# About Us

Marjan Factory Company is a member of Hussam Y. Al Muhaidib Group, the great name in the industry which was inherited by generations in the field of tank manufacturing (fiberglass-polyethylene), which we have been manufacturing for more than 25 years. We are proud of being a leading Saudi national company in our industry.

We have a specialized staff of engineers, production managers, and professionals working passionately to provide high-quality products using innovative and sustainable technologies integrated with water solution systems.

Marjan Factory has State of The Art equipment, machines, and material used in manufacturing our products with clear understanding of our clients' needs. We provide our service to our customers through our country wide spread branch network and approved resellers.

**Muhaidib**

## **Chairman's Note...**

**Hussam Yousef Al Muhaidib**

Our new vision for the work of the Marjan Factory Company has been launched to align with the Kingdom's 2030 vision, and this is reflected in our mission to provide integrated solutions for water management in the domestic and commercial sectors. We are at Marjan Factory Company, embracing the national energies of Saudi youth in all work departments to raise the level of our products and services that we provide to our customers.

---

## Mission

We strive to be the trusted company in providing quality products and services integrated with world renowned brands from water tanks, pipes, pumps, purifiers, heaters and water service equipment supported with modern marketing tools and digital media, and after sales service.

## Vision

To be the leading water tank manufacturing company in providing total water management solutions to the Saudi market.

# Fiberglass Tanks

## Types :

- 1- Horizontal tanks (above and below ground)
- 2- Vertical tanks

## Uses :

- 1- Water storage
- 2- Septic storage
- 3- Fuel storage
- 4- Chemicals storage

## Specifications and Features :

- 25-year guarantee .
- Customized manufacturing and size for vertical and horizontal tanks above and underground .
- The sizes of a one-piece tank can contain up to 200 thousand liters, which provides engineering durability .
- Resistant to algae and bacteria, and doesn't need insulation internally .
- The ability, endurance, and resistance to withstand difficult situations and weather conditions .
- The ability to customize and add wanted accessories, such as ladders, vents, and covers .
- Used to store freshwater, septic, fuel, and complex chemicals .
- Maintenance ease as it contains a maintenance vent, which doesn't require moving the tank out of the installation area.

## Polyethylene Tanks

### Types :

- 1- Horizontal tanks
- 2- Vertical tanks

### Manufacturing Process :

Manufacturing machines : Marjan Factory Company is distinguished by owning state of the art machines for manufacturing tanks with the highest standards of quality in all stages of manufacturing, using the latest devices, equipment, and the best approved raw material.

### Manufacturing material :

The manufacturing material is polyethylene supplied from SABIC (Saudi Arabia), accredited in water tanks manufacturing from Saudi Standards, Metrology and Quality Organization SASO, and the European Food and Drug Administration

### Specifications and Features :

- 4 layer tanks 10 years guarantee .
- 100% Saudi tank with European specifications .
- Tight and sturdy cover .
- Internally smooth which fixes splices and prevents leakage .
- Sun and UV rays resistant .
- Light-weight, resilient, and has a tight cover that doesn't allow the entrance of dust, dirt, and insects .
- Available in horizontal and vertical circular shapes, in all sizes and colors .

## Pumps

Murjan Al Muhaidib Factory Company is partnering with the most important international brands specialized in the manufacture of pumps.

It was established in 1945 in Denmark and has factories in Europe. Brand availability Grundfos water pumps are of unparalleled quality in efficiency and reliability.

It is an Italian manufacturer of pumps and submersibles company, and its main office is in Italy (Sistema trademark is one of the most important trademarks in the market of pumps in the world and it has more than 30 years of experience. The company works in electric water pumps sector in more than 100 countries)

One of the largest pumps and submersible factories in China, founded in 1990 Dedicated to the sale of pumps , submersibles , air compressors and the work of water systems.

Chinese water pumps and submersibles (Seiko brand specializing in selling) High quality pumps and submersibles.

## Scala 1 Booster Pump

It is one of the most important products of the global Grundfos company Our company is the exclusive agent for this pump.

### Specifications and Features :

- Intelligent design, remote operation and detachment can be controlled .
- Protection against running dry and leakage, ideal water pressure .
- Long life span, gives water volume up to 7 m<sup>3</sup>/h and pressure up to 56 m .
- Very low sound similar to the sound of a modern dishwasher, small in size and easy to install .

## Water Filter

Marjan Factory Company deals with the most important brands in the field of gas stations Household water purification, which is Taiwanese aquaker, and several are available models.

**Big Blue Filter**

**AQ102 - 6 satge Water filiter**

## Central Heaters (Richmond)

### Types :

- 1- Central water heater with a capacity of (50 - gallons)
- 2- Central water heater with a capacity of (80-gallon)
- 3- Central water heater with a capacity of (120-gallon)

### Efficiency :

High energy-saving factor

Tank insulation is designed with a high capacity to reduce heat wastage and saves energy.

High-capacity heater plugs are made of the best material for rapid heating and (Incoloy) to extend the life of the heater

### Specifications and Features :

- Non-perishable or broken brass drain valve.
- Heater's Compliance with LEED international standards to preserve the environment.
- Heater's Compliance with Saudi and international safety and quality specifications.
- It prevents the formation of deposits resulting from poor viewing quality that affects viewing negatively affects the efficiency and performance of the heater.

## Instant Heaters (JNOD)

The technology of smart instant heaters is the best solution to provide you with hot water while saving energy and water at the same time. No need to waste water waiting for the hot water to arrive from the heater or to continue consuming electricity for continuous heating.

### Types :

- 1- Instant heater model FA55 (5.5 – kilowatts)
- 2- Instant heater model FA70 (7 – kilowatts)

### Specifications and Features :

- Unlimited hot water instant heating on demand.
- Saves energy due to heating water on demand only.
- Heating is controlled by a microcomputer.
- Water is separated from electricity through multiple layers of composite nano-insulating material.
- Protection from high temperatures through the smart sensors in the device.
- Easy to be installed and does not require more space in the bathroom or kitchen.

## German Poly Melt Tubes POLYMELT

Since 1956, the Polo Plast factory was established in Germany to manufacture pipes and fittings with a modern and innovative technology. Production of high-quality pipes and fittings complying with the standard specifications.

The factory produces pipe to a size of about 250 mm.

### Specifications and Features :

Healthy, non-toxic and light-resistant.  
Resistant to corrosion and rust, making it safe inside walls: specifications and features. Easy to install and reliable to weld.  
It looks beautiful when installed outside the walls.  
High temperature resistant.

## Heat Pipes

## Vesbo Pipes VESBO

A leading brand in manufacture of PPR heat pipes since 1992. Vesbo produces pipes and fittings of various sizes.

### Specifications and Features :

- Healthy, non-toxic and light-resistant .
- Resistant to corrosion and rust, making it safe inside walls: specifications and features. Easy to install and reliable to weld .
- looks beautiful when installed outside the walls .
- High temperature resistant .

## Food Waste Disposer

Marjan Al Muhaidib Co. is the agent for American household food waste shredders. It is considered one of the largest factories in the world since 1938. It is a modern and powerful technology that grinds food waste into small particles in a way that is hygienic and without unpleasant odors in the kitchen and is installed under the kitchen sink.

### Model - D100

This model features two-stage grinding technology so it can grind almost any food waste in addition to a low noise level as well.

### Model - D200

This model is very high performance in addition to a quiet sound during operation, it has three grinding levels that make you choose the appropriate degree for the type of waste.

### Model - D56

This model features daily food waste handling with one-stage grinding technology, and it is considered one of the best medium-performance devices that you can own.

### Model - D66

This model features single-stage stainless steel grinding elements and is standard for use in small kitchens.

# Manhole Covers

It is part of the integrated water solutions provided by Mourjan Factory Company of manhole covers with strong, solid, and safe products and in several sizes that fit all requirements.

## Specifications and features :

- Ultra durability .
- Safe from sliding risk .
- Prevents bad odors .
- Multiple colors and sizes .
- Isothermal and anti-ultraviolet .
- Anti-theft because there is no recycle value .

## Mourjan Electric Floater

It is Part of the integrated water solutions provided by Mourjan Factory Company with a safe Plastic frame and electrically insulated.

## Specifications and features :

- Plastic frame .
- Precise water level control .
- Heavy in order to control .
- Electric floater with an electric wire is 5 meters long .
- The operating mode is up or down, according to the electric connection method .
