Canandi

The Canandi website highlights their **advanced GPS tracking systems** for hunting dogs, wild animals, and birds of prey. It features product details, usage information, and secure purchasing options.

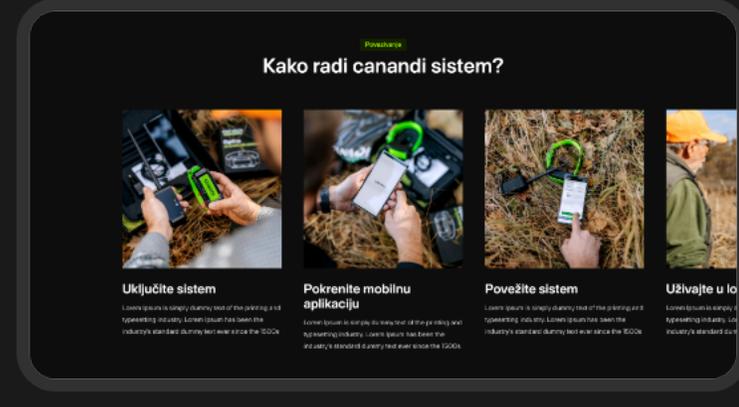

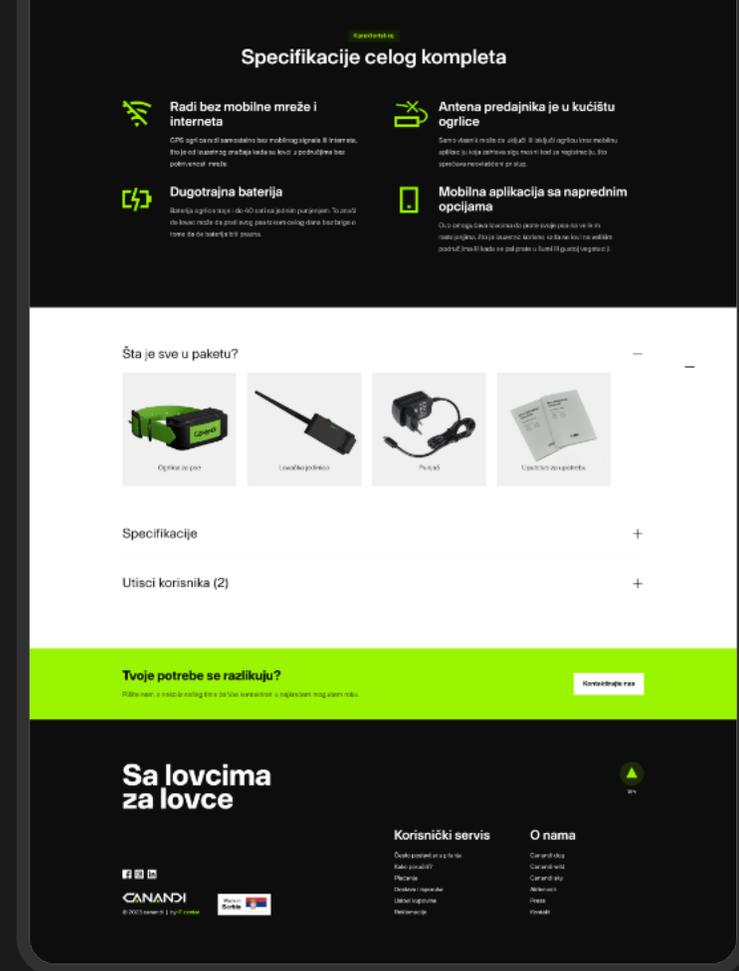

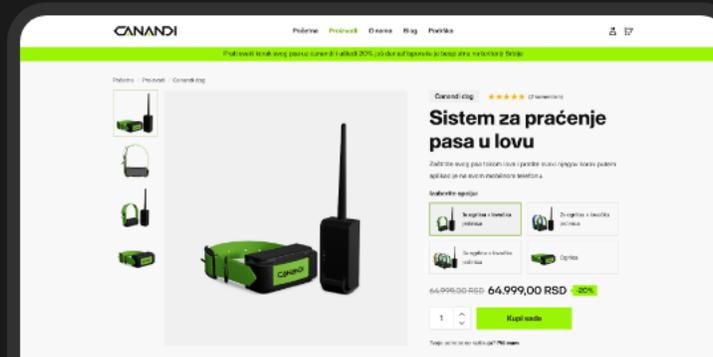

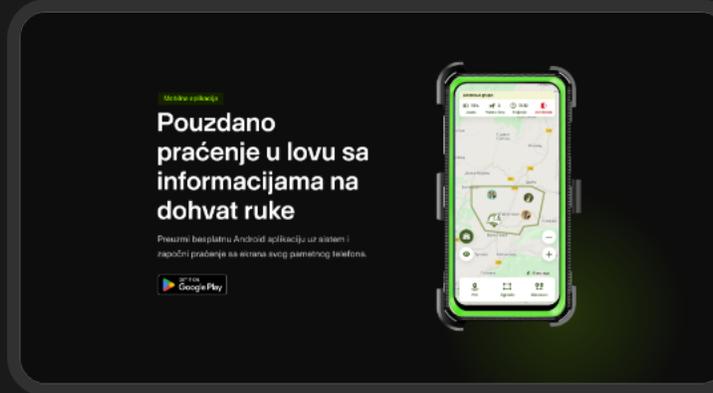

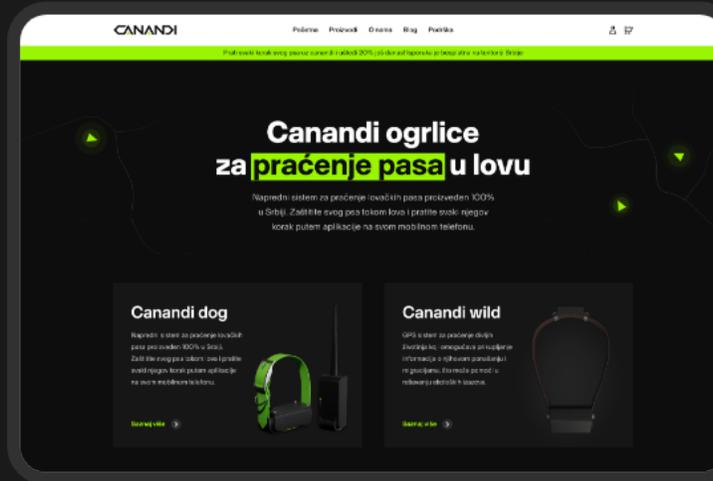

Key Components

Product Listings: Detailed descriptions of GPS tracking systems.

Mobile App Integration: Information on real-time tracking capabilities via the Android app.

User Resources: Guides, FAQs, and tips on using the tracking devices effectively.

Secure Shopping: Easy and secure online purchasing options for customers.

Yamaha Barel

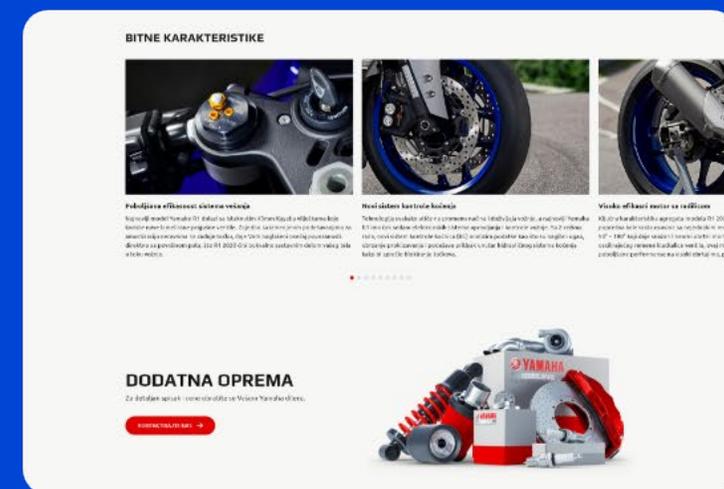

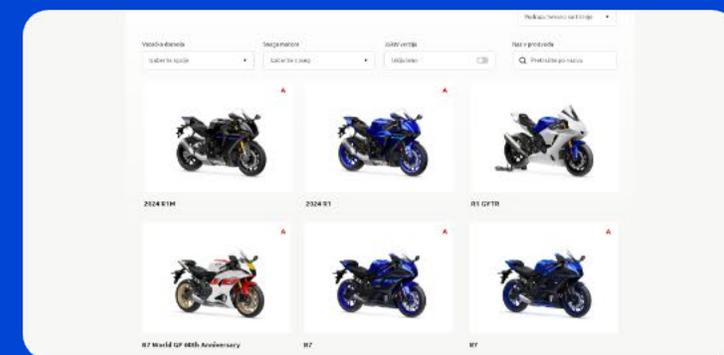

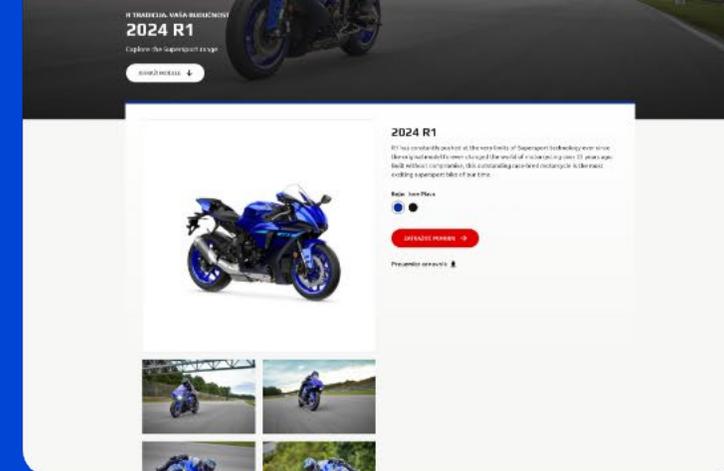

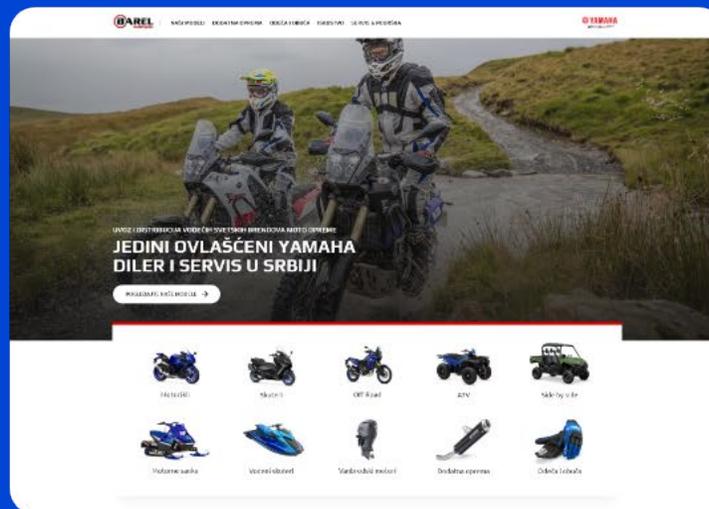

Yamaha Barel is a **leading motorcycle dealership** offering an extensive range of Yamaha motorcycles, accessories, and services.

Key Components

Product Listings: Detailed information on a wide range of Yamaha motorcycles and accessories.

Promotions and Deals: Up-to-date information on the latest promotions and special offers.

Service Options: Comprehensive details on motorcycle servicing, maintenance, and support.

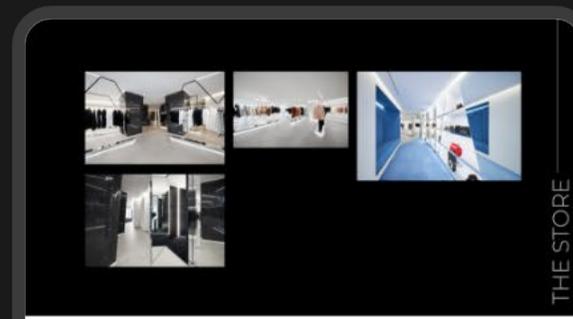

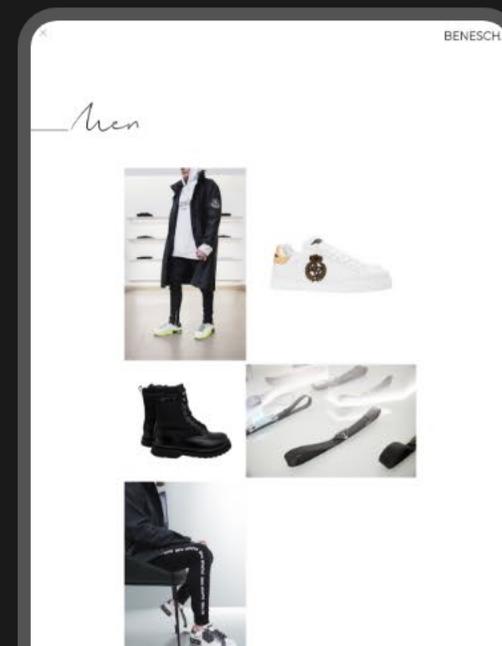

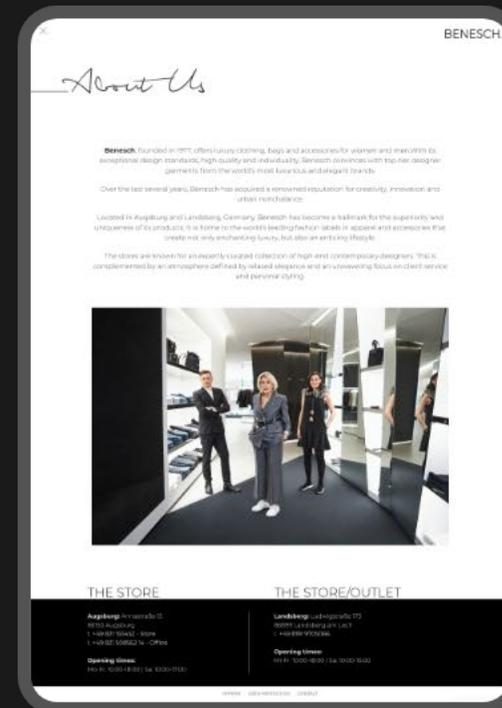

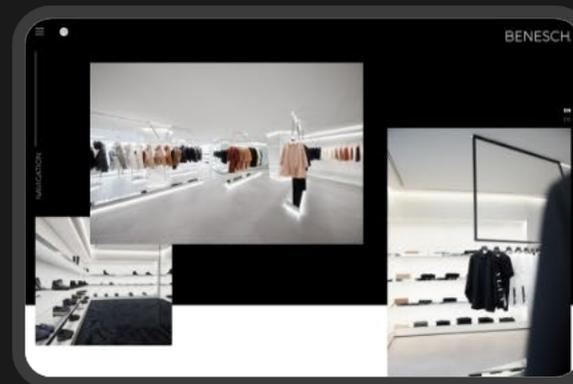

Benesch

We developed an elegant website for Benesch, a **luxury fashion retailer** established in 1977, showcasing their commitment to quality, creativity, and innovation.

Website Showcase

The site features a curated collection of designer garments and accessories, presented in a visually stunning and user-friendly interface. It offers a seamless online shopping experience, embodying Benesch's dedication to luxury and superior client service.

DrGrandel

The site emphasizes the brand's dedication to **scientific methods and professional skincare.**

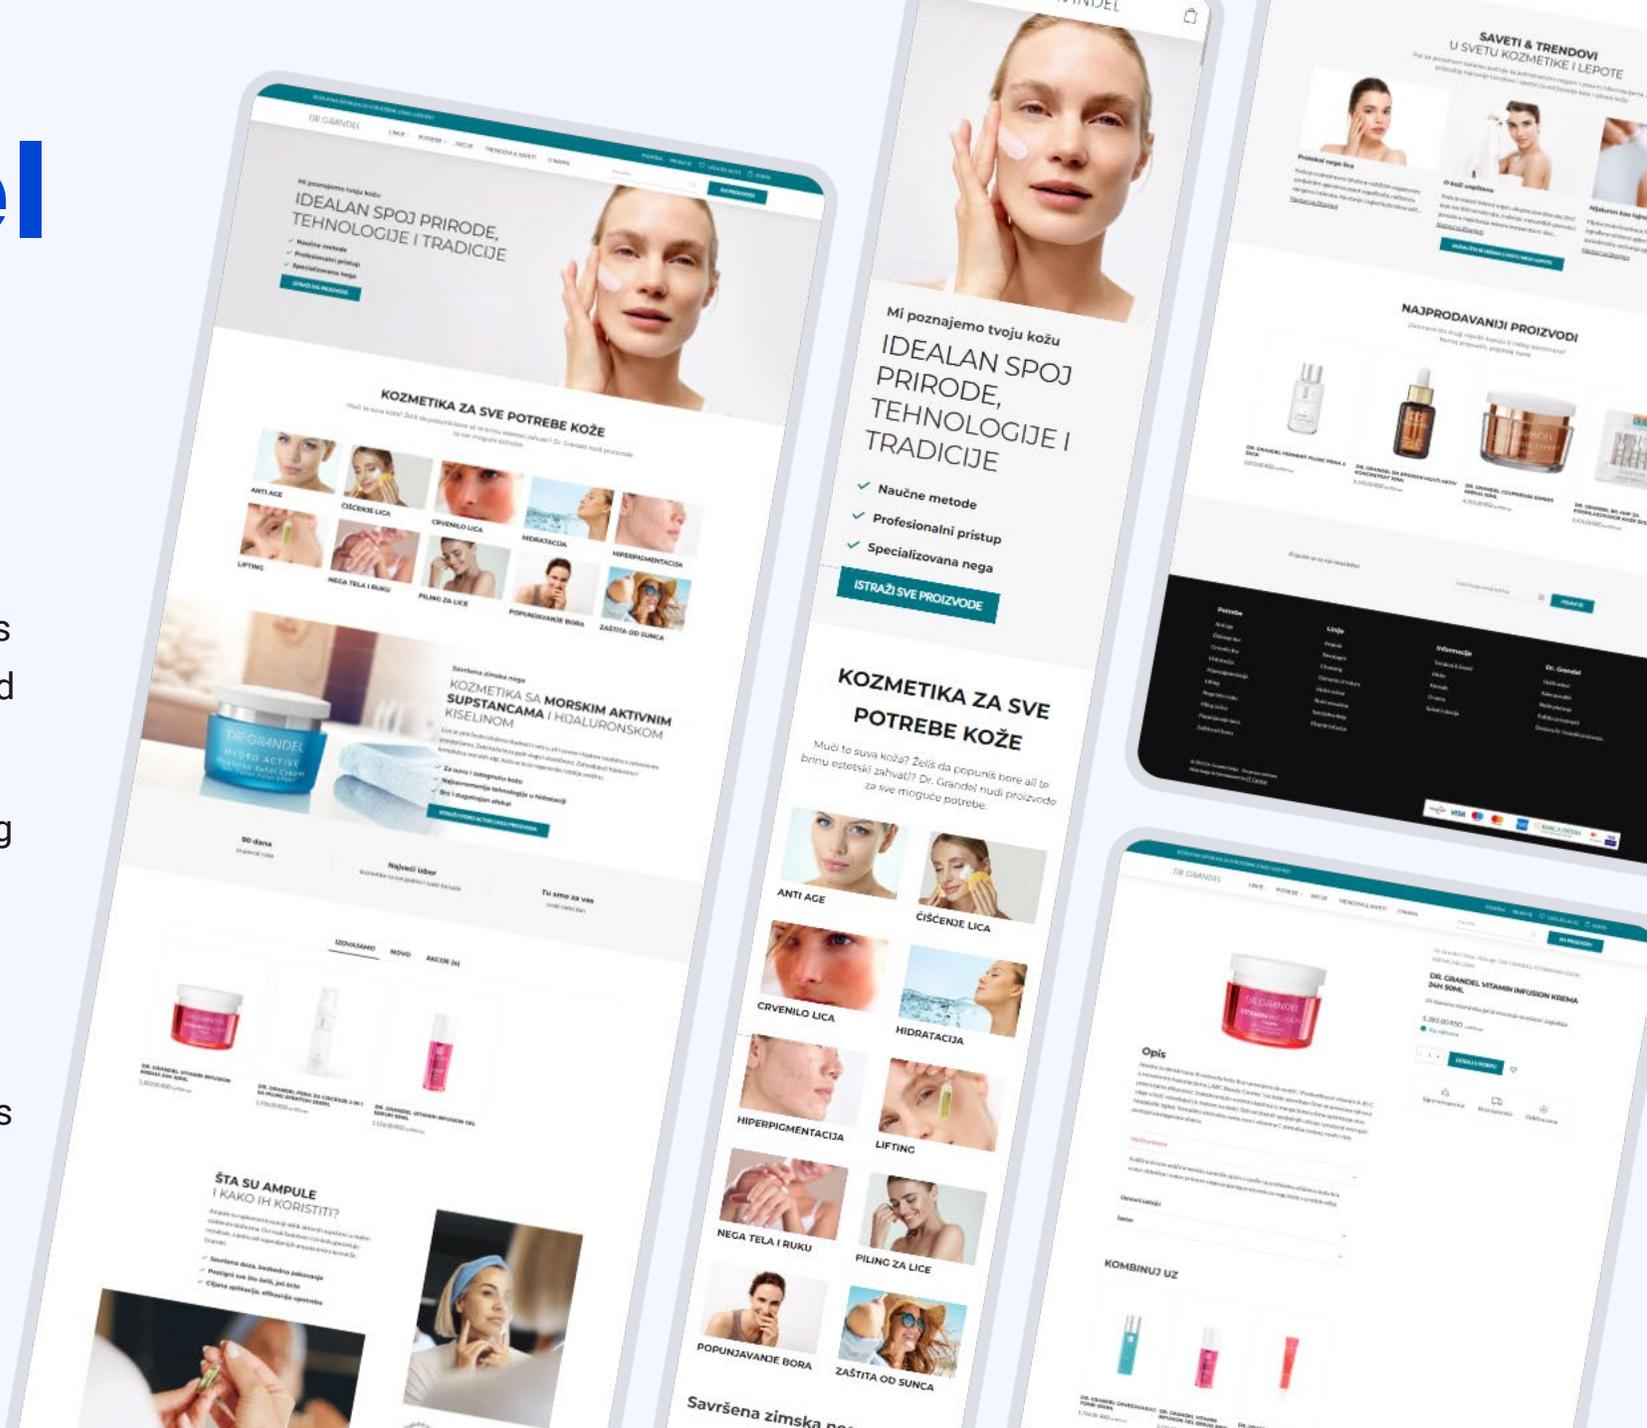

Key Components

Product Listings: Detailed information on various skincare lines, including anti-aging, hydration, and sun protection.

E-Commerce Functionality: Easy online shopping with multiple payment options.

Filters and Categories: Allows users to browse products by specific needs and skin concerns.

User Resources: Includes trends, tips, and guides on skincare.

Milija Shop

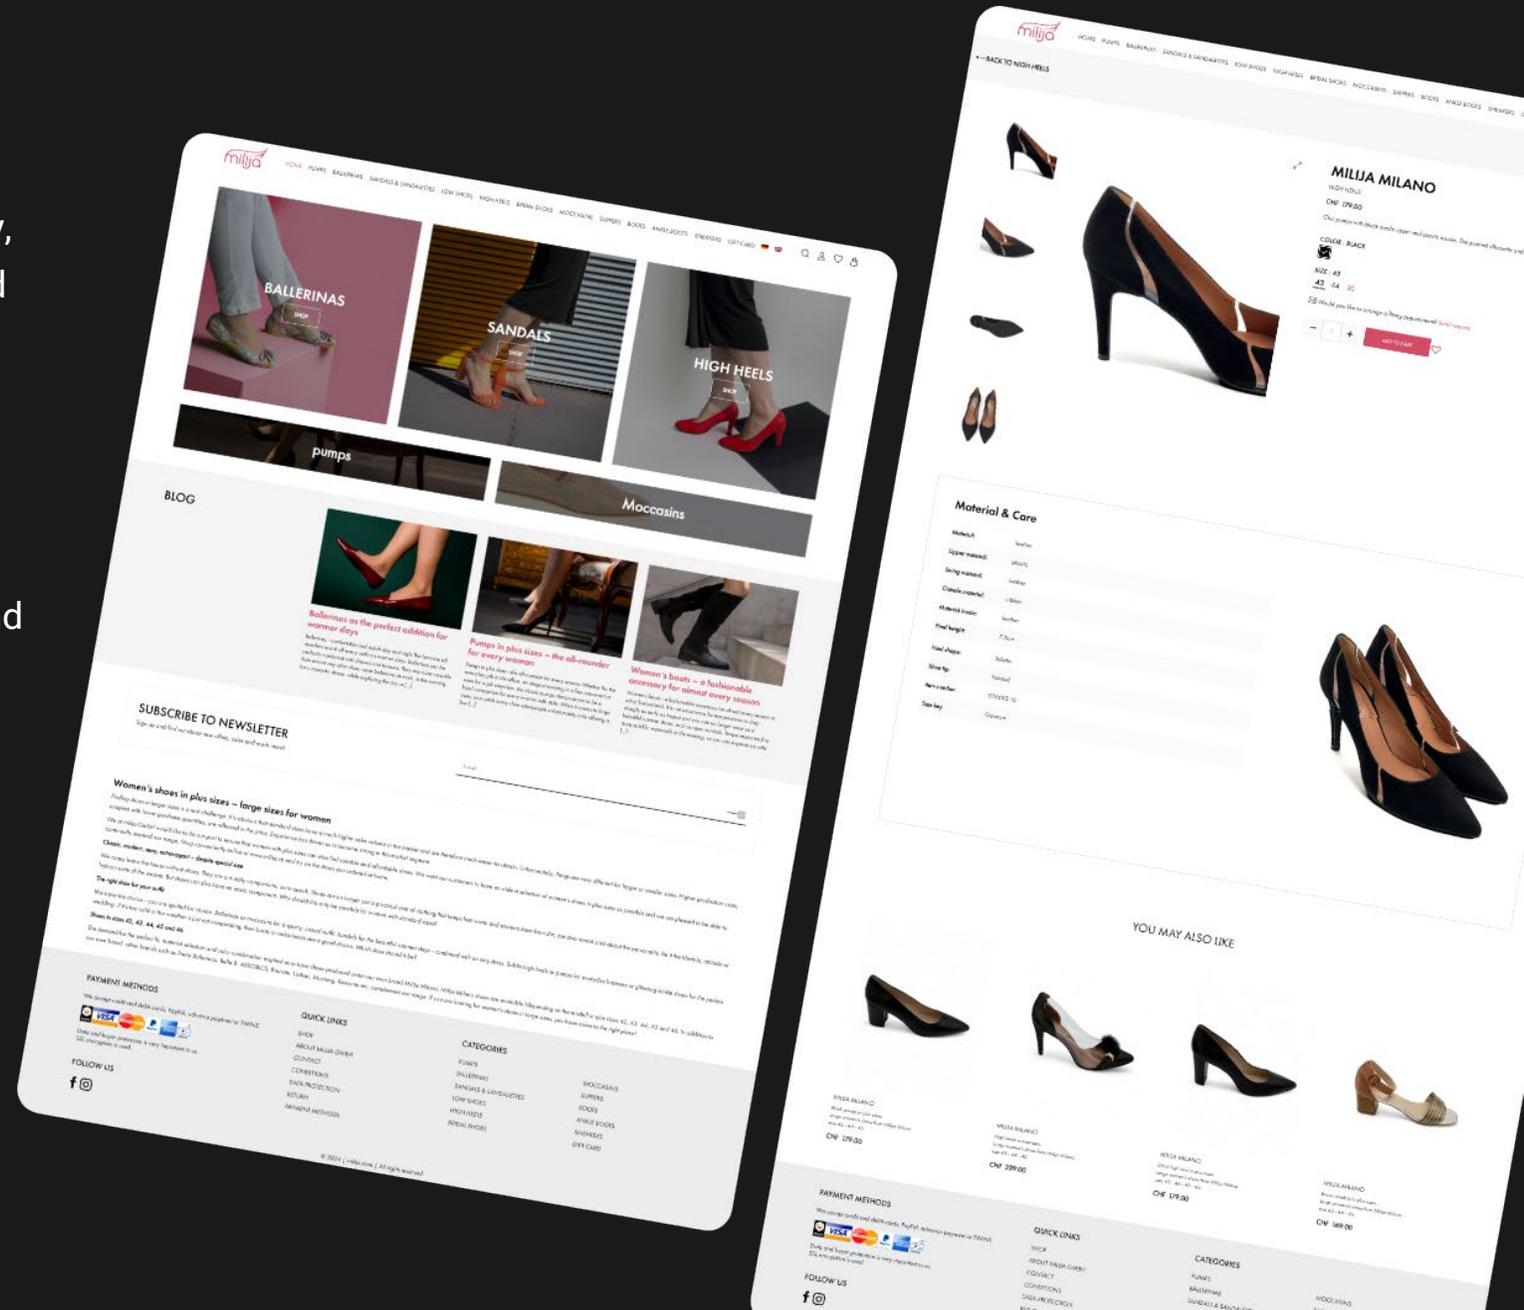

Milija Switzerland offers a wide selection of high-quality, **oversized women's shoes**, catering to various styles and needs. The brand focuses on providing fashionable and comfortable footwear.

Key Components

WordPress and WooCommerce: For efficient content and product management.

E-Commerce Functionality: Seamless online shopping with secure payment options including credit cards, PayPal, prepayment, and TWINT.

Product Showcase: Features detailed product listings with filters for category, color, and size, allowing customers to easily find and purchase their desired shoes.

WEB DEV
PORTFOLIO

Enrichix.ch

ENRICHIX is an **AI-powered platform** for smart product data management and scalable content creation in e-commerce.

Key Components

Data Optimization: Centralized, consistent product information.

AI Content: Automated descriptions, SEO copy & translations.

Scalable Workflows: For individuals and teams across channels.

Collaboration: Brand-aligned content with version control.

The screenshot shows the top of the Enrichix website. At the top left is the ENRICHIX logo. The main heading reads "The flexible and intelligent solution for perfect product data & content". Below this is a sub-headline: "Optimize product data, automate workflows and integrate systems seamlessly - with flexible functions and AI-supported content creation in all languages". A prominent blue button labeled "Get a Quote" is centered below the text. At the bottom of this section, there are several small icons representing different product categories like coffee makers, blenders, and kitchen appliances.

This section is titled "Key Features" and lists "Important functions at a glance". It features eight icons with corresponding text: "Flexible data import", "Real-time e-commerce", "Intelligent basic data enrichment", "Automated product enrichment", "AI-driven product description", "Automated data quality assurance", "Flexible data export", and "Seamless integration". Below this list is a sub-section titled "Flexible data import" with a brief description: "ENRICHIX makes reporting data easy. Whether you want to import your product data directly from other systems via API or conveniently via CSV or Excel file, our PIM system adapts to your specific requirements. This gives you full control over your data and saves you valuable time." Below the text is a screenshot of the "Import data" interface, showing a "Drag & Drop your files or Browse" area and a "Support@enrichix.com" button.

The section is titled "Benefits and Customer Value" and contains four columns, each with an icon and a title: 1. "Flexibility" with a camera icon, describing individual adaptation to various processes. 2. "User-friendliness" with a star icon, highlighting intuitive AI-supported workflows. 3. "Increased efficiency" with a lightning bolt icon, mentioning automated workflows and quality checks. 4. "Cost optimization" with a dollar sign icon, focusing on reducing manual effort and optimizing processes. At the bottom of this section is a blue button labeled "Frequently asked questions".

This section is titled "Pricing & Plans" and features the heading "Pick the plan that suits you best". It lists three plans: "Basic" (up to 400 CHF/p.M.), "Pro" (up to 1549 CHF/p.M.), and "Enterprise" (up to 2549 CHF/p.M.). Each plan has a "Get a Quote" button. Below the plans is a table of features categorized by "Onboarding", "Number of users", "Languages", "Data import", "Data Export", "Product Data Treatment (AI)", "Content Creation (AI)", "SEO Optimization (AI)", "Translation (AI)", "Number of SKUs", "Support", "Hosting", and "Back-ups/Drinks". The "Enterprise Plus" plan is highlighted with a blue background and lists additional features like "Customized Onboarding", "AI-linked Users", "Data Export Full-Queue API Access", "Customized Product Data Treatment (AI)", "Customer Content Creation (AI)", "Customer SEO Optimization (AI)", "Translation (AI) Integration", "Unlimited SKUs", and "24/7 support". Below the pricing table is a "Frequently asked questions" section with five questions and expandable answers. At the bottom, there is an ENRICHIX logo, contact information, and social media links.

ProOxy.ch

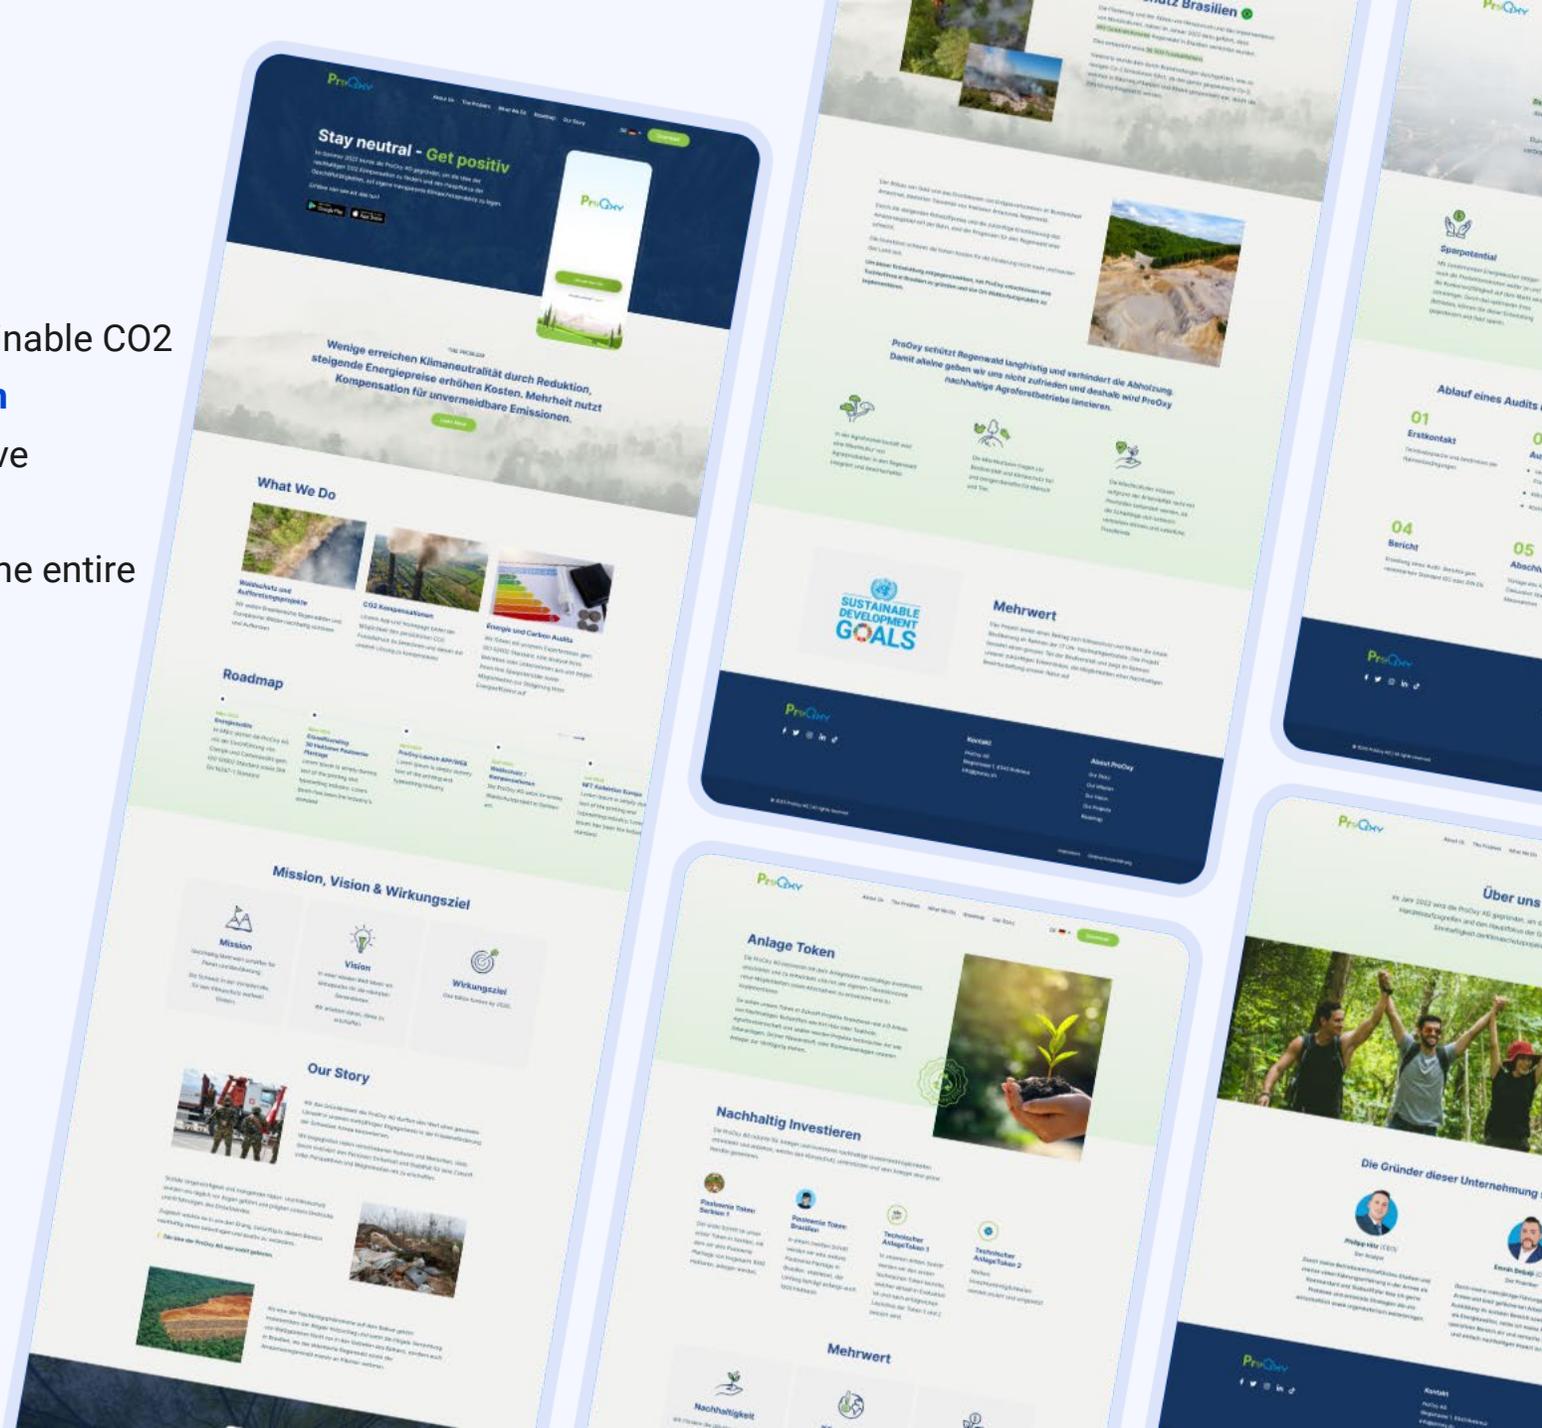

Website that demonstrates client's dedication to sustainable CO2 compensation through **cutting-edge climate protection initiatives**. It emphasizes their use of advanced Negative Emission Technologies, offering effective solutions for businesses striving for climate neutrality. For ProOxy, the entire corporate identity was developed from scratch.

Key Components

Informative Content: Detailed descriptions of CO2 reduction efforts and technologies.

User-Friendly Interface: Easy navigation to explore services and solutions.

Corporate Identity: Complete brand development, including logo design, cover letters, and a comprehensive brand guide, ensuring a cohesive and professional image across all platforms.

Euroturs

Euroturs is a **travel agency** offering a wide range of travel packages, including summer vacations, flights, and tailored tours across various destinations.

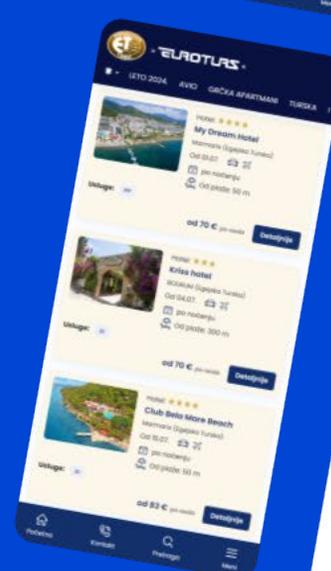

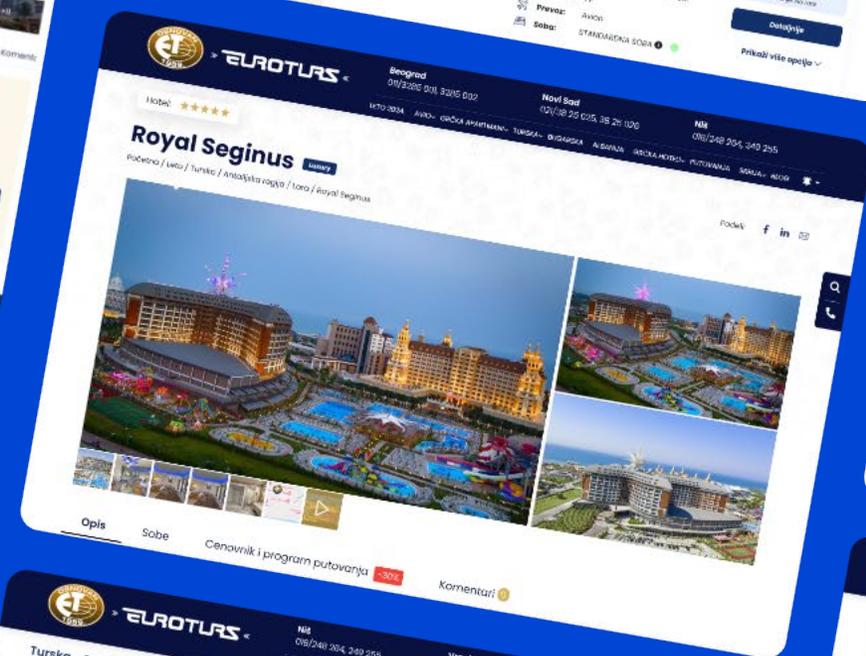

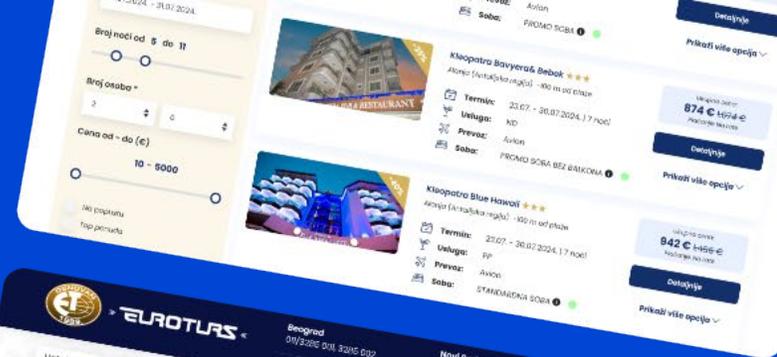

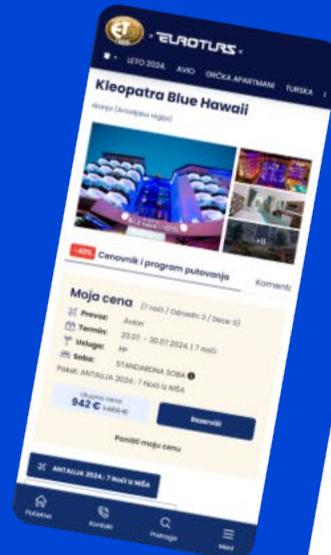

Key Components

Travel Packages: Extensive listings of domestic and international travel options.

Booking and Payment: Easy online booking with various payment options.

Destination Information: Detailed descriptions of destinations, accommodations, and activities.

Promotions and Offers: Regular updates on special deals and last-minute offers.

Nature Travel Office

Nature Travel Office offers a wide range of **adventure tours and travel experiences across the Balkans**, focusing on the region's natural beauty and cultural heritage.

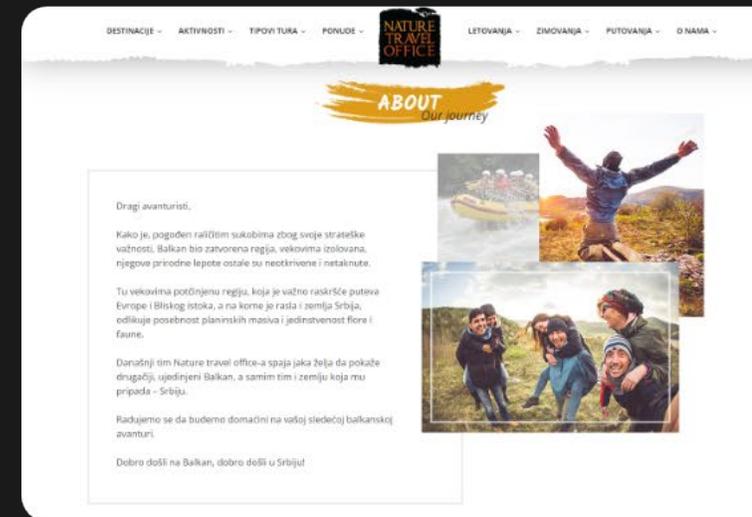

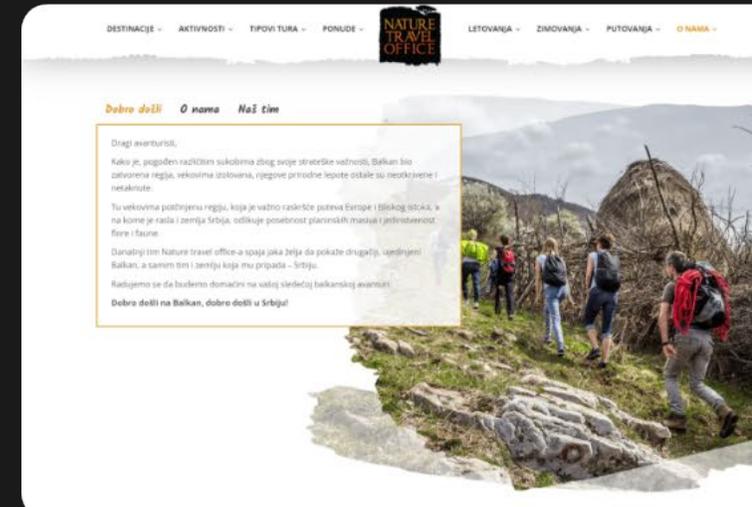

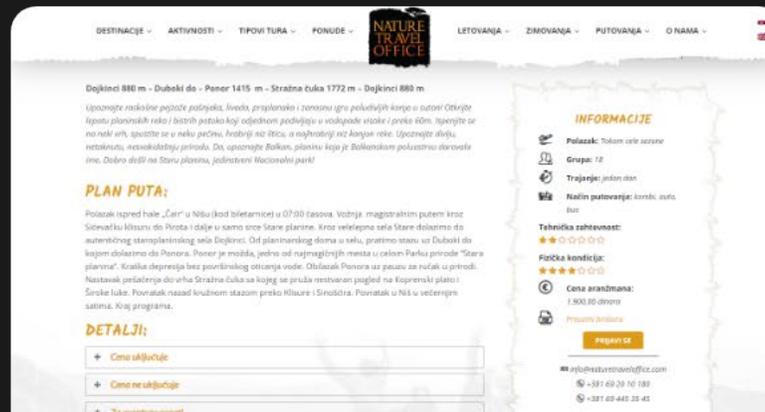

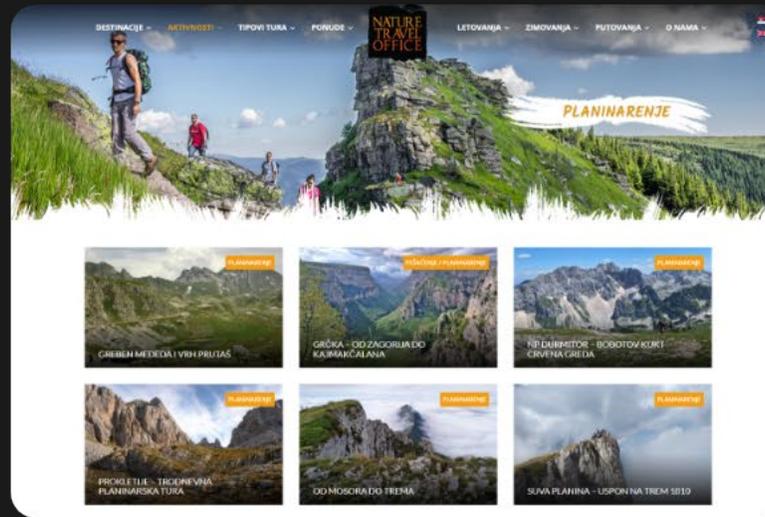

Key Components

Destination Listings: Comprehensive information on various Balkan destinations, including Serbia, Montenegro, Bulgaria, and more.

Activity Options: Details on activities like hiking, kayaking, canyoning, paragliding, and more.

Tour Types: Offers daily tours, bestsellers, recommended tours, and special packages.

Booking and Payment: Easy online booking and multiple payment options for a seamless user experience.

Lovvvish

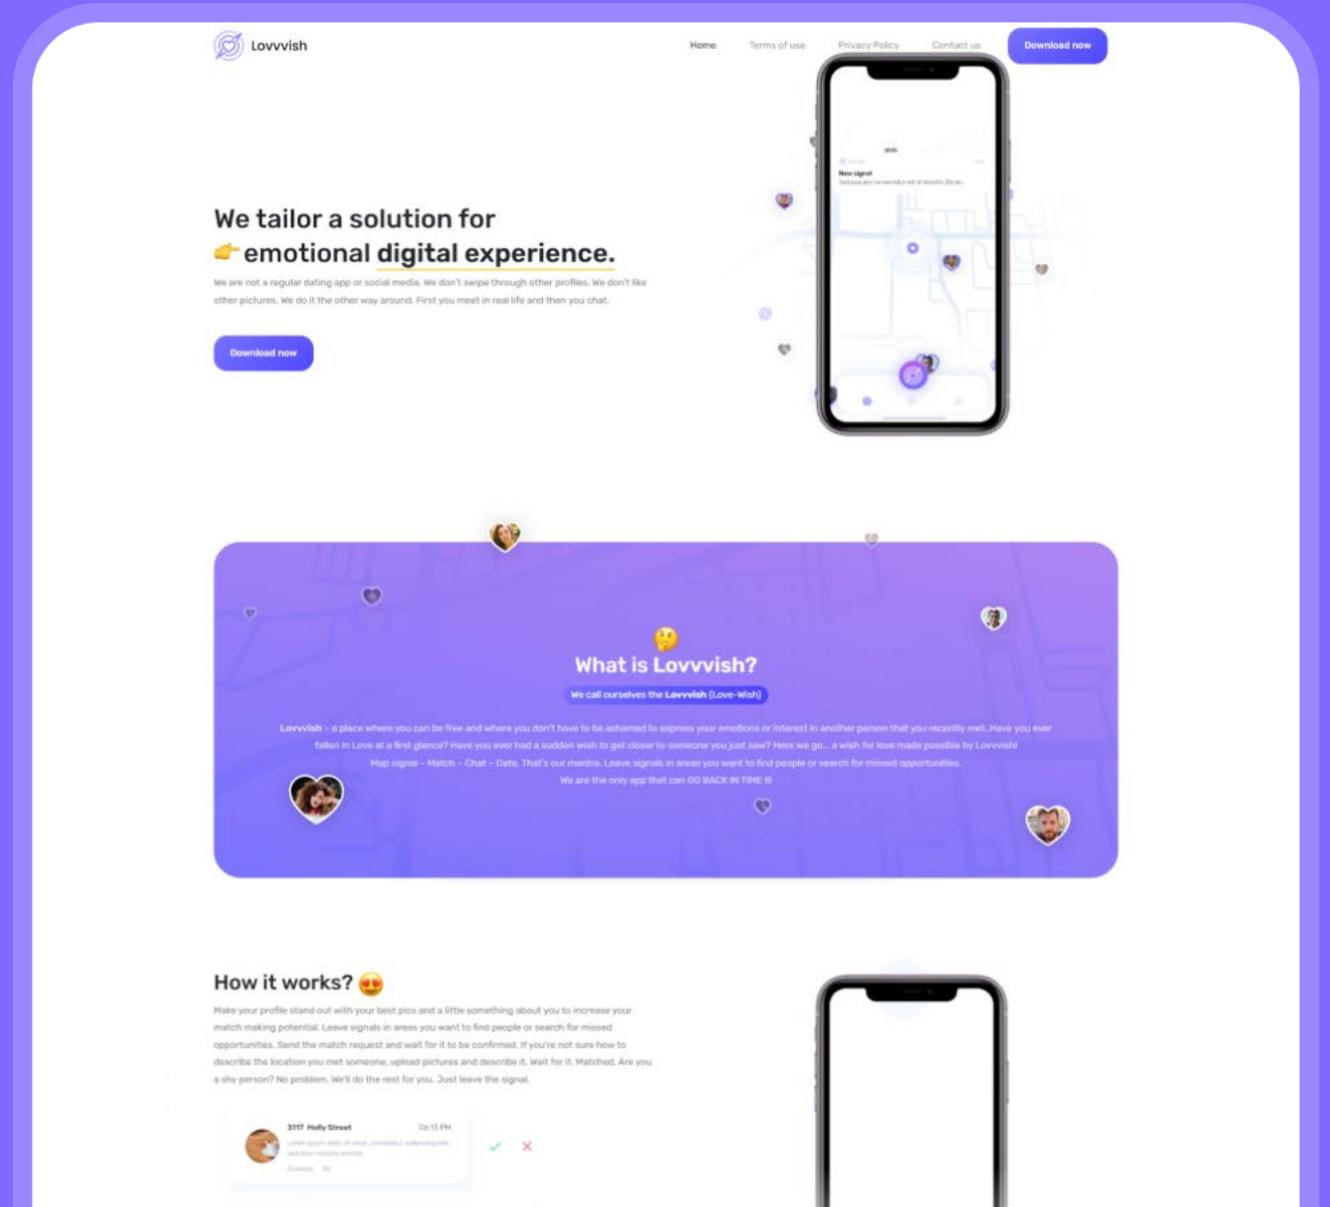

Website showcase for the **innovative dating platform that emphasizes real-life connections**. It highlights the platform's unique features, such as leaving signals in specific locations to find missed connections and exploring potential matches via a map.

Key Components

User-Friendly Interface: Designed for easy navigation and exploration of Lovvvish's unique dating approach.

Feature Highlights: Detailed descriptions of the platform's capabilities and benefits.

Engagement: Encourages users to learn more and engage with Lovvvish's service.

HuBike

Website showcase for HuBike - **an innovative smart and secure bicycle parking system designed for urban environments.** The site highlights the hardware-software solution that protects bicycles from theft and supports both standard and electric bikes, tailored for everyday riders, couriers, postal workers, delivery services, as well as recreational cyclists.

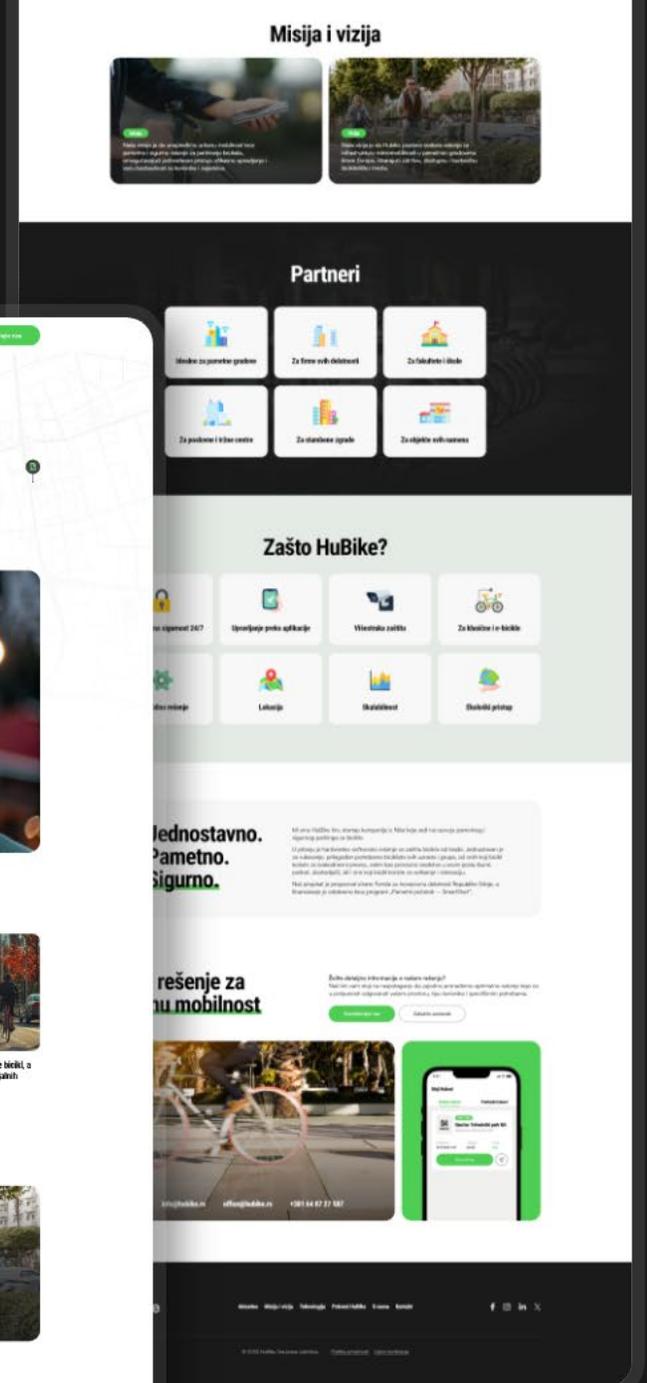

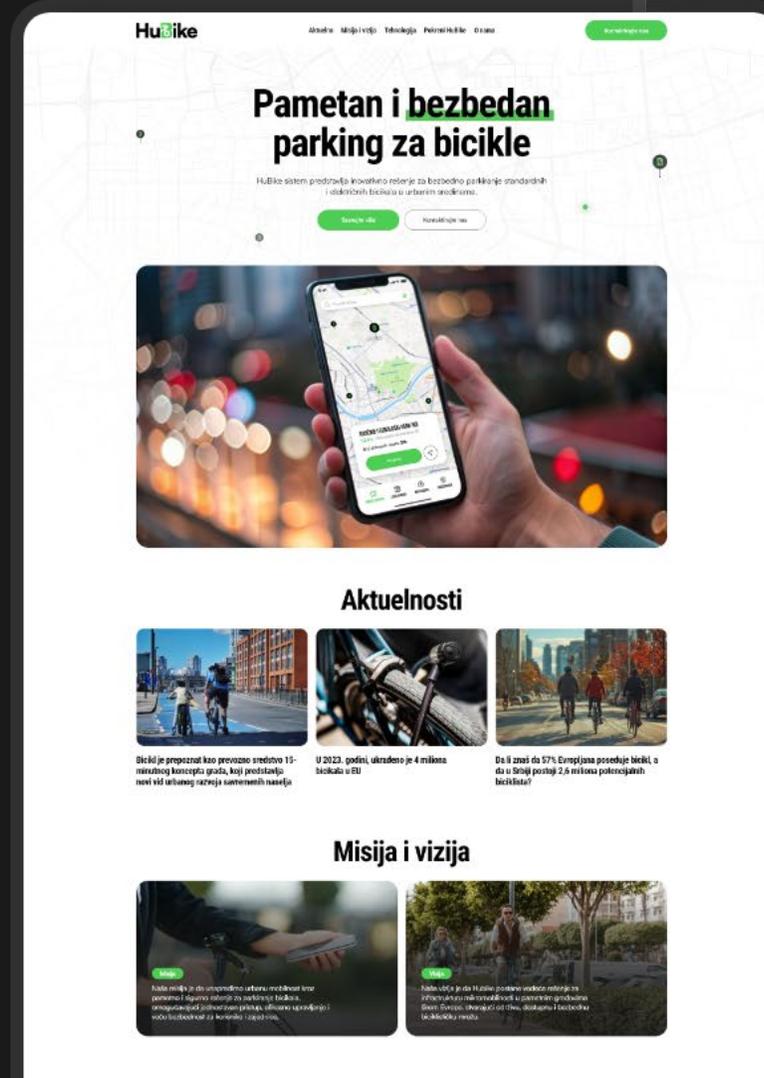

Key Components

Clear Value Presentation: Concise explanation of HuBike's smart parking concept and its advantages.

User-Centered Design: A clean and intuitive interface that helps visitors quickly understand how the system works and who it is intended for.

Feature Highlights: Visual and textual breakdown of core functionalities, including security mechanisms and ease of use.

Engagement & Credibility: Structured sections that encourage visitors to explore the system further, demonstrating innovation and reliability for reference purposes.

VRH

Promotes **hiking tours in Serbia**, offering detailed information on various trails, certified guides, and the project's background. It aims to encourage outdoor activities and exploration of Serbia's natural beauty.

Key Components

Hiking Tours: Detailed descriptions of hiking trails, including difficulty, duration, and highlights.

Certified Guides: Profiles of experienced guides with their qualifications and backgrounds.

Project Information: Background on the Dođi Na Vrh project and its mission to promote hiking.

User Engagement: Options to sign up for tours and learn more about hiking in Serbia.

Star Travel

Star Travel Niš is a **travel agency** offering a wide range of travel packages including summer vacations, flights, and custom tours to various destinations.

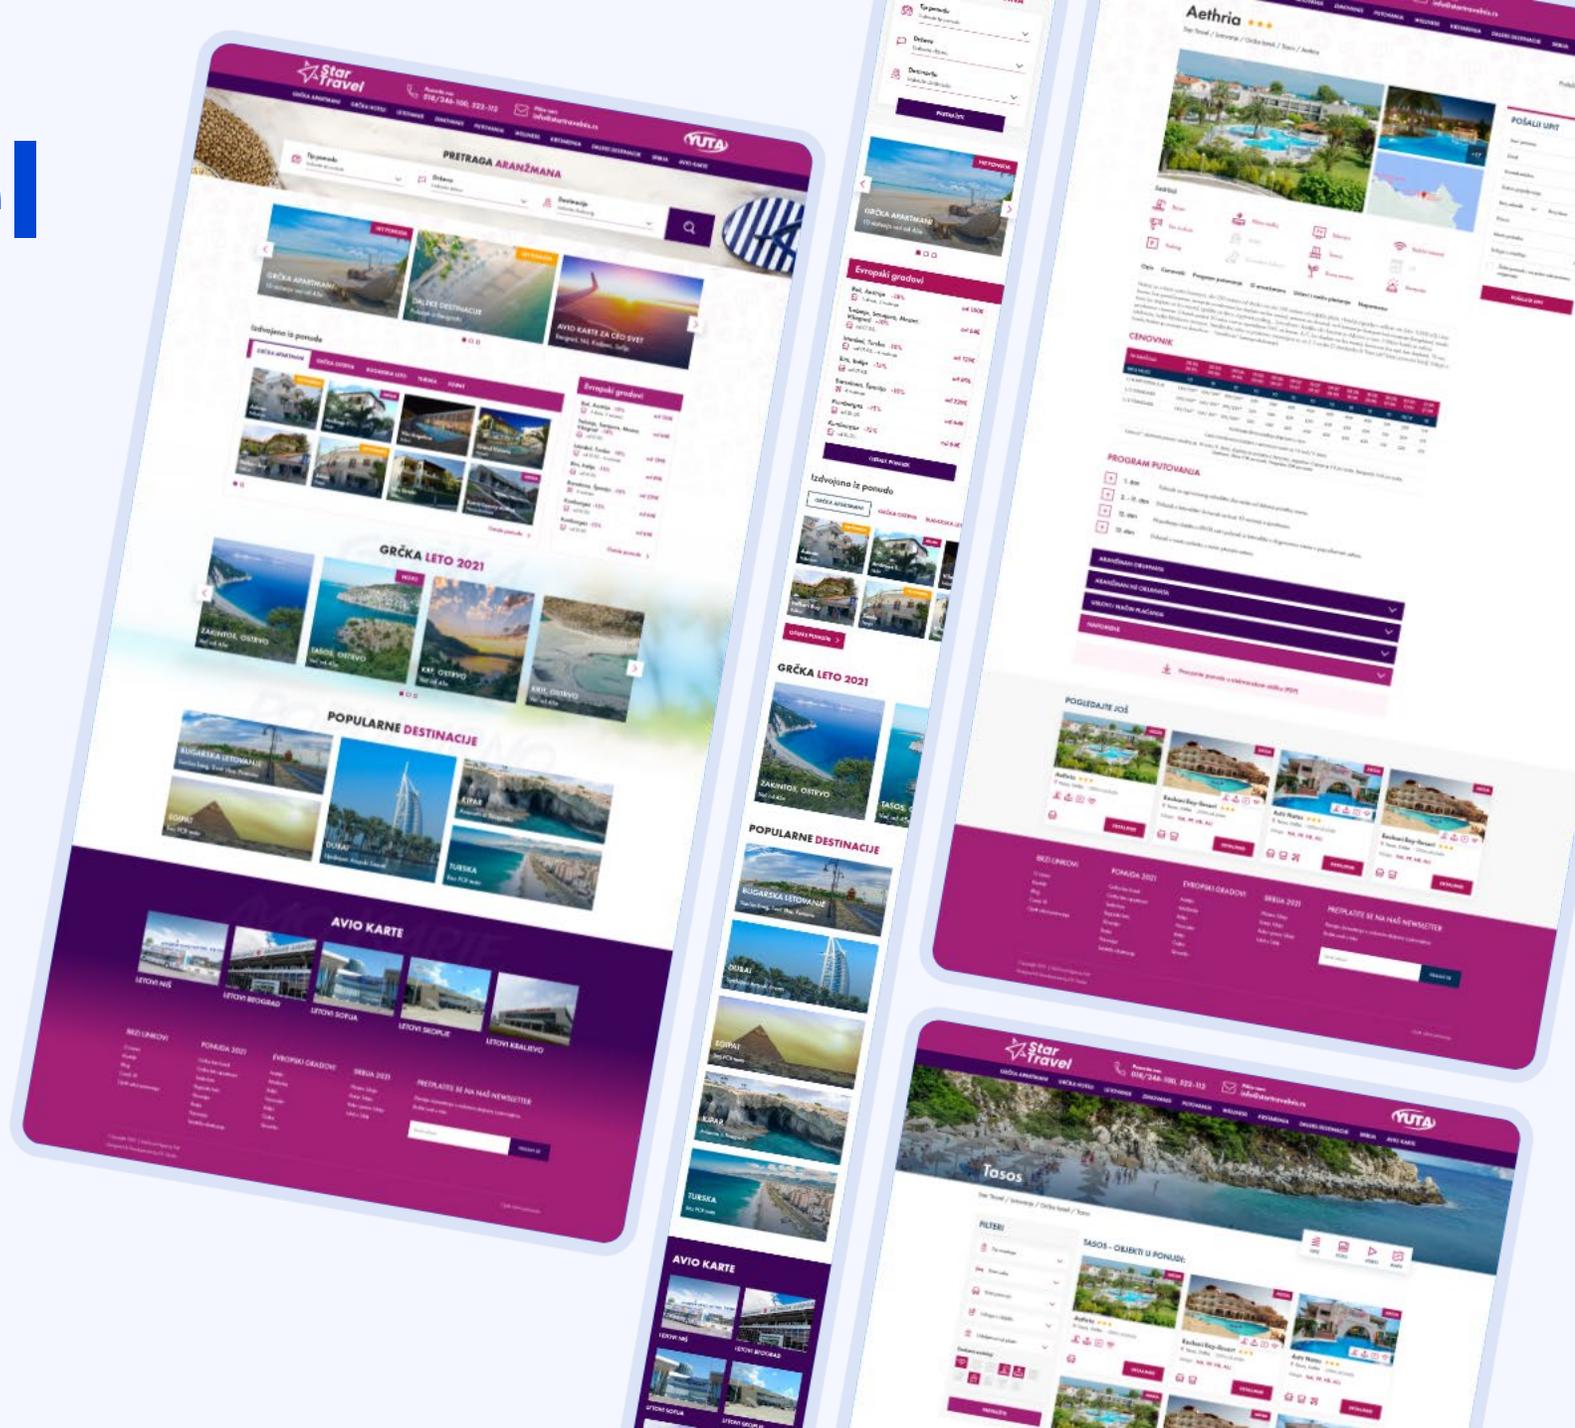

Key Components

Travel Packages: Extensive listings of domestic and international vacation options.

Easy Booking: User-friendly online booking system with multiple payment options.

Destination Information: Detailed descriptions of destinations, accommodations, and activities.

Special Offers: Regular updates on special deals and last-minute offers.

Esthetic Atelier.ch

The Esthetic Atelier is a Swiss beauty salon with more than 20 years of experience in the beauty industry. Focused on individual skin needs and visible results, the salon offers professional treatments in a relaxing and welcoming atmosphere.

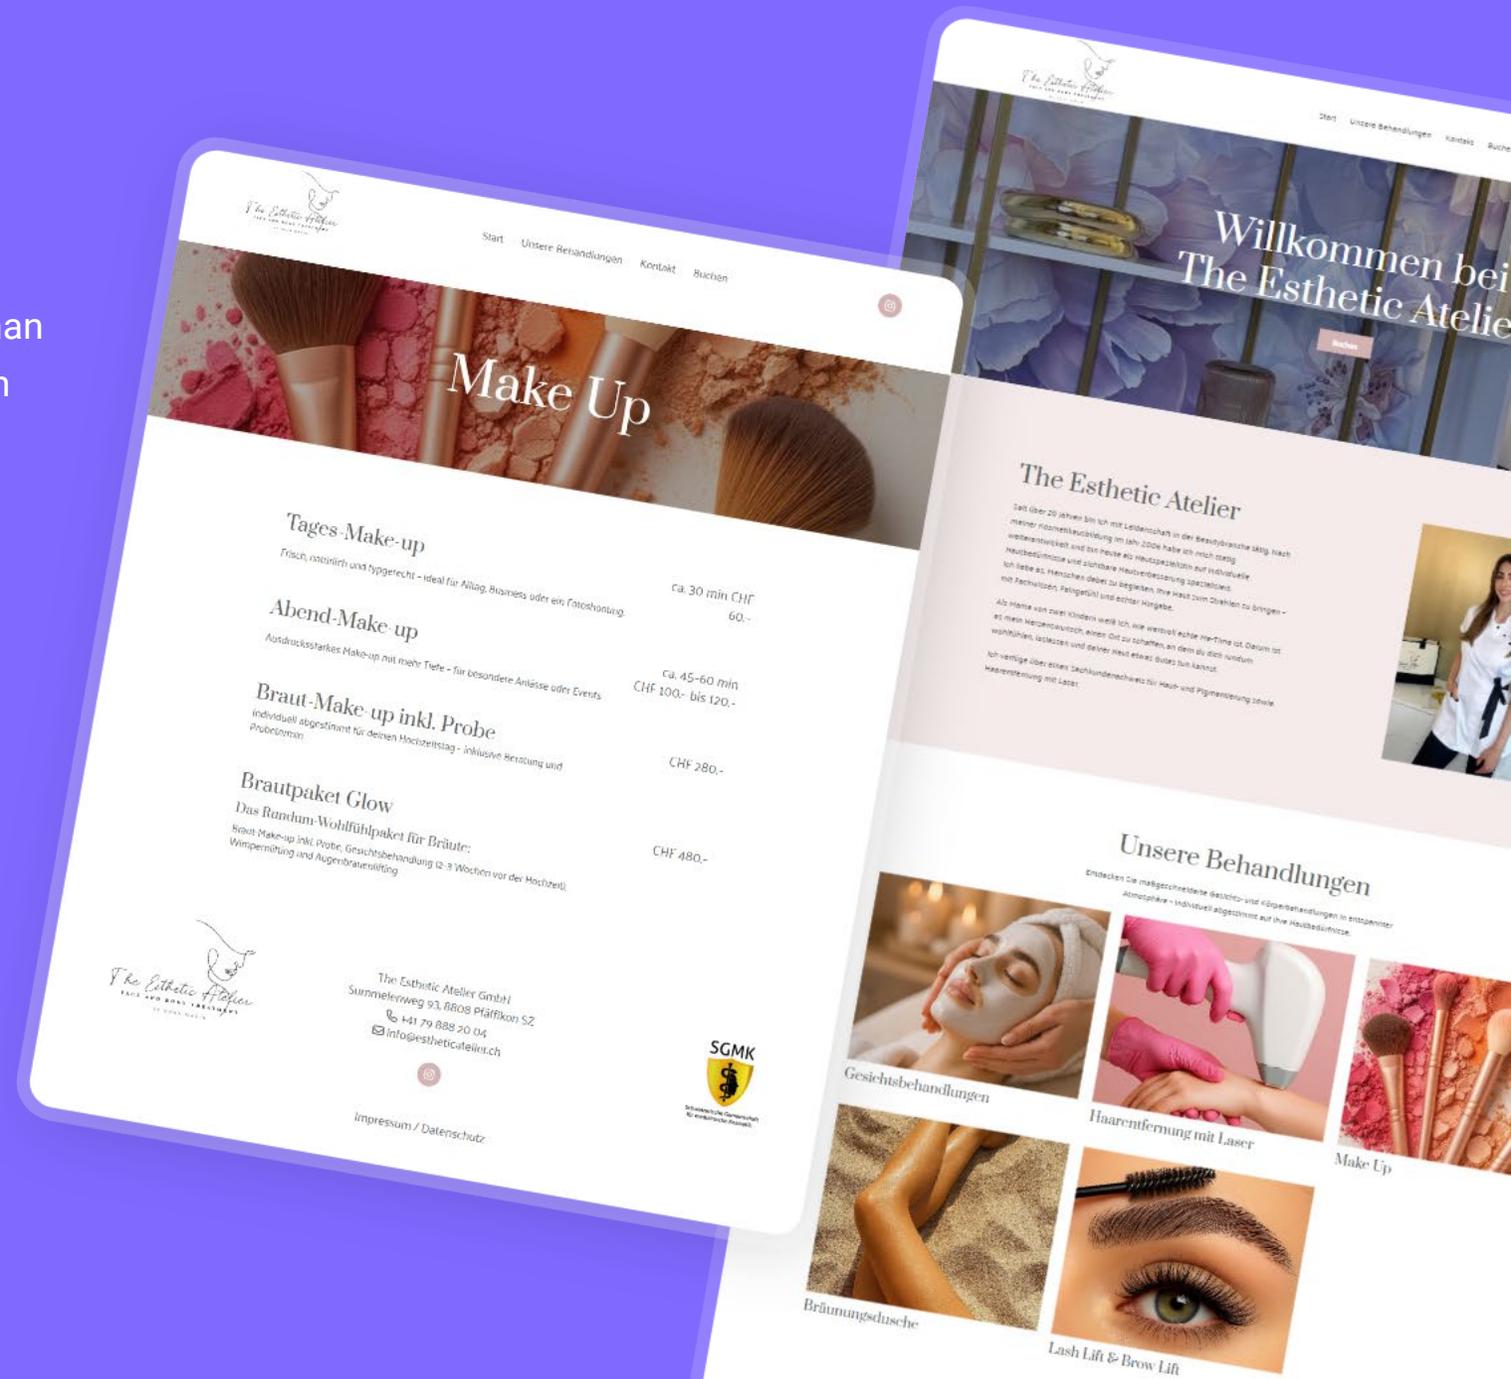

Showcase

Customized Treatments: Tailored face and body care.

Laser Expertise: Certified hair removal & pigmentation treatments.

Beauty Services: Make-up, lash & brow lift, tanning.

Client-Centered: A place for true “Me-Time” and expert care.

Serbian Hunting Association

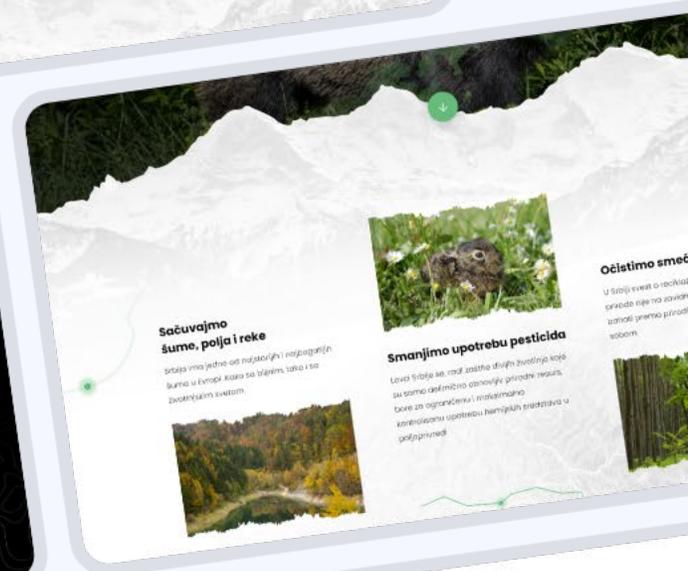

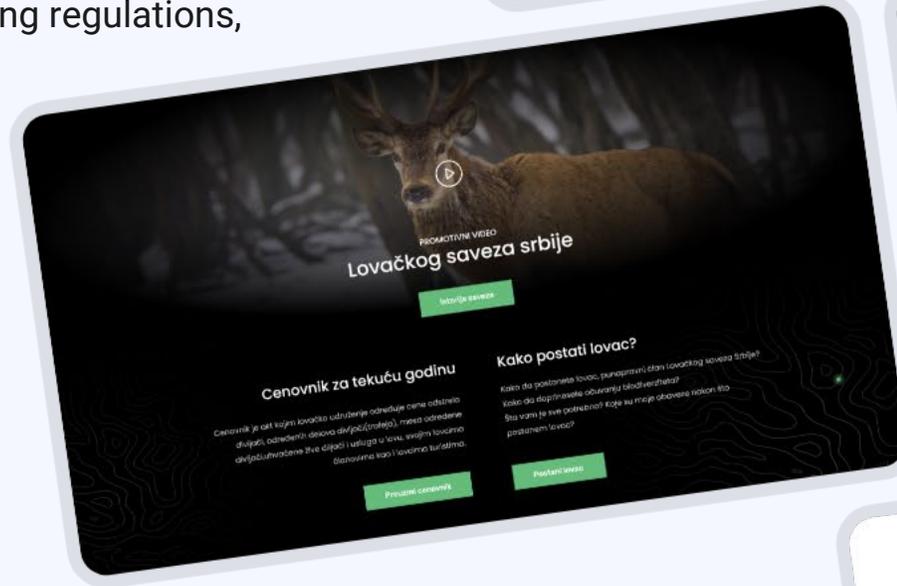

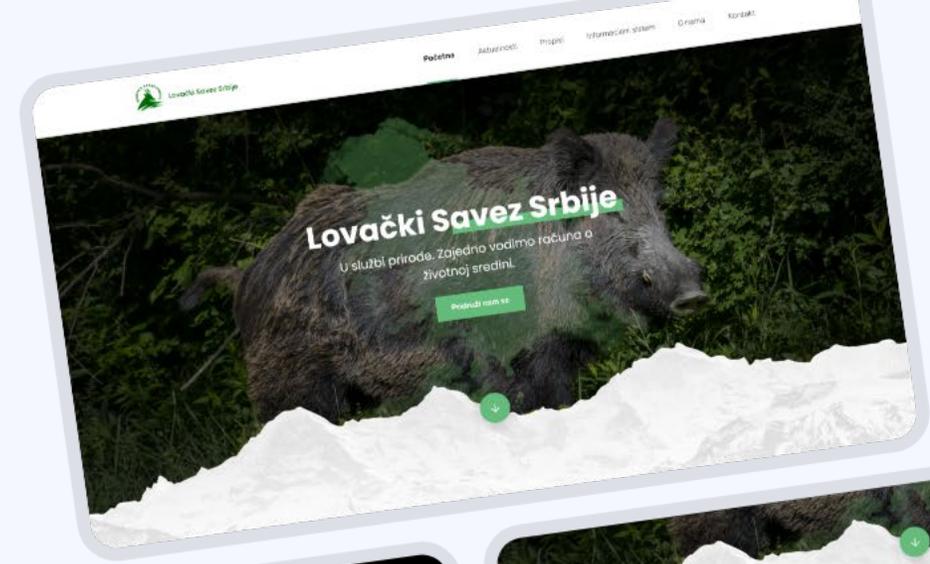

Website that focuses on **promoting hunting as a sport** while emphasizing wildlife conservation and environmental protection. The website provides comprehensive information on hunting regulations, events, and membership details.

Key Components

Regulations and Guidelines: Detailed information on hunting laws, bylaws, and guidelines.

Event Information: Updates on hunting exams, meetings, and activities.

Conservation Efforts: Highlights the association's initiatives to protect wildlife and promote sustainable hunting practices.

DraPtec

DraPtec specializes in manufacturing a wide range of **carbon fiber composite parts** for various industries, including automotive, medical, and custom applications.

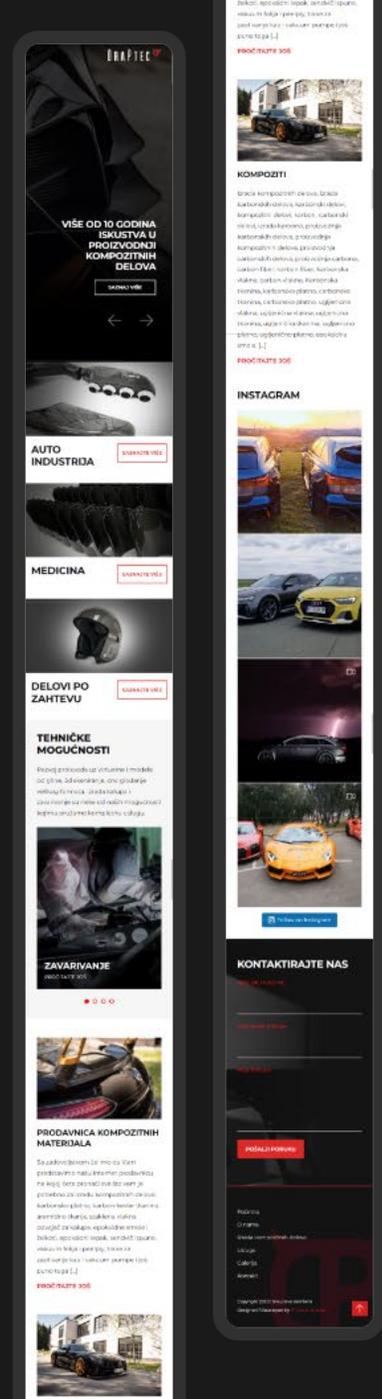

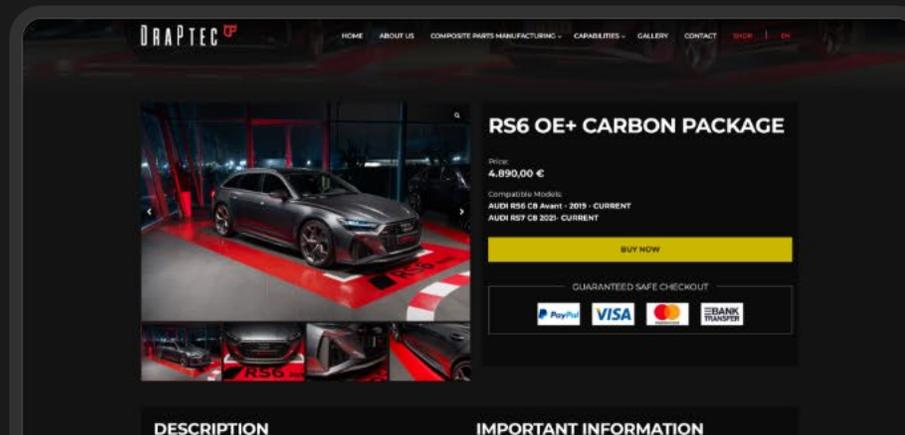

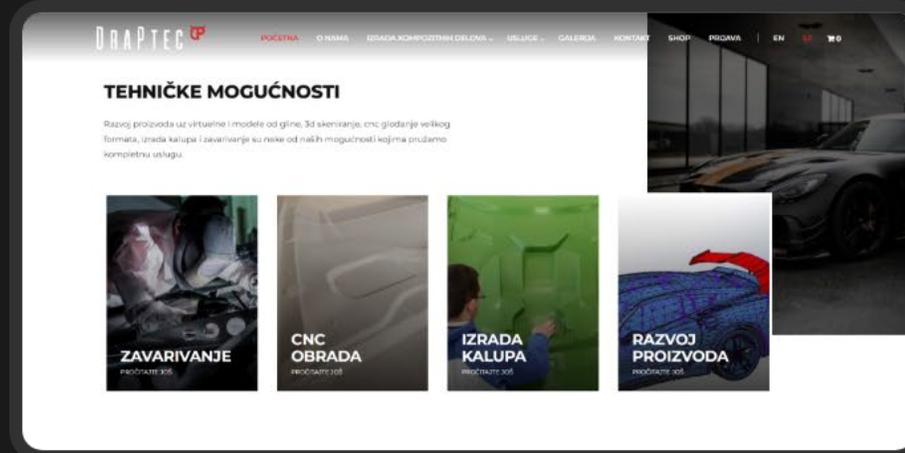

Key Components

Product Information: Detailed descriptions of composite parts for different sectors.

Capabilities: Highlights their expertise in product development, mold making, CNC milling, and welding.

User Resources: Includes a gallery, contact information, and access to their online shop.

E-Commerce Functionality: Online shop for purchasing high-quality carbon fiber products, including specific packages.

MojPrint

MojPrint CMS is an IT Centar in-house **content management system tailored for print-on-demand companies**. It integrates with Promobox to facilitate the creation and management of websites.

Key Components

Website Creation: Used to develop over 10 websites that handle customizable promotional products.

Efficient Management: Simplifies product updates and administration.

User-Friendly Interface: Provides an intuitive solution designed to meet the specific needs of print-on-demand businesses.

The screenshot displays the MojPrint CMS website. At the top, there's a navigation bar with 'printCMS' logo and links for 'Kontakt', 'O nama', 'Blog', 'Kontakt', and 'Demo verzija'. The main heading is 'Vaš biznis počinje ovde'. Below it, there's a sub-heading 'Potpuna integracija sa katalogom' and a 'Dobro došli' button. A list of partner logos includes 'promobox', 'uniprint', 'FOCUS URBANSPOrTWEAR', 'digitec', 'STAMPARSKA GRAFICS', and 'KAMPANJA'. A section titled 'Vaši proizvodi' features the heading 'Takode, možete kreirati i svoje proizvode' and a 'Dobro došli' button. At the bottom, there's a 'Features' section titled 'Neke od funkcionalnosti' with icons for 'Stilovi', 'Interaktivna mapa', 'Detaljna pretraga', 'Preuzimanje', and 'Naveštavanje'.

Parudzbine Evidencija svih upita sa sajta

PrintCMS omogućuje vam da centralizovano pratite sve upite sa sajta u vidu evidencije. Organizovano, precizno i pregledno rešenje pomoće vam da pratite parudzbine, realizacije narudžbi i postavite svoj radni tok.

[Dobro došli](#)

The screenshot shows a data table with columns for 'ID', 'Ime', 'Prezime', 'Adresa', 'Telefon', 'Email', 'Status', and 'Datum prijave'. The table contains several rows of data, with a 'Dobro došli' button at the bottom.

Custom API

Potpuna integracija sa katalogom

Značaj brendiranja u poslovanju je veliki. Zahvaljujući potpunoj integraciji sa Promobox katalogom, vaši klijenti mogu da dobiju odgovarajuću promo materiju za svoje poslovanje izravno sa vašeg sajta. Iznimno jednostavno i brzo postavljanje i korišćenje. Štampanja promotivnog materijala nikad nije bila jednostavnija i može se obaviti potpuno ONLINE.

RATEL

The RATEL website, powered by our custom-built CMS, is an informational platform for Serbia's Regulatory Agency for Electronic Communications and Postal Services, providing essential regulatory and market information.

Showcase

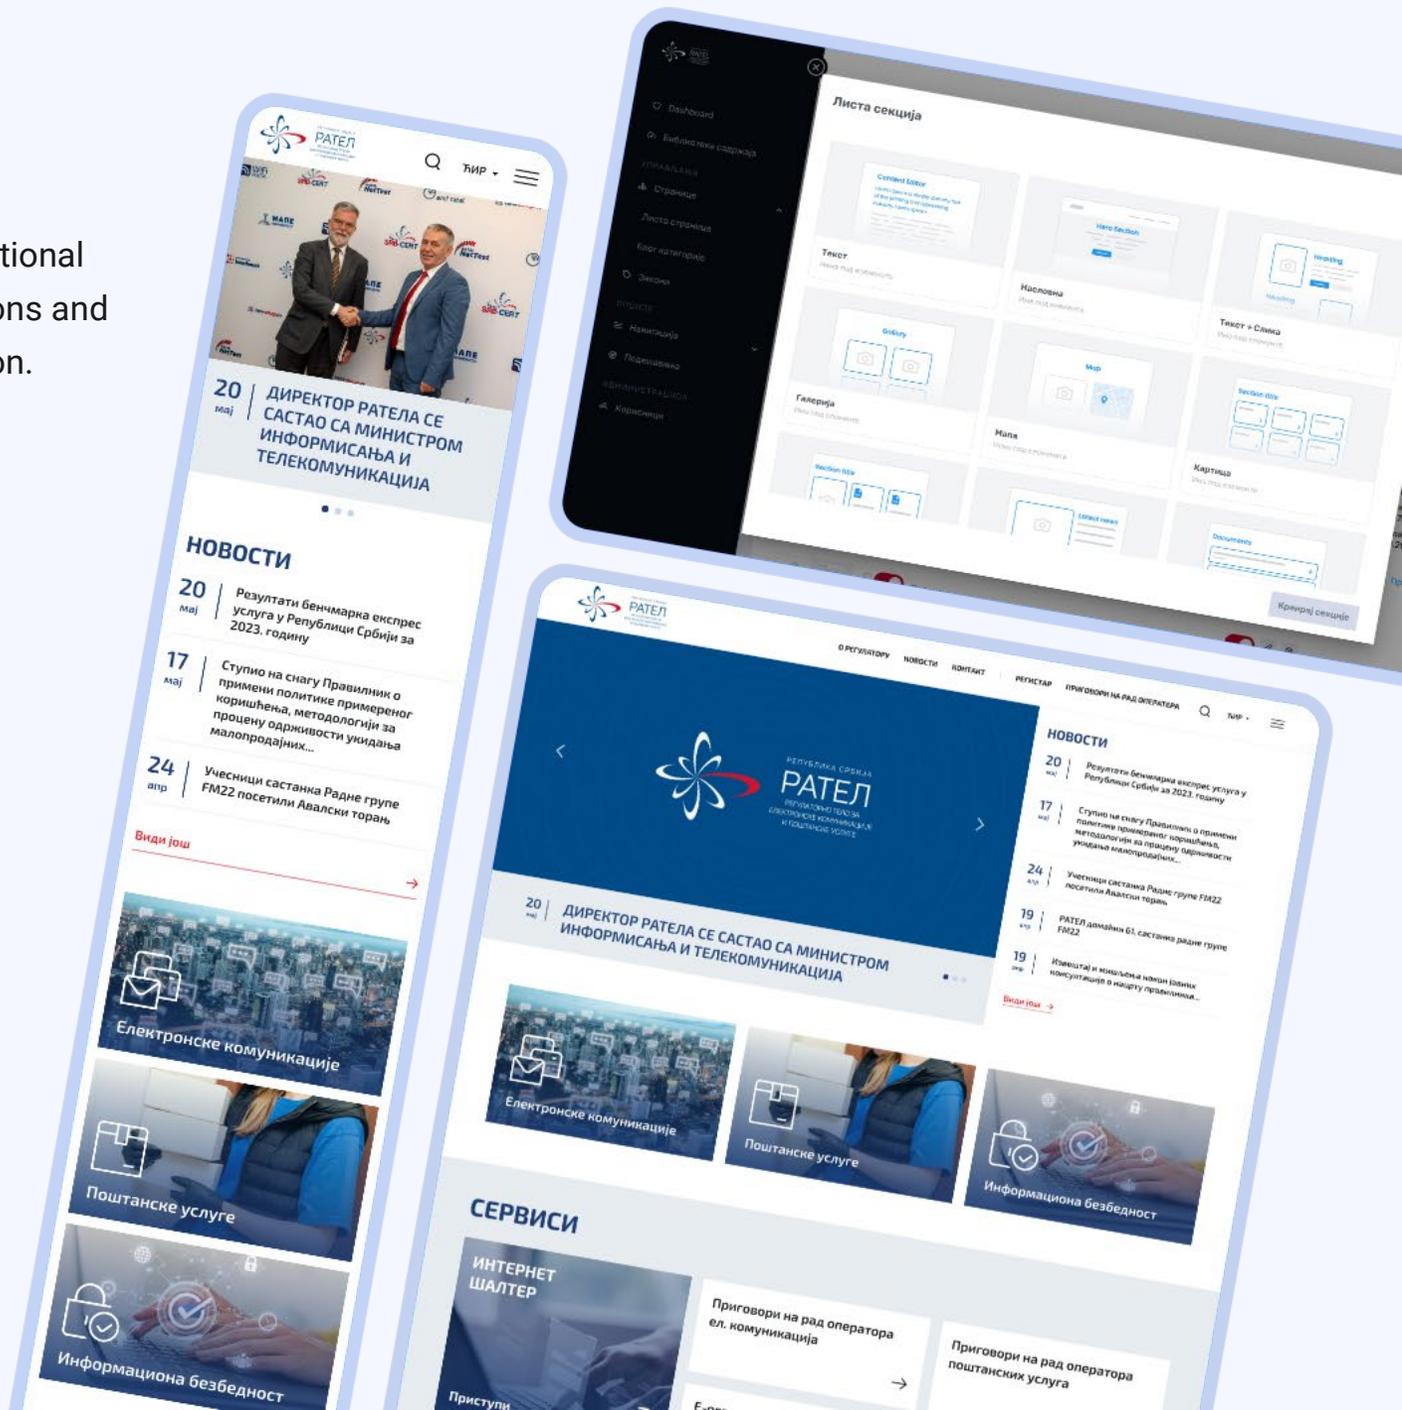

Regulatory Documents: Comprehensive library of laws and regulations with linked documents for easy access.

Market Reports: Detailed analyses and quarterly reviews, all managed seamlessly through the CMS.

Tailored Navigation Menus: Designed to support complex site navigation, making it easy for users to find relevant information.

User Services: Tools for reporting issues and checking service quality.

Custom CMS Capabilities: Enables efficient management of market reports, legal documents, and dynamic navigation menus for an organized and user-friendly experience.

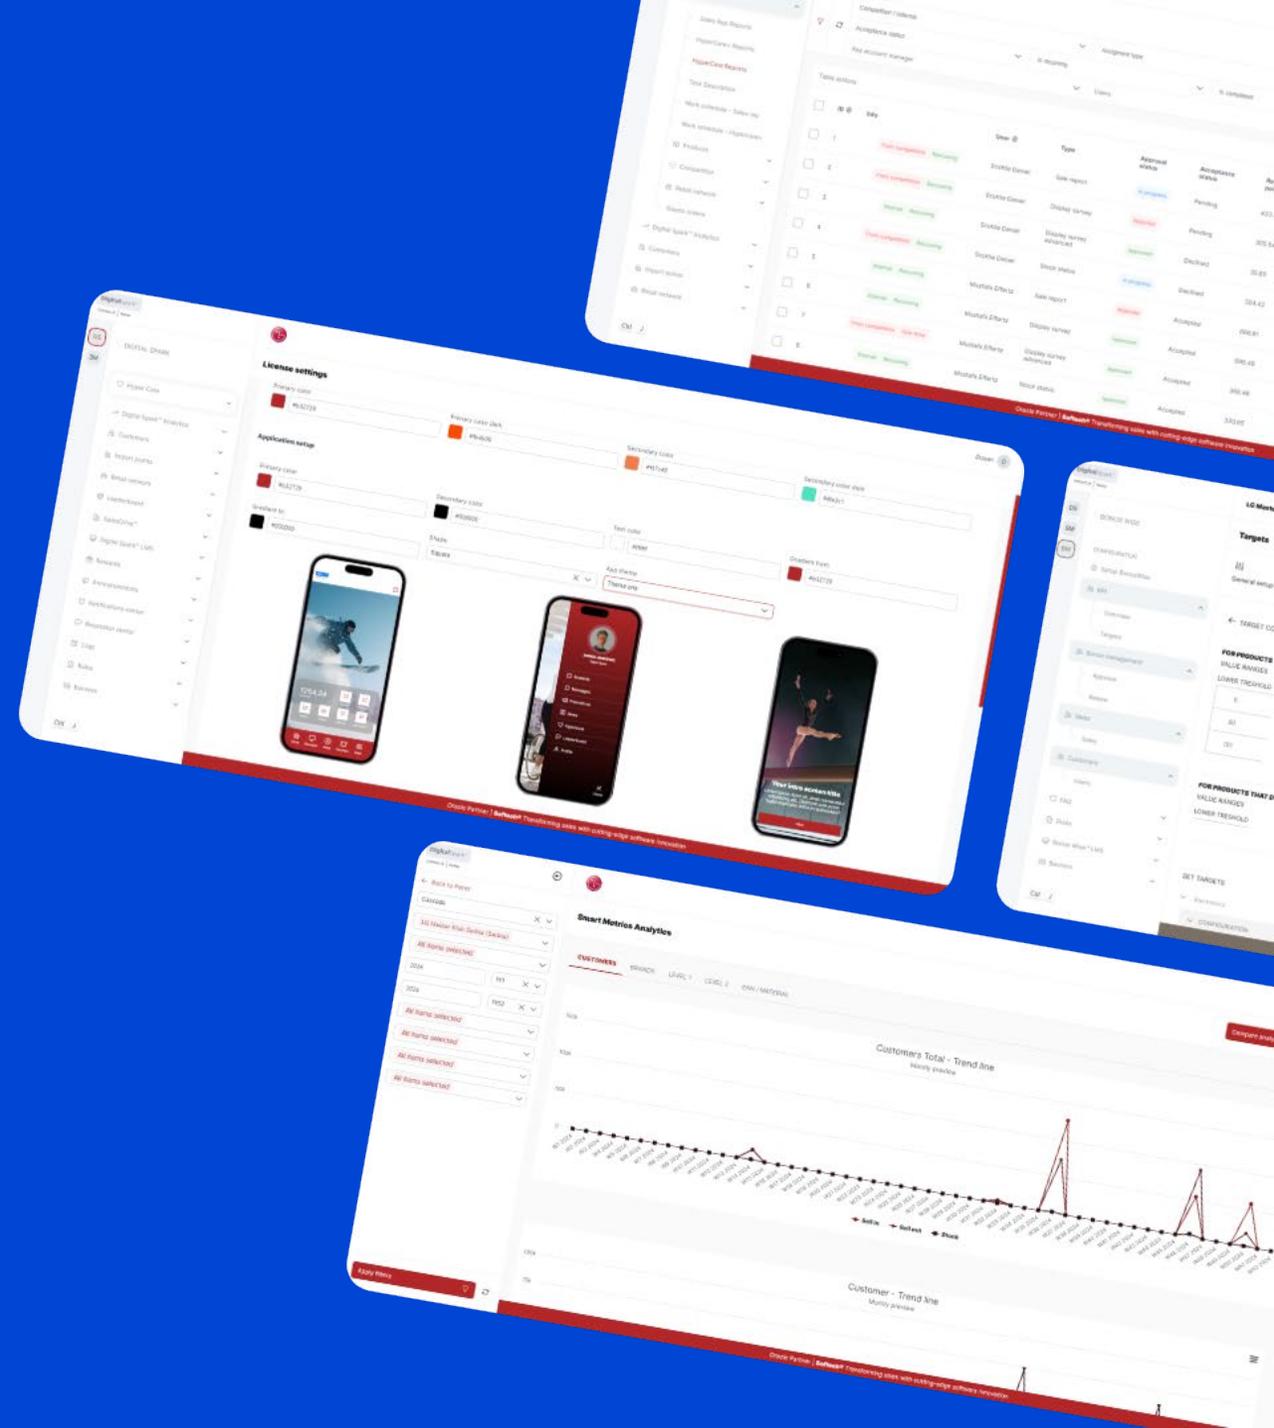

Digital Spark

A robust multi-brand application with customizable configurations, branding (colors, logos, images), and dedicated employee applications for each brand. The comprehensive software includes multiple interconnected modules, each offering unique features and benefits:

1. **SalesDrive:** The system core that incentivizes employees to sell specific products and learn from an educational platform, earning points to purchase in-app vouchers.
2. **HyperCare:** Encourages employees to complete specific assignments, track their progress, and award points.
3. **SmartMetrics:** Tracks company sell-in, sell-out, and quantity information, providing a comprehensive analytics dashboard.
4. **BonusWise:** Assigns KPIs to employees, monitors their progress, and facilitates easier payouts.

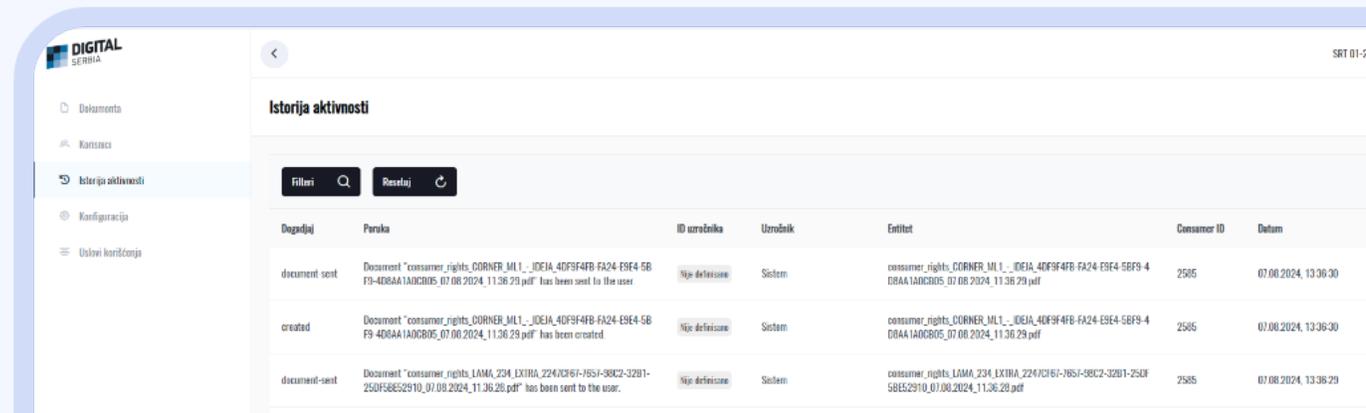

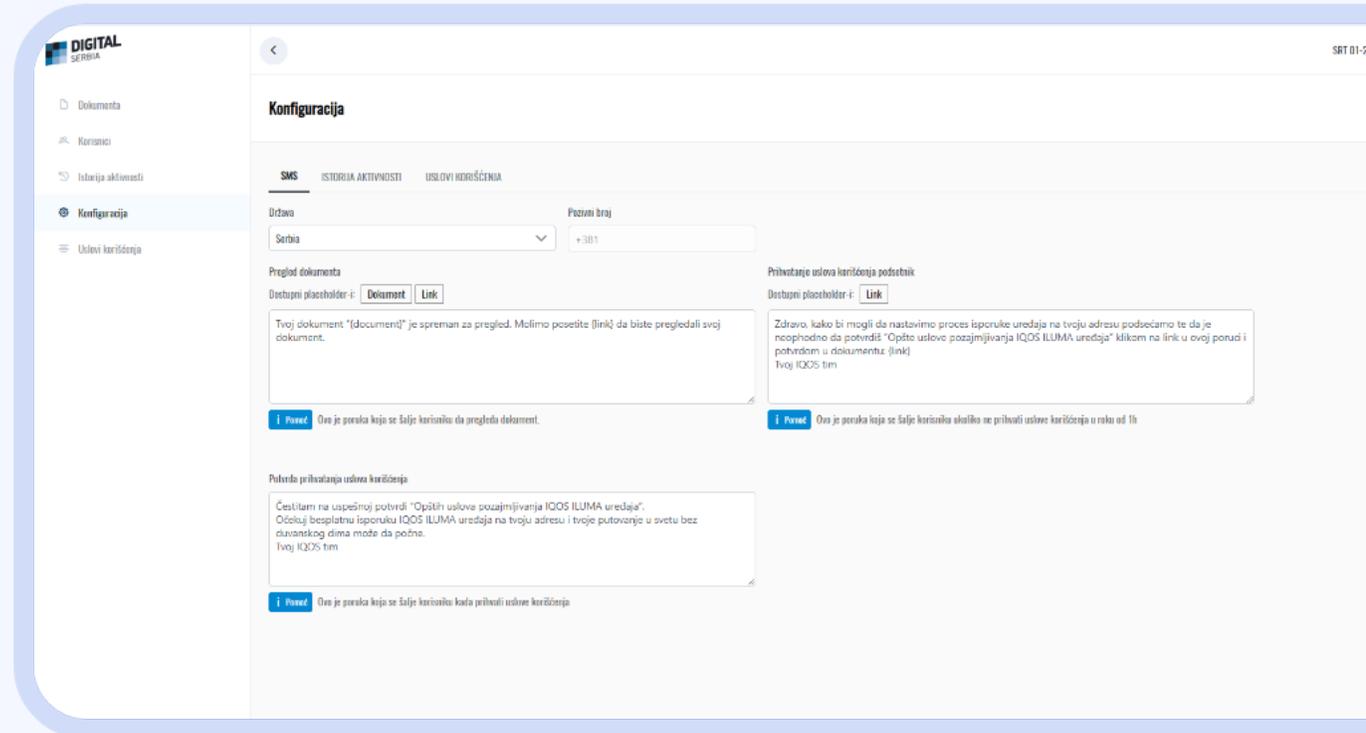

All modules are integrated into a super analytics dashboard, enabling tracking of employee progress across different modules.

PMI – Digital Contracts

Represents an application for digitalizing various contracts. It uses AWS services, Monolith CRM, and an SMS gateway from the PMI ecosystem. The app triggers actions such as document generation and database synchronization based on API calls from Monolith or S3 bucket CSV file uploads. PDF contracts are automatically generated and populated with data from these files and are sent to consumers through SMS gateway.

The architecture is easily configurable for multiple markets, with adaptable environment and admin panel settings. All actions are logged and displayed in the admin panel, which supports different authorization levels and uses Azure SSO. The app integrates with the DTE platform via Salesforce, using encrypted query strings for data transmission. End users receive signed short URLs to access their documents anytime.

PerfectLine

Comprehensive management system for gyms and fitness centers with tools for **real-time tracking** and administration.

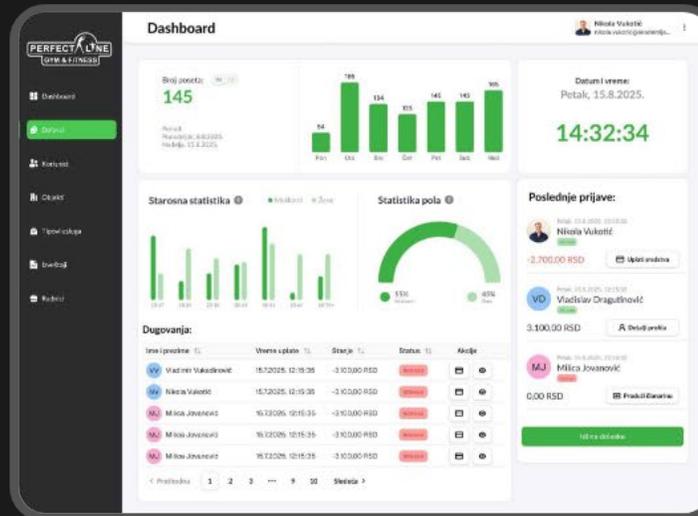

Key Components

Dashboard Overview: Quick insight into activities and key metrics.

Attendance Tracking: Live overview of daily visits and member status.

User & Facility Management: Centralized control of members, staff, and multiple gym locations.

Reports & Analytics: Generate summaries and monitor performance

Virtual Culture

Virtual Culture is a comprehensive digital platform that brings cultural tourism to a global audience through VR, web, and 360-degree video experiences. It enables users to explore museums and cultural sites virtually, with immersive content that bridges the gap between physical and digital tourism.

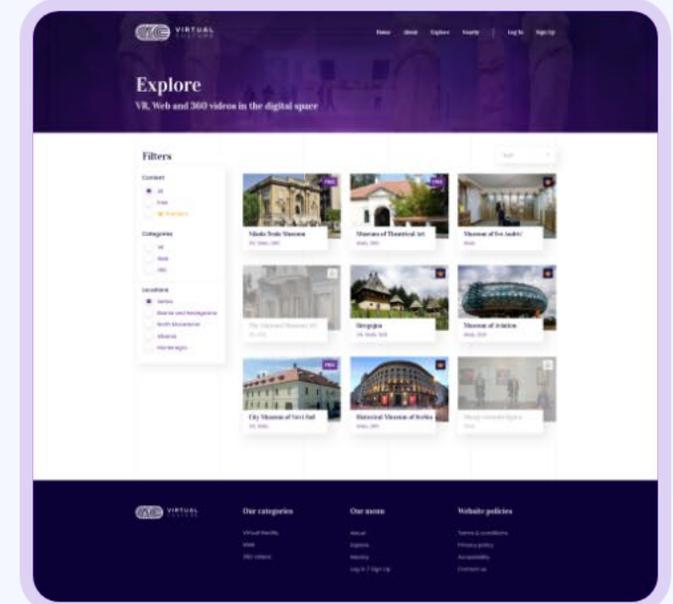

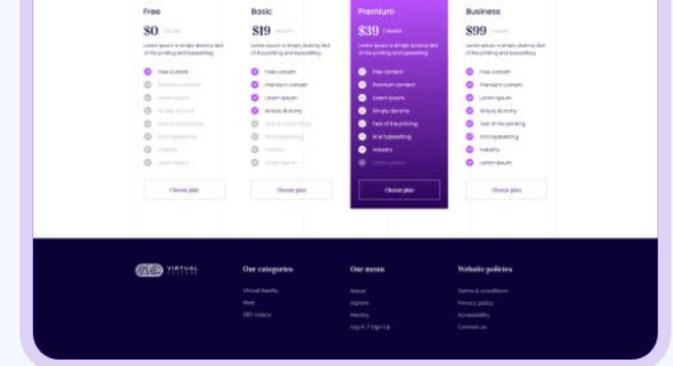

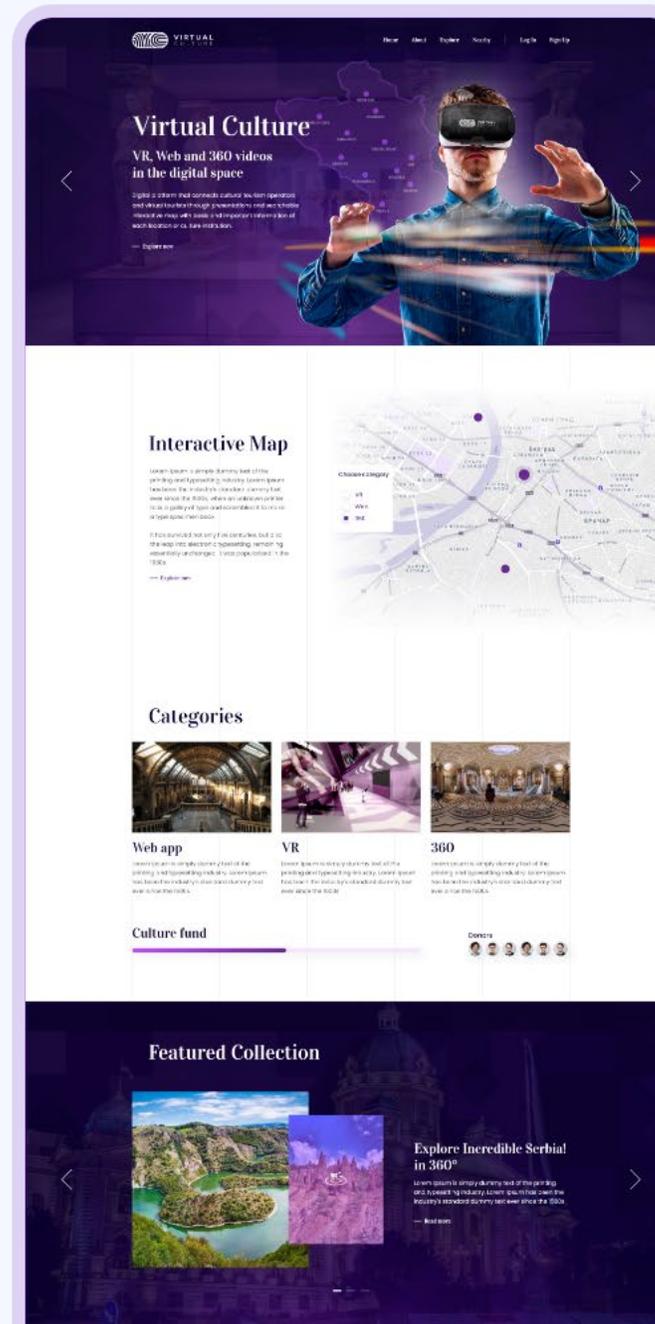

Showcase

Interactive Map: Users can explore cultural sites via a searchable map with essential information on each location.

Featured Collections: Highlights unique cultural collections and sites for an enriched virtual experience.

E-Commerce Integration: Allows users to choose from different subscription plans, offering access to free, basic, premium, and business content tiers.

Immersive Virtual Tours: Engages users with lifelike experiences, making culture and heritage accessible from anywhere in the world.

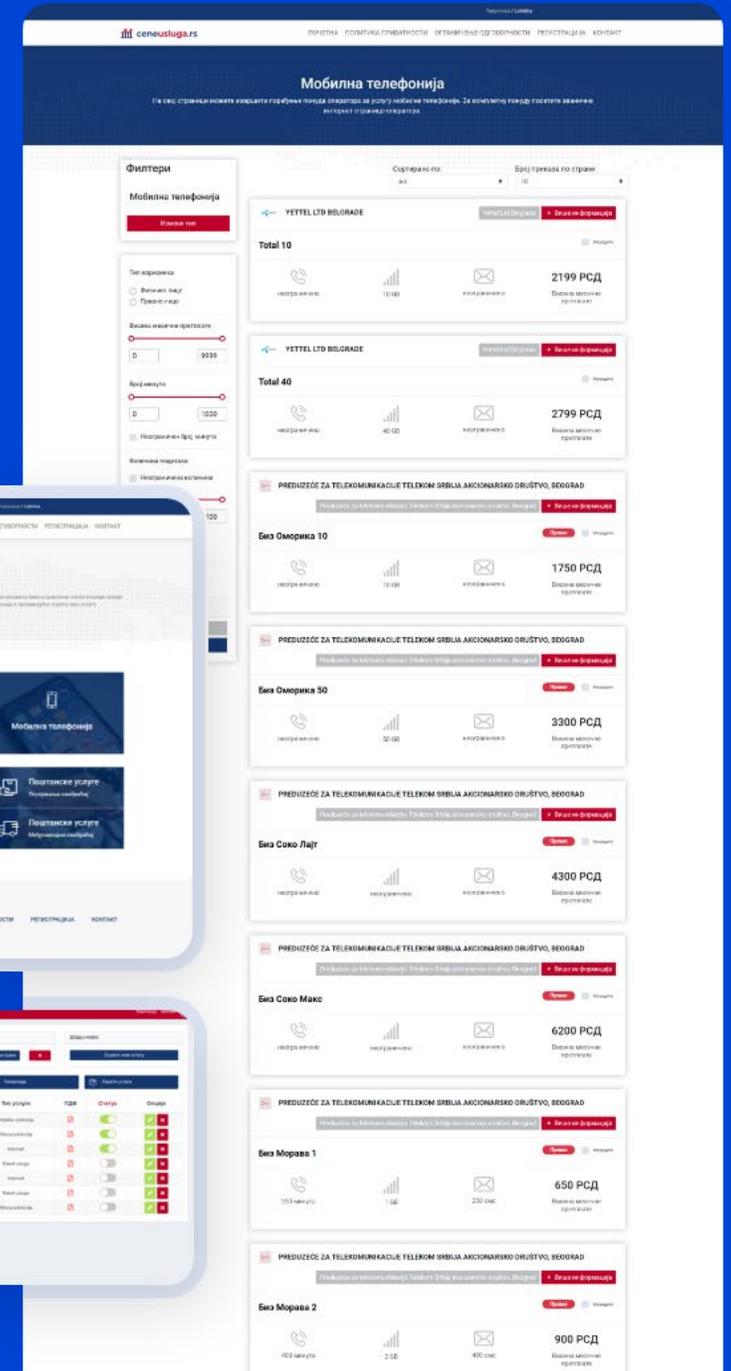

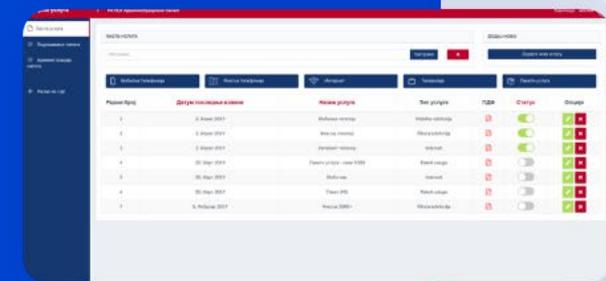

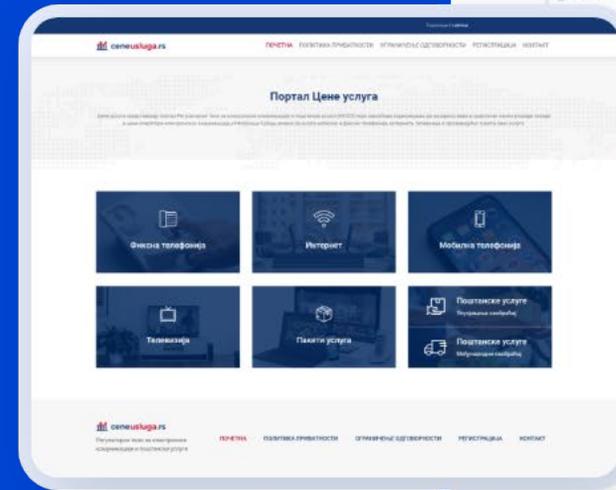

RATEL Cene Usluga

Cene usluga is an official portal developed for the Regulatory Agency for Electronic Communications and Postal Services (RATEL). It provides a **streamlined platform for users in Serbia to effortlessly compare the offers and prices of various electronic communications operators.**

Covering mobile and fixed telephony, internet, television, and bundled packages, the portal ensures transparency and empowers consumers to make informed decisions based on the latest market data.

Operators can actively update their portfolios and offers to stay competitive, allowing users to view and compare the most current options available.

National CERT

National CERT is the National Center for Security Risks Prevention in ICT systems across the Republic of Serbia, established as part of the Regulatory Authority for Electronic Communications and Postal Services (RATEL).

Its primary duties include the coordination of prevention and protection against security risks at a national level. The platform, developed for RATEL, is a custom management system that handles website content and incident control submissions.

Engineered to meet stringent security requirements, it ensures robust resistance to penetration testing and fully adheres to OWASP Top 10 standards, prioritizing secure operations to safeguard sensitive data and national ICT infrastructure.

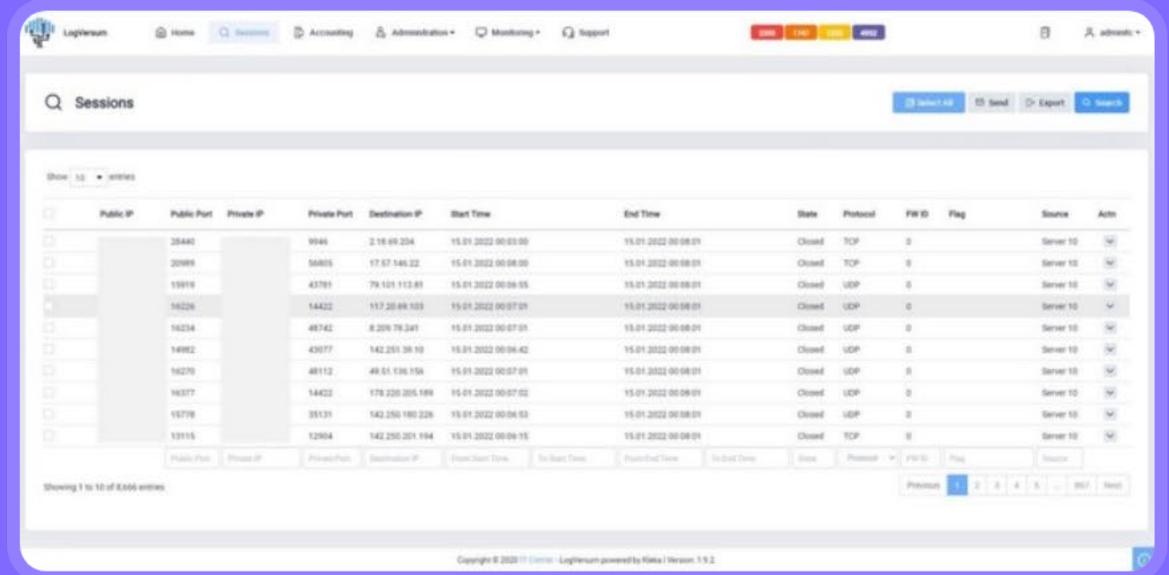

Kleka telecommunication software

Software for fast processing, review, storage and analysis of logs from the firewall and pairing them with user data from the RADIUS database that contains information about the MSISDN number and private IP address of the user.

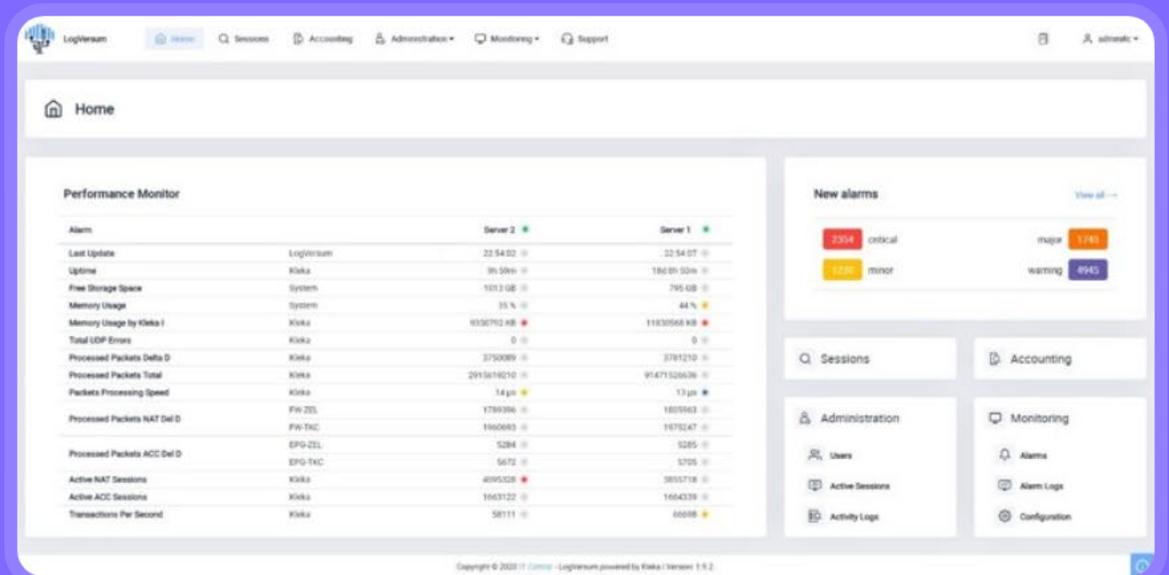

The amount of traffic that sources emit at speeds up to 300 GB / h and 1 GB / h. The projected amount of traffic is close to 5 million events per minute.

The software displays data for a maximum of 20 seconds from the time of query for open and closed pdp sessions and correlates real-time messages from Firewall and Radius servers with a delay of less than 1 second to third systems.

The screenshot shows the 'Sessions' page in the LogViewman interface. It features a table with columns for Public IP, Private IP, Private Port, Destination IP, Start Time, End Time, State, Protocol, FW ID, Flag, Source, and Action. The table contains 10 rows of session data. Below the table, there are filters for Public Port, Private IP, Private Port, Destination IP, Start Time, End Time, State, Protocol, FW ID, and Flag. A pagination bar at the bottom indicates 'Showing 1 to 10 of 8466 entries'.

Hotel CMS

Ferienhütten Tirol, a specialized hut rental website, is built on our robust in-house Content Management System, ITCMS, utilizing both the core and hotel modules for an optimized user experience. Designed for the hospitality sector, ITCMS equips the website with essential tools for room management, equipment configurations, and image galleries.

One unique feature is the **Season Configurator**, which enables seasonal image changes based on specific dates, automatically updating visuals to match the time of year. This functionality, along with comprehensive room and amenity settings, provides guests with an immersive, dynamic experience that brings the mountain charm of Ferienhütten Tirol to life.

MOBILE DEVELOPMENT

HuBike

The HuBike mobile app is designed to help bicycle owners **securely park their bicycles**, manage parking spots, and receive security notifications, ensuring optimal safety and convenience.

Showcase

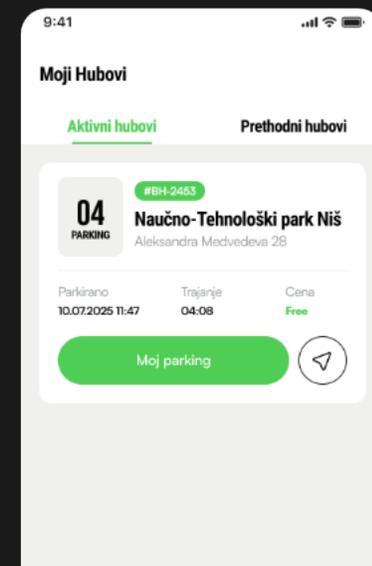

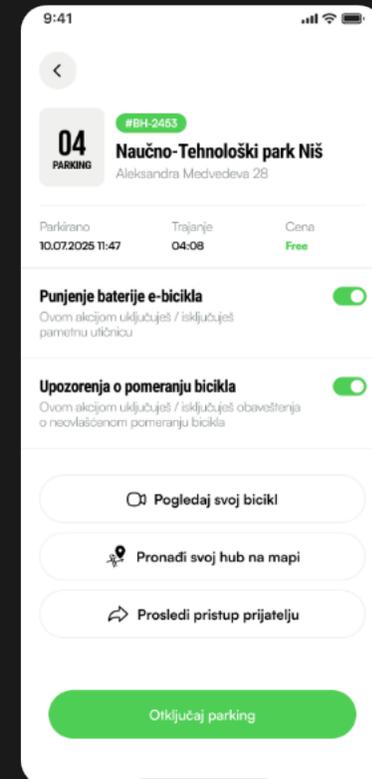

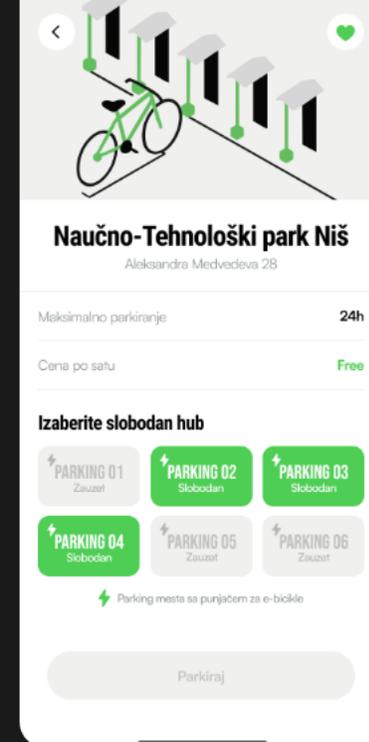

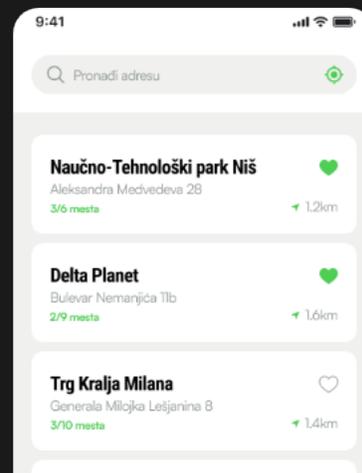

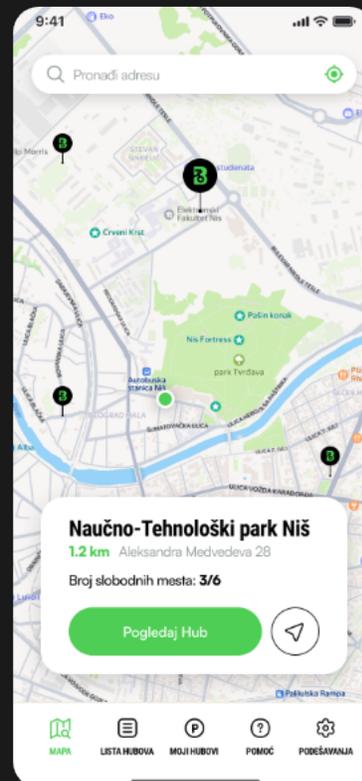

Parking Management: Find available hubs and parking spots, and initiate the locking/unlocking process.

Live Monitoring: View the status of parking spots (free, occupied) and receive notifications about unauthorized bicycle movement.

Smart Charging: Activate or deactivate the smart power outlet for charging electric bicycles when parked.

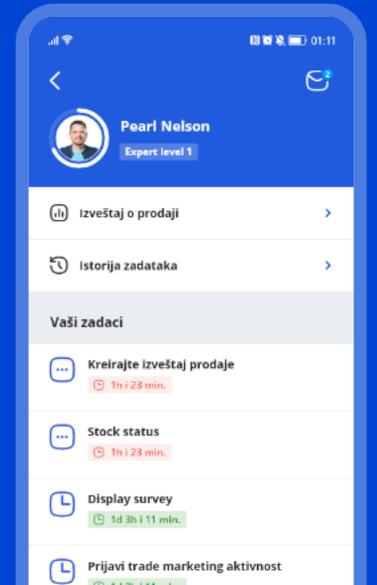

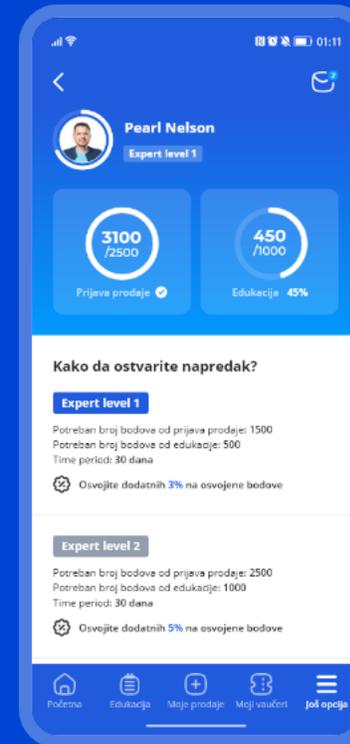

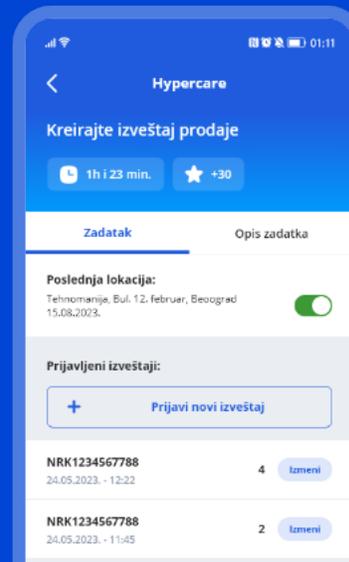

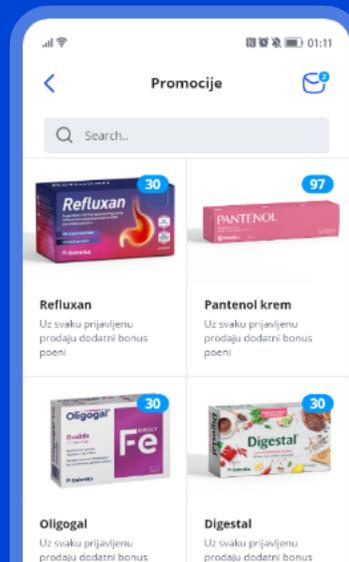

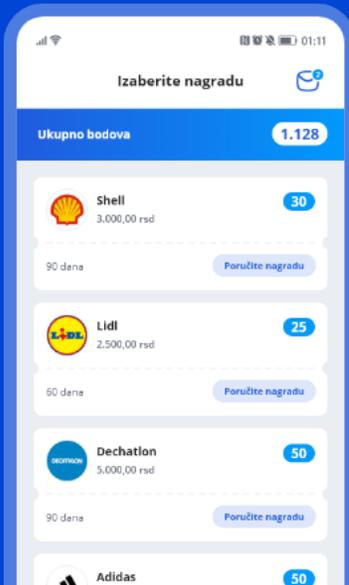

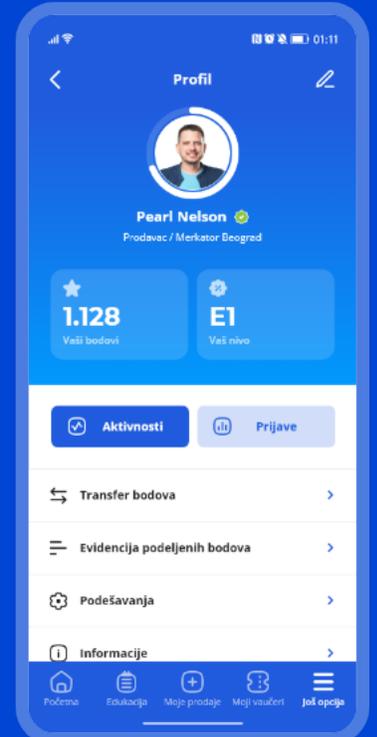

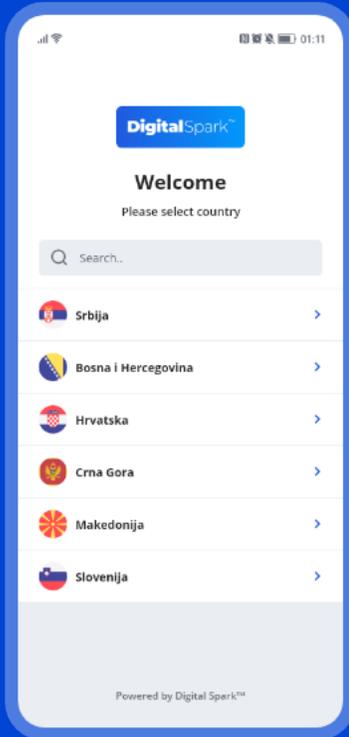

Share Access: Temporarily share access to a parking spot with another user via a code.

Notification Control: Deactivate security notifications for a specified period.

Digital Spark

Customizable incentive-based reward tool designed to boost sales and motivate retail teams. Trusted by over 20 multinational corporations in eight Southeast European countries, it supports more than 75,000 daily B2B users.

ProOxy

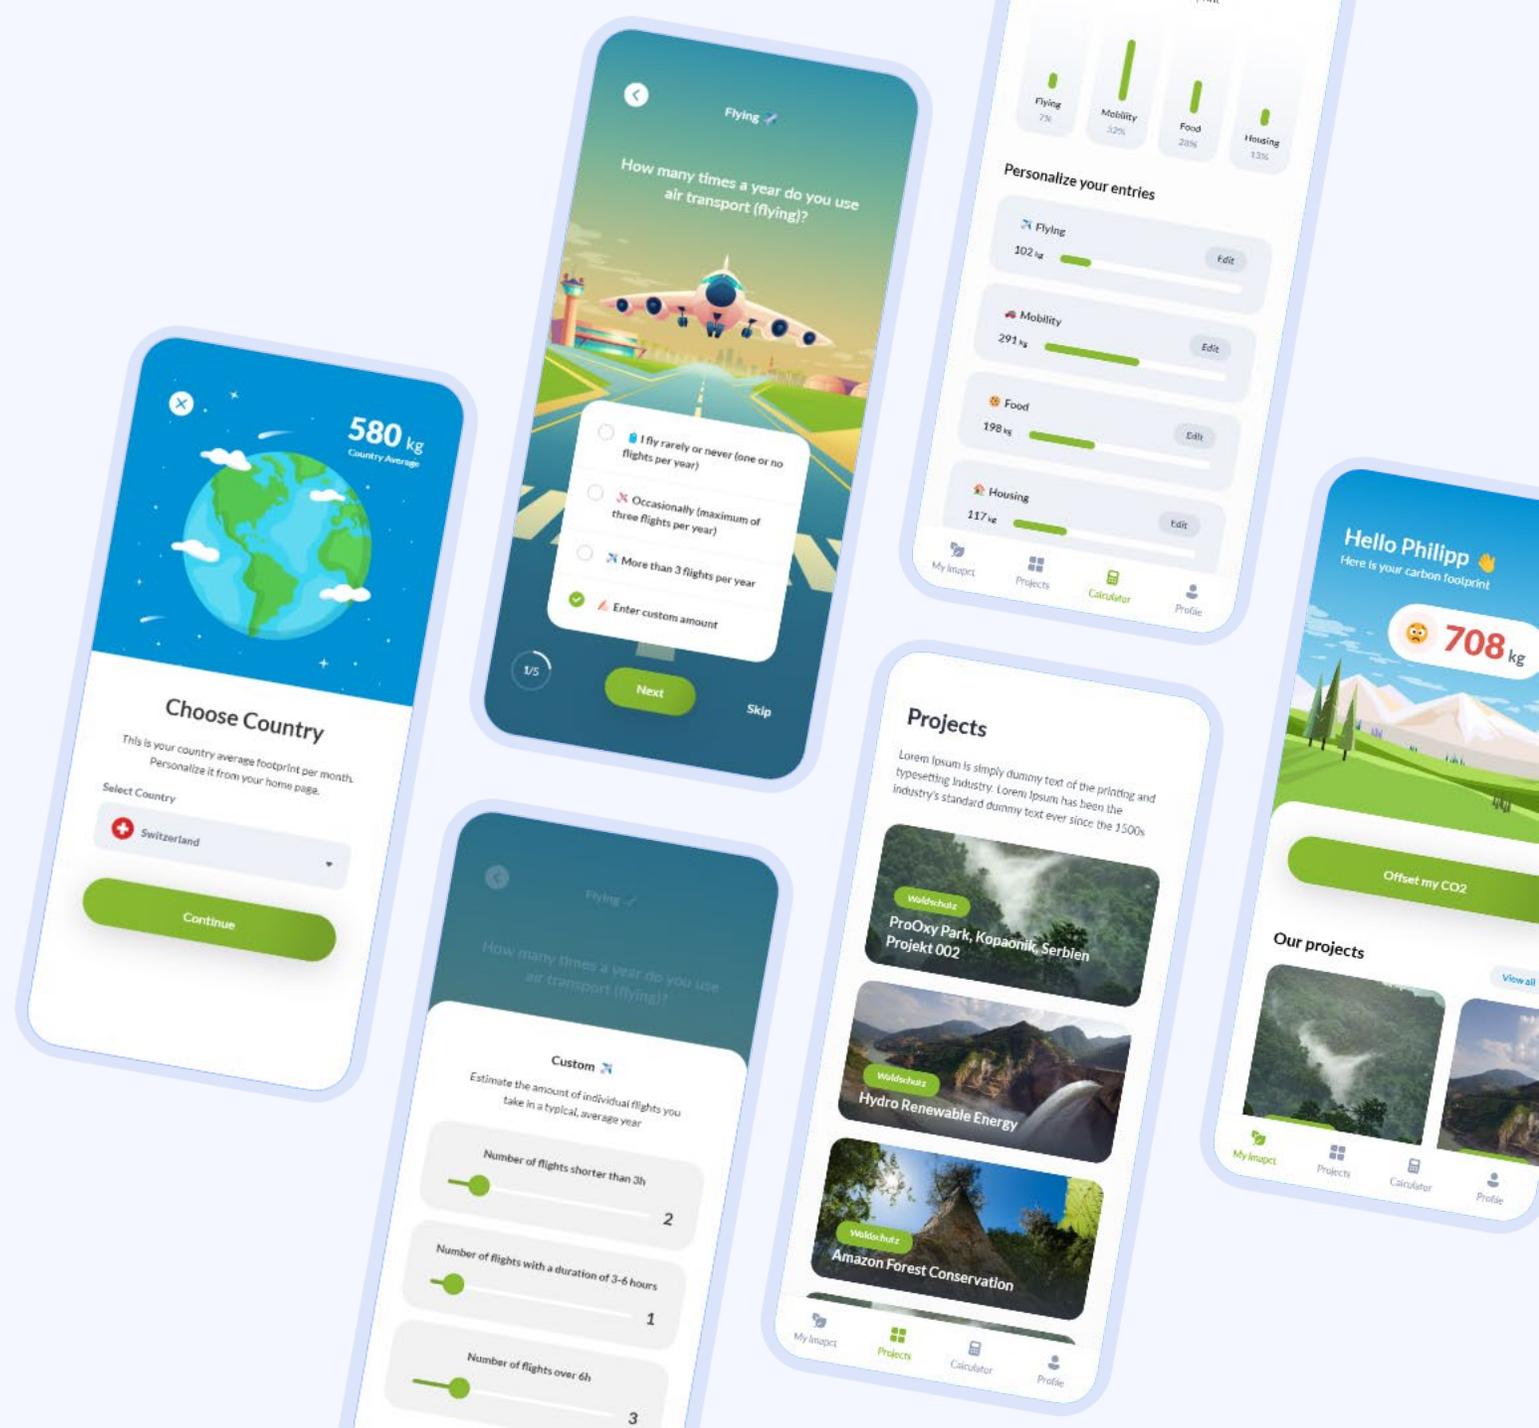

The ProOxy mobile app features a **dynamic CO2 emissions calculator** designed as a questionnaire with top-notch animations. It allows users to offset their emissions through mobile payments.

Showcase

CO2 Emissions Calculator: Engaging questionnaire with advanced animations.

Mobile Payments: Easy offsetting of CO2 emissions via PayPal and Payrexx.

User Engagement: Intuitive design for a seamless user experience.

Koshko

Developed to **enhance the basketball experience** for players and fans, the Koshko app offers features for performance tracking, tournament management, and social interaction.

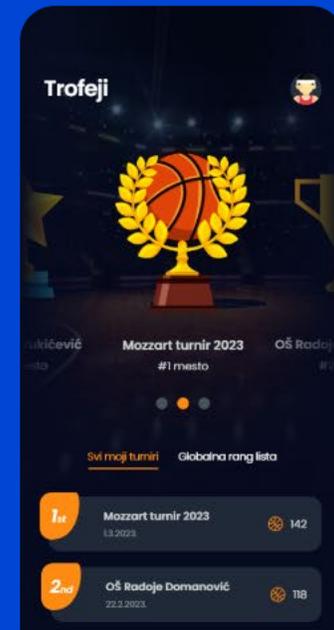

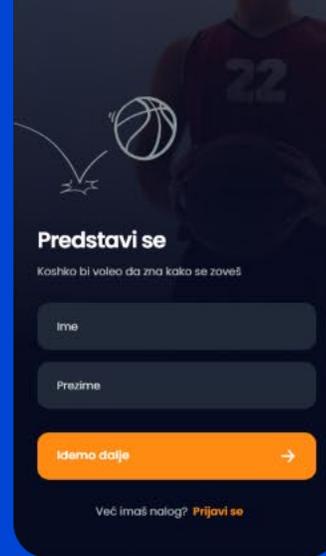

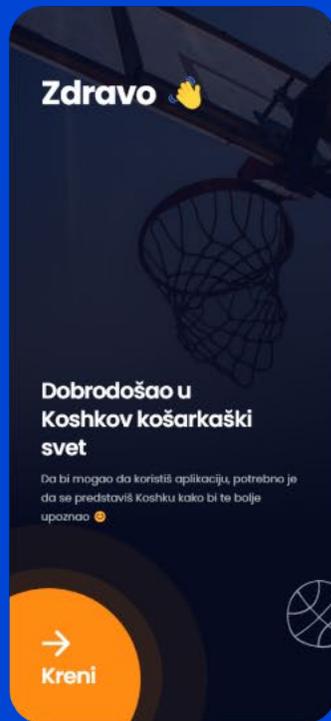

Showcase

Performance Tracking: Enables monitoring and analysis of individual performance over time.

Tournament Management: Facilitates organizing and participating in basketball tournaments.

Social Interaction: Connects players, supports team joining, and achievement sharing.

Engaging Interface: Provides a user-friendly design with interactive elements for a comprehensive basketball experience.

WiFeed

The WiFeed mobile app is designed to help pet owners **manage and automate feeding schedules** for their pets, ensuring optimal nutrition and convenience.

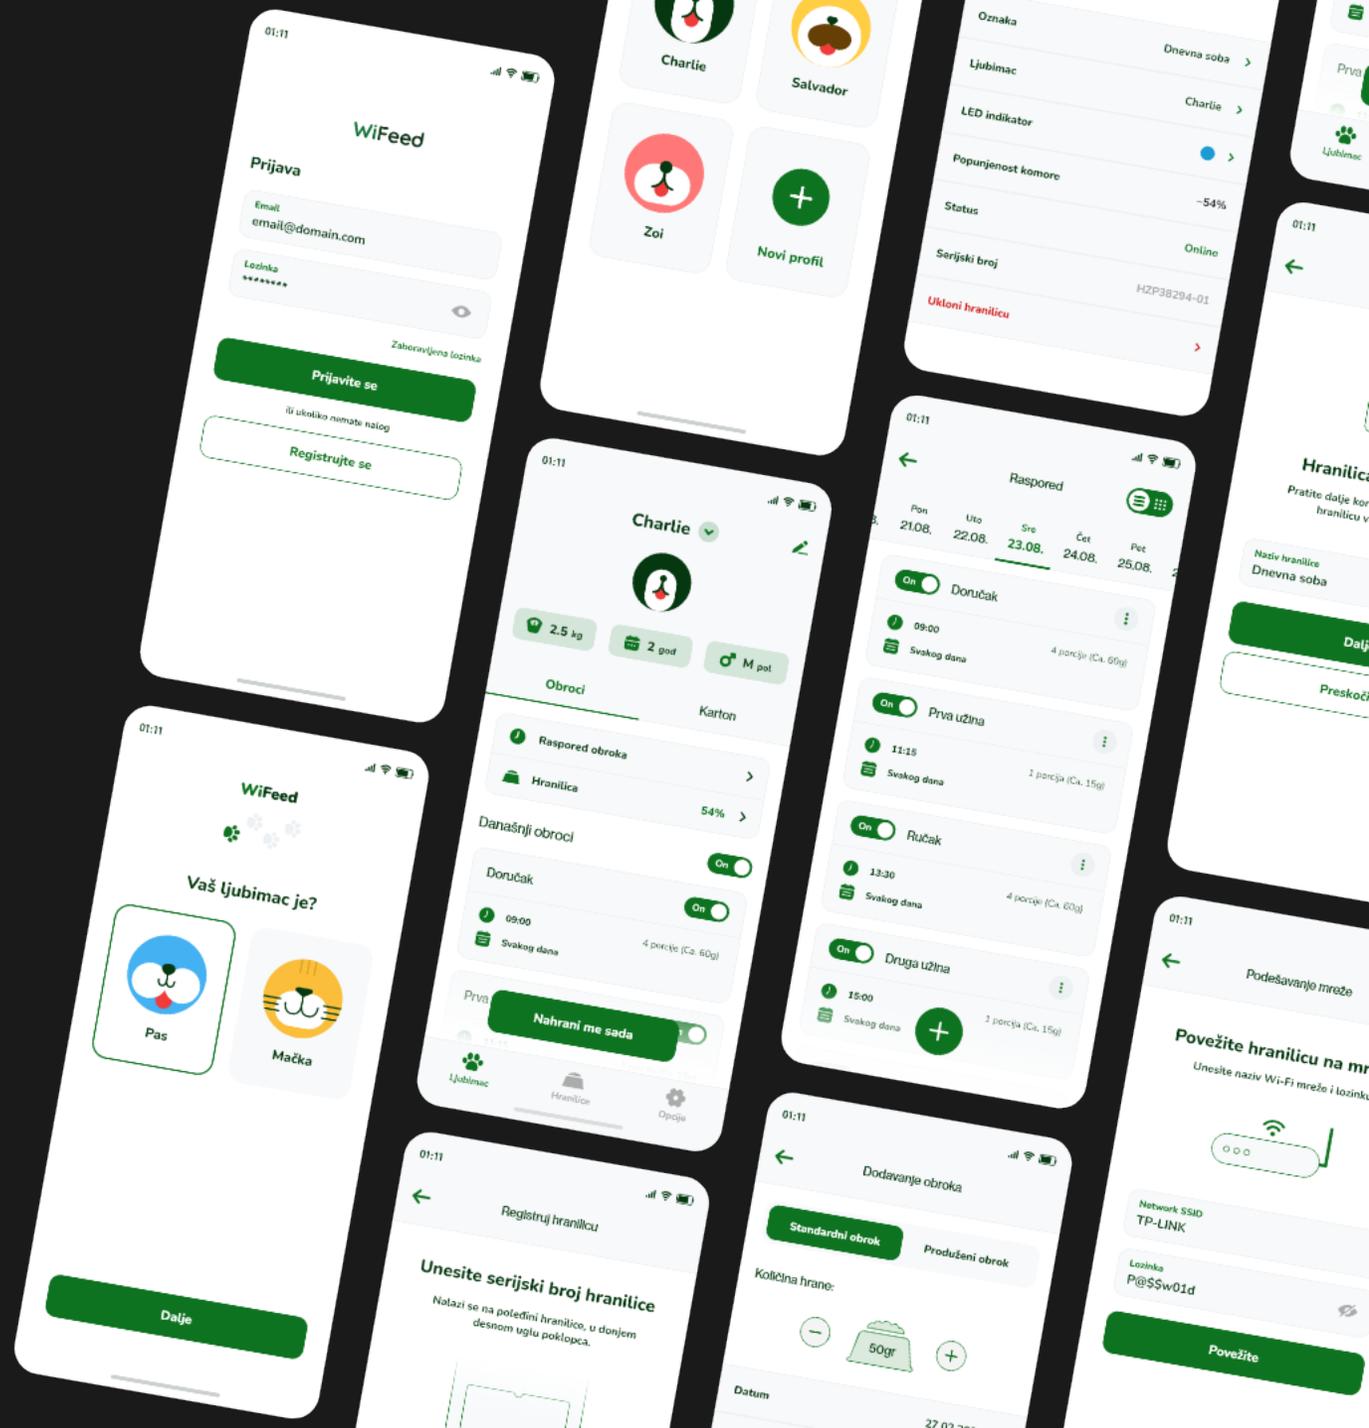

Showcase

Automated Feeding: Schedule and automate meal times with precise portion control.

Live Monitoring: Monitor the status of feeders, including food levels and device connectivity.

Manual Feeding: Option to manually trigger feedings from the app.

Setup and Connectivity: Easy setup and connectivity with WiFeed devices using Wi-Fi.

IPS

The IPS app is an internal tool designed for plastic surgery clinics to **manage client information, track treatments, and organize services efficiently.**

Showcase

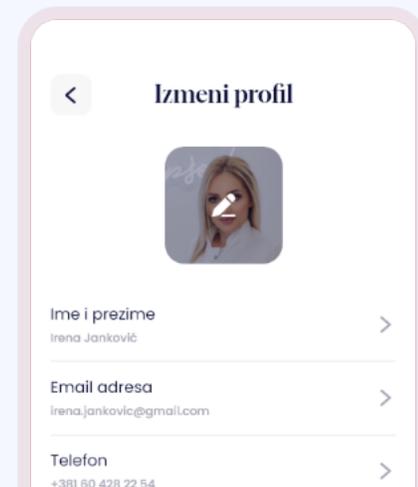

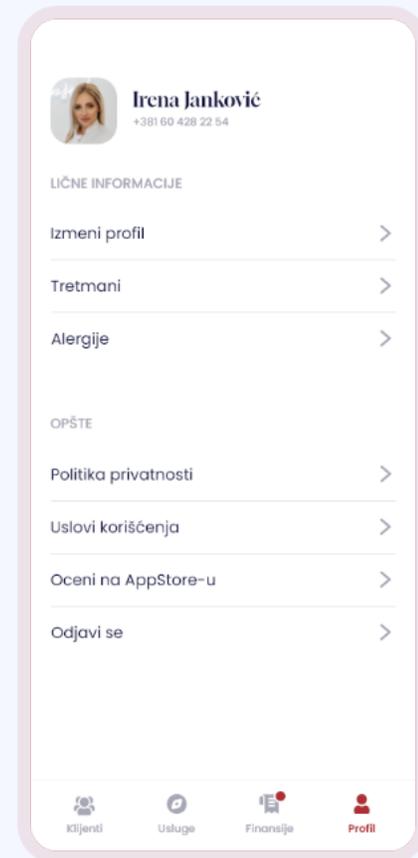

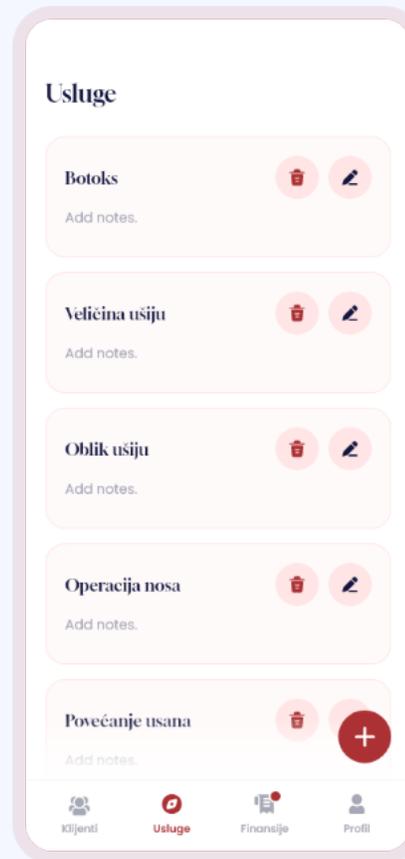

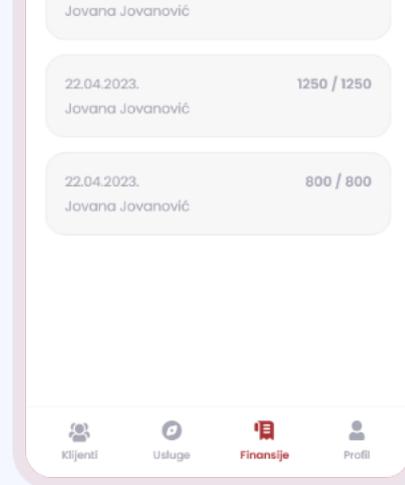

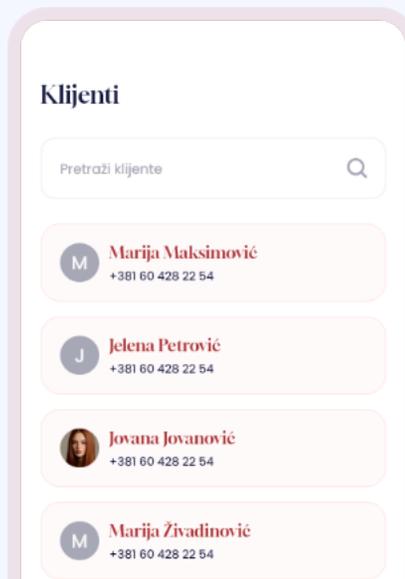

Client Management: Easily search and view client profiles with contact details.

Service Tracking: Document and manage various treatments like Botox, nose operations, and lip augmentations.

Profile Management: Update personal profiles, treatment history, and notes.

Loyalty Program: Offers a loyalty program for customers, enhancing retention and rewarding frequent users of plastic surgery services.

Finance Management: Keep track of financial transactions and treatment costs.

IROAS

A sophisticated platform with a dedicated web app, mobile app, and custom-built CMS. It offers **immersive journey experiences through curated stories**, interactive maps, and multimedia content, showcasing our ability to deliver engaging, multi-device user experiences efficiently. It showcases the capability to develop focused lifestyle applications with specific user needs.

Showcase

Transformation Tool: Implements the Aligned Power System (S.P.A.) for personal growth.

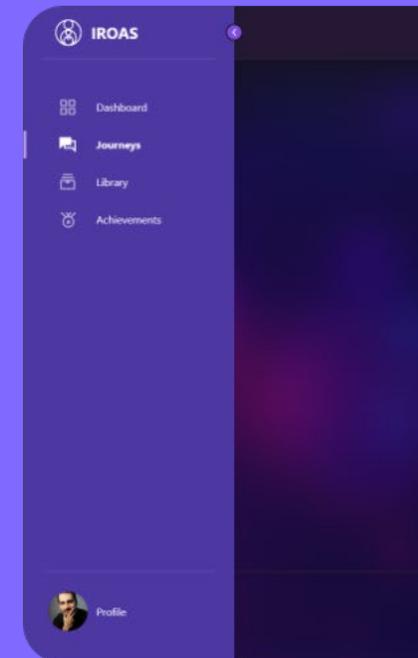

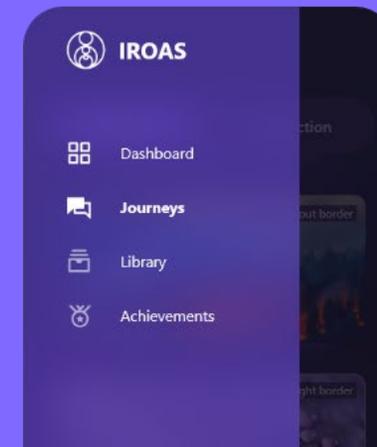

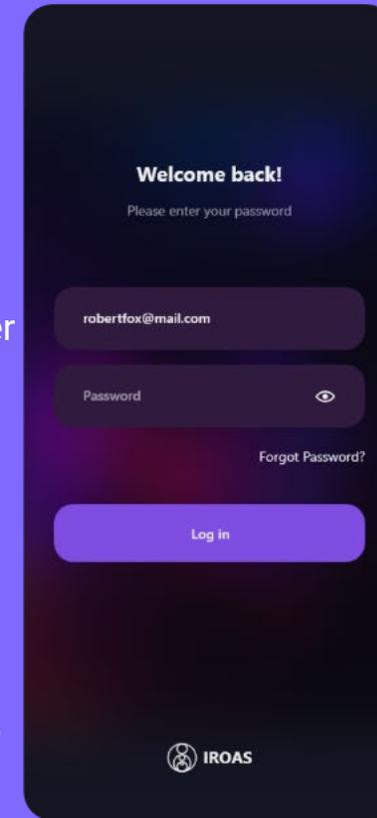

Multilingual Support: Available in English and Spanish.

Curated Journeys: Users can explore different projects with guided journeys that include stories, activities, and insights.

User Profiles: Allows users to create and manage their profiles for a personalized experience.

Multimedia Content: Integrates videos, images, and audio to enrich the journey experience.

User Engagement: Options for users to share their experiences and feedback.

PerfectLine

Companion mobile app for gym members, providing **full access** to their profiles and activities.

Key Components

Digital Membership Card: Barcode for instant check-in.

Activity Stats: Daily and weekly visit analytics.
