ET-R8

The ET-R8 by Mac Tools has been designed for everyday use in the workshop. With a high resolution 8" screen and an easy-to-use interface, scanning a car couldn't be simpler. The device supports a wide range of car and van manufacturers from Europe, Asia and America.

ET-R8
Quick Start Guide

1. Activate
Switch on your ET-R8 tablet and connect to the Wi-Fi. Call us on **01923 882 392** so that we can guide you through the activation process.

2. Connect
Connect the supplied VCI to the vehicle via the OBD II port.

3. Scan
Select 'Scan' and then navigate to 'Diagnostics' to complete a scan. Select the manufacturer and the tablet and VCI will connect automatically via Bluetooth. Follow the prompts on the screen to complete the scan.

4. Special Functions
To complete any job such as ABS bleeding, brake pad replacement, oil maintenance etc... Select the special functions tab and the job that you need to carry out. The VCI will connect automatically as above and then follow the prompts on the device to complete.

5. Reports
Once the health check has been completed, select report, in green at the bottom of the page. Select the report type and enter the license plate number if required and save or share. You can view saved reports under the report tab on the home screen of the diagnostics application.
