AAP AND AFSP EMERGENCY MEDICINE SUICIDE PREVENTION CLINICAL ECHO

OPPORTUNITY

The American Academy of Pediatrics (**AAP**) and the American Foundation for Suicide Prevention (**AFSP**) have partnered to develop an ECHO program that focuses on clinical strategies described in the [Blueprint for Youth Suicide Prevention](#). **This program will provide evidence-based tools, resources, and support on how to implement suicide prevention protocols within the emergency department setting.**

The two overarching program goals involve increases to participant:

- Knowledge and self-efficacy regarding best practices to identify and support youth at risk for suicide.
- Implementation of suicide prevention protocols.

BENEFITS FOR PARTICIPANTS

- Increase knowledge and confidence of **best practices** related to **identifying and supporting youth at risk** for suicide.
- **Learn strategies, resources, and approaches** on how to **implement best practices** related to youth suicide prevention protocols.
- **Network** and **problem solve** in real time with leading **suicide prevention experts** and a quality improvement advisor.
- **Connect** regularly with a **small cohort** of your peers in a **confidential** and **safe** virtual meeting **environment**.

TOPICS ADDRESSED

- Addressing suicide prevention in emergency medicine settings
- Screening for youth suicide risk in emergency department settings
- Conducting a brief suicide safety assessment
- Providing appropriate care for youth at risk
- Planning a safe discharge from the emergency department
- Preparing the emergency department setting for a suicide prevention protocol
