Health Sciences certificate program is designed for students to develop competency in the use of modeling and simulation theory, methods and technologies to support health sciences research, policy-making, and training in the health care domain. The core course of this program covers the basic knowledge of Modeling and Simulation while the other three courses focus on the applications of M&S in health care related fields.

This program is targeted to graduate students interested in pursuing a career in modeling and simulation in health care or graduate students enrolled in the PhD program at the College of Health Sciences who desire to focus their research and/or course of study in modeling and simulation. The expected time to complete the certificate is four semesters.

Admission

Admission to this certificate program requires a bachelor's degree (or equivalent) and a previous knowledge of calculus and statistics. The basic certificate requirements are four three-hour courses for a total of twelve required credits. The basic simulation core class called Introduction to Modeling and Simulation of three credits is required, plus nine credits of discipline specific classes. A 3.00 GPA for the four-course sequence is required for successful completion. Total amount of credit: 12.

Curriculum Requirements

MSIM 601	Introduction to Modeling and Simulation	3
HSR 815	Decision Analysis in Health Care	3
Discipline Specific Class		3
Discipline Specific Class		3
Total Credit Hours		12

Since Modeling and Simulation is a highly multidisciplinary science, other colleges can offer discipline specific classes, such as:

BIOL 772	Modeling and Simulation in the Life Sciences	4
PSYC 731	Human Cognition	3
BIOL 732	GIS in the Life Sciences	3
BNAL 722	Agent-Based Simulation and Modeling	3

Certificate

Molecular Diagnostics Certificate

<http://www.odu.edu/mdts/molecular-diagnostics> (<http://www.odu.edu/mdts/molecular-diagnostics/>)

Robert Bruno, PhD, Program Director

The discipline of molecular diagnostics includes all tests and methods to identify disease, a predisposition for a disease, diagnosis and prognosis of disease, and potential responses to drug therapy by analysis of an individual's DNA, RNA, and proteins. The field is the fastest growing segment of clinical diagnostic testing as molecular techniques become standard practice in medicine.

The post-baccalaureate molecular diagnostics certificate program is designed to provide fundamental principles, advanced applications and laboratory skills needed for molecular diagnostic and molecular biology procedures conducted in clinical and research environments.

Curriculum Requirements

The Certificate is awarded upon completion of 12 credit hours in a coherent sequence with a 3.0 GPA.

Required Courses

MDTS 500	Principles of Molecular Diagnostics	3
MDTS 501	Molecular Diagnostics Laboratory	3
MDTS 600	Advanced Clinical Applications of Molecular Diagnostics	3
MDTS 601	Advanced Molecular Diagnostics Laboratory	3

Optional Course

MDTS 668	Clinical Laboratory Internship	

Total Credit Hours

12

School of Rehabilitation Sciences

3000 Ellmer Health Sciences Building
1019 W 41st. Street, Norfolk, VA 23529
757-683-4960

<http://www.odu.edu/rehabsci/dpt> (<http://www.odu.edu/rehabsci/dpt/>)

Patricia Laverdure, Chair

Center for Brain Research and Rehabilitation

The School of Rehabilitation Sciences has opened a 3,800 square foot research facility (<http://www.odu.edu/ptat/resources/>) with a large gait/movement assessment area, a room for virtual reality and rehabilitation studies, a multipurpose room for neurologic testing, and office space for faculty and graduate students. A primary research focus relates to neuromechanical basis of human movement under healthy and pathological conditions, with more clinically oriented studies on methods to improve gait and function in people with neurologic impairments. This research laboratory is designed for multidisciplinary use by faculty and graduate students in Athletic Training, Occupational Therapy, Physical Therapy, Human Movement Sciences, and Electrical and Computer Engineering. Collaboration among disciplines and with the Virginia Modeling and Simulation Center (VMASC) allows us to participate in exciting research projects exploring new technology in rehabilitation.

Faschini Wallach Center for Restorative Therapies

The School of Rehabilitation Sciences, in collaboration with the Ellmer College of Health Sciences and Old Dominion University, operates a multidisciplinary therapy clinic on the ODU campus. Located at 1019 W 41st Street, Norfolk, VA 23529, the clinic offers physical, occupational, and speech therapy services to ODU faculty, staff, students, and the surrounding community. In addition to providing high-quality care, the clinic serves as a hands-on learning environment where students develop skills in assessment, clinical decision-making, and treatment. It also supports clinical research initiatives in partnership with the Center for Brain Research and Rehabilitation, the Kinesiology and Rehabilitation PhD Program, and university and community research partners.

PROFESSIONAL (ENTRY-LEVEL) DEGREE PROGRAM

Ryan McCann, PhD, ATC, CSCS

Graduate Program Director of Athletic Training
School of Rehabilitation Sciences
3064 Ellmer College of Health Sciences Building
757-683-6131

The Master of Science of Athletic Training degree program is a professional (entry-level) athletic training program that addresses the curricular content necessary for safe and proficient patient care. The curriculum addresses the six core competencies expected of all healthcare providers (evidence-based practice, quality improvement, use of healthcare informatics, patient-centered care, interprofessional education and collaborative practice, and professionalism). Classroom learning is enhanced through clinical education experiences which provide students with supervised hands-on learning opportunities necessary to develop the knowledge, skills, and abilities needed for autonomous clinical practice.

Admission and Entrance Requirements Requirements for Admission

Students are admitted to the program after completion of a bachelor's degree and prerequisite coursework. Courses for the program begin in May, during the first summer session, and continue for two calendar years. Specific procedures for admission must be followed, including the verification of meeting the technical standards. Admission into the program is competitive.

An application to the Athletic Training Centralized Application Service (ATCAS) must be submitted. The ATCAS website will be open to applicants on July 1 each year at <https://atcas.liaisoncas.com/applicant-ux/#/login>. Applications are reviewed on an ongoing basis as they are received each year and continue until all positions are filled. Please follow the directions for the application found at the ATCAS site.

An applicant seeking admission to the MSAT degree program must have:

1. a bachelor's degree and official transcripts from each undergraduate and graduate program attended at a regionally-accredited institution or an equivalent foreign institution;
2. a minimum overall grade point average of 3.0 in undergraduate coursework.

Acceptance into the graduate school does not imply automatic acceptance into the athletic training program.

Other Application Requirements & Prerequisite Courses

The applicant will also need to submit documentation (via ATCAS) demonstrating the following requirements:

- Verification of 15 clock hours of observation with an athletic trainer;
- Two recommendations from professional or academic references; and
- Completion of the following prerequisites at Old Dominion University or another regionally-accredited institution (or international equivalent), with a minimum grade point average of 3.0 (the first **five must be** laboratory science courses):
 - Biology
 - Chemistry
 - Physics
 - Anatomy OR Anatomy & Physiology I
 - Physiology OR Anatomy & Physiology II
 - Biomechanics OR Kinesiology

- Psychology
- Nutrition
- Statistics

Curriculum Requirements

ATHLETIC TRAINING CORE COURSES

AT 602	Foundations of Sports Medicine for Health Care Providers	3
AT 603	Clinical Examination and Patient Care-Spine & Head	4
AT 604	Clinical Examination and Patient Care-Lower Extremity	4
AT 605	Clinical Examination and Patient Care-Upper Extremity	4
AT 607	Management of Medical Conditions for Healthcare Providers I	3
AT 612	Functional Movement for Healthcare Providers	3
AT 617	Management of Medical Conditions for Healthcare Providers II	3
AT 638	Documentation & Quality Improvement for Healthcare Providers	3
AT 640	Clinical Medicine for Healthcare Providers I	3
AT 641	Clinical Medicine for Healthcare Providers II	3
AT 652	Pharmacology	3
AT 661	Behavioral Health in Sports Medicine	3
AT 664	Ethics in Healthcare	3
AT 673	Healthcare Administration and Policy	3
AT 686	Performance Enhancement in Sports Medicine	3
AT 687	Contemporary Issues in Athletic Training	2
AT 689	Professional Competence Assessment in Athletic Training	3
AT 691	Gross Anatomy for the Rehabilitation Sciences (Credits range from 0 to 6 credits. AT students should register for 4 credits.)	6

AT 647	Interprofessional Clinical I	1
AT 648	Interprofessional Clinical II	1
AT 666	Athletic Training Practicum I	1
AT 667	Athletic Training Practicum II	1
AT 668	Athletic Training Practicum III	2
AT 669	Athletic Training Practicum IV	1
Total Credit Hours		69

Additional Requirements

Continuance and Exit Requirements

Students must meet all requirements for continuance as outlined in the graduate continuance policy for the University. Students completing the program of study must:

1. have an overall grade point average of 3.0;
2. have a GPA of 3.0 in the major;
3. demonstrate writing proficiency;
4. satisfy all course competencies;
5. pass comprehensive examinations;

- complete a research project;
- provide exit feedback to the program director; and
- file the necessary paperwork for graduation.

Doctor of Philosophy Kinesiology and Rehabilitation (PhD)

Eric Schussler and Patrick Wilson, Graduate Program Directors

The Ph.D. in Kinesiology and Rehabilitation is designed for aspiring professionals who already have a master's degree or entry-level clinical doctorate and are interested in becoming leaders, teachers, and scholars in the fields of athletic training, biomechanics, exercise science, kinesiology, occupational therapy, physical therapy, or speech-language pathology. This inter-professional program features faculty from different schools in the Ellmer College of Health Sciences. Students are immersed in research experiences in and out of the classroom and complete a flexible curriculum that encompasses motor control, motor learning, neuroscience, biomechanics, exercise physiology, rehabilitation, communication, and research methodology. In addition to 4 core courses, students will complete research courses, teaching and/or research apprenticeship courses, and at least four electives for a total of at least 51 credit hours.

Requirements for Admission

Five to seven students will be admitted to the Ph.D. program annually, starting with the fall term. Applications for admission are reviewed by the Ph.D. In Kinesiology and Rehabilitation admissions committee. To qualify for admission, an applicant must meet the general University admission requirements at the graduate level as well as specific program requirements including:

- Completed graduate degree (Master's or Clinical Doctorate) from a regionally-accredited institution in kinesiology, exercise science, athletic training, occupational therapy, physical therapy, speech and language pathology, or a related field.
- A minimum grade point average (GPA) of 3.25 on a 4.0 scale for the graduate degree.
- A personal statement that explains your qualifications, professional and career goals, and reasons for seeking the Ph.D. Be sure to also identify potential professor(s) at ODU who could mentor you based on your research interests.
- Three letters of reference a least two of which are from former professors familiar with the applicant's academic performance.
- English Proficiency Requirement for those whose first language is not English. (See Admissions website)

Enrollment in the program is limited by number of available faculty mentors matching an applicant's desired area of research. Interested individuals are advised to contact the program to find out whether a mentor is available for their research area of interest.

Application Dates

Applications to the program and for assistantships are due by February 1 for students planning to enter in the fall semester, however applications will be accepted until the cohort is full.

Curriculum Requirements

Coursework consists of a total of 51 credit hours, including 12 credit hours of core courses, at least 9 credit hours of research courses, 6 credit hours of experiential learning/apprenticeships, and 12 credit hours of electives. Each student will also complete 12 credit hours of dissertation research. Up to 12 hours of graduate credit may be transferred from another program to be applied to non-core courses. Transfer of credits is approved at the discretion of the guidance committee and the graduate program director.

Kinesiology and Rehabilitation Core Courses		12
KRS 830	Theoretical Models in Kinesiology and Rehabilitation *	
KRS 835	Critical Appraisal and Synthesis of Evidence in Kinesiology and Rehabilitation	
KRS 851	Motor Performance: Rhythmic/Cyclic Tasks	
KRS 857	Kinesiology in Rehabilitation	
Research Core		9
<i>Courses to be selected in consultation with advisor.</i>		
FOUN 812	Research Design and Analysis	
FOUN 816	Single Subject Research Designs	
FOUN 822	Applied Linear Models in Educational Research	
FOUN 823	Analysis of Variance Applied to Educational Research	
HLSC 810	Research Design and Application	
HLSC 811	Quantitative Research Methods in Health Care	
KRS 825	Mixed and Multi Methods in Health Sciences Research	
TLCI 814	Qualitative Research Design in Education	
Experiential Learning/Apprenticeships		6
<i>Courses may be taken more than one time.</i>		
KRS 887	Structured Teaching Experience for Kinesiology and Rehabilitation Professions	
KRS 898	Supervised Research	
Electives		12

Dissertation Research		12
KRS 899	Dissertation	
Total Credit Hours		51

* Must be completed in student's first year in program.
KRS 830

Additional Requirements

Degree Requirements

- Satisfactory completion of at least 51 semester hours of graduate level coursework with a grade point average of 3.0 or higher, including all

required courses as listed below. (Students who receive two or more grades of C or one grade of F may not continue in the program).

2. Acceptable performance on written and oral candidacy examinations to be completed at the end of the program of coursework. Students may re-take the candidacy exams only once.
3. Successful defense of a dissertation proposal.
4. Completion of a dissertation representing the candidate's ability to conduct scholarly, original research.
5. Successful oral defense of the dissertation.
6. Submission of the approved final copy of the dissertation.

Time frames for completion of degree requirement

1. The entire process from admission to dissertation defense must be completed within eight years. Exceptions to this time limit require the approval of the graduate program director, the department chair, and the college dean.
2. Academic credit which is more than eight years old at the time of graduation must be re-validated by an examination before the work can be applied to a doctoral degree.
3. The dissertation must be completed within five years after the candidacy exams are passed.
4. Dissertations should be defended at least four weeks prior to the deadline for electronic submission.

Each student is required to have a faculty advisor who will meet with the student upon admission to the program. The faculty advisor, with the graduate program director, approves the student's plan of study and conducts the written and oral competency exams.

Doctor of Occupational Therapy Occupational Therapy (OTD)

Occupational Therapy doctoral program is a 105 credit, capstone-based, cohort-designed professional doctoral degree program culminating in student eligibility to sit for the national certification examination to obtain state licensure.

We provide an active learning, professional curriculum with didactic, clinical education (fieldwork), service-learning and capstone components designed to meet the accreditation standards of the Accreditation Council for Occupational Therapy Education.

Our goal

Our goal is to meet the needs of diverse individuals, communities, and populations and lead teams in health management, maintenance, and promotion and illness, injury and disability prevention.

Note that a felony conviction and professional license revocation may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Accreditation statement

The entry-level Occupational Therapy doctoral degree program has applied for accreditation and has been granted Candidacy Status by the Accreditation Council for Occupational Therapy Education (<http://www.acoteonline.org/>) (ACOTE) of the American Occupational Therapy Association (<https://www.aota.org/>) (AOTA).

The program must have a pre-accreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (<https://www.nbcot.org/>) (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination.

Accreditation Council for Occupational Therapy Education (ACOTE)
7501 Wisconsin Avenue, Suite 510E
Bethesda, MD 20814
301-652-6611
accred@aota.org

The Occupational Therapy doctoral program is designed to graduate diverse, intellectually inquisitive, and innovative occupational therapy practice leaders, advocates, and scholars, who, through their understanding of the relationship of occupation, health, and well being gained through rigorous didactic and clinical academic pursuit, find scientifically grounded practical solutions to the everyday occupational needs of society.

This rigorous academic program teaches effective clinical decision-making skills to prepare healthcare providers capable of treating diverse clients across the lifespan. Through its collaborative network of strategic partnerships involving regional healthcare, educational, and community-based infrastructure, the program leverages in-class didactic learning with service learning (civic engagement) and practicum experience to improve the health and well being of the citizens of the Commonwealth of Virginia, the nation, and the world.

Admission

- A completed application through the Occupational Therapy Centralized Application Service (OTCAS) that includes transcripts, a statement of interest, and three professional and/or academic recommendations.
- A bachelor's degree and official transcripts from each regionally accredited institution or foreign equivalent undergraduate and graduate program attended. We accept students with a wide variety of undergraduate backgrounds
- A minimum overall grade point average of 3.0 in undergraduate coursework
- Completion of the following prerequisite coursework:
 - **Anatomy and Physiology** - 8 credit hours with labs; the course content must address the organization of cells, tissues, organs, and organ systems in humans
 - **Developmental Psychology** - 3 credit hour child development or a lifespan course that includes learning principles and motor, language, cognitive, emotional, and social development
 - **Abnormal Psychology or Psychopathology** - 3 credit hour course addressing psychopathology
 - **Social Science** - 6 credit hours in courses that can include psychology, sociology, anthropology, political science, public health, epidemiology, gerontology, and urban studies
 - **Statistics** - 3 credit hour course addressing behavioral, educational, psychological, or mathematical statistics. Business statistics does not fulfill this requirement.
- Attestation of acknowledgment of the National Board for Certification in Occupational Therapy Character Review (<https://www.nbcot.org/en/Students/Services/>) (page 8) eligibility requirements for certifying occupational therapy practitioners
- No standardized achievement tests are required.
- A virtual interview with faculty and practitioners.
- Participation in the Occupational Therapy virtual observation experience (<https://sites.google.com/odu.edu/odu-otd-introductorymodule/home/>).

Curriculum Requirements

The Doctor of Occupational Therapy program consists of 36 courses for a total of 105 credit hours, delivered in nine consecutive semesters with classes being taught onsite and with asynchronous online instruction during fieldwork experiences.

Course Sequence

Year 1

Summer

8

OCCT 721	Foundations of Occupational Therapy Practice

Doctor of Physical Therapy Physical Therapy (DPT)

Archana Vatwani, Physical Therapy Graduate Program Director

The Doctor of Physical Therapy (<https://ww1.odu.edu/rehabsci/dpt/>) degree is designed to professionally prepare students with the knowledge and clinical experiences to become licensed physical therapists who will enter general physical therapy practice. Upon graduation, students will be prepared to sit for licensure in any United States jurisdiction and practice in any health care setting where physical therapy is offered. The curriculum consists of 116 credit hours over a three-year period of time including summers. There are three full-time clinical internships totaling 32 weeks. The first two are completed over the second and third summers, with the final 14 weeks of clinical education occurring in the spring semester preceding graduation. A variety of clinical facilities locally, throughout Virginia, and the United States are used for internship experiences. Students are responsible for providing their own transportation to these off-campus clinical sites.

Requirements for Admission

Students are admitted to the program after completion of a bachelor's degree and prerequisite course work. The application deadline is October 1 of each year, and the program begins in late May. Specific procedures for admission must be followed including the verification of meeting the technical standards. Admission into the program is competitive.

An application to the University and a separate application to the Physical Therapy Centralized Application Service (PTCAS) must be submitted. The PTCAS website will be open to applicants mid June each year at www.PTCAS.org (<http://www.PTCAS.org>). Deadline for application submission is October 1 each year. Please follow the directions for application found at the PTCAS site.

A competitive admission process is used for determining acceptance. Excellent ODU students may qualify for guaranteed entry into the Doctor of Physical Therapy program. For criteria and additional information, please contact the Pre-Health Undergraduate Advisor from Exercise Science (757) 683-4995 or College of Health Sciences advisor at (757) 683-5137.

Prerequisite courses include the following:

STAT 130M	Elementary Statistics	3
BIOL 121N	General Biology I	3
BIOL 122N	General Biology I Lab	1
BIOL 123N	General Biology II	3
BIOL 124N	General Biology II Lab	1
BIOL 240 or BIOL 250	Fundamentals of Anatomy and Physiology I Human Anatomy and Physiology I	4
BIOL 241 or BIOL 251	Fundamentals of Anatomy and Physiology II Human Anatomy and Physiology II	4
Two semesters of Chemistry, including labs		8
Two semesters of Physics, including labs		8
Psychology		3
An introductory course in Biomechanics or Kinesiology recommended but not required		
Total Credit Hours		38

School of Speech-Language Pathology

School of Speech-Language Pathology
 Dr. Stacie Raymer, Chair, Graduate Program Director
 Dr. Rachel Johnson, Undergraduate Program Director

The School of Speech-Language Pathology offers undergraduate and graduate degrees that prepare professionals to address communication and swallowing disorders and differences that disrupt learning, health, and quality of life for people across the lifespan. As stipulated by our accreditation status, the degrees are offered primarily in face-to-face format. The bachelor's degree offers elective opportunities for early clinical

experiences in preparation for master's degree programs in speech-language pathology (offered at Old Dominion University) or clinical doctoral programs in audiology (offered at other universities) where students become licensed and certified for clinical practice. The MS Speech-Language Pathology program prepares professionals for national certification and state licensure as a speech-language pathologist.

Programs

MS Speech-Language Pathology (p. 316)

Master of Science Speech-Language Pathology (MS)

Stacie Raymer, Graduate Program Director
 241 Lions Child Study Center
 757-683-4522

The Master of Science - Speech-Language Pathology education program (residential) is accredited by the Council on Academic Accreditation (CAA) in Audiology and Speech-Language Pathology, which is affiliated with the American Speech-Language-Hearing Association (2200 Research Boulevard #310, Rockville, Maryland 20850, phone: 800-498-2071 or 301-296-5700).

In compliance with federal disclosure regulations, the ODU M.S. in Speech-Language Pathology program meets the educational requirements for professional speech-language pathology licensure in the Commonwealth of Virginia. The degree prepares professionals to meet certification standards to apply for the Certificate of Clinical Competence in Speech-Language Pathology through curriculum and clinical activities that guide students to understand, identify, assess, and develop intervention programs for children and adults who present a wide array of speech, language, and swallowing disorders and differences. In addition to coursework, students engage in supervised on-campus practica in the ODU Speech and Hearing Clinic/Scottish Rite Center for Childhood Speech and Language Disorders. Students also complete two off-campus externships in settings such as public schools, hospitals, private practices, rehabilitation centers, and clinics. Graduate students also must successfully pass a written comprehensive examination. Upon graduation, all students will be prepared to complete the national examination in Speech-Language Pathology (Praxis) and apply for ASHA certification and licensure in the Commonwealth of Virginia and most other states. Student outcome data and the program strategic plan can be accessed on the program website: M.S. Speech-Language Pathology | Old Dominion University (odu.edu) (<https://www.odu.edu/speech-language-pathology/academics/msed/>).

Admission

Application and Admission

Application to the ODU MS Speech-Language Pathology program takes place through Communication Sciences and Disorders Centralized Application System (CSDCAS, <https://csdcas.liaisoncas.org/csdcas-students/>). The deadline to submit all documents (application, all transcripts, three letters of recommendation, essay) to CSDCAS is February 1 of each year. After submission of the CSDCAS application, students will receive an email from ODU Graduate Admissions to submit an ODU application fee. No additional documents are needed with the ODU application. Admission decisions take place after March 1 for admissions in Fall of that year.

Students with an undergraduate degree in speech-language pathology/communication sciences and disorders and students with bachelors degrees outside the discipline who have completed leveling coursework are eligible for acceptance into the program. The normal matriculation for a student who has completed undergraduate requirements in the field is two full years (6 semesters) of full-time enrollment. Prerequisite courses are accepted from other institutions and include: introduction to communication disorders; anatomy of speech and language; phonetics; speech sound disorders; language development; speech science; intro to audiology; and aural rehabilitation.

Admission to the graduate program in speech-language pathology is granted after a competitive review completed by the program faculty. Individuals

entering the master's degree program in speech-language pathology must possess an undergraduate degree by the Fall and will be required to submit final official transcripts to ODU prior to graduate enrollment.

The following minimum requirements are necessary to be considered for admission to the program's competitive application cycle:

1. a baccalaureate degree from an institution accredited by a regional accrediting body or an equivalent degree from a foreign institution;
2. an undergraduate grade point average of 2.80 or better;
3. three letters of recommendation, at least two of which should be from prior university instructors;
4. a 500 word essay describing the student's personal experiences and background that influence their potential to meet professional practice competencies (accountability, integrity, cultural competence, collaborative practice).
5. Please note: At this time, no GRE score is required.

Curriculum Requirements

Prerequisite Courses (or Equivalent from another Institution)

CSD 350	Survey in Communication Disorders	3
or CSD 452	Introduction to Voice and Fluency Disorders	
CSD 351	Anatomy of Speech, Language, and Swallowing	3
CSD 352	Phonetics	3
CSD 451/551	Introduction to Speech Sound Disorders	3
CSD 453/553	Speech and Language Development	3
CSD 458/558	Speech and Hearing Science	3
CSD 460/560	Hearing Disorders and Basic Audiometry	3
CSD 461/561	Aural Rehabilitation I	3
Total Credit Hours		24

Core Courses

CSD 612	Research and Evidence Based Practice in Speech-Language Pathology	3
CSD 651	Spoken and Written Language Disorders: School-Aged Children	3
CSD 652	Speech Sound Disorders	3
CSD 653	Language Disorders: Birth to Five Years	3
CSD 655	Voice and Resonance Disorders	2
CSD 656	Theories and Therapies in Stuttering	2
CSD 657	Aphasia	3
CSD 658	Swallowing Disorders	3
CSD 659	Augmentative and Alternative Communication	3
CSD 660	Procedures in Audiology	3
CSD 662	Cognitive-Communication Disorders	3
CSD 663	Clinical Perspectives on Autism Spectrum Disorders	2
CSD 664	Culturally Sustaining Communication Practices in Speech-Language Pathology	1
CSD 665	Theories of Supervision in Speech-Language Pathology	1
CSD 750	Neuromotor Speech Disorders	3

Clinical Practica

CSD 669	Clinical Practicum in Speech-Language Pathology I, II, III	3
CSD 668	Advanced Clinical Externship in Speech-Language Pathology (I, II)	3
Complete 9 more clinic credits in CSD 668 & CSD 669		9
Total Credit Hours		53

Additional Requirements

Continuance

Once admitted to the program, students must:

1. maintain a grade point average of 3.00;
2. satisfactorily complete all practica and externships;
3. earn no more than two grades below B-. Students must retake courses in which grades below B- are earned and receive grades of B- or higher. Obtaining three grades below B- leads to expulsion from the program;
4. meet prerequisite competencies (25 observation hours) in order to be admitted to clinical practica;
5. complete the CITI Responsible Conduct of Research (Social and Behavioral) training modules. See <https://www.odu.edu/impact/responsible-conduct-of-training> (<https://www.odu.edu/impact/responsible-conduct-of-training/>).

Exit

Students must:

1. have a grade point average of 3.00;
2. pass the department writing proficiency examination;
3. meet all academic competencies;
4. meet all clinical competencies;
5. pass a written comprehensive examination.

Comprehensive Examination

All students seeking a master's degree in speech-language pathology are required to successfully complete a written comprehensive examination. Topics of examination are based upon program coursework and related areas of professional preparation. If any topic is not successfully completed during the first administration, the student is allowed only one more attempt to pass that topic. Failure to pass any topic on the second administration leads to expulsion from the program.

Program Requirements

All students who have met prerequisite requirements must complete 53 semester hours of graduate study in speech-language pathology (38 academic credits and 15 clinical credits). Students are expected to satisfy all professional, academic, and clinical requirements and demonstrate professional, ethical, and communication behaviors commensurate with the certification standards of the profession and accreditation standards of the program.

Graduate Nursing Programs

The Ellmer School of Nursing offers graduate programs leading to the Master of Science in Nursing (M.S.N) and the Doctor of Nursing Practice (D.N.P). All graduate nursing programs are offered in an online/hybrid and on-campus format with the exception of Nurse Anesthesia. Graduate nursing programs are designed to prepare graduates with expertise in theory, research, and advanced nursing practice. Through academic courses and clinical experiences, graduate students are prepared to meet the present nationwide demand for nurses in advanced practice, leadership and education. The graduate nursing program is fully accredited by the Commission on Collegiate Nursing Education (CCNE).

Graduate students may specialize in a variety of roles. All specialties emphasize development of the nursing role through advanced theory and research. The program strives to instill leadership responsibility, professional commitment, and a holistic approach to health and nursing care in its graduates.

The number of credits required for the Master of Science in Nursing degree varies and reflects specific courses and practicum requirements necessary for certification in a specialty area of professional nursing practice. Tracks in the MSN program are designed for completion in five consecutive semesters following a full-time schedule; a part-time curriculum schedule may be available for selected tracks upon request.

NURS 800 and NURS 809, incorporated into the MSN core curriculum, are required prerequisites for the DNP. Before completion of the MSN, graduate students will be asked to indicate whether or not they intend to continue their studies to earn the DNP.

Refer to the Ellmer School of Nursing website at www.odu.edu/nursing (<http://www.odu.edu/nursing/>) for program specific course schedules.

Programs

Doctor of Nursing Practice Programs

- Nursing Practice with a Concentration in Advanced Practice (DNP) (p. 327)
- Nursing Practice with a Concentration in Nurse Anesthesia (DNP) (p. 328)
- Nursing Practice with a Concentration in Nurse Executive (DNP) (p. 329)
- Nursing Practice with a Concentration in Post-Masters Adult Gerontology Clinical Nurse Specialist (DNP) (p. 330)
- Nursing Practice with a Concentration in Post-Masters Neonatal Clinical Nurse Specialist (DNP) (p. 331)
- Nursing Practice with a Concentration in Post-Masters Pediatric Clinical Nurse Specialist (DNP) (p. 331)
- Nursing Practice with a Concentration in Post-Masters Psychiatric Mental Health Nurse Practitioner (DNP) (p. 332)

Master of Science in Nursing Programs

- Nursing with a Concentration in Adult Gerontology Clinical Nurse Specialist-Educator (MSN) (p. 318)
- Nursing with a Concentration in Family Nurse Practitioner (MSN) (p. 319)
- Nursing with a Concentration in Neonatal Clinical Nurse Specialist (MSN) (p. 321)

- Nursing with a Concentration in Neonatal Nurse Practitioner (MSN) (p. 322)
- Nursing with a Concentration in Nurse Midwifery (MSN) (p. 323)
- Nursing with a Concentration in Pediatric Clinical Nurse Specialist (MSN) (p. 324)
- Nursing with a Concentration in Pediatric Nurse Practitioner (MSN) (p. 325)
- Nursing with a Concentration in Psychiatric-Mental Health Nurse Practitioner (MSN) (p. 326)

Certificate Programs

- Neonatal Physician Assistant Certificate (p. 333)
- Nurse Educator Certificate (p. 334)
- Post-Professional - Adult Gerontology, Clinical Nurse Specialist Certificate (p. 334)
- Post-Professional - Family Nurse Practitioner Certificate (p. 334)
- Post-Professional - Psychiatric Mental Health Nurse Practitioner Certificate (p. 335)

Master of Nursing

Nursing with a Concentration in Adult Gerontology Clinical Nurse Specialist-Educator (MSN)

Adult Gerontology Clinical Nurse Specialist/Educator

Pamela Bishop, Program Director

The School of Nursing offers a curriculum leading to the degree of Master of Science in Nursing with an advanced practice area of Adult Gerontology Clinical Nurse Specialist (CNS)/Educator. The program of study prepares students as expert clinicians in the application of evidence-based knowledge within the realms of nursing interventions, teaching and research. Students also receive preparation as nurse educators, and are therefore dually prepared for clinical and academic roles.

The program requires course content in theory, research, education, and Adult Gerontology CNS professional and clinical cores. Applicants are admitted for either full-time or part-time study and begin in the fall. The curriculum is designed to prepare nurses as Adult Gerontology Clinical Nurse Specialists. Graduates of this program are eligible to sit for the American Nurses' Association (ANCC) Adult Gerontology Clinical Nurse Specialist Certification Exam or the American Association of Critical Care Nurses (AACN) Acute Care Adult-Gerontology (AACNS-AG) Exam. *The MSN - Adult Gerontology Clinical Nurse Specialist/Educator program is offered in an online/hybrid format.*

Admission

Program Application Deadlines

Clinical Nurse Specialist - Adult Gerontology Clinical Nurse Specialist/Educator

Priority Deadline: June 1

Admission Requirements for the MSN Graduate Program

In addition to meeting University requirements, applicants must meet the admission criteria below.

*Note: Some MSN tracks may have additional requirements. See program description for more information.

1. Current, unencumbered license as a registered nurse (RN).
2. Must have completed an undergraduate physical/health assessment course and an undergraduate statistics or research course as confirmed

by an official college transcript. Applicants who have not completed these pre-requisites prior to the application deadline will not be reviewed for admission.

3. Baccalaureate degree in nursing or related science field from a regionally accredited college or university with a minimum of a 3.0 grade point average.
4. Three letters of recommendation, with at least one from a former faculty member and at least one from a former employer while in the RN role.
5. A 500-700 word essay that addresses the applicant's goals and reasons for seeking certification as an advanced practice nurse.
6. At least one year of recent clinical nursing practice experience is preferred, but not required. See any specific program requirements.

Curriculum Requirements

Core Courses

Tracks in the MSN programs share a set of core courses that meet nursing accreditation and state approval guidelines for the degree. Regardless of the role concentration, all MSN students are required to complete the following **22 credits*** of core courses.

NURS 709	Evidence-Based Research for Nursing Practice	3
NURS 719	Family and Community Primary Care Assessment	1
NURS 761	Pharmacology for Advanced Practice Nursing	3
NURS 770	Pathophysiology for Advanced Nursing Practice	3
NURS 771	Physical Assessment for Advanced Nursing Practice	3
NURS 800	Integrative Concepts for Advanced Nursing Practice Roles	3
NURS 802	The Business of Advanced Nursing Practice	3
NURS 809	Advocacy for Healthcare Public Policy for Advanced Practice	3
Total Credit Hours		22

Adult Gerontology Clinical Nurse Specialist-Educator Concentration

In addition to the 22 credits of MSN core courses, the following courses are required for degree completion of the CNS/Educator program for a total of 47 credits.

NURS 530	Principles of Practice: Contemporary Issues in Nursing Care of the Older Adult	2
NURS 720	Instructional Delivery Methods & Learner Assessment	3
NURS 730	Nursing Curricular Design and Program Evaluation	3
NURS 734	Educator Internship: Classroom Instruction	3
NURS 738	Clinical Nurse Specialist I: Introduction to Practice	2
NURS 739	Clinical Nurse Specialist Practicum I: Role Socialization	4
NURS 756	Clinical Nurse Specialist II: Transition to Practice	3
NURS 757	Clinical Nurse Specialist Practicum II: Role Transition	5
Total Credit Hours for Concentration		25
Total Credit Hours for Degree		47

Additional Requirements

MSN Degree Requirements

In addition to general University requirements, the following apply to candidates for the Master of Science in Nursing degree:

1. Only degree-seeking students may take graduate MSN nursing courses.
2. Contact the graduate nursing office regarding study options for each program at (757) 683-4298 or the program director for the specific role.
3. A comprehensive portfolio evaluation covering the program of study will be required for MSN students.
4. The student must make clinical site arrangements three months in advance to take a nursing practicum to assure appropriate and available placement for the learning experience. The student must coordinate approval of clinical sites with the Program Director and School of Nursing Student Clinical Services Coordinator.
5. The B grade (3.00) is the minimal acceptable grade for all courses with a NURS prefix or any course required for the degree for continuation in the master's program. Satisfactory performance in the laboratory or practicum component of a nursing course is required. Students achieving less than a B grade (3.00) in a nursing course may request an opportunity from the role program director to repeat the course once. Two course failures will result in termination from the nursing program. Students may not progress with an incomplete in prerequisite courses as listed in the curriculum plan.

Additional requirements include physical exams, CPR certification, immunization requirements, computer competencies and technical standards, background checks and urine drug screening.

Transfers Between MSN Programs

Students may not transfer between programs in the MSN. Any student wishing to change programs may apply to a new program for admission during the regularly scheduled application process and deadline for the program. Their applications will be considered and reviewed as a new admission with the entire application pool.

Progression to the DNP

MSN students wishing to pursue a DNP must declare their intention before the final semester of their MSN program. If pursuing the DNP Advanced Practice program, NURS 805 and NURS 865 are taken in the final semester of the MSN program. Any student who has completed their MSN and did not declare their intent to pursue the DNP must apply and be considered with all post masters applicants as a new admission to the DNP program.

Transfer Credit Evaluation Policy

Any transfer credit requests must be submitted to the concentration program director within two weeks of notification of admission to the program. Once coursework has commenced for your program of study, all coursework must be completed at Old Dominion University, and no further transfer credits will be awarded.

Master of Nursing Nursing with a Concentration in Family Nurse Practitioner (MSN)

Master of Science in Nursing – Family Nurse Practitioner

Lisa Cordero, Program Director

The family nurse practitioner (FNP) role prepares graduate students to provide a full range of primary care services to individuals and families throughout the life span. In collaboration with other health care professionals, graduate students provide health promotion, health maintenance and restorative care to well, at-risk, and chronically ill clients and their families. Student clinical experiences are provided in a variety of primary care settings. Successful completion of the program qualifies

students to register for the AANP or ANCC examination for certification as a family nurse practitioner. *The MSN - Family Nurse Practitioner is offered in an online/hybrid format.*

Master of Nursing Nursing with a Concentration in Neonatal Nurse Practitioner (MSN)

Master of Science in Nursing - Neonatal Nurse Practitioner

Alyssa Weiss, Program Director

The neonatal nurse practitioner (NNP) provides population-focused health care to preterm (<37 weeks) and term neonates, infants, and children up to 2 years of age. As a key member of an interprofessional team, the NNP participates in a wide variety of complex patient care activities in settings that include, but are not limited to, all levels of neonatal inpatient care in both academic and community-based settings; transport, acute care, and chronic care settings; delivery rooms; and outpatient settings. Student clinical experiences are designed to prepare the graduate to practice as an NNP providing direct patient care in a newborn nursery, or in a Level II, III, or IV NICU. Successful completion of the program qualifies students to register for the examination for certification as neonatal nurse practitioner. For admission requirements see the website for the School of Nursing at <http://www.odu.edu/nursing> or contact the program director. *The MSN - Neonatal Nurse Practitioner program is offered in an online/hybrid format.*

Any student who has completed their MSN and did not declare their intent to pursue the DNP must apply and be considered with all post masters applicants as a new admission to the DNP program.

Transfer Credit Evaluation Policy

Any transfer credit requests must be submitted to the concentration program director within two weeks of notification of admission to the program. Once coursework has commenced for your program of study, all coursework must be completed at Old Dominion University, and no further transfer credits will be awarded.

Master of Nursing Nursing with a Concentration in Nurse Midwifery (MSN)

Master of Science in Nursing - Nurse Midwifery (cooperative program with Shenandoah University)

Alyssa Weiss, Program Director
Penny Marzalik, Shenandoah University Program Director

The Master's in Nursing, with specialization in nurse midwifery, is a joint program with Shenandoah University. The two-year program includes advanced practice nursing content offered by Old Dominion University. Midwifery specific courses taken in the second year are through Shenandoah University. The Master of Science in Nursing is awarded by

Old Dominion University and a certificate of midwifery specialty is awarded by Shenandoah University. Graduates are eligible to take the national midwifery certification examination. The program is full time study. *The MSN - Nurse Midwifery is offered in an online/hybrid format.*

Admission

Program Application Deadlines

Nurse Midwifery - May 1

Admission Requirements for the MSN Graduate Program

In addition to meeting University requirements, applicants must meet the admission criteria below.

*Note: Some MSN tracks may have additional requirements. See program description for more information.

1. Current, unencumbered license as a registered nurse (RN).
2. Must have completed an undergraduate physical/health assessment course and an undergraduate statistics or research course as confirmed by an official college transcript. Applicants who have not completed these pre- requisites prior to the application deadline will not be reviewed for admission.
3. Baccalaureate degree in nursing or related science field from a regionally accredited college or university with a minimum of a 3.0 grade point average.
4. Three letters of recommendation, with at least one from a former faculty member and at least one from a former employer while in the RN role.
5. A 500-700 word essay that addresses the applicant's goals and reasons for seeking certification as an advanced practice nurse.
6. At least one year of recent clinical nursing practice experience is preferred, but not required.

Curriculum Requirements

Core Courses

Tracks in the MSN programs share a set of core courses that meet nursing accreditation and state approval guidelines for the degree. Regardless of the role concentration, all MSN students are required to complete the following **22 credits*** of core courses.

NURS 709	Evidence-Based Research for Nursing Practice	3
NURS 719	Family and Community Primary Care Assessment	1
NURS 761	Pharmacology for Advanced Practice Nursing	3
NURS 770	Pathophysiology for Advanced Nursing Practice	3
NURS 771	Physical Assessment for Advanced Nursing Practice	3
NURS 800	Integrative Concepts for Advanced Nursing Practice Roles	3
NURS 802	The Business of Advanced Nursing Practice	3
NURS 809	Advocacy for Healthcare Public Policy for Advanced Practice	3
Total Credit Hours		22

Nurse Midwifery Concentration

In addition to the 22 credits of MSN core courses, students must complete 26 credits of nurse midwife courses at SU.

Shenandoah Courses:

NM 610 Primary Care of Women	2
NM 612 Women's Health	2
NM 620 Comprehensive Antepartal Care	2

NMLB 624 Midwifery Practicum I	3
NMLB 630 Midwifery Practicum II	4
NM 640 Comprehensive Perinatal Care	3
NM 641 Perinatal Complications	2
NMLB 651 Integrated Midwifery Internship	5
NM 652 Evidence Based Practice Project	1
NM 660 Advanced Nurse-Midwifery Role Development	2
Total Concentration Credit Hours	26
MSN Core Requirements	22
Total Credit Hours	48

Additional Requirements

MSN Degree Requirements

In addition to general University requirements, the following apply to candidates for the Master of Science in Nursing degree:

1. Only degree-seeking students may take graduate MSN nursing courses.
2. Contact the graduate nursing office regarding study options for each program at (757) 683-4298 or the program director for the specific role.
3. A comprehensive portfolio evaluation covering the program of study will be required for MSN students.
4. The student must make clinical site arrangements three months in advance to take a nursing practicum to assure appropriate and available placement for the learning experience. The student must coordinate approval of clinical sites with the Program Director and School of Nursing Student Clinical Services Coordinator.
5. The B grade (3.00) is the minimal acceptable grade for all courses with a NURS prefix or any course required for the degree for continuation in the master's program. Satisfactory performance in the laboratory or practicum component of a nursing course is required. Students achieving less than a B grade (3.00) in a nursing course may request an opportunity from the role program director to repeat the course once. Two course failures will result in termination from the nursing program. Students may not progress with an incomplete in prerequisite courses as listed in the curriculum plan.

Additional requirements include physical exams, CPR certification, immunization requirements, computer competencies and technical standards, background checks and urine drug screening.

Transfers Between MSN Programs

Students may not transfer between programs in the MSN. Any student wishing to change programs may apply to a new program for admission during the regularly scheduled application process and deadline for the program. Their applications will be considered and reviewed as a new admission with the entire application pool.

Progression to the DNP

MSN students wishing to pursue a DNP must declare their intention before the final semester of their MSN program. If pursuing the DNP Advanced Practice program, NURS 805 and NURS 865 are taken in the final semester of the MSN program. Any student who has completed their MSN and did not declare their intent to pursue the DNP must apply and be considered with all post masters applicants as a new admission to the DNP program.

Transfer Credit Evaluation Policy

Any transfer credit requests must be submitted to the concentration program director within two weeks of notification of admission to the program. Once coursework has commenced for your program of study, all coursework must be completed at Old Dominion University, and no further transfer credits will be awarded.

Master of Nursing Nursing with a Concentration in Pediatric Clinical Nurse Specialist (MSN)

Pam Bishop, Program Director

The School of Nursing offers a curriculum leading to the degree of Master of Science in Nursing with an advanced practice area of Pediatric Clinical Nurse Specialist. The program of study prepares students as expert clinicians in the application of evidence-based knowledge within the realms of nursing interventions, teaching and research.

The program requires course content in theory, research, education, and Pediatric CNS professional and clinical cores. The curriculum is designed to prepare nurses as Pediatric Clinical Nurse Specialists. Graduates of this program are eligible to sit for the American Association of Critical Care Nurses (AACN) Acute Care Pediatric (ACCNS-P) Exam. *The MSN - Pediatric Clinical Nurse Specialist is offered in an online/hybrid format.*

Master of Nursing Nursing with a Concentration in Pediatric Nurse Practitioner (MSN)

Masters of Science in Nursing - Pediatric Nurse Practitioner

Diana Cartagena, Program Director

The pediatric nurse practitioner (PNP) role prepares graduate students to provide a full range of services to pediatric patients in primary care settings. In collaboration with other health care professionals, graduate students provide health promotion, health maintenance and restorative care to well, at-risk, and chronically ill pediatric patients and their families.

Student clinical experiences are provided in a variety of primary care settings for students pursuing the primary care pediatric role. Successful completion of the program qualifies students to register for the examination for certification as a pediatric nurse practitioner. *The MSN - Pediatric Nurse Practitioner is offered in an online/hybrid format.*

Doctor of Nursing Practice Nursing Practice with a Concentration in Advanced Practice (DNP)

Doctor of Nursing Practice

Kelli Garber, Program Director

The Doctor of Nursing Practice program is designed for nurses that are seeking a terminal degree in nursing practice. DNP-prepared nurses are equipped to serve as clinical experts, change agents, and advocates in addressing healthcare in our nation. Specific areas of focus include:

advanced practice skills, healthcare policy, organizational and systems leadership, interprofessional collaboration, evidence-based research, healthcare technology, informatics, and patient advocacy. The DNP program at ODU is fully accredited by the Commission on Collegiate Nursing Education (CCNE).

The Doctor of Nursing Practice (DNP) degree will provide additional education for advanced practice nurses in:

1. Advanced diagnostics and practice skills;
2. Care of the underserved and increasingly diverse population; and
3. Incorporation of emerging care technologies. The program may be completed as a full-time or part-time student and is distance friendly.

To graduate from Old Dominion University's DNP Program, a student must have successfully completed all required course work, including prerequisite courses of NURS 800 and NURS 809, an evidence-based research project and all clinical practicum. It will take a full-time student four semesters (spring, summer, fall and spring) to complete the program. A part-time student will complete the DNP program in seven semesters (spring, summer, fall, spring, summer, fall, and spring). *The DNP - Post Master's Advanced Practice track is offered in an online/hybrid format.*

Admission Requirements for the DNP Program

*Note: For admission requirements to the Nurse Anesthesia program refer to the website at <http://www.odu.edu/nursing> (<http://www.odu.edu/nursing/graduate/dnp-to-post-masters/anesthesia/>).

In addition to meeting University requirements, applicants must meet the admission criteria below..

1. Current, unencumbered license as a registered nurse (RN).
2. Master's degree in nursing or a related field from a regionally accredited college or university with a minimum of 3.0 grade point
3. Baccalaureate degree in nursing or related field from a regionally accredited college or university with a minimum of a 3.0 grade point average.
4. Three letters of recommendation, with at least one from a former faculty member and at least two from former employers.
5. A 500-700 word essay that should speak specifically to the concentration area to which you are applying.
6. Current Resume

Application Deadlines for the DNP Programs

Post Master's Advanced Practice - Early Admission June 1, Deadline Sep 1. Late Applications considered if space available.

Curriculum Requirements

Advanced Practice Concentration

NURS 801	Roles and Responsibilities for Transforming Practice	3
NURS 802	The Business of Advanced Nursing Practice	3
NURS 803	Leadership and Interprofessional Practice in Healthcare	3
NURS 805	Application of Practice-Based Research Methods	2
NURS 806	Proposal Development and Database Management	4
NURS 807	Informatics and Healthcare Technology	3
NURS 865	DNP Clinical Practicum I	2
NURS 866	DNP Clinical Practicum II	2
NURS 867	DNP Clinical Practicum III	3
NURS 868	DNP Clinical Practicum IV	3
NURS 890	DNP Nursing Capstone	3

Prerequisite courses NURS 800* and NURS 809* must also be completed to meet degree requirements for the DNP. NURS 800 and 809 are included in the MSN curricula. NURS 802* is also included in the MSN curricula. If previously completed for the MSN, students may take an elective course to meet these three credits rather than repeating NURS 802

Total Credit Hours

* Courses are included in the MSN curricula.

Doctor of Nursing Practice Nursing Practice with a Concentration in Nurse Anesthesia (DNP)

Doctor of Nursing Practice - Nurse Anesthesia

Adrienne Hartgerink, Program Director, ahartger@odu.edu

The Doctor of Nursing Practice (DNP) with a concentration in nurse anesthesia prepares the graduate to provide a variety of anesthetics to patients across the lifespan and wellness continuum. Graduates are groomed to translate research and evidence into clinical practice, to care for underserved and diverse populations, incorporate emerging care technologies, develop leadership skills and measure patient outcomes in an effort to improve safety and quality of patient care.

The Old Dominion University DNP program with a concentration in nurse anesthesia is a 36 month full time program that begins in May each year. The program is a hybrid of on-campus and on-line classes. The curriculum is an assimilation of nurse anesthesia specialty and DNP courses. Each student is required to complete a scholarly project that addresses patient care, quality improvement, process improvement, or practice improvement. The Nurse Anesthesia program is accredited by the Council on Accreditation for Nurse Anesthesia Educational Programs. For admission requirements, please see the website for the School of Nursing (www.odu.edu/nursing) or contact the program director.

Admission Requirements for the Nurse Anesthesia Program

In addition to meeting University requirements, applicants must meet the admission criteria below..

1. Current, unencumbered multi-state compact license as a registered nurse (RN).
2. Baccalaureate degree in nursing from a regionally accredited college or university with a minimum of a 3.0 grade point average.
3. Three letters of recommendation, with at least one from a direct supervisor.
4. A 500-700 word essay that should speak specifically to the concentration area to which you are applying.
5. Critical Care Registered Nurse Certification including score
6. Current American Heart Association certifications in BLS, ACLS, and PALS
7. A minimum of 16 hours of clinical shadowing experience
8. Current Resume with a minimum of two years of full-time nursing experience in a critical care unit at the time of application. Critical care experience must be obtained in a critical care area within the United States, its territories, or a US military hospital outside of the United States.
9. If English is not your native language, TOEFL scores (100 or above)
10. GRE Required: Preferred >300 total score (150 on Verbal and 150 on Quantitative Reasoning and 4 or higher on Analytical Writing)
11. Earned grade of **B** or better in the following courses:

- Anatomy & Physiology
- Organic or biochemistry (200 level or above)
- Statistics
- Pathophysiology
- Pharmacology
- *Please note chemistry and statistics classes must be completed within the last **10 years**

Doctor of Nursing Practice Nursing Practice with a Concentration in Nurse Executive (DNP)

Doctor of Nursing Practice- Post-Master's Nurse Executive

Janice Hawkins, Program Director

The Doctor of Nursing Practice program is designed for nurses that are seeking a terminal degree in nursing practice. DNP-prepared nurses are equipped to serve as clinical experts, change agents, and advocates in addressing healthcare in our nation. Specific areas of focus include: advanced practice skills, healthcare policy, organizational and systems leadership, interprofessional collaboration, evidence-based research, healthcare technology, informatics, and patient advocacy. The DNP program at ODU is fully accredited by the Commission on Collegiate Nursing Education (CCNE).

The Nurse Executive role prepares top level nurse executives for leadership positions in a health system. The program outcomes are consistent with the American Organization of Nurse Executive guidelines for nurse executive practice. Content focuses on executive leadership skills, working with vulnerable populations, fiscal and human resource management, quality magnet achievement, emerging technology, and organizational research in clinical issues. Students participate in executive internships throughout the program in their home area.

To graduate from Old Dominion University's DNP Program, a student must have successfully completed all required course work, including prerequisite courses of NURS 800 and 809, an evidence-based research project and all clinical practicum. Students must successfully complete 1000 hours of supervised clinical practice. The DNP program provides a minimum of 560 clinical hours within four practicum courses. MSN courses with a supervised clinical practicum component will be considered for transfer credit toward the total clinical hour requirement. A review of MSN transcripts or course descriptions/syllabi will be used to determine whether clinical hours are acceptable for transfer. Students entering the Nurse Executive DNP program, who require additional clinical hours, will be advised of their options by the Program Director. *The DNP - Post-Master's Nurse Executive track is offered in an online/hybrid format.*

Admission Requirements for the DNP Program

In addition to meeting University requirements, applicants must meet the admission criteria below..

1. Current, unencumbered license as a registered nurse (RN).
2. Master's degree in nursing or a related field from a regionally accredited college or university with a minimum of 3.0 grade point
3. Baccalaureate degree in nursing or related field from a regionally accredited college or university with a minimum of a 3.0 grade point average.
4. Three letters of recommendation, with at least one from a former faculty member and at least two from former employers.
5. A 500-700 word essay that should speak specifically to the concentration area to which you are applying.
6. Current Resume

Application Deadlines for the DNP Programs

Post Master's Nurse Executive - Priority Deadlines April 1 and September 1

Curriculum Requirements

NURS 805	Application of Practice-Based Research Methods	2
NURS 806	Proposal Development and Database Management	4
NURS 807	Informatics and Healthcare Technology	3
NURS 810	Leadership in Complex Systems and Organizations	3
NURS 812	Evidence-Based Management for Quality Healthcare	3
NURS 814	Competitive Resource Design and Utilization	3
NURS 816	DNP Executive Practicum I	2-5
NURS 817	DNP Executive Practicum II	2-5
NURS 818	DNP Executive Practicum III	3-5
NURS 819	DNP Executive Practicum IV	3-5
NURS 890	DNP Nursing Capstone	3
Prerequisite courses NURS 800* and NURS 809* must also be completed to meet degree requirements for the DNP.		
Total Credit Hours		31-41

*Courses are included in the master's curricula.

Doctor of Nursing Practice Nursing Practice with a Concentration in Post-Masters Adult Gerontology Clinical Nurse Specialist (DNP)

Doctor of Nursing Practice

The Doctor of Nursing Practice program is designed for nurses that are seeking a terminal degree in nursing practice. DNP-prepared nurses are equipped to serve as clinical experts, change agents, and advocates in addressing healthcare in our nation. Specific areas of focus include: advanced practice skills, healthcare policy, organizational and systems leadership, interprofessional collaboration, evidence-based research, healthcare technology, informatics, and patient advocacy. The DNP program at ODU is fully accredited by the Commission on Collegiate Nursing Education (CCNE).

ODU offers seven concentrations in the DNP program. The number of credits required for the Doctor of Nursing degree varies by concentration and reflects specific courses and practicum requirements necessary for the specialty area of professional nursing practice. NURS 800 and NURS 809, incorporated into the MSN core curriculum, are required prerequisites for the DNP.

Refer to the School of Nursing (SON) website for more information: www.odu.edu/nursing.

Post Master's Adult Gerontology Clinical Nurse Specialist DNP

Janice Hawkins, DNP Nurse Executive Program Director

Pam Bishop, Adult Gerontology CNS Program Director

The Post Masters Adult Gerontology CNS Doctor of Nursing Practice (DNP) concentration has been developed to address a growing demand from advanced practice nurses. This Post-Masters Clinical Nurse Specialist DNP program is targeted to licensed, registered nurses with an MSN. The curriculum is designed to prepare nurses as Adult Gerontology Clinical Nurse Specialists.

The program is offered in an online/hybrid format and requires course content in theory, research, and Adult Gerontology CNS professional and

clinical cores. Graduates of this program are eligible to sit for the American Nurses' Association (ANCC) Adult Gerontology Clinical Nurse Specialist Certification Exam or the American Association of Critical Care Nurses (AACN) Acute Care Adult-Gerontology (AACNS-AG) Exam.

Additional requirements include physical exams, CPR certification, immunization requirements, computer competencies and technical standards, background checks and urine drug screening.

To graduate from Old Dominion University's DNP Program, a student must have successfully completed all required course work, including prerequisite courses of NURS 800 and NURS 809, an evidence-based research project, and all clinical practicum.

Admission Requirements

Admission Requirements for the Adult Gerontology CNS DNP

In addition to meeting University requirements, applicants must meet the admission criteria below.

1. Current, unencumbered license as a registered nurse (RN).
2. Master's degree in nursing or a related field from a regionally accredited college or university with a minimum of 3.0 grade point
3. Baccalaureate degree in nursing or related field from a regionally accredited college or university with a minimum of a 3.0 grade point average.
4. Three letters of recommendation, with at least one from a former faculty member and at least two from former employers.
5. A 500-700 word essay that should speak specifically to the concentration area to which you are applying.
6. Current Resume
7. Prior successful completion (grade of B or better) of the following courses in a previous APRN MSN program, preferred within 5 years of admission:
 - a. Advanced Pathophysiology
 - b. Advanced Physical Assessment
 - c. Advanced Pharmacology

Application Deadline

Priority Deadline: June 1

NURS 800 and NURS 809, incorporated into the MSN core curriculum, are required prerequisites for the DNP.

Refer to the School of Nursing (SON) website for more information: www.odu.edu/nursing.

Post Master's Pediatric Clinical Nurse Specialist DNP

Janice Hawkins, DNP Nurse Executive Program Director

Pam Bishop, Pediatric CNS Program Director

The Post Masters Adult Gerontology CNS Doctor of Nursing Practice (DNP) concentration has been developed to address a growing demand from advanced practice nurses. The program of study prepares students as expert clinicians in the application of evidence-based knowledge within the realms of nursing interventions, teaching, and research. This Post-Masters Clinical Nurse Specialist DNP program is targeted to licensed, registered nurses with an MSN.

The program requires course content in theory, research, and Pediatric CNS professional and clinical cores. The curriculum is designed to prepare nurses as Pediatric Clinical Nurse Specialists. Graduates of this program are eligible to sit for the American Association of Critical Care Nurses (AACN) Acute Care Pediatric (ACCNS-P) Exam. The Post Master's Pediatric CNS DNP is offered in an online/hybrid format.

Additional requirements include physical exams, CPR certification, immunization requirements, computer competencies and technical standards, background checks and urine drug screening.

To graduate from Old Dominion University's DNP Program, a student must have successfully completed all required course work, including prerequisite courses of NURS 800 and NURS 809, an evidence-based research project, and all clinical practicum.

Admission Requirements

Admission Requirements for the Pediatric CNS DNP

In addition to meeting University requirements, applicants must meet the admission criteria below.

1. Current, unencumbered license as a registered nurse (RN).
2. Master's degree in nursing or a related field from a regionally accredited college or university with a minimum of 3.0 grade point
3. Baccalaureate degree in nursing or related field from a regionally accredited college or university with a minimum of a 3.0 grade point average.
4. Three letters of recommendation, with at least one from a former faculty member and at least two from former employers.
5. A 500-700 word essay that should speak specifically to the concentration area to which you are applying.
6. Current Resume

Doctor of Nursing Practice Nursing Practice with a Concentration in Post-Masters Psychiatric Mental Health Nurse Practitioner (DNP)

Doctor of Nursing Practice

The Doctor of Nursing Practice program is designed for nurses that are seeking a terminal degree in nursing practice. DNP-prepared nurses are equipped to serve as clinical experts, change agents, and advocates in addressing healthcare in our nation. Specific areas of focus include: advanced practice skills, healthcare policy, organizational and systems leadership, interprofessional collaboration, evidence-based research, healthcare technology, informatics, and patient advocacy. The DNP program at ODU is fully accredited by the Commission on Collegiate Nursing Education (CCNE).

ODU offers three concentrations in the DNP programs: 1) Post-Master's Advanced Practice (build on traditional master's programs for nurse practitioners, clinical nurse specialists, nurse midwives, and nurse anesthesia), 2) Post-Master's Nurse Executive, Post-Masters Psychiatric Mental Health Nurse Practitioner (for APRNs seeking to add a PMHNP and DNP) and 3) Post-Baccalaureate Nurse Anesthesia (CRNA). In order to graduate from Old Dominion University's Post-Master's APN and NE DNP programs, a student must successfully complete all 37 post-masters credit hours of required course work, including an evidence-based

DNP project, and all clinical practica. It will take a full-time student four semesters (spring, summer, fall and spring) to complete the program. A part-time student will complete the DNP program in seven semesters (spring, summer, fall, spring, summer, fall, and spring). All of the master's programs in nursing at ODU include six credits that also meet requirements for the DNP program allowing students to complete the DNP in three additional semesters. See specific differing credit requirements and curriculum plans for Post Masters Psych Mental Health DNP and Post Baccalaureate Nurse Anesthesia programs.

See detailed information on each concentration in the following sections. Refer to the School of Nursing (SON) website for program specific curriculum plans www.odu.edu/nursing.

Post Master's Psychiatric Mental Health Nurse Practitioner

Kelli Garber, DNP Advanced Practice Program Director

Katia Hall, PMHNP Program Director

The Psychiatric Mental Health Nurse Practitioner Post Masters Doctor of Nursing Practice (DNP) program has been developed to address a growing demand from advanced practice nurses for programming that enables them to obtain a DNP and an additional national certification as a nurse practitioner in the area of psychiatric mental health. This Post Masters Psychiatric Mental Health DNP program is targeted to licensed, registered nurses with an APRN MSN who wish to gain new skills and knowledge for board certification to provide psychiatric care services as a psychiatric mental health nurse practitioner. The Psychiatric Mental Health Doctor of Nursing Practice (DNP) degree will provide additional education for advanced practice nurses in:

- Advanced diagnostics and practice skills in psychiatric mental health;
- Care of the underserved and increasingly diverse population; and
- Incorporation of emerging care technologies.

To graduate from Old Dominion University's DNP Program, a student must have successfully completed all required course work, including prerequisite courses of NURS 800 and NURS 809, an evidence-based research project and all clinical practicum. The DNP Post Master's Psychiatric Mental Health Nurse Practitioner concentration is offered in an online/hybrid format.

Admission Requirements

Admission Requirements for the DNP Program

In addition to meeting University requirements, applicants must meet the admission criteria below..

1. Current, unencumbered license as a registered nurse (RN).
2. Master's degree in nursing or a related field from a regionally accredited college or university with a minimum of 3.0 grade point
3. Baccalaureate degree in nursing or related field from a regionally accredited college or university with a minimum of a 3.0 grade point average.
4. Three letters of recommendation, with at least one from a former faculty member and at least two from former employers.
5. A 500-700 word essay that should speak specifically to the concentration area to which you are applying.
6. Current Resume

Application Deadline

September 1

Psychiatric Mental Health Nurse Practitioner

1. Completed application for review and admission to the Psychiatric Mental Health Nurse Practitioner track and DNP program.
2. Prior successful completion (grade of B or better) of the following courses in a previous APRN MSN program, preferred within 5 years of admission:

- a. Advanced Pathophysiology
- b. Advanced Physical Assessment
- c. Advanced Pharmacology

Certificate

Neonatal Physician Assistant Certificate

Certificate Programs

Certificate programs offered by the School of Nursing are post-graduate, non-degree offerings. These highly focused programs are designed to provide nurses or others with knowledge and skills to complement their advanced practice roles.

Neonatal Physician Assistant

Alyssa Weiss, Advisor

This program is designed to educate licensed physician assistants with sponsored physician support for a role in neonatal care. The program of study will provide didactic instruction to complement the physician assistant's on-the-job clinical training, as well as offer a unique opportunity for interprofessional education with neonatal nurse practitioner students. *The Neonatal Physician Assistant Certificate is offered in an online/hybrid format.*

Admission Requirements for Certificate Programs

1. School of Nursing Supplemental Application (available at www.odu.edu/nursing)

2. A 500-700 word essay that addresses the applicant's goals and reasons for seeking the certificate.
3. Transcripts
4. One letter of recommendation
5. Resume
6. Non-degree application

In addition to the certificate admission requirements listed above, PA applicants must submit a physician sponsor letter, Physician Assistant transcripts, active Physician Assistant license, and documentation of Physician Assistant certification.

Curriculum Requirements

NURS 773	Pharmacology for Advanced Neonatal Care	3
NURS 774	Advanced Neonatal Care: High Risk Management I	3
NURS 751	Developmental Neonatal Physiology	2
HLSC 771	Foundations of Advanced Neonatal Care	3
HLSC 775	Advanced Neonatal Care: High Risk Management II	3
Total Credit Hours		14

Certificate Nurse Educator Certificate

Certificate Programs

Certificate programs offered by the School of Nursing are post-graduate, non-degree offerings. These highly focused programs are designed to provide nurses or others with knowledge and skills to complement their advanced practice roles.

Nurse Educator Certificate Program

Karen Karlowicz, Advisor

The Nurse Educator Certificate program offers valuable knowledge and practical experience related to teaching in entry-level or graduate nursing education programs. Courses provide an overview of nursing curriculum design, program evaluation, student assessment, instructional methodologies, and professional/ethical/legal issues in nursing/health professions education. Completion of a teaching practicum is required.

This certificate program is targeted to nurses with at least one graduate degree in nursing who may be seeking faculty positions in entry-level or graduate nursing education programs. Admission is also open to students currently enrolled in a graduate nursing program as well as currently enrolled or graduates of other Health Sciences graduate degree programs. The expected time to complete the certificate is three semesters. It is recommended that students begin the course sequence in fall semester. The *Nurse Educator Certificate* is offered in an online/hybrid format.

Admission Requirements for Certificate Programs

1. School of Nursing Supplemental Application (available at www.odu.edu/nursing)
2. Current, unencumbered license as a registered nurse (RN).
3. A 500-700 word essay that addresses the applicant's goals and reasons for seeking the certificate.
4. Transcripts
5. One letter of recommendation
6. Resume
7. Non degree application

Curriculum Requirements

NURS 676	Professional, Ethical and Legal Concepts of Nursing Education	3
NURS 720	Instructional Delivery Methods & Learner Assessment	3
NURS 730	Nursing Curricular Design and Program Evaluation	3
NURS 734	Educator Internship: Classroom Instruction	3
Total Credit Hours		12

Certificate Post-Professional - Adult Gerontology, Clinical Nurse Specialist Certificate

Pamela Bishop, Advisor Certificate programs offered by the School of Nursing are post-graduate, non-degree offerings. These highly focused programs are designed to provide nurses or others with knowledge and skills to complement their advanced practice roles. This post-professional certificate enables nurses with a previously earned MSN to complete only those courses and practicums required for eligibility to take the Adult Gerontology Clinical Nurse Specialist certification exam. This program is offered in an online/hybrid format.

Please note: Admissions as of Fall 2025 is on hold for program review.

Admission Requirements Successful completion (grade of B or better) of the following courses: Advanced Pathophysiology Advanced Physical Assessment Advanced Pharmacology Completed application for admission to the certificate program. Current, unencumbered license as a registered nurse (RN). The application submission deadlines for the certificate program are the same as those for the MSN program.

Curriculum Degree Requirements The 16-credit hour post-master's certificate curriculum includes those courses required by the American Nurses Credentialing Center and the American Association of Critical Care Nurses, both of which administer certification exams for the Adult Gerontology Clinical Nurse Specialist.

NURS 530	Principles of Practice: Contemporary Issues in Nursing Care of the Older Adult	2
NURS 738	Clinical Nurse Specialist I: Introduction to Practice	2
NURS 739	Clinical Nurse Specialist Practicum I: Role Socialization	4
NURS 756	Clinical Nurse Specialist II: Transition to Practice	3
NURS 757	Clinical Nurse Specialist Practicum II: Role Transition	5
Total Credit Hours		16

Certificate Post-Professional - Family Nurse Practitioner Certificate Post-Professional - Family Nurse Practitioner (Graduate Certificate)

Lisa Cordero, Advisor

The Post-Professional Certificate for Family Nurse Practitioner has been developed to address a growing demand from nurses for programming that enables them to obtain national certification as an advanced practice nurse (nurse practitioner) in the area of family care. The program will educate students in the concepts associated with illnesses and conditions

across the lifespan. Students will develop knowledge in the diagnosis and management of illnesses. Students will learn to provide advanced nursing care to patients from childhood to older adulthood. Upon completing the program, application of key concepts related to diagnosis, treatment, and ongoing management of patients in primary care settings, with a focus on healthy promotion and disease prevention using best practices and evidence-based care to achieve the best possible patient outcomes will be understood.

This certificate program is targeted to licensed, registered nurses with an APRN MSN who wish to gain new skills and knowledge for board certification to provide primary care services as a family nurse practitioner. The expected time to complete the program is 1.5 years. There is a limited number of seats for the Post-Professional Certificate in Family Nurse Practitioner. *The Post Professional FNP Certificate track is offered in an online/hybrid format.*

Please note: Admissions as of Fall 2025 is on hold for program review.

Admission Requirements

- Successful completion (grade of A- or better) of the following courses in a previous APRN MSN program within the last 5 years:
 - Advanced Pathophysiology
 - Advanced Physical Assessment
 - Advanced Pharmacology
- Completed application for admission to the certificate program.
- Current, unencumbered license as a registered nurse (RN).
- The application submission deadlines for the certificate program are the same as those for the MSN program.

Curriculum Requirements

NURS 705	Primary Care Approaches for Children	3
NURS 719	Family and Community Primary Care Assessment	1
NURS 760	Advanced Family Nursing I Practicum	3
NURS 762	Advanced Family Nursing I: Management of Acute Illnesses	3
NURS 764	Advanced Family Nursing II Practicum	4
NURS 765	Advanced Family Nursing II: Management of Chronic Illnesses	3
NURS 766	Primary Care Approaches for Women	3
NURS 767	Advanced Family Nursing III Practicum	3-4
Total Credit Hours		23-24

Certificate

Post-Professional - Psychiatric Mental Health Nurse Practitioner Certificate

Katia Hall, Advisor

The Post-Professional Certificate in Psychiatric Mental Health Nurse Practitioner has been developed to address a growing demand from nurses for programming that enables them to obtain national certification as an advanced practice nurse (nurse practitioner) in psychiatric mental health. This certificate program is targeted to licensed, registered nurses with an APRN MSN who wish to gain new skills and knowledge for board certification to provide psychiatric care services as a psychiatric mental health nurse practitioner. The expected time to complete the program is 3 semesters or 12 months. There is a limited number of seats for the Post-Professional Certificate in Psychiatric Mental Health Nurse Practitioner. *The Post Professional PMHNP Certificate track is offered in an online/hybrid format.*

Please note: Admissions as of Fall 2025 is on hold for program review.

Admission Requirements

- Successful completion (grade of B or better) of the following courses in a previous APRN MSN program, preferred within 5 years of admission:
 - Advanced Pathophysiology
 - Advanced Physical Assessment
 - Advanced Pharmacology
- Completed application for admission to the certificate program.

Curriculum

Degree Requirements

The 18-credit hour post-APRN master's certificate curriculum includes those courses required by the American Nurses Credentialing Center which administers certification exams for the Psychiatric Mental Health Nurse Practitioner specialty.

NURS 723	Psychotherapeutic Approaches & Treatment Modalities	3
NURS 725	Psychopharmacology and Neurobiology	3
NURS 726	Managing Psychiatric Disorders Across the Lifespan	3
NURS 727	Psychiatric Mental Health Nurse Practitioner Practicum I	4
NURS 728	Psychiatric Mental Health Nurse Practitioner Practicum II	5

School Mission

The Joint School of Public Health (JSPH) is a collaborative partnership between Old Dominion University and Norfolk State University to offer experiential learning and research opportunities across multiple campuses. The first of its kind in Virginia, students learn through hands-on experience, classroom learning, and community engagement to prepare for the public health jobs of the future.

The school's mission is to improve the health and well-being of populations, in the Commonwealth of Virginia and beyond, through transformative education, research, scholarship, service, practice experiences and community partnerships.

Program Application and Acceptance

The JSPH has developed graduate programs that prepare individuals for practice, teaching, or research to meet the public health needs of the region, the state, and the nation. These programs include the Doctor of Philosophy (PhD) in Health Services Research degree, the Master of Public Health (MPH) degree, and several graduate certificate programs.

Students entering graduate programs in the JSPH should meet the minimum university admission requirements (see <https://www.odu.edu/admission/graduate> (<https://www.odu.edu/admission/graduate/>)). Application information, qualifications, deadlines, and advisors are listed in the specific program sections of this catalog and on the program web sites.

Note: Students enrolled in the MPH concentration provided at Norfolk State University (NSU) should rely on the NSU Graduate Catalog starting with the 2024 - 2025 academic year: <https://www.nsu.edu/catalog> (<https://www.nsu.edu/catalog/>).

Master of Public Health

Public Health with a Concentration in Applied Data Science (MPH)

For information about the MPH Program:

mph@odu.edu (<https://www.odu.edu/academics/programs/masters/public-health/>)

Website: <https://www.odu.edu/academics/programs/masters/public-health>

Students can complete this program in a traditional (classroom) format or online.

The Master's of Public Health (MPH) is designed to prepare students for entry and/or advancement in public health careers. The program provides students with an understanding of the public health sciences and with knowledge and skills that can be utilized in healthcare management, population-based research, and the community practice of public health. The MPH is designed for students with a bachelor's degree from all academic disciplines within and outside of the health disciplines. The graduates of the program will be ready to serve as invaluable professionals and leaders in the realm of public health.

The 43-credit Applied Data Science curriculum provides students with hands-on skills of applying data science principles to process, visualize and analyze data in order to extract meaningful information to address important questions in public health and the health sciences. Students in this track will also learn to use popular software packages such as R, SAS, SQL and Tableau. Data scientists are in high demand in several fields. Data science professionals with added contextual expertise of public health will find career opportunities at state or federal departments of public health, universities, pharmaceutical industries, and business entities.

Admission

The Master of Public Health program evaluates applicants using a holistic review process. All components of an application are reviewed prior to making an admission decision. Consideration may be given for appropriate work experience in a health-related field.

All applications are made through the Schools of Public Health Application Service (SOPHAS), the centralized application service for schools and programs of public health.

Application Checklist:

1. Completion of Bachelor's Degree from an accredited US institution or Foreign institution with a **GPA of 2.8 or higher**.
2. Two (2) letters of recommendation from academic sources or employment supervisor. Additional letters of recommendation are encouraged, if available.
3. Unofficial transcripts from all degree-granting programs listing the dates of program completion or attendance.
4. A personal essay of approximately 500 words explaining your public health career goals, reasons for interest in the Public Health program, specialty concentration selected with reasons for this selection, and any relevant work experience
5. TOEFL (minimum 79 IBT or 550 paper)/IELTS (minimum 7.0) is required for International Applicants.

There are no pre-requisite courses or specific undergraduate degrees required to be eligible to apply. Previous coursework in statistics and research methods is encouraged but not required. Applicants will be formally notified of admission decisions within two weeks of receipt of a completed application. Applicants need to confirm their spot in the program within 2 weeks of receiving a decision. Admitted students will be assigned a faculty advisor in their concentration area.
