

 D MARIS BAY DATÇA PENINSULA	PROCUREMENT POLICY	Document Code	EK-3
		Revision No	00
		Revision Date	24.03.2023
		Page No	1 / 1

In D Maris Bay procurement policy:

- It will collaborate with stakeholders in accordance with existing integrated management systems.
- It will support women entrepreneurs among its stakeholders.
- It will maintain mutually beneficial collaboration with its stakeholders and reduce CO2 emissions originating from vehicles during transportation.
- It will prioritize local and/or fair trade when purchasing products and services.
- It will give preference to environmentally sustainable suppliers and products in all procurement processes, including products, food, beverages, construction materials, cleaning materials, and consumables.
- It will not purchase products at risk of depletion and all products with fishing bans in the supply and consumption of plant, animal, and aquatic products.
- It will strive to minimize waste in procurement, preferring reusable, returnable, and recycled products.
- It will comply with applicable legal and other requirements related to energy efficiency, energy use, and energy consumption in all procurements.
- It will ensure the availability of information and necessary resources to achieve energy goals.
- It will procure energy-efficient products and services that support design activities considering energy performance and ensure the supply of products and services that are energy-efficient.
- It will commit to and declare continuous improvement in energy performance and energy management system.
