**DESTRIERO**

High Quality Feed Horses

NOURISH YOUR HORSE'S STRENGTH WITH QUALITY

## High Quality Feed Horses

Destriero Horse Feeds - dedicated exclusively to horses - originated from the expertise and dedication of Galtieri's team of nutritionists and researchers.

We are committed to continuously improving our products to meet the nutritional requirements of horses at every life stage: from pregnancy and weaning to growth and sporting activities. Moreover, the Destriero line addresses specific needs such as older age, maintenance, and recovery phases.

Formulated with top-quality raw materials including oats, barley, corn, beans, soybeans, and carrots, along with selected forages, vitamins, and minerals, Destriero products are carefully chosen to ensure maximum nutritional value.

Rigorous raw material selection, certified supply chain controls, and careful processing including flaking and pelleting in an exclusive, modern technology plant ensure consistent quality and exceptional results.

# LIFE

Destriero Life is the product line specifically designed to meet the nutritional needs of horses at various stages of their lives and activities. This line is formulated to ensure the utmost well-being and optimal health of broodmares during pregnancy and lactation, stallions during the breeding season, and foals from birth through weaning and into full growth. The Destriero Life line comprises the following products, each uniquely formulated to cater to the specific needs of each stage:

## ■ DESTRIERO BROODMARES

The ideal product for the breeding season, ensuring excellent nutrition for broodmares during pregnancy and lactation

## ■ DESTRIERO BROODMARES AND FOALS

This product is designed to provide broodmares with the necessary nutrients during pregnancy and lactation while simultaneously ensuring a healthy and robust growth for foals.

## ■ DESTRIERO BABY

An ideal formulation for foals in their first months of life, developed to support their initial development with a balanced supply of essential nutrients.

## ■ DESTRIERO RAISING FLAKS

Created to accompany foals from weaning through to full growth, this product ensures a consistent and suitable nutritional intake for optimal development.

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# BROODMARES 25 kg

**DESTRIERO BROODMARES** is the ideal product for the breeding season, providing the right nutrition during pregnancy and lactation. It offers an excellent content of bioavailable minerals for the health of the animal. Particularly suitable for proper embryonic development in pregnant broodmares, it meets regular nutritional needs, reducing the possibility of deficiencies that may occur during pregnancy.

## PROPERTIES

- Pellet 3 mm
- Starch sources from barley and corn, does not contain oats.
- Good protein levels from high-quality ingredients (soy, sunflower).
- High content of digestible fiber (alfalfa, beet pulp, soybean hulls, bran).
- Perfect mineral integration (Ca/P 2:1) and trace elements with vitamins.

## ANALYTICAL DATA (% AS-FED)

Crude protein	15%
Oils and fats	3,50%
Crude fiber	13%
NSC Carbohydrates	30%
SC Carbohydrates	28%

## BENEFITS

- Enhances reproductive efficiency.
- Stimulates milk production.
- Ensures harmonious fetal development
- Improves liver function.
- Excellent palatability and digestibility.

## ADDITIVES (PER KG)

Vit. E	680 mg
Vit. K3	1 mg

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# BROODMARES AND FOALS

25 kg

**BROODMARES AND FOALS** is the ideal product to support gestation and lactation for broodmares and to aid foals during their growth. The protein content promotes growth and ensures gastrointestinal well-being during the most delicate phase for the foal. The addition of dehydrated alfalfa provides palatability and digestibility from the first day of feeding. Thanks to its vitamin-mineral concentration, Broodmares and Foals meets all nutritional needs in the early stages of life and addresses any deficiencies during the mare's lactation phase (third to fourth month). The amino acids contained, support regular growth in terms of bone mineralization and skeletal conformation for healthy and robust individuals.

## PROPERTIES

- 3 mm Pellets
- Starch sources from barley and corn, does not contain oats.
- High content of digestible fiber from dehydrated alfalfa pellets.
- Perfect trace element, vitamin, and amino acid integration.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	16,1%
Oils and Fats	3,30%
Crude Fiber	11,30%
NSC Carbohydrates	30%
SC Carbohydrates	28%

## BENEFITS

- Promotes fetal development and foal growth.
- Enhances reproductive efficiency.
- Excellent palatability and digestibility.

Vit. E	24,9 mg

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# BABY

25  
kg

**DESTRIERO BABY** is the ideal supplement to maternal milk.

It provides biologically active nutrients. During the first month of life, foals experience a significant weight gain of approximately 1000 grams per day, which can increase two to threefold by the age of 5 to 6 months. Therefore, it is crucial to supply the essential nutrients needed to support the high cellular turnover and ensure rapid, balanced, and harmonious development of the muscular and skeletal systems, as well as the integumentary tissues.

## PROPERTIES

- 3 mm Pellets
- High protein content with a balanced amino acid profile.
- Easily available energy sources (cracked cereal flakes).
- Targeted mineral supply and perfect trace element and vitamin integration.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	18%
Oils and Fats	4.5%
Crude Fiber	7%
NSC Carbohydrates	40%
SC Carbohydrates	16%

## BENEFITS

- Robust and harmonious skeletal and muscular development.
- Easy weaning.
- Enhances liver and circulatory function.
- Excellent palatability.

## ADDITIVES (PER KG)

Vit. B6	2 mg
Vit. E	1.260 mg
Vit. K3	2 mg

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# RAISING FLAKS

20  
kg

**DESTRIERO RAISING FLAKS** provides the essential nutrition for proper foal growth from the fifth or sixth month of life until reaching 75-80% of adult weight (around 24 months of age).

Nutrition during this phase must be balanced to prevent developmental disorders related to nutritional deficiencies, which are rarely correctable in adulthood. Destriero Raising Flakes ensures optimal delivery of bioavailable minerals for the health of bone tissue and muscle mass.

## PROPERTIES

- 4 mm Pellets with cereal flakes (oats, barley, corn), fava bean flakes, and crushed carob.
- Diversified and well-balanced energy supply.
- The pellet component contains the optimal levels of protein, fiber, and mineral and trace element integration.

## BENEFITS

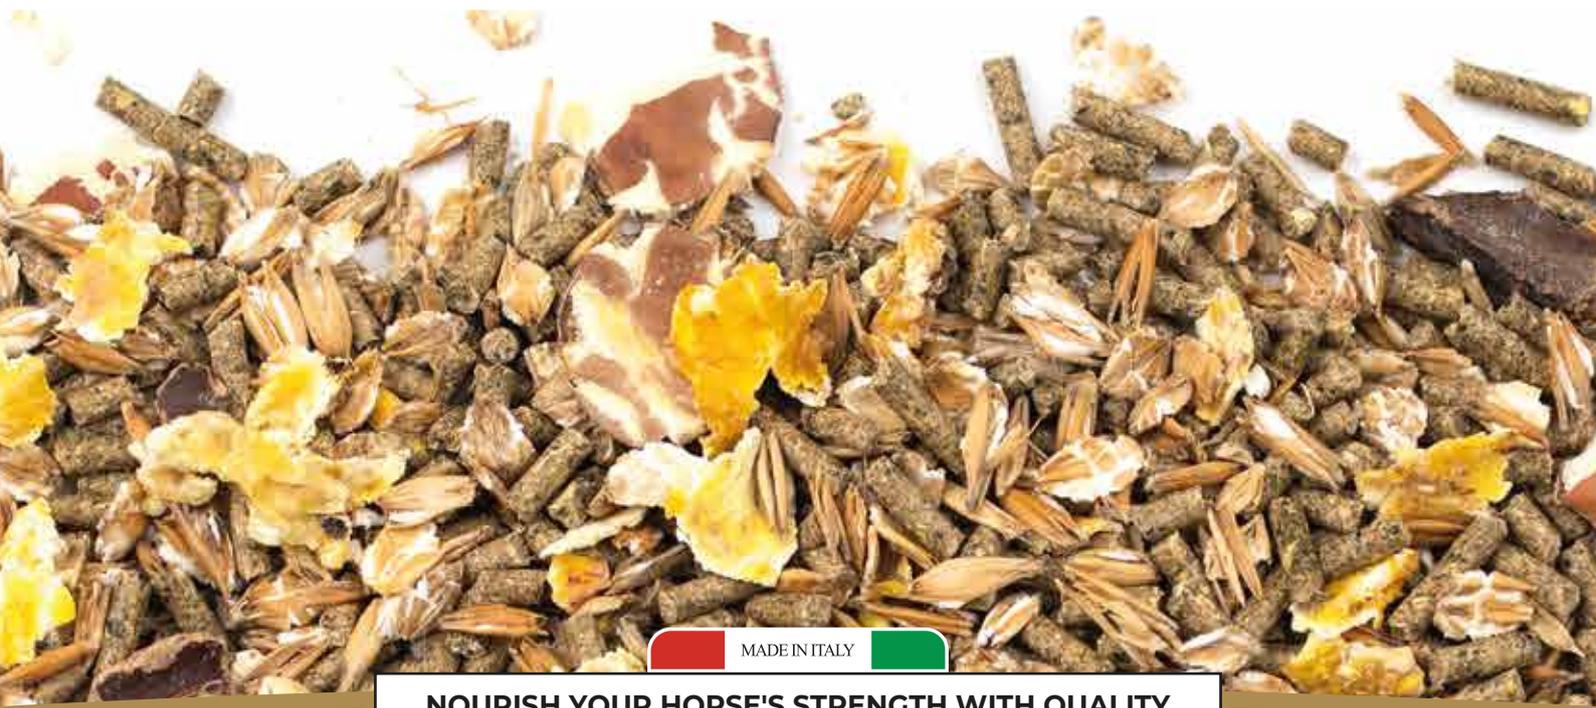

- Optimal growth of skeletal framework and muscular structures.
- Supports increased intake capacity.
- Reduces preparation time for competitive activities.
- Supplement for basic rations.
- Excellent palatability and digestibility.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	14%
Oils and Fats	4%
Crude Fiber	10%

# MAINTENANCE

Destriero Maintenance Line is a range of products designed to ensure the daily well-being and optimal maintenance of horses at every stage of their lives. This line comprises distinct products, each formulated to meet the specific nutritional needs of horses, providing them with a balanced and complete diet.

## ■ DESTRIERO EASY

: Ideal for horses with moderate energy requirements, this product offers a balanced nutritional intake that supports overall health and daily well-being.

Its formula is tailored for horses in light work or at rest, ensuring they receive all essential nutrients without excess calories.

## ■ DESTRIERO EQUIMIX

Perfect for horses needing a diverse and complete diet, Equimix combines high-quality ingredients to provide optimal nutrition.

This product is suitable for horses in moderate activity and helps maintain good physical condition and a strong immune system.

## ■ DESTRIERO FATTENING

Ideal for horses that need to regain weight and physical condition, this product is rich in essential nutrients and calories, helping to restore body mass and optimal condition.

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# EASY 20 kg

**DESTRIERO EASY** is the ideal product for all needs related to achieving optimal physical condition and excellent performance for horses engaged in both amateur and light competitive sports without excessive energy expenditure. Suitable for feeding horses that benefit from a diet low in sugars and starch, this product is rich in fiber and fats. This balanced diet ensures good digestibility, improving the horse's appearance and performance.

## PROPERTIES

- 4 mm Pellets with cereal flakes (barley, oats) and crushed carob.
- Gradual-release energy sources provided by highly digestible fibers (alfalfa, bran, soybean hulls) with a limited starch content (barley and corn) without the addition of oats.
- Excellent supply of minerals and trace elements essential for the integrity of bone and muscle tissue.

## BENEFITS

- Maintains the horse in good health.
- Ensures excellent recovery and fatigue resistance.
- Provides a consistent energy supply.
- Limits lactic acid production.
- Excellent palatability.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	15%

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# EQUIMIX 25 kg

**DESTRIERO EQUIMIX** is a feed suitable for horses engaged in light physical activity or at rest. Formulated with the right amount of cereal and fava bean flakes without the addition of oats, it provides sources of digestible fiber with a low starch content. This feed is ideal for restoring liver functionality and preparing horses for the new sports season.

## PROPERTIES

- 4 mm Pellets with cereal flakes (barley, corn), fava bean flakes, and crushed carob.
- Contains no oats.
- Good supply of diverse quality fibers (alfalfa, beet pulp, soybean hulls, bran) to best restore liver functionality.
- Adequate supply of minerals and vitamins to replenish reserves after periods of intense athletic activity.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	14,0%
Oils and Fats	3%
Crude Fiber	11%
NSC Carbohydrates	36%
SC Carbohydrates	24%

## BENEFITS

- Helps the horse build energy reserves.
- Reduces electrolyte loss and promotes the recovery of body reserves.
- Prevents the formation of lactic acid.
- Excellent palatability.

Vit. K3	1,2 mg

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# FATTENING 25 kg

**DESTRIERO FATTENING** is the ideal feed for the development phase of foals. It is highly energetic and specifically formulated for animals that need to regain weight and physical condition. This nutrient-rich feed contains flaked cereals, making it particularly tasty and digestible. The pellet component provides essential micronutrients necessary for healthy and robust growth. Nutritional deficiencies during this phase could compromise their potential in adulthood.

## PROPERTIES

- 4 mm pellets with flaked cereals: steam-cooked and rolled oats, flaked barley, flaked corn.
- Diversified and well-balanced energy supply.
- The pellet component concentrates protein, fiber, and mineral and vitamin integration

## BENEFITS

- Optimal development of skeletal structure and muscle tissues.
- Steam cooking and flaking of cereals enhance digestibility and performance.
- Excellent palatability and digestibility.

# SPORT

The Destriero Sport Line is specifically designed to meet the nutritional needs of horses engaged in sports activities, both amateur and competitive. Whether it's Dressage, jumping, reining, trekking, racing, or Endurance, this range of feeds is ideal for horses undergoing moderate to intense physical work, providing a balanced nutritional intake aimed at optimizing their performance.

Formulated with high-quality ingredients and backed by extensive scientific research, Destriero Sport products deliver energy, endurance, and rapid recovery, effectively supporting sport horses in every discipline. Our dedication to research and innovation allows us to offer advanced feeding solutions, perfect for the well-being and performance of your champions.

## ■ **DESTRIERO GRANDPRIX**

Perfect for horses engaged in intense physical activity, such as jumping, this feed provides a high energy intake, promoting maximum performance during high-level competitions.

## ■ **DESTRIERO TONIC**

Ideal for horses engaged in intense sports disciplines, such as show jumping or dressage. Its balanced composition promotes excellent physical condition and rapid recovery.

## ■ **DESTRIERO PROFESSIONAL**

Suitable for all forms of competition, from light to heavy, this product ensures balanced and versatile nutrition, ideal for horses participating in various types of events.

## ■ **DESTRIERO COMPETITOR**

Suitable for horses subjected to short-duration competitive efforts, such as racing or speed trials. This feed is formulated to provide a rapid energy boost and support explosive performance.

## ■ **DESTRIERO PERFORMANCES**

Ideal for horses subjected to intense, short-duration efforts, such as sprints or speed trials. Its specific formulation provides quickly available energy for optimal performance.

## **DESTRIERO ENDURANCE**

Suitable for demanding and prolonged sports activities, such as endurance racing. Its formulation is designed to ensure sustained energy release and maintain physical efficiency over long periods.

## ■ **DESTRIERO ELITE**

Designed for horses that endure intense and prolonged efforts, this feed ensures a constant release of energy and nutrients, supporting endurance and strength during long-duration competitions.

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# GRAND PRIX 20 kg

**DESTRIERO GRAN PRIX** is the ideal feed for horses engaged in more demanding competitive activities. It provides a balanced supply of proteins, fibers, minerals, and vitamins.

The product contains a moderate amount of high-quality fats to ensure proper energy metabolism and prevent lactic acid buildup. It protects and optimizes joint function in sport horses and ensures excellent digestibility, enhancing both appearance and performance.

## PROPERTIES

- 4 mm pellets with cereal flakes (oats, barley, corn), fava bean flakes, and crushed carob.
- High energy content from carefully balanced, diversified sources.
- The pellet component provides concentrated levels of protein, fiber, and a comprehensive blend of minerals and vitamins.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	14%
Oils and Fats	3,8%
Crude Fiber	9,5%
NSC Carbohydrates	43%
SC Carbohydrates	22%

## BENEFITS

- Provides muscular energy for short but intense efforts.
- Supports the needs of competitive horses.
- Adequate supply of vitamins and minerals following periods of intense competition.
- Excellent palatability and digestibility.

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# PROFESSIONAL 20 kg

**DESTRIERO PROFESSIONAL**, enriched with palatable dehydrated carrot pellets, is the leading product in our sports line, designed for all forms of competitive disciplines that demand strength and endurance, including racing, endurance, trotting, and show jumping.

This product features a high content of rolled oats and does not require additional feed supplements. It provides all essential nutrients, enhancing digestibility for optimal conversion into muscle mass and energy, ensuring excellent performance during competitions.

## PROPERTIES

- 4 mm pellets with cereal flakes (oats, barley, corn), fava bean flakes, and crushed carob.
- Enriched with dehydrated carrot pellets.
- High energy content derived from carefully balanced, diverse sources.
- The pellet component concentrates protein, fiber, and essential mineral and vitamin supplementation.

## ANALYTICAL DATA (% AS-FED)

# PERFORMANCES 18 kg

**DESTRIERO PERFORMANCES** contains 85% flaked cereals, providing readily available energy for horses engaged in intense, short-duration exertion such as racing and jumping. It includes over 50% flaked oats and does not require any additional supplementation.

This product delivers high energy levels to support the high cellular turnover typical of athletic horses. It supplies biologically active nutrients to support chondrocytes and preserve the cartilage layer of the bones.

DESTRIERO PERFORMANCE is ideal for increasing muscle mass in underweight horses.

## PROPERTIES

- Pellet Size: 4 mm with flaked oats, and flakes (barley, corn).
- Concentrated Components: The pellet portion contains concentrated levels of protein, fiber, and a balanced blend of mineral and vitamin supplementation.
- High Energy Content: Provides readily available high energy.

## BENEFITS

- Enhances resistance to intense, short-duration exertion in endurance horses.
- Provides non-acidic energy for medium to long-term use.
- Excellent for muscle development and physical recovery.
- Ensures optimal acceptance and digestibility.

# ELITE

**20  
kg**

**DESTRIERO ELITE** is a high-cereal feed enriched with steam-flaked whole soybeans, palatable dehydrated carrot pellets, and premium dehydrated alfalfa pellets. Its elevated level of biologically valuable fats supports optimal energy metabolism and helps prevent the formation of lactic acid. Containing flaked oats, DESTRIERO ELITE requires no additional supplementation. It is the ideal choice for daily joint protection and maintaining the functionality of horses engaged in intense and prolonged activities.

## PROPERTIES

- 4 mm pellets with flaked oats, and flakes of barley, corn, fava beans, and soybeans, as well as crushed carob pods.
- Enriched with dehydrated carrot pellets and alfalfa pellets.
- No additional oats required.
- High level of readily available energy.
- The pellet component concentrates the protein, fiber, and mineral and vitamin supplementation.

## BENEFITS

- Promotes overall well-being and enhances optimal response capabilities.
- Improves muscle mass and tone, adequately supporting intense competitive efforts.
- Facilitates the conversion of fatty acids into energy.
- Ensures excellent palatability and digestibility.

# TONIC

20  
kg

**DESTRIERO TONIC** is a complete feed formulated for horses engaged in intense physical activity. It is crafted with a balanced mix of flaked cereals, high-quality dehydrated alfalfa pellets, and essential nutrients, including minerals, trace elements, and vitamins. The high protein content supports the elevated cellular turnover characteristic of athletic horses. Ideal for horses competing in demanding sports and during recovery phases, DESTRIERO TONIC ensures optimal muscle tonicity and promotes a shiny, radiant coat.

## PROPERTIES

- 4 mm pellets with flaked oats, flakes (barley, corn, fava beans), crushed carob, and alfalfa pellets.
- No additional oats required.
- Produced and formulated using advanced technologies designed to enhance muscle tonicity and provide responsive agility to stimuli.
- The pellet component is concentrated with protein, fiber, and a complete blend of minerals and vitamins.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	13%
Oils and Fats	3,8%
Crude Fiber	10,5%
NSC Carbohydrates	44%
SC Carbohydrates	22%

## BENEFITS

- Meets all nutritional needs of horses engaged in intense work, while minimizing lactic acid production.
- Promotes good muscle tonicity and supports proper function of the skeletal and nervous systems.
- Enhances overall well-being and strengthens immune defenses.
- Excellent palatability and digestibility.

# COMPETITOR 18 kg

**DESTRIERO COMPETITOR** contains 75% flaked cereals, making it ideal for providing energy to horses engaged in short-duration competitive efforts such as racing, jumping, and trotting. It includes over 40% steamed oats and requires no additional supplements. Enriched with dehydrated carrots, it is also well-suited for weight recovery in debilitated horses.

## PROPERTIES

- 4 mm Pellets containing steamed oats, flakes (barley, corn), and dehydrated carrots.
- No additional oats required.
- High energy content provided by readily available and sustained-release starches.
- The pellet component is concentrated with protein, fiber, and mineral and vitamin integration.

## BENEFITS

- Stimulates the development of athletic foundation in the horse.
- Provides non-acidic energy useful over the medium to long term.
- Excellent for muscle development and recovery of physical condition.
- Outstanding palatability and digestibility.

# ENDURANCE

20  
kg

**DESTRIERO ENDURANCE** is formulated with a balanced mix of flaked cereals, high-quality dehydrated alfalfa, and pellet feed, providing essential mineral and oligoelement nutrients. The blend is combined with sugar cane molasses, enhancing its palatability and appeal to the animals. It is ideal for horses engaged in sports activities and subsequent physical recovery phases. It ensures that the animals remain strong and resilient by providing readily available energy for both exertion and physical endurance.

## PROPERTIES

- Pellet 4 mm containing flaked oats, flaked cereals (barley, corn), crushed carob, and alfalfa pellets, enriched with sugar cane molasses and soybean oil.
- Formulated with technology designed to enhance muscle endurance for intense and prolonged exertion.
- The pellet component concentrates the protein, fiber, and the mineral and oligoelement integration.

## BENEFITS

- Meets all the nutritional needs of horses engaged in prolonged physical exertion while minimizing lactic acid production.
- Supports muscle tone and the proper functioning of the skeletal and nervous systems.
- Excellent palatability and digestibility.

# SPECIAL CARE

Our special line of products is dedicated to horses requiring specific care, such as gastrointestinal disorders or specific supplement needs. Formulated with high-quality ingredients and supported by thorough research, these products provide targeted solutions to enhance the well-being and health of your horses.

## ■ DESTRIERO HEALTH

Designed to support gastrointestinal balance in horses, this product helps maintain optimal digestive balance and reduces gastrointestinal disorders.

## ■ DESTRIERO AMINOTOP

Formulated with specific ingredients to support joint health and improve mobility, this supplement is ideal for all stages of a horse's life. It is excellent for broodmares during lactation and growing foals.

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

#### ■ **DESTRIERO PUROSANGUE 125**

Supplementary Feed designed to protect the body from oxidative stress affecting skeletal and cardiac musculature. The inclusion of polyunsaturated fatty acids provides valuable energy for participating in the most demanding competitions. Its formulation also offers significant prebiotic and immunostimulatory effects at the intestinal level.

#### ■ **DESTRIERO PUROSANGUE 145**

Complementary Feed rich in highly digestible cereals and complete dietary integration for the horse. Its balanced composition promotes an optimal ratio of lean mass to fat mass, supporting physical development, performance, and long-term health.

**NOURISH YOUR HORSE'S STRENGTH WITH QUALITY**

# HEALTH

20  
kg

Complementary Feed specifically designed to meet the nutritional needs of horses suffering from glucidic metabolism deficiencies, such as gastritis, ulcers, and laminitis. It ensures an appropriate supply of proteins, fibers, minerals, and vitamins, making it an ideal meal for maintaining overall health and fitness. Free from cereals, it reduces starch levels and allergy risks in the diet. A low glycemic index nutrition can aid horses with chronic laminitis, Cushing's syndrome, "Tying Up," and insulin resistance. This feed is also suitable for reducing the nervous load in affected individuals.

## PROPERTIES

- 4 mm Pellet.
- Adequate protein content with optimal balancing of essential amino acids.
- Provided by digestible fibers (such as bran, soybean hulls, and dehydrated alfalfa), delivering the necessary energy for strenuous and prolonged exertion.
- Mineral and Trace Element Integration: Targeted supplementation to maintain electrolyte balance during sweating.

## BENEFITS

- Boosts muscle energy during prolonged exertion.
- Provides support for horses engaged in intense physical activities.
- Ensures safety of use and helps prevent certain forms of acidosis.
- Increases resistance to fatigue and stress for extended periods.

# AMINOTOP 25 kg

Feed enriched with essential amino acids, oligo-minerals, and vitamins for all life stages of the horse. The technical composition promotes maximum growth in foals and complete mineralization of the skeleton and bone structure (healthy hooves and joints). It ensures proper fetal development in broodmares and meets all protein and mineral needs during lactation. It is optimal for fertility in broodmares and stallions. Should be fed with high-quality hay for perfect Body Condition Score (BCS) management.

## PROPERTIES

- 4 mm pellets.
- Reduced energy content.
- Good protein level from quality sources (soybean, sunflower).
- High digestible fiber content (alfalfa, soybean hulls, bran).
- Perfect mineral (Ca/P) and oligovitamins integration.
- Excellent palatability.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	30,2%
Oils and Fats	1,7%

# PUROSANGUE 125

20 kg

Thermo-flaked cereals significantly enhance the digestibility and absorption of all nutrients, ensuring an optimal nutritional state for the horse. **Destriero Purosangue 125** is the ideal product during sports activities and the growth phases of foals genetically predisposed to rapid growth. The high content of amino acids and highly digestible, technologically advanced lipids meets all the needs of horses undergoing intense activity, also improving weight recovery and muscle mass increase.

## PROPERTIES

- 4 mm pellets with cereal flakes (barley, corn, oats, soy).
- Appropriate protein level with optimal balance of essential amino acids.
- Perfect mineral and oligo-vitamin integration.
- Enhances its effectiveness when used in conjunction with Destriero Aminotop.

## BENEFITS

- Promotes bone and muscle growth.
- The supply of polyunsaturated fatty acids provides valuable energy for the sport horse.
- Performs a significant prebiotic and immunostimulatory function.
- Excellent palatability and digestibility.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	12,50%
Oils and Fats	9,00%
Crude Fiber	9,20%

## ADDITIVES (PER KG)

Vit. A	15.000 U.I.
Vit. D3	2.800 U.I.
Vit. B1	3,40 mg
Vit. B12	0,01 mg
Vit. B2	1,95 mg
Vit. B6	0,50 mg
Vit. E	334 mg
Vit. K3	0,50 mg

kg

This integrated product performs its primary function through the rational supply of sodium, potassium, calcium, and essential amino acids. Its balanced composition promotes an optimal ratio between lean mass and body fat, supporting muscular power and endurance. It enhances the speed and elasticity of muscle fibers, contributing to superior performance and greater flexibility. Additionally, it ensures the overall well-being of the animal through daily and consistent provision of essential amino acids, hematopoietic factors, and antioxidants, which contribute to the overall health and vitality of the horse.

## PROPERTIES

- 4 mm pellets with cereal flakes (barley, corn, oats, soy).
- Optimal supply of sodium, potassium, calcium, and essential amino acids.
- The pellet component is concentrated with protein, fiber, and mineral and vitamin supplementation.

## BENEFITS

- Ensures the optimal balance between lean mass and fat mass.
- Enhances muscle endurance.
- Promotes overall animal well-being through adequate supply of essential amino acids, hematopoietic factors, and antioxidants.
- Excellent palatability and digestibility.

## ANALYTICAL DATA (% AS-FED)

Crude Protein	14,50%
Oils and Fats	4,50%
Crude Fiber	8,00%

## ADDITIVES (PER KG)

Vit. A	15.000 U.I.
Vit. D3	1.600 U.I.
Vit. B1	1,90 mg
Vit. B12	0,01 mg
Vit. B2	1,35 mg
Vit. B6	0,50 mg
Vit. E	302 mg
Vit. K3	0,50 mg

## OUR STORY: FAMILY, PASSION AND PERSEVERANCE

More than Fifty years ago, our story began—a tale of passion, family, perseverance, and love. Love for our origins and for our land, rich in history, charm, and emotion. An ancient and fertile land, caressed by the warm Italian sun, the cool sea breeze, and the hands of breeders and farmers, true custodians of landscapes and territories.

Since **1973**, we have chosen to stand by breeders, increasingly dedicating ourselves each year to providing services for all activities in the agri-food production chain.

Our large family today includes:

- **Over 700 retail outlets** across central-southern Italy and the islands.
- **Selected product lines** for all production phases and every animal requirement in the zootechnical sector, complemented by lines for pet food, ornithology and a wide range of products tailored for horses.

Since the early 2000s, we have pursued a path aimed at supporting the development of an agricultural sector focused on research and innovation to support breeders and retailers.

In 2010, we established the **first South Italy production hub for the processing of flaked cereals**: Cooking, Flaking, and Drying are carried out using a computerized management system that controls the product throughout all processing stages, ensuring excellent quality of flaked cereals.

In the following years, we continued to develop and improve our production and packaging lines to enhance daily output and meet the needs of an evolving market.

**Each process is rigorously monitored** through state-of-the-art computerized systems, ensuring traceability at every production stage

A further guarantee that our customers receive consistently healthy and nutritionally balanced products.

We meticulously craft the perfect recipe through continuous development of technological and precision nutritional lines tailored to all animal categories. We guarantee high-quality fibrous, energetic, and starchy products, meeting all primary needs:

- Conducting over 10,000 quality checks annually to ensure the safety of our foods.
- Operating with an in-house laboratory and two certified external laboratories.
- Holding the most important quality, environmental, and safety certifications.

## High-Quality Feed

Over the years, we have undertaken social initiatives aimed at ensuring health, safety, equal opportunities, and well-being. At the heart of our activities are always **People**. Everything revolves around the hands of breeders, collaborators, and industry technicians.

To support growth, enhancement, and competitiveness within our company, as well as to promote high-quality employment, continuous training and professional development play a strategic role in qualifying and re-qualifying our human resources. Thus, we dedicate constant training plans and engagement with the global market.

Driven by administrative ingenuity and the growing demands of an increasingly streamlined poultry market, in 2010 we launched AVIGAL, a farming company focused on producing and marketing laying hens for the entire national market. This comprehensive service for customers, producers of consumption eggs, ensures high quality from the most efficient genetics, controlled according to current hygienic-sanitary standards throughout the production cycle.

- **We rear over 800,000 laying hens annually**, using continuously evolving alternative breeding systems. We conduct sampling and analyses for animal and environmental safety, employing tailored vaccination programs designed by our technicians and veterinarians.

Words like **sustainability, animal welfare, and environmental ethics** are now commonplace: We respect every phase of the production process, minimizing environmental impact and rationalizing the use of natural resources. In recent years, our Galtieri Green program has significantly reduced environmental impact in production processes. Project goals include increasingly intensive use of **renewable energy**, currently accounting for a quarter of our production, and total elimination of plastic use in our production processes. Additionally, through our "-Asphalt +Sea" project, we have shifted over 70% of raw material transport from roads to maritime and rail transport. This initiative results in **reduced CO2 emissions, cost efficiency in transport, and maximized supply chain responsiveness**.

This ambitious project represents a direct response to our commitment to sustainability in the animal feed industry and an indirect response to the need for new logistic solutions capable of overcoming infrastructural challenges.

# OURS IS A STORY OF TRADITION, PROGRESS, AND FUTURE.
