* For purposes of "gain-share" distributions to local governments under 2007 law, rather than verification of a statutory hiring requirement, of there is none.

† For latest property tax year ending on prior June 30; 15-year exemption is on project property in excess of taxable portion, which begins at \$25, \$50 or \$100 million and rises 3% per year; taxes paid are on taxable portion and possibly other associated property. Foregone taxes are adjusted using standard factor for the approximately one-sixth that is shifted to other taxpayers under local levies, as well as reduced by special payments that consist of the statutory community service fee and locally negotiated amounts.

‡ Newly created and retained jobs (full-time equivalent—2,080 hours/year) associated directly with project, as of previous calendar year, excluding (indirect) jobs with or for construction, vendors, suppliers, tangential company operations, or even on-site contractors, other than a general project operator. State tax revenues based on wage data and latest average tax rates by income level from Department of Revenue statistics; does **not** include revenue associated with indirect employment or any induced/multiplier effect of employee spending.
