

What is the UGN?

The UGN (UniVersus Gaming Network) is the primary way UVS Games provides support to retailers, helping them grow communities, execute events and introduce new players to UniVersus.

What are the benefits of joining the UGN?

- Specialty Events! Depending on the size of your UniVersus community you'll receive tournament kits, access to prerelease kits from your preferred distributor, etc.
- Exclusive Marketing Materials! Access to digital & physical marketing materials (posters, standees, and more!)
- Store & Event Locator!

How can my store join the UGN?

It's simple! Follow these steps, and don't forget to set your preferred distributor so that you can gain access to prerelease kits for the next UniVersus set!

1. Go to <https://play.uvsgames.com/> and create an account.
 - a. Click Login, you'll see Don't have an account? Sign up – choose this option.
 - b. Enter your email and a password.
 - c. Once you click continue you'll be asked to verify your email. After verifying your email your account is created.
2. Now you'll need to create an organization so you can host, post, and run UniVersus events.
 - a. Go to your profile and select Organizer Application
 - b. Follow the prompts and apply. Please be sure to register as an owner of the store. If someone other than an owner signs up, it'll put the application in a pending state until the owner verifies the information.
 - i. Select your primary distributor when prompted - this will be the distributor you'll be able to order prerelease event kits from.
 - c. Once the application is submitted Carde.io will approve and confirm it is done.

How to update distributor: This should be the distributor you plan to order prerelease products from.

1. In the upper right corner of the website click your name, click on Organizer Application from the dropdown menu.
2. Select the I am the owner.
3. Select Update Existing Store application.
4. Under Additional information on the application there is a Primary Distributor drop down bar and you can select your primary distributor.

Create an Event!

When you're ready to create an event, go to the homepage select Event.

1. Click Create Event on the right side of the screen.
2. Name the event (this will be displayed on the UGN) and select your store as the organization.
3. Fill in the details and click save.
4. On the next panel, fill in the details for your activity (the info of the main event).
5. Save Activity & Continue.
6. Scroll to the bottom and hit Save and Publish.

Some Specialty Events like Prerelease can only be held during certain time periods. If you don't see the event type that you are trying to create available, check that you selected the right day for the event. If you ever run into any issues, reach out to lgs@uvsgames.com
