## WHY CEDAR STEEL

At Cedar Steel, we go beyond basic steel fabrication. Here's what sets us apart:

### Expertise You Can Trust

Backed by over 30 years of industry knowledge, we understand the technical and practical demands of every project.

### Advanced Robotics

Our use of the Krafftech X-Calibre robotic coping machine ensures unmatched cutting precision and consistency.

### End-to-End Capabilities

From technical design support and 3D drafting to fabrication and on-site installation, we manage the complete project lifecycle.

### Fast Turnaround

We offer rapid delivery on residential projects with a 48-hour turnaround window available.

### Tailored Solutions

Every project is unique—we customise our services to match your goals, plans, and timelines.

### Client-Centric Approach

Our responsive team prioritises clear communication, on-time delivery, and professional execution.

## CLIENT TESTIMONIAL

*"From start to finish of the project, the team at Cedar was an absolute pleasure to deal with.*

*Very quick turnaround, highly detailed shop drawings and Joe from their installation team had great attention to detail. Highly recommend for any steel fabrication projects."*

**Aaron Hall**

*"The team at Cedar Steel are great to work with. They are a professional company. We've worked together on multiple jobs now both supply only and supply and install. Steel is delivered on site on the date promised.*

*When installation is requested, they provide first class service. They are definitely the one stop shop. Happy to continue working with them on many more projects."*

**John Dagher**

*"We have used Cedar Steel for our last three commercial and residential projects in Sydney and regional NSW.*

*I have found their service and reliability to be fantastic and would highly recommend them."*

**Adam Horner**

*"From the moment I asked for a Quote, through to installation the professionalism is second to none.*

*Ray and team were a pleasure to deal with. I will be using them again in the future. Highly recommend giving the team a call for your project."*
